

Southwest IDEAS Conference

November 16, 2022

James Siccardi, *VP Investor Relations*

FORWARD-LOOKING STATEMENT

This presentation contains forward-looking statements within the “Safe Harbor” provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements in this report include, but are not limited to, statements about our expectations, objectives, anticipations, plans, hopes, beliefs, intentions, or strategies regarding the future. Forward-looking statements that represent our current expectations about future events are based on assumptions and involve risks and uncertainties. If the risks or uncertainties occur or the assumptions prove incorrect, then our results may differ materially from those set forth or implied by the forward-looking statements. Our forward-looking statements are not guarantees of future performance or events. Words such as “expects,” “anticipates,” “believes,” “estimates,” variations of such words, and similar expressions are also intended to identify such forward-looking statements.

These forward-looking statements are subject to risks, uncertainties, and assumptions that are difficult to predict; therefore, actual results may differ materially and adversely from those expressed in any forward-looking statements. You should not place undue reliance on these forward-looking statements, which reflect management’s opinions only as of the date of this presentation. All forward-looking statements included in this presentation are subject to certain risks and uncertainties, which could cause actual results to differ materially from those projected in the forward-looking statements, as disclosed from time to time in our reports on Forms 10-K, 10-Q, and 8-K as well as in our Annual Reports to Stockholders and, if necessary, updated in our quarterly reports on Form 10 Q or in other filings. We assume no obligation to update any such forward-looking statements. It is important to note that our actual results could differ materially from the results set forth or implied by our forward-looking statements.

LEVERAGING THE PX TECHNOLOGY PLATFORM

Our solutions reduce waste and energy consumption

We revolutionized seawater reverse osmosis (SWRO) desalination, reducing energy costs by up to 60%*

We are expanding our pressure exchanger technology to handle commercial applications in other industries

We seek to achieve long-term sustainable growth by accelerating the environmental sustainability of our customers' operations

**Energy Recovery estimate*

ONGOING STRONG FUNDAMENTALS

Rapid Growth

Cash & Securities and **NO DEBT**

TARGETING 25% – 40% AVERAGE REVENUE GROWTH

Note: These revenue growth range goals, long-term vision and similar statements illustrate possible outcomes of our different segment strategies. These growth illustrations should not be treated as forecasts, projections or financial guidance. We cannot assure that we will be able to accomplish these goals, metrics or opportunities in the future, all of which are subject to significant risks and uncertainties as set forth under Risk Factors in our Annual Report on Form 10-K.

THE PX IS ENERGY RECOVERY'S CORE TECHNOLOGY

Anatomy of a Pressure Exchanger

Transfers energy from high-pressure to low-pressure fluids (both liquids and gas) through continuously rotating ducts with only one moving part (the rotor)

- Best-in-class energy recovery application
- Unmatched low life-cycle costs
- Pressure exchanger technology works as a platform to build product applications
- The technology is versatile and can handle liquid, gas, and a range of pressures
- Benefits include lower lifecycle cost and energy use in industrial fluid-flow systems

Pressure Exchanger Technology Operating Range

Pressure Exchanger can handle liquid, gas, liquid with suspended solids and supercritical fluids

Excels in a Wide-Range of Pressure Applications

This versatile technology acts as a fluid piston, efficiently transferring energy between high- and low-pressure fluids and gases through continuously rotating ducts

INDUSTRIES BENEFITING FROM PX TECHNOLOGY

Water Desalination

Industrial Wastewater Treatment

CO₂ Refrigeration

SWRO AND INDUSTRIAL WASTEWATER TREATMENT

OUR PX PLATFORM HAS COME TO DOMINATE LARGE SCALE SWRO DESALINATION

Cumulative Won Mega Project¹

Technology Strength = High Margin

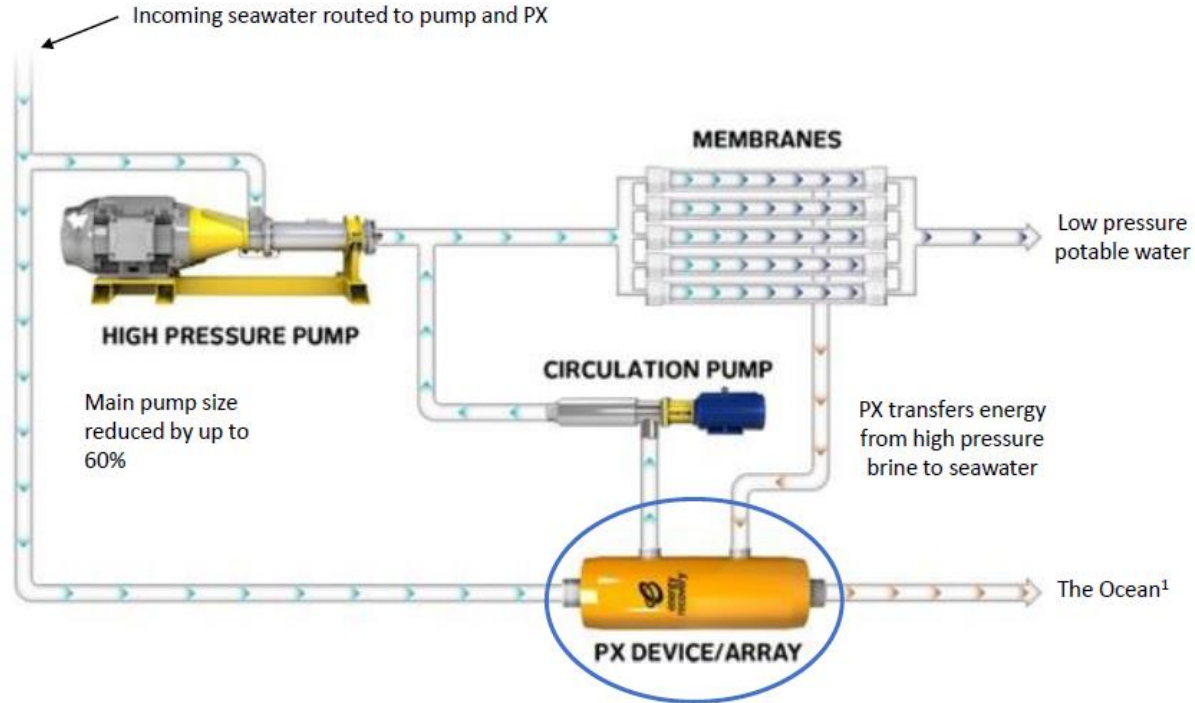

69% ERII Gross Margin²

25% Russell 2000 Industrials

Our Pressure Exchanger is designed for a 25-year life, needs no maintenance, and has up to 98% efficiency – an unrivaled quality that translates into high profitability

¹Mega Projects produce 50,000 cubic meters or more of water per day; ²2022 YTD Reported Gross Margin

PX IN ACTION: SWRO

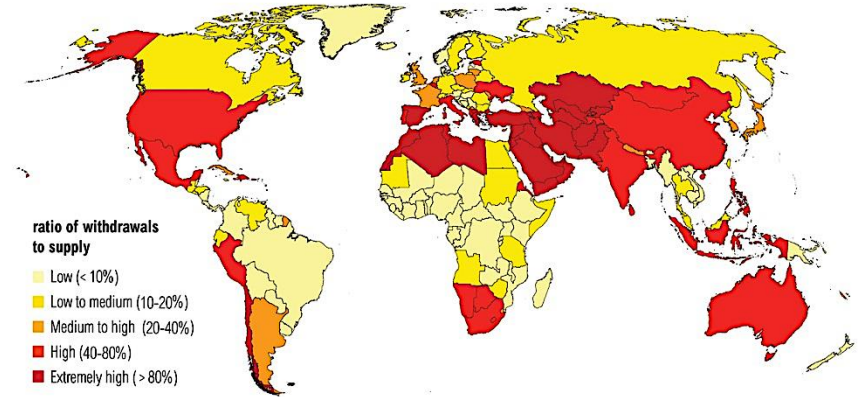

PX lowers energy consumption by up to 60%

WORLD-WIDE DEMAND FOR FRESH WATER CONTINUES TO OUTSTRIP SUPPLY

The United Nations estimates a 40% gap in freshwater supplies by 2030 – equivalent to 75% of the Mediterranean Sea

Water Stress by Country: 2040

NOTE: Projections are based on a business-as-usual scenario using SSP2 and RCP8.5.

Desalination

Addressable Market

- Targeting sales of ~\$200M by 2026¹
- 10-20% projected avg. annual market growth through 2030¹

Market Drivers

- Freshwater scarcity/declining resources
- Water-stressed regions
- Rising population
- Abundance of seawater

Geopolitical Drivers

- Countries turning to SWRO to bridge gap
- 2B+ lack access to clean drinking water
- Trans-boundary water-supply issues

Industrial Wastewater

Addressable Market

- ~\$1B with potential to triple by 2030²
- Dependent on regulation to realize full TAM

Market Drivers

- Freshwater scarcity/declining resources
- Rising focus on water quality
- Industrialization and urbanization

Geopolitical Drivers

- Countries beginning to require reuse standards
- U.N. goal to triple amount of treated wastewater globally by 2030

¹These revenue growth range goals, long-term vision and similar statements illustrate possible outcomes of our different segment strategies. These growth illustrations should not be treated as forecasts, projections or financial guidance. We cannot assure that we will be able to accomplish these goals, metrics or opportunities in the future, all of which are subject to significant risks and uncertainties as set forth under Risk Factors in our Annual Report on Form 10-K; ²Energy Recovery projections and estimates based on currently available information. Actual results and figures may differ.

INITIAL INDUSTRIAL WASTEWATER APPLICATIONS

INDUSTRIAL WASTEWATER APPLIED TO LITHIUM MARKET

DISRUPTING THE GLOBAL REFRIGERATION INDUSTRY

~\$1B Annual Potential
TAM for ERI by 2030*

**Energy Recovery projections and estimates based on currently available information. Actual results and figures may differ.*

TRANSITIONING FROM HARMFUL HFCS TO NATURAL CO₂ REFRIGERANTS

- HFCs are up to **13,000x** worse for the environment than natural refrigerants such as CO₂¹
- Developed countries have agreed to reduce HFC usage by **85% by 2036**

HFC Phase-down Timeline: EU & US

CO₂ Installations: EU & US

¹Based on IPCC data: <https://unfccc.int/process/transparency-and-reporting/greenhouse-gas-data/greenhouse-gas-data-unfccc/global-warming-potentials>

ERII'S PX TECHNOLOGY – EASING THE TRANSITION TO CO₂ REFRIGERATION

**November
2021**

Signed first contract for delivery in 2022

1H 2022

Signed joint development agreements to design PX G-centric CO₂ system

July 2022

First PX G commissioned in a southern European supermarket

October 2022

Second PX G commissioned at Vallarta in California

UNIQUE VALUE PROPOSITION

Energy Recovery's Sustainable Growth Rests on Three Strategic Pillars

Pillar 1

Leadership in SWRO

Protect position in SWRO
by improving products and
operations in a fast-growing market

Serves as the foundation of
Energy Recovery's growth strategy

Pillar 2

Innovation in New Industries

Drive high margin growth by
capitalizing on commercial
opportunities in new and tangential
industries

Diversify from desalination and
accelerate growth while
de-risking revenue

Pillar 3

ESG Integration

**Accelerate environmental
sustainability** for customers via
reduced energy consumption

Practice long-term discipline
to manage E, S, and G risk while
maximizing opportunities related
to sustainable product aspirations

LEADING ESG PERFORMANCE

\$3.9B saved for customers on energy expenses annually¹

14.5M metric tons emissions avoided due to PXs – nearly 3M vehicles removed from the road annually¹

98%+ product revenue from energy-efficiency related sources

30TWh saved in electricity consumption¹
