DIEBOLD, INCORPORATED AND SUBSIDIARIES
FORM 10-Q as of June 30, 2016
Notes to Condensed Consolidated Financial Statements
(unaudited)
(in millions, except per share amounts)

Note 1: Consolidated Financial Statements

The accompanying unaudited condensed consolidated financial statements of Diebold, Incorporated and its subsidiaries (collectively, the Company) have been prepared in accordance with the instructions to Form 10-Q and therefore do not include all information and footnotes necessary for a fair presentation of financial position, results of operations and cash flows in conformity with accounting principles generally accepted in the United States (U.S. GAAP); however, such information reflects all adjustments (consisting solely of normal recurring adjustments) that are, in the opinion of management, necessary for a fair statement of the results for the interim periods.

The condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes contained in the Company's annual report on Form 10-K for the year ended December 31, 2015. In addition, some of the Company's statements in this quarterly report on Form 10-Q may involve risks and uncertainties that could significantly impact expected future results. The results of operations for the six months ended June 30, 2016 are not necessarily indicative of results to be expected for the full year.

The Company has reclassified the presentation of certain prior-year information to conform to the current presentation disclosed in the notes included elsewhere in this quarterly report on Form 10-Q.

Recently Adopted Accounting Guidance

In April 2015, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2015-03, *Interest-Imputation of Interest: Simplifying the Presentation of Debt Issuance Costs* (ASU 2015-03), which requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. Additionally, in August 2015, the FASB issued ASU 2015-15, *Interest-Imputation of Interest: Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements Amendments to SEC Paragraphs Pursuant to Staff Announcement at June 18, 2015 EITF Meeting* (ASU 2015-15). The standards became effective for the Company on January 1, 2016. The adoption of ASU 2015-03 and ASU 2015-15 resulted in \$28.3 of debt issuance costs included in long-term debt as of June 30, 2016 and a reclassification of \$6.9 from other assets to long-term debt as of December 31, 2015.

In May 2015, the FASB issued ASU 2015-07, *Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share or Its Equivalent* (ASU 2015-07). The amendment in this update removes the requirement to categorize within the fair value hierarchy all investments for which fair value is measured using the net asset value per share practical expedient. The amendments also remove the requirement to make certain disclosures for all investments that are eligible to be measured at fair value using the net asset value per share practical expedient. Rather, those disclosures are limited to investments for which the entity has elected to measure the fair value using that practical expedient. The standard became effective for the Company on January 1, 2016. The adoption of ASU 2015-07 did not have a material impact on the financial statements of the Company.

In July 2015, the FASB issued ASU 2015-12, *Plan Accounting: Defined Benefit Plan (Topic 960), Defined Contribution Pension Plans (Topic 962), Health and Welfare Benefit Plans (Topic 965): (Part I) Fully Benefit-Responsive Investment Contracts, (Part II) Plan Investment Disclosures, (Part III) Measurement Date Practical Expedient* (ASU 2015-12), which is a three-part update with the objective of simplifying benefit plan reporting to make the information presented more useful to the reader. Part I designates contract value as the only required measure for fully benefit-responsive investment contracts (FBRIC). A FBRIC is a guaranteed investment contract between the plan and an issuer in which the issuer agrees to pay a predetermined interest rate and principal for a set amount deposited with the issuer. Part II simplifies the investment disclosure requirements for employee benefits plans. Part III provides an alternative measurement date for fiscal periods that do not coincide with a month-end date. This guidance is effective for fiscal years beginning after December 15, 2015. The amendments in Parts I and II of this standard are effective retrospectively. The standard became effective for the Company on January 1, 2016. The adoption of ASU 2015-12 did not have a material impact on the financial statements of the Company.

In September 2015, the FASB issued ASU 2015-16, *Business Combinations (Topic 805): Simplifying the Accounting for Measurement-Period Adjustments* (ASU 2015-16). The amendment in this update requires that an acquirer recognize adjustments to provisional amounts that are identified during the measurement period in the reporting period in which the adjustment amounts are determined. The amendments in this update require that the acquirer record, in the same period's financial statements, the effect

on earnings of changes in depreciation, amortization, or other income effects, if any, as a result of the change to the provisional amounts, calculated as if the accounting had been completed at the acquisition date and presented separately on the face of the income statement or disclosed in the notes by line item. The standard became effective for the Company on January 1, 2016. The adoption of ASU 2015-16 did not have a material impact on the financial statements of the Company.

Recently Issued Accounting Guidance

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers* (ASU 2014-09), which requires an entity to recognize the amount of revenue to which it expects to be entitled for the transfer of promised goods or services to customers. ASU 2014-09 will replace most existing revenue recognition guidance in U.S. GAAP when it becomes effective. The standard is effective for the Company on January 1, 2018. Early application is permitted on the original adoption date of January 1, 2017. The standard permits the use of either the retrospective or cumulative effect transition method. The Company is evaluating the effect that ASU 2014-09 will have on its consolidated financial statements and related disclosures. The Company has not yet selected a transition method nor has it determined the effect of the standard on its ongoing financial reporting.

In November 2015, the FASB issued ASU 2015-17, *Income Taxes (Topic 740): Balance Sheet Classification of Deferred Taxes* (ASU 2015-17). This amendment requires the presentation of deferred tax assets and liabilities to be categorized as noncurrent on the balance sheet, instead of being classified as current or noncurrent. ASU 2015-17 is effective for the Company on January 1, 2017, with early adoption permitted. The adoption of ASU 2015-17 is not expected to have a material impact on the financial statements of the Company.

In January 2016, the FASB issued ASU 2016-01, *Financial Instruments - Overall (subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities* (ASU 2016-01). This amendment requires equity investments (except those accounted for under the equity method of accounting or those that result in consolidation of the investee) to be measured at fair value with changes in fair value recognized in net income. This amendment simplifies the impairment assessment of equity investments without readily determinable fair values by requiring a qualitative assessment to identify impairment. It eliminates the requirement for public business entities to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet. This amendment requires public business entities to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes. Additionally, the update requires an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments and requires an entity to separate presentation of financial assets and financial liabilities by measurement category and form of financial asset (that is, securities or loans and receivables) on the balance sheet or the accompanying notes to the financial statements. ASU 2016-01 is effective for the Company on January 1, 2018, including interim periods, with early adoption permitted on a limited basis. The adoption of ASU 2016-01 is not expected to have a material impact on the financial statements of the Company.

In February 2016, the FASB issued ASU 2016-02, *Leases (Topic 842)* (ASU 2016-02). The FASB issued the update to require the recognition of lease assets and liabilities on the balance sheet of lessees. ASU 2016-02 will be effective for the Company on January 1, 2019, including interim periods. ASU 2016-02 requires a modified retrospective transition method with the option to elect a package of practical expedients. Early adoption is permitted. The Company is evaluating the effect that ASU 2016-02 will have on its financial statements and related disclosures.

In March 2016, the FASB issued ASU 2016-05, *Derivatives and Hedging (Topic 815): Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships* (ASU 2016-05). The FASB issued the update to clarify the effect on an existing hedging relationship, if any, of a change in the counterparty to a derivative instrument that has been designated as a hedging instrument. The ASU clarifies the steps required to determine bifurcation of an embedded derivative. ASU 2016-05 will be effective for the Company on January 1, 2017, including interim periods. Early adoption is permitted. The adoption of ASU 2016-05 is not expected to have a material impact on the financial statements of the Company.

In March 2016, the FASB issued ASU 2016-06, *Derivatives and Hedging (Topic 815): Contingent Put and Call Options in Debt Instruments* (ASU 2016-06). The FASB issued the update to clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. The standard will be effective for the Company on January 1, 2017, including interim periods. ASU 2016-06 requires a modified retrospective basis to existing debt instruments as of the beginning of the fiscal year for which the amendments are effective. Early

adoption is permitted. The adoption of ASU 2016-06 is not expected to have a material impact on the financial statements of the Company.

In March 2016, the FASB issued ASU 2016-08, *Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)* (ASU 2016-08). The FASB issued the amendment to clarify the implementation guidance on principal versus agent considerations. The effective date and transition requirements for the amendments in this update are the same as the effective date and transition requirements of ASU 2014-09. The Company is evaluating the effect that ASU 2016-08 will have on its financial statements and related disclosures.

In March 2016, the FASB issued ASU 2016-09, *Compensation—Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting* (ASU 2016-09). The FASB issued the amendment to simplify several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. Some of the areas for simplification apply only to nonpublic entities. ASU 2016-09 is effective for the Company for annual periods beginning after December 15, 2016, with early adoption permitted. The adoption of ASU 2016-09 is not expected to have a material impact on the financial statements of the Company.

In April 2016, the FASB issued ASU 2016-10, *Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing* (ASU 2016-10). The FASB issued the amendment to clarify the following two aspects of Topic 606: identifying performance obligations and the licensing implementation guidance, while retaining the related principles for those areas. The effective date and transition requirements for the amendments in this update are the same as the effective date and transition requirements of ASU 2014-09. The Company is evaluating the effect that ASU 2016-10 will have on its financial statements and related disclosures.

In May 2016, the FASB issued ASU 2016-11, *Revenue Recognition (Topic 605) and Derivatives and Hedging (Topic 815): Rescission of SEC Guidance Because of Accounting Standards Updates 2014-09 and 2014-16 Pursuant to Staff Announcements at the March 3, 2016 EITF Meeting* (ASU 2016-11). The FASB issued the amendment to rescind the following aspects of Topic 606. Specifically, registrants should not rely on the following SEC Staff Observer comments upon adoption of Topic 606: Revenue and Expense Recognition for Freight Services in Process, which is codified in paragraph 605-20-S99-2; Accounting for Shipping and Handling Fees and Costs, which is codified in paragraph 605-45-S99-1; Accounting for Consideration Given by a Vendor to a Customer (including Reseller of the Vendor's Products), which is codified in paragraph 605-50-S99-1; Accounting for Gas-Balancing Arrangements (that is, use of the "entitlements method"), which is codified in paragraph 932-10-S99-5. The effective date and transition requirements for the amendments in this update are the same as the effective date and transition requirements of ASU 2014-09. The Company is evaluating the effect that ASU 2016-11 will have on its financial statements and related disclosures.

In May 2016, the FASB issued ASU 2016-12, *Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing: Narrow-Scope Improvements and Practical Expedients* (ASU 2016-12). The FASB issued the amendment to improve Topic 606 by reducing the potential for diversity in practice at initial application and reducing the cost and complexity of applying Topic 606 both at transition and on an ongoing basis. The effective date and transition requirements for the amendments in this update are the same as the effective date and transition requirements of ASU 2014-09. The Company is evaluating the effect that ASU 2016-12 will have on its financial statements and related disclosures.

In June 2016, the FASB issued ASU 2016-13, *Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments* (ASU 2016-13). The FASB issued the amendment to require a financial asset (or a group of financial assets) measured at amortized cost basis to be presented at the net amount expected to be collected. The updates will be effective for the Company on January 1, 2020. The Company is evaluating the effect that ASU 2016-13 will have on its financial statements and related disclosures.

Note 2: Earnings Per Share

Basic earnings per share is based on the weighted-average number of common shares outstanding. Diluted earnings per share includes the dilutive effect of potential common shares outstanding. Under the two-class method of computing earnings per share, non-vested share-based payment awards that contain rights to receive non-forfeitable dividends are considered participating securities. The Company's participating securities include restricted stock units (RSUs), deferred shares, and shares that were vested, but deferred by the employee. The Company calculated basic and diluted earnings per share under both the treasury stock method and the two-class method. For the six months ended June 30, 2016 and 2015, there was no impact in the per share amounts calculated under the two methods. Accordingly, the treasury stock method is disclosed below.

The following represents amounts used in computing earnings per share and the effect on the weighted-average number of shares of dilutive potential common shares:

(1) Pension and other post-retirement benefits AOCI components are included in the computation of net periodic benefit cost (refer to note 12).

Note 5: Share-Based Compensation

The Company's share-based compensation payments to employees are recognized based on their grant-date fair values during the period in which the employee is required to provide services in exchange for the award. Share-based compensation is primarily recognized as a component of selling and administrative expense. Total share-based compensation expense was \$4.5 and \$4.8 for the three months ended June 30, 2016 and 2015, respectively, and was \$10.1 and \$9.1 for the six months ended June 30, 2016 and 2015, respectively.

Options outstanding and exercisable as of June 30, 2016 under the Company's 1991 Equity and Performance Incentive Plan (as Amended and Restated as of February 12, 2014) (the 1991 Plan) and changes during the six months ended June 30, 2016 were as follows:

	Number of Shares	Weighted- Average Exercise Price	Weighted- Average Remaining Contractual Term	Aggregate Intrinsic Value ⁽¹⁾
Outstanding at January 1, 2016	1.7	\$ 34.21		
Expired or forfeited	(0.2)	\$ 39.30		
Granted	0.5	\$ 27.39		
Outstanding at June 30, 2016	2.0	\$ 32.09	8	\$ —
Options exercisable at June 30, 2016	1.1	\$ 33.87	6	\$ —
Options vested and expected to vest at June 30, 2016 (2)	1.9	\$ 32.17	7	\$ —

(1) The aggregate intrinsic value (the difference between the closing price of the Company's common shares on the last trading day of the second quarter of 2016 and the exercise price, multiplied by the number of "in-the-money" options) that would have been received by the option holders had all option holders exercised their options on June 30, 2016. The amount of aggregate intrinsic value will change based on the fair market value of the Company's common shares.

(2) The options expected to vest are the result of applying the pre-vesting forfeiture rate assumption to total outstanding non-vested options.

The following table summarizes information on non-vested RSUs and performance shares relating to employees and non-employee directors for the six months ended June 30, 2016:

	Number of Shares	Weighted-Average Grant-Date Fair Value (per share)
RSUs:		
Non-vested at January 1, 2016	0.9	\$ 32.53
Forfeited	(0.1)	\$ 31.74
Vested	(0.2)	\$ 31.71
Granted	0.5	\$ 27.13
Non-vested at June 30, 2016	1.1	\$ 30.12
Performance Shares:		
Non-vested at January 1, 2016	0.8	\$ 34.06
Forfeited	—	\$ 32.58
Vested	(0.2)	\$ 29.35
Granted	0.6	\$ 27.26
Non-vested at June 30, 2016	1.2	\$ 31.48

Performance shares are granted to employees and vest based on the achievement of certain performance objectives, as determined by the Board of Directors each year. Each performance share earned entitles the holder to one common share of the Company. The Company's performance shares include performance objectives that are assessed after a three-year period as well as performance objectives that are assessed annually over a three-year period. No shares are vested unless certain performance threshold objectives are met.

As of June 30, 2016, there were 0.1 non-employee director deferred shares vested and outstanding.

Note 6: Income Taxes

The effective tax rate on the income from the continuing operations was 41.7 percent and 13.6 percent for the three months ended June 30, 2016 and 2015, respectively. The effective tax rate was 99.4 percent and (3.2) percent for the six months ended June 30, 2016 and 2015, respectively. The tax rate on the loss for the three and six months ended June 30, 2016 increased due to the recognition of favorable discrete items, including the release of an uncertain tax position and discrete expenses related to the potential Wincor Nixdorf Aktiengesellschaft (Wincor Nixdorf) acquisition (the Acquisition). The tax rate for these periods was also increased by a reduction in the deferred tax liability associated with the Company's undistributed foreign subsidiary earnings. The foreign currency hedges related to the Acquisition generated a loss for the three months ended June 30, 2016 and a net gain for six months ended June 30, 2016. The non-taxable treatment of these hedges had the impact of decreasing the rate in the three months ended June 30, 2016 and increasing the rate for the six months ended June 30, 2016. The tax rate on income for the three and six months ended June 30, 2015 benefited from a release of an uncertain tax position due to the expiration of the statute of limitations. Additionally, the tax rate for the six months ended June 30, 2015 benefited from discrete tax items related to the Venezuela divestiture and the release of a valuation allowance.

Note 7: Investments

The Company's investments, primarily in Brazil, consist of certificates of deposit that are classified as available-for-sale and stated at fair value based upon quoted market prices. Unrealized gains and losses are recorded in AOCI. Realized gains and losses are recognized in investment income and are determined using the specific identification method. There were no realized gains from the sale of securities and proceeds from the sale of available-for-sale securities for the three and six months ended June 30, 2016 and 2015.

Note 8: Allowance for Credit Losses

The following table summarizes the Company's allowance for credit losses for the six months ended June 30, 2016 and 2015:

	Finance Leases	Notes Receivable	Total
Allowance for credit losses			
Balance at January 1, 2016	\$ 0.5	\$ 4.1	\$ 4.6
Provision for credit losses	—	—	—
Balance at June 30, 2016	\$ 0.5	\$ 4.1	\$ 4.6

Provision for credit losses	0.3	—	0.3
Write-offs	(0.1)	—	(0.1)
Balance at June 30, 2015	\$ 0.6	\$ 4.1	\$ 4.7

There were no significant changes in provision for credit losses, recoveries and write-offs during the six months ended June 30, 2016 and 2015. As of June 30, 2016, finance leases and notes receivable individually evaluated for impairment were \$63.5 and \$8.7, respectively. As of June 30, 2015, finance leases and notes receivable individually evaluated for impairment were \$118.9 and \$14.6, respectively. As of June 30, 2016 and December 31, 2015, the Company's finance lease receivables in Latin America were \$49.5 and \$58.8, respectively. The decrease is related primarily to recurring customer payments for financing arrangements.

The Company records interest income and any fees or costs related to financing receivables using the effective interest method over the term of the lease or loan. The Company reviews the aging of its financing receivables to determine past due and delinquent accounts. Credit quality is reviewed at inception and is re-evaluated as needed based on customer-specific circumstances. Receivable balances 60 days to 89 days past due are reviewed and may be placed on nonaccrual status based on customer-specific circumstances. Receivable balances are placed on nonaccrual status upon reaching greater than 89 days past due. Upon receipt of payment on nonaccrual financing receivables, interest income is recognized and accrual of interest is resumed once the account has been made current or the specific circumstances have been resolved.

As of June 30, 2016 and December 31, 2015, the recorded investment in past due financing receivables on nonaccrual status was \$0.6 and \$0.7, respectively, and there were no recorded investments in finance receivables past due 90 days or more and still accruing interest. The recorded investment in impaired notes receivable was \$4.1 as of June 30, 2016 and December 31, 2015 and was fully reserved.

In March 2015, the Company acquired Phoenix Interactive Design, Inc. (Phoenix), a leader in developing innovative multi-vendor software solutions for automated teller machines (ATMs) and a host of other financial self-service (FSS) applications. During the second quarter of 2016, the Company adjusted the preliminary goodwill by \$(0.5) primarily to reflect adjustments to the finalization of deferred income taxes.

There have been no impairment indicators identified during the six months ended June 30, 2016.

As of June 30, 2016, the Company had various international short-term uncommitted lines of credit with borrowing limits of \$113.5. The weighted-average interest rate on outstanding borrowings on the short-term uncommitted lines of credit as of June 30, 2016 and December 31, 2015 was 10.49 percent and 5.66 percent, respectively. The increase in the weighted-average interest rate is attributable to a change in mix of borrowings of foreign entities. Short-term uncommitted lines mature in less than one year. The amount available under the short-term uncommitted lines at June 30, 2016 was \$97.5.

The Company entered into a revolving and term loan credit agreement (the Credit Agreement), dated as of November 23, 2015, among the Company and certain of the Company's subsidiaries, as borrowers, JPMorgan Chase Bank, N.A., as Administrative Agent, and the lenders named therein. The Credit Agreement included, among other things, mechanics for the Company's existing revolving and term loan A facilities to be refinanced under the Credit Agreement. On December 23, 2015, the Company entered into a Replacement Facilities Effective Date Amendment, which amended the Credit Agreement, among the Company, certain of the Company's subsidiaries, the lenders identified therein and JPMorgan Chase Bank, N.A., as Administrative Agent, pursuant to which the Company refinanced its \$520.0 revolving and \$230.0 term loan A senior unsecured credit facilities (which have been terminated and repaid in full) with, respectively, a new unsecured revolving facility (the Revolving Facility) in an amount of up to \$520.0 and a new (non-delayed draw) unsecured term loan A facility (the Term Loan A Facility) on substantially the same terms as the Delayed Draw Term Facility (as defined in the Credit Agreement) in the amount of up to \$230.0. The Delayed Draw Term Facility of \$250.0 may be drawn up to one year after the closing date of the Acquisition. The Revolving Facility and Term Loan A Facility are subject to the same maximum consolidated net leverage ratio and minimum consolidated interest coverage ratio as the Delayed Draw Term Facility. On December 23, 2020, the Term Loan A Facility will mature and the Revolving Facility will automatically terminate. The weighted-average interest rate on outstanding revolving credit facility borrowings as of June 30, 2016 and December 31, 2015 was 1.88 percent and 2.33 percent, respectively, which is variable based on the London Interbank Offered Rate (LIBOR). The amount available under the revolving credit facility as of June 30, 2016 was \$210.0.

On April 19, 2016, the Company issued \$400.0 aggregate principal amount of 8.50 percent senior notes due 2024 (the 2016 Senior Notes) in an offering exempt from the registration requirements of the Securities Act of 1933 in connection with the Acquisition. The 2016 Senior Notes are and will be guaranteed by certain of the Company's existing and future domestic subsidiaries. If the Acquisition has not closed by November 21, 2016, the Company will be required to redeem the 2016 Senior Notes in whole at a redemption price equal to 100 percent of the aggregate principal amount, plus accrued and unpaid interest to, but excluding, the redemption date.

Also in April 2016, allocation and pricing of the term loan B facility (the Term Loan B Facility) provided under the Credit Agreement (which the Term Loan B Facility is intended to provide part of the financing for the Acquisition) was completed. The Term Loan B Facility consists of a \$1,000.0 U.S. dollar-denominated tranche that bears interest at LIBOR plus an applicable margin of 4.50 percent (or, at the Company's option, prime plus an applicable margin of 3.50 percent), and a €350.0 euro-denominated tranche that will bear interest at the Euro Interbank Offered Rate (EURIBOR) plus an applicable margin of 4.25 percent. Each tranche was funded during the second quarter of 2016 at 99 percent of par.

⁽ⁱⁱ⁾ EURIBOR with a floor of 0.75%.

Following the close of the Acquisition, the debt facilities under the Credit Agreement will be secured by substantially all assets of the Company and its domestic subsidiaries that are borrowers or guarantors under the Credit Agreement, subject to certain exceptions and permitted liens.

In March 2006, the Company issued senior notes (2006 Senior Notes) in an aggregate principal amount of \$300.0. The Company funded the repayment of \$75.0 aggregate principal amount of the 2006 Senior Notes at maturity in March 2013 using borrowings under its revolving credit facility and the repayment of \$175.0 aggregate principal amount of the Company's 2006 Senior Notes which matured in March 2016 through the use of proceeds from the divestiture of the Company's NA electronic security business. Prepayment of the remaining \$50.0 aggregate principal amount of the 2006 Senior Notes were paid in full on May 2, 2016. The prepayment included a make-whole premium of \$3.9, which was paid in addition to the principal and interest of the 2006 Senior Notes and is included in interest expense for the six months ended June 30, 2016.

The Company's financing agreements contain various restrictive financial covenants, including net debt to capitalization, net debt to earnings before interest, taxes, depreciation and amortization (EBITDA) and net interest coverage ratios. As of June 30, 2016, the Company was in compliance with the financial and other covenants in its debt agreements.

Restricted Cash

As of June 30, 2016, the Company had \$1,823.0 in restricted cash to be used for the cash portion of the Acquisition, paying off existing debt and related interest, as well as any deal costs pursuant to the terms of the Credit Agreement. The carrying value of restricted cash approximates its fair value and is included in cash flows from investing and financing activities. Restricted cash in investing activities consists of the proceeds from the debt borrowings related to the Acquisition. Restricted cash in financing activities consists of the domestic net proceeds from the NA electronic security divestiture offset by the \$175.0 and \$50.0 payments of the 2006 Senior Notes during the first and second quarter of 2016, respectively. Restricted cash is expected to be fully utilized or unrestricted no later than the fourth quarter of 2016.

Note 12: Benefit Plans

The Company has qualified pension plans covering certain U.S. employees that have been closed to new participants since 2003 and frozen since December 2013. Plans that cover salaried employees provide pension benefits based on the employee's compensation during the ten years before retirement. The Company's funding policy for salaried plans is to contribute annually based on actuarial projections and applicable regulations. Plans covering hourly employees generally provide benefits of stated amounts for each year of service. The Company's funding policy for hourly plans is to make at least the minimum annual contributions required by applicable regulations. Employees of the Company's operations in countries outside of the United States participate to varying degrees in local pension plans, which in the aggregate, are not significant.

The Company has non-qualified pension plans to provide supplemental retirement benefits to certain officers, which was also frozen since December 2013. Benefits are payable at retirement based upon a percentage of the participant's compensation, as defined. In addition to providing pension benefits, the Company provides post-retirement healthcare and life insurance benefits (referred to as other benefits) for certain retired employees. Currently, there are no plan assets and the Company funds the benefits as the claims are paid.

Eligible employees may be entitled to these benefits based upon years of service with the Company, age at retirement and collective bargaining agreements. Currently, the Company has made no commitments to increase these benefits for existing retirees.

The following table sets forth the net periodic benefit cost for the Company's defined benefit pension plans and other benefits for the three months ended June 30:

Note 13: Guarantees and Product Warranties

The Company provides its global operations guarantees and standby letters of credit through various financial institutions for suppliers, customers, regulatory agencies and insurance providers. If the Company is not able to make payment or fulfill contractual obligations, the suppliers, customers, regulatory agencies and insurance providers may draw on the pertinent bank. At June 30, 2016, the maximum future payment obligations related to these various guarantees totaled \$101.1, of which \$30.0 represented standby letters of credit to insurance providers, and no associated liability was recorded. At December 31, 2015, the maximum future payment obligations relative to these various guarantees totaled \$89.9, of which \$30.0 represented standby letters of credit to insurance providers, and no associated liability was recorded.

The Company provides its customers a manufacturer's warranty and records, at the time of the sale, a corresponding estimated liability for potential warranty costs. Estimated future obligations due to warranty claims are based upon historical factors such as labor rates, average repair time, travel time, number of service calls per machine and cost of replacement parts. As of June 30, 2016 and 2015, the Company's warranty liability balances were \$67.1 and \$95.4, respectively. The decrease in the warranty liability was largely attributable to a decrease in new provisions in all regions, which was partially offset by an increase in currency translation in Brazil.

Changes in the Company's warranty liability balance are illustrated in the following table:

	2016	2015
Balance at January 1	\$ 73.6	\$ 113.3

Note 14: Commitments and Contingencies**Contractual Obligations**

At June 30, 2016, the Company had purchase commitments due within one year totaling \$6.8 for materials through contract manufacturing agreements at negotiated prices.

Indirect Tax Contingencies

The Company accrues non-income-tax liabilities for indirect tax matters when management believes that a loss is probable and the amounts can be reasonably estimated, while contingent gains are recognized only when realized. In the event any losses are sustained in excess of accruals, they are charged against income. In evaluating indirect tax matters, management takes into consideration factors such as historical experience with matters of similar nature, specific facts and circumstances, and the likelihood of prevailing. Management evaluates and updates accruals as matters progress over time. It is reasonably possible that some of the matters for which accruals have not been established could be decided unfavorably to the Company and could require recognizing future expenditures. Also, statutes of limitations could expire without the Company paying the taxes for matters for which accruals have been established, which could result in the recognition of future gains upon reversal of these accruals at that time.

At June 30, 2016, the Company was a party to several routine indirect tax claims from various taxing authorities globally that were incurred in the normal course of business, which neither individually nor in the aggregate are considered material by management in relation to the Company's financial position or results of operations. In management's opinion, the consolidated financial statements would not be materially affected by the outcome of these indirect tax claims and/or proceedings or asserted claims.

In addition to these routine indirect tax matters, the Company was a party to the proceedings described below:

In August 2012, one of the Company's Brazil subsidiaries was notified of a tax assessment of approximately R\$270.0, including penalties and interest, regarding certain Brazil federal indirect taxes (Industrialized Products Tax, Import Tax, Programa de Integração Social and Contribution to Social Security Financing) for 2008 and 2009. The assessment alleges improper importation

(in millions, except per share amounts)

of certain components into Brazil's free trade zone that would nullify certain indirect tax incentives. On September 10, 2012, the Company filed its administrative defenses with the tax authorities.

In response to an order by the administrative court, the tax inspector provided further analysis with respect to the initial assessment in December 2013 that indicates a potential exposure that is significantly lower than the initial tax assessment received in August 2012. This revised analysis has been accepted by the initial administrative court; however, this matter remains subject to ongoing administrative proceedings and appeals. Accordingly, the Company cannot provide any assurance that its exposure pursuant to the initial assessment will be lowered significantly or at all. In addition, this matter could negatively impact Brazil federal indirect taxes in other years that remain open under statute. It is reasonably possible that the Company could be required to pay taxes, penalties and interest related to this matter, which could be material to the Company's consolidated financial statements. The Company continues to defend itself in this matter.

The Company has challenged customs rulings in Thailand seeking to retroactively collect customs duties on previous imports of ATMs. Management believes that the customs authority's attempt to retroactively assess customs duties is in contravention of World Trade Organization agreements and, accordingly, is challenging the rulings. In the third quarter of 2015, the Company received a prospective ruling from the United States Customs Border Protection which is consistent with the Company's interpretation of the treaty in question. The Company has submitted that ruling for consideration in its ongoing dispute with Thailand. The matters are currently in the appeals process and management continues to believe that the Company has a valid legal position in these appeals. Accordingly, the Company has not accrued any amount for this contingency; however, the Company cannot provide any assurance that it will not ultimately be subject to retroactive assessments.

At June 30, 2016 and December 31, 2015, the Company had an accrual related to the Brazil indirect tax matter disclosed above of \$9.3 and \$7.5, respectively. The movement between periods relates to the currency fluctuation in the Brazil real.

A loss contingency is reasonably possible if it has a more than remote but less than probable chance of occurring. Although management believes the Company has valid defenses with respect to its indirect tax positions, it is reasonably possible that a loss could occur in excess of the estimated accrual. The Company estimated the aggregate risk at June 30, 2016 to be up to approximately \$209.1 for its material indirect tax matters, of which \$179.1 and \$24.0, respectively, relates to the Brazil indirect tax matter and Thailand customs matter disclosed above. The aggregate risk related to indirect taxes is adjusted as the applicable statutes of limitations expire.

Legal Contingencies

At June 30, 2016, the Company was a party to several lawsuits that were incurred in the normal course of business, which neither individually nor in the aggregate are considered material by management in relation to the Company's financial position or results of operations. In management's opinion, the Company's condensed consolidated financial statements would not be materially affected by the outcome of these legal proceedings, commitments or asserted claims.

Note 15: Derivative Instruments and Hedging Activities

The Company uses derivatives to mitigate the economic consequences associated with fluctuations in currencies and interest rates. The following table summarizes the (loss) gain recognized on derivative instruments for three months ended and six months ended June 30:

Foreign Exchange

Net Investment Hedges The Company has international subsidiaries with net balance sheet positions that generate cumulative translation adjustments within AOCI. The Company uses derivatives to manage potential changes in value of its net investments in LA. The Company uses the forward-to-forward method for its quarterly retrospective and prospective assessments of hedge effectiveness. No ineffectiveness results if the notional amount of the derivative matches the portion of the net investment designated as being hedged because the Company uses derivative instruments with underlying exchange rates consistent with its functional currency and the functional currency of the hedged net investment. Changes in value that are deemed effective are accumulated in AOCI where they will remain until they are reclassified to income together with the gain or loss on the entire investment upon substantial liquidation of the subsidiary. The fair value of the Company's net investment hedge contracts were \$(3.8) and \$1.0 as of June 30, 2016 and December 31, 2015, respectively. The net gain (loss) recognized in AOCI on net investment hedge derivative instruments was \$(6.0) and \$(1.5) in the three months ended June 30, 2016 and 2015, respectively, and \$(11.5) and \$5.1 in the six months ended June 30, 2016 and 2015.

Non-Designated Hedges A substantial portion of the Company's operations and revenues are international. As a result, changes in foreign exchange rates can create substantial foreign exchange gains and losses from the revaluation of non-functional currency monetary assets and liabilities. The Company's policy allows the use of foreign exchange forward contracts with maturities of up to 24 months to mitigate the impact of currency fluctuations on those foreign currency asset and liability balances. The Company elected not to apply hedge accounting to its foreign exchange forward contracts. Thus, spot-based gains/losses offset revaluation gains/losses within foreign exchange loss, net and forward-based gains/losses represent interest expense. The fair value of the Company's non-designated foreign exchange forward contracts was \$1.7 and \$0.9 as of June 30, 2016 and December 31, 2015, respectively.

Foreign Currency Option and Forward Contracts - acquisition related On November 23, 2015, the Company entered into two foreign currency option contracts to purchase €1,416.0 for \$1,547.1 to hedge against the effect of exchange rate fluctuations on the euro-denominated cash consideration related to the Acquisition and estimated euro denominated deal related costs and any outstanding Wincor Nixdorf borrowings. At that time, the cash component of the purchase price consideration approximated €1,162.2. The foreign currency option contracts were sold during the second quarter of 2016 for cash proceeds of \$42.6, which are included in investing activities in the condensed consolidated statements of cash flows, resulting in a gain of \$35.6 during the six months ended June 30, 2016 and \$7.0 during the fourth quarter of 2015. The weighted average strike price was \$1.09 per euro. These foreign currency option contracts were non-designated and included in other current assets on the condensed consolidated balance sheet as of December 31, 2015 based on the net asset position.

On April 29, 2016, the Company entered into one foreign currency forward contract to purchase €713.0 for \$820.9 to hedge against the effect of exchange rate fluctuations on the euro-denominated cash consideration related to the Acquisition and estimated euro denominated deal related costs and any outstanding Wincor Nixdorf borrowings. The forward rate is \$1.1514. This foreign currency forward contract is non-designated and included in other current assets or other current liabilities based on the net asset or net liability position, respectively, in the condensed consolidated balance sheets. The gains and losses from the revaluation of the foreign currency forward contract are included in other (expense) income miscellaneous, net on the condensed consolidated statements of operations.

During the three and six months ended June 30, 2016, the Company recorded a \$(23.6) and \$12.9, respectively, mark-to-market (loss) gain on foreign currency and forward option contracts reflected in miscellaneous, net. The fair value of the Company's foreign currency forward and option contracts were \$(22.7) and \$7.0 as of June 30, 2016 and December 31, 2015, respectively, and are included in other current liabilities and other current assets, respectively. As of July 25, 2016, the fair value of the foreign currency forward contract was \$(30.2).

Interest Rate

Cash Flow Hedges The Company has variable rate debt that is subject to fluctuations in interest related cash flows due to changes in market interest rates. As of June 30, 2016, the Company paid off its pay-fixed receive-variable interest rate swap. As a result, the Company had no pay-fixed receive-variable interest rate swaps outstanding as of June 30, 2016. Changes in value that are deemed effective are accumulated in AOCI and reclassified to interest expense on the condensed consolidated statements of operations when the hedged interest is accrued. To the extent that it becomes probable that the Company's variable rate borrowings will not occur, the gains or losses on the related cash flow hedges will be reclassified from AOCI to interest expense. The fair value of the Company's interest rate contracts was minimal as of December 31, 2015.

In December 2005 and January 2006, the Company executed cash flow hedges by entering into receive-variable and pay-fixed interest rate swaps, with a total notional amount of \$200.0, related to the 2006 Senior Notes. Amounts previously recorded in AOCI related to the pre-issuance cash flow hedges were reclassified to interest expense on a straight-line basis through February 2016.

The gain recognized on designated cash flow hedge derivative instruments was minimal for both the three months ended and six months ended June 30, 2016, and \$0.2 and \$0.5 for the three months ended and six months ended June 30, 2015, respectively. Gains and losses related to interest rate contracts that are reclassified from AOCI are recorded in interest expense on the condensed consolidated statements of operations. The Company does not anticipate reclassifying any amount from AOCI to interest expense within the next 12 months.

Total severance	<u>\$ 5.0</u>	<u>\$ 7.1</u>	<u>\$ 5.4</u>	<u>\$ 10.2</u>

⁽¹⁾ NA includes corporate and global restructuring costs.

During the first quarter of 2013, the Company announced a multi-year transformation plan. Certain aspects of this plan were previously disclosed under the Company's global realignment plan and global shared services plan. This multi-year transformation focuses on globalizing the Company's service organization and creating a unified center-led global organization for research and development, as well as transforming the Company's general and administrative cost structure. Restructuring charges of \$5.0 and \$7.1 for the three months ended June 30, 2016 and 2015, respectively, and \$5.4 and \$10.2 for the six months ended June 30, 2016 and 2015, respectively, related to the Company's multi-year transformation plan. As of June 30, 2016, the restructuring accrual balance consists of severance restructuring activities in connection with the multi-year transformation plan. As of June 30, 2016, the Company anticipates minimal additional restructuring costs to be incurred through the end of 2016 in connection with the multi-year transformation plan. As management finalizes certain aspects of the transformation plan, the anticipated future costs related to this plan are subject to change.

The following table summarizes the Company's cumulative total restructuring costs for the multi-year transformation plan as of June 30, 2016:

	Severance	Other	Total

Impairment and Other Charges

During the first quarter of 2015, the Company recorded an impairment of certain capitalized software of \$9.1 related to redundant legacy Diebold software as a result of the acquisition of Phoenix. In addition, the Company agreed to sell its equity interest in its Venezuela joint venture to its joint venture partner and recorded a \$10.3 impairment of assets in the first quarter of 2015. On April 29, 2015, the Company closed the sale for the estimated fair market value and recorded a \$1.0 reversal of impairment of assets based on final adjustments in the second quarter of 2015, resulting in a \$9.3 impairment of assets for the six months ended June 30, 2015 (refer to note 19).

Other charges consist of items that the Company has determined are non-routine in nature and are not expected to recur in future operations. Net non-routine expense of \$18.2 and \$32.3 impacted the three and six months ended June 30, 2016, respectively, and

Refer to note 11 for further details surrounding the increase in long-term debt as of June 30, 2016 compared to December 31, 2015.

Note 18: Segment Information

The Company considers its operating structure and the information subject to regular review by its President and Chief Executive Officer, who is the Chief Operating Decision Maker (CODM), to identify reportable operating segments. The CODM makes decisions, allocates resources and assesses performance by the following regions, which are also the Company's four reportable operating segments: NA, AP, EMEA and LA. The four geographic segments sell and service FSS and security systems around the globe, as well as elections, lottery and information technology solutions in Brazil other, through wholly-owned subsidiaries, majority-owned joint ventures and independent distributors in most major countries.

Certain information not routinely used in the management of the segments, information not allocated back to the segments or information that is impractical to report is not shown. Segment operating profit is defined as revenues less expenses identifiable to those segments. Segment operating profit reconciles to consolidated income before income taxes by deducting corporate costs

Note 19: Acquisitions and Divestitures

Acquisitions

In the fourth quarter of 2015, the Company announced its intention to acquire all 29.8 Wincor Nixdorf ordinary shares outstanding (33.1 total Wincor Nixdorf ordinary shares issued inclusive of 3.3 treasury shares) through a voluntary tender offer for €38.98 in cash and 0.434 common shares of the Company per Wincor Nixdorf ordinary share outstanding. The Company considered a number of factors in connection with its evaluation of the proposed transaction, including significant strategic opportunities and potential synergies, as generally supporting its decision to enter into the business combination agreement with Wincor Nixdorf. As of March 29, 2016, the Company confirmed that it received 68.9 percent of total Wincor Nixdorf ordinary shares issued inclusive of treasury shares (76.5 percent of all Wincor Nixdorf ordinary shares outstanding) for purposes of satisfying the minimum tender condition of the offer. On April 15, 2016, the Company announced the final results of the offer that 22.9 Wincor Nixdorf ordinary shares had been tendered by the end of the statutory additional acceptance period on April 12, 2016, which (together with 0.2 voting proxies held by the Company) represented 69.9 percent of total Wincor Nixdorf ordinary shares issued inclusive of treasury shares (77.5 percent of all Wincor Nixdorf ordinary shares outstanding). The closing of the offer remains subject to antitrust approval in Poland, the last country in which antitrust clearance is required as a closing condition, and is on target to close in the summer of 2016. The Company intends to finance the cash portion of the offer consideration as well as any Wincor Nixdorf debt outstanding with funds available under the Company's Credit Agreement and proceeds from the issuance and sale of the 2016 Senior Notes, which are required to be redeemed in the event that the offer has not closed by November 21, 2016 (refer to note 11). The Company is incurring interest expense as well as certain costs and fees, some of which will be payable even in the event the Acquisition is terminated or expires. Wincor Nixdorf has a fiscal year end of September 30 and is reported using International Financial Reporting Standards (IFRS) as issued by the European Union (EU). For the fiscal year ended September 30, 2015, Wincor Nixdorf recorded net sales of €2,427.0.

In the first quarter of 2015, the Company acquired 100 percent of the equity interests of Phoenix for a total purchase price of \$72.9, including \$12.6 of deferred cash payment payable over the next three years. Acquiring Phoenix, a leading developer of innovative multi-vendor software solutions for ATMs and a host of other FSS applications, was a foundational move to accelerate the

Company's growth in the fast-growing managed services and branch automation spaces. The results of operations for Phoenix are primarily included in the NA reportable operating segment within the Company's condensed consolidated financial statements from the date of the acquisition.

Divestitures

On October 25, 2015, the Company entered into a definitive asset purchase agreement with a wholly owned subsidiary of Securitas AB (Securitas Electronic Security) to divest its NA electronic security business located in the United States and Canada for an aggregate purchase price of \$350.0 in cash, 10.0 percent of which was contingent based on the successful transition of certain customer relationships. The Company received the full payment of \$35.0 in the first quarter of 2016 as all contingencies for this payment were achieved. For the NA electronic security business to continue its growth, it would have required resources and investment that the Company was not committed to make given its focus on the self-service market. The closing of the NA electronic security divestiture occurred on February 1, 2016 and the Company recorded a gain on sale, net of tax, of \$0.5 and \$149.6 for the three and six months ended June 30, 2016. The closing purchase price is subject to a customary working capital adjustment, which is expected to be finalized in the third quarter of 2016. The purchase agreement provides for customary representations, warranties, covenants and agreements.

The Company also agreed to provide certain transition services to Securitas Electronic Security after the closing, including providing Securitas Electronic Security a \$6.0 credit for such services, of which \$5.0 relates to a quarterly payment to Securitas Electronic Security and \$1.0 is a credit against payments due from Securitas Electronic Security. During the three and six months ended June 30, 2016, \$1.2 and \$2.5, respectively, were paid as part of the quarterly payments and for the three and six months ended June 30, 2016, respectively, was used against amounts owed by Securitas Electronic Security and \$0.7 and \$1.0, respectively, was used against amounts owed by Securitas Electronic Security.

The operating results for the NA electronic security business were previously included in the Company's NA segment and have been reclassified to discontinued operations for all of the periods presented. The assets and liabilities of this business were classified as held for sale in the Company's condensed consolidated balance sheet as of December 31, 2015. Cash flows provided or used by the NA electronic security business are presented as cash flows from discontinued operations for all of the periods presented. The operating results, assets and liabilities and cash flows from discontinued operations are no longer included in the financial statements of the Company from February 1, 2016.

During the first quarter of 2015, the Company agreed to sell its equity interest in its Venezuela joint venture to its joint venture partner and recorded a \$10.3 impairment of assets. On April 29, 2015, the Company closed the sale for the estimated fair market value and recorded a \$1.0 reversal of impairment of assets based on final adjustments in the second quarter of 2015, resulting in a \$9.3 impairment of assets for the six months ended June 30, 2015. During the remainder of 2015, the Company incurred an additional \$0.4 related to uncollectible accounts receivable, which is included in selling and administrative expenses on the consolidated statements of operations. The Company no longer has a consolidating entity in Venezuela but will continue to operate in Venezuela on an indirect basis.

Prior to the sale, the Company's Venezuela operations consisted of a fifty-percent owned subsidiary, which was consolidated. Venezuela was measured using the U.S. dollar as its functional currency because its economy is considered highly inflationary. On February 10, 2015, the Venezuela government introduced a new foreign currency exchange platform called the Marginal Currency System, or SIMADI, which replaced the SICAD 2 mechanism, yielding another significant increase in the exchange rate. As of March 31, 2015, management determined it was unlikely that the Company would be able to convert bolivars under a currency exchange other than SIMADI and remeasured its Venezuela balance sheet using the SIMADI rate of 192.95 compared to the previous SICAD 2 rate of 50.86, which resulted in a loss of \$7.5 recorded within foreign exchange loss, net in the condensed consolidated statements of operations in the first quarter of 2015.

Item 2: Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Management's discussion and analysis of financial condition and results of operations should be read in conjunction with the condensed consolidated financial statements and accompanying notes that appear within this quarterly report on Form 10-Q.

Introduction

Diebold, Incorporated and its subsidiaries provide the services, software and technology that connect people around the world with their money — bridging the physical and digital worlds of cash conveniently, securely and efficiently. Since its founding in 1859, Diebold has evolved to become a leading provider of exceptional self-service innovation, security and services to financial, retail, commercial and other markets. The Company employs approximately 15,000 associates globally, and its service staff is one of the financial industry's largest, with professionals in more than 600 locations and businesses in more than 90 countries worldwide. The Company continues to execute its multi-year transformation, Diebold 2.0, with the primary objective of transforming the Company into a world-class, services-led and software-enabled Company, supported by innovative hardware.

Diebold 2.0 consists of four pillars:

- Cost - Streamline the cost structure and improve near-term delivery and execution.
- Cash - Generate increased free cash flow in order to fund the investments necessary to drive profitable growth, while preserving the ability to return value to shareholders in the form of dividends and, as appropriate, share repurchases.
- Talent - Attract and retain the talent necessary to drive innovation and the focused execution of the transformation strategy.
- Growth - Return the Company to a sustainable, profitable growth trajectory.

In 2015, the Company fully transitioned into the "Walk" phase of Diebold 2.0 whereby the Company continued to build on each pillar of cost, cash, talent and growth. Compared to the "Crawl" phase, the main difference in "Walk" is a greater emphasis on increasing the mix of revenue from services and software, as well as shaping the Company's portfolio of businesses. As it relates to increasing the mix of services and software, the Company has sharpened its focus on pursuing and winning managed services and multi-vendor services contracts. Through the second quarter of 2016, the Company has approximately 28,000 ATMs under a managed services agreement and approximately 12,000 competitor ATMs under a service contract in NA. For the software business, the acquisition of Phoenix has significantly enhanced the Company's ability to capture more of the market for ATM, multi-vendor, marketing and asset management software.

As it relates to shaping the portfolio of businesses, the Company is making progress towards completing the pending business combination with Wincor Nixdorf. During the first half of 2016, the Company successfully surpassed the minimum threshold for tendered ordinary shares of Wincor Nixdorf and completed the required financing for the Acquisition. The Company has obtained a number of antitrust approvals in certain jurisdictions for the Acquisition. The closing of the takeover offer remains subject to antitrust approval in Poland, the last country in which antitrust clearance is required as a closing condition, and remains on target to close in the summer of 2016. Additionally, the Company completed the sale of its NA electronic security business in the first quarter of 2016.

In December 2015, the Company announced it is forming a new joint venture with a subsidiary of the Inspur Group, a Chinese cloud computing and data center company, to develop, manufacture and distribute FSS solutions in China. The Inspur Group will hold a majority stake of 51 percent in the new joint venture, which will be named Inspur (Suzhou) Financial Technology Service Co. Ltd. (Inspur JV). The joint venture will offer a complete range of self-service terminals within the Chinese market, including ATMs. Diebold will serve as the exclusive distributor outside of China for all products developed by the new joint venture, which will be sold under the Diebold brand. The Company does not expect to consolidate Inspur JV once the joint venture is formed and will include its results of operations in equity in earnings of an investee included in other (expense) income of the condensed consolidated statements of operations.

In addition, to support Diebold's services-led approach to the market, the Inspur Group will acquire a minority share of Diebold's current China joint venture. Moving forward, this business will be focused on providing a whole suite of services, including installation, maintenance, professional and managed services related to ATMs and other automated transaction solutions.

Solutions

The Company believes it is a leader in managed and maintenance services with a dedicated service network serving its customers across the globe. The combination of the Company's differentiated security, remote management and highly-trained field technicians has made the Company a preferred choice for current and emerging self-service solutions. Through managed services, banks entrust the management of their ATM and security operations to the Company, allowing their associates to focus on core competencies. Furthermore, the Company's managed services provide banks and credit unions with a leading-edge solutions that they need to stay competitive in the marketplace.

A significant demand driver in the global ATM marketplace is branch automation, which helps financial institutions grow revenue, reduce costs, and increase convenience and security for the banks' customers by migrating routine transactions, typically done inside the branch, to lower-cost automated channels. The Company serves as a strategic partner to its customers by offering a complete branch automation solution — services, software and technology — that addresses the complete value chain of consult, design, build and operate. The Company's Advisory Services team collaborates with its clients to help define the ideal customer experience, modify processes, refine existing staffing models and deploy technology to meet branch automation objectives. The Diebold Series in-lobby teller terminal (ILT) provides branch automation technology by combining the speed and accuracy of a self-service terminal with intelligence from the bank's core systems, as well as the ability to complete higher value transactions away from the teller line.

The Company also offers hardware-agnostic, omni-channel software solutions for ATMs and a host of other self-service applications. These offerings include highly configurable, enterprise-wide software that automates and migrates financial services across channels, changing the way financial products are delivered to consumers.

Mobile integration is an emerging trend in branch automation, as consumers look for more convenient ways to interact with their financial institutions. To address this need, the Company offers its innovative Mobile Cash Access software solution, which enables consumers to initiate ATM transactions with a mobile device. By eliminating the need for an ATM card, Mobile Cash Access dramatically speeds up transaction time, addresses the risk of card skimming, and reduces the risk of fraud and theft since sensitive customer information is never stored on the mobile device and is passed to the ATM via a secure virtual private network connection. The Company has demonstrated success with this solution in NA and EMEA.

As part of its branch automation solution, the Company offers two-way video capabilities. The solution provides consumers with on-demand access to bank call center representatives at the ATM for sales or bank account maintenance support. In addition to delivering a personal touch outside of regular business hours, it ultimately assists financial institutions by maximizing operational efficiencies, improving the consumer experience and enhancing the overall consumer relationship.

An innovation that enhances security for customers is Diebold's ActivEdge™ secure card reader. This is the ATM industry's first complete anti-skimming, EMV compliant card reader that prevents all known forms of skimming, the most prevalent type of ATM crime. ActivEdge™ can assist financial institutions avoid skimming-related fraud losses, which, according to the ATM Industry Association, totals more than \$2,000.0 annually worldwide. ActivEdge™ requires users to insert cards into the reader via the long edge, instead of the traditional short edge. The Company believes by shifting a card's angle 90 degrees, ActivEdge™ prevents modern skimming devices from reading the card's full magnetic strip, eliminating the devices' ability to steal card data. The Company continues to invest in supporting current and developing new services, software and security solutions that align with the needs of its customers.

Business Drivers

The business drivers of the Company's future performance include, but are not limited to:

- demand for services and software, including managed services and professional services;
- timing of self-service equipment upgrades and/or replacement cycles;
- demand for products and solutions related to bank branch automation opportunities;
- demand for security products and services for the financial and commercial sectors; and
- high levels of deployment growth for new self-service products in emerging markets.

Significant Highlights

In the fourth quarter of 2015, the Company announced its intention to acquire all 29.8 Wincor Nixdorf ordinary shares outstanding (33.1 total Wincor Nixdorf ordinary shares issued inclusive of 3.3 treasury shares) through a voluntary tender offer for €38.98 in cash and 0.434 common shares of the Company per Wincor Nixdorf ordinary share outstanding. The Company considered a number of factors in connection with its evaluation of the proposed transaction, including significant strategic opportunities and potential synergies, as generally supporting its decision to enter into the business combination agreement with Wincor Nixdorf. As of March 29, 2016, the Company confirmed that it received 68.9 percent of total Wincor Nixdorf ordinary shares issued inclusive of treasury shares (76.5 percent of all Wincor Nixdorf ordinary shares outstanding) for purposes of satisfying the minimum tender condition of the offer. On April 15, 2016, the Company announced the final results of the offer that 22.9 Wincor Nixdorf ordinary shares had been tendered by the end of the statutory additional acceptance period on April 12, 2016, which (together with 0.2 voting proxies held by the Company) represented 69.9 percent of total Wincor Nixdorf ordinary shares issued inclusive of treasury shares (77.5 percent of all Wincor Nixdorf ordinary shares outstanding). The closing of the offer remains subject to antitrust approval in Poland, the last country in which antitrust clearance is required as a closing condition, and is on target to close in the summer of 2016. The Company intends to finance the cash portion of the offer consideration as well as any Wincor Nixdorf debt outstanding with funds available under the Company's Credit Agreement and proceeds from the issuance and sale of the 2016 Senior Notes, which are required to be redeemed in the event that the offer has not closed by November 21, 2016. The Company will incur interest expense along with continuing to incur certain costs and fees, some of which will be payable even in the event the Acquisition is terminated or expires. Wincor Nixdorf has a fiscal year end of September 30 and is reported using IFRS, as issued by the EU. For the fiscal year ended September 30, 2015, Wincor Nixdorf recorded net sales of €2,427.0. For more information related to the Acquisition, the Company has filed a Registration Statement on Form S-4 with the SEC which was declared effective by the SEC on February 5, 2016.

On October 25, 2015, the Company entered into a definitive asset purchase agreement with Securitas Electronic Security to divest its electronic security business located in the United States and Canada for an aggregate purchase price of \$350.0 in cash, 10.0 percent of which was contingent based on the successful transition of certain customer relationships. The Company received the full payment of \$35.0 in the first quarter of 2016 now that all contingencies for this payment have been achieved. For the NA electronic security business to continue its growth, it would require resources and investment that the Company was not committed to make given its focus on the self-service market. The closing of the NA electronic security divestiture occurred on February 1, 2016 and the Company recorded a gain on sale, net of tax, of \$0.5 and \$149.6 for the three and six months ended June 30, 2016. The closing purchase price is subject to a customary working capital adjustment. The Company also agreed to provide certain transition services to Securitas Electronic Security after the closing, including providing Securitas Electronic Security a \$6.0 credit for such services, of which \$5.0 relates to a quarterly payment to Securitas Electronic Security and \$1.0 is a credit against payments due from Securitas Electronic Security. During the three and six months ended June 30, 2016, \$1.2 and \$2.5, respectively, were paid as part of the quarterly payments and \$0.7 and \$1.0, respectively, was used against amounts owed by Securitas Electronic Security. The operating results for the NA electronic security business were previously included in the Company's NA segment and have been reclassified to discontinued operations for all of the periods presented.

On March 13, 2015, the Company acquired all of the equity interests of Phoenix for a total purchase price of \$72.9, including \$12.6 of deferred cash payment payable over the next three years. Acquiring Phoenix, a leader in developing innovative multi-vendor software solutions for ATMs and a host of other FSS applications, is a foundational move to accelerate the Company's growth in the fast-growing managed services and branch automation spaces. The results of operations for Phoenix are primarily included in NA within the Company's condensed consolidated financial statements from the date of the acquisition.

As of March 31, 2015, the Company agreed to sell its equity interest in its Venezuela joint venture to its joint venture partner and recorded a \$10.3 impairment of assets in the first quarter of 2015. On April 29, 2015, the Company closed the sale for the estimated fair market value and recorded a \$1.0 reversal of impairment of assets based on final adjustments in the second quarter of 2015, resulting in a \$9.3 impairment of assets for the six months ended June 30, 2015. During the remainder of 2015, the Company incurred an additional \$0.4 related to uncollectible accounts receivable. The Company no longer has a consolidating entity in Venezuela but will continue to operate in Venezuela on an indirect basis.

Prior to the sale, the Company's Venezuela operations consisted of a fifty-percent owned subsidiary, which was consolidated. Venezuela was measured using the U.S. dollar as its functional currency because its economy is considered highly inflationary. On February 10, 2015, the Venezuela government introduced a new foreign currency exchange platform called the Marginal Currency System, or SIMADI, which replaced the SICAD 2 mechanism, yielding another significant increase in the exchange

rate. As of March 31, 2015, management determined it was unlikely that the Company would be able to convert bolivars under a currency exchange other than SIMADI and remeasured its Venezuela balance sheet using the SIMADI rate of 192.95 compared to the previous SICAD 2 rate of 50.86, which resulted in a loss of \$7.5 recorded within foreign exchange loss, net in the condensed consolidated statements of operations in the first quarter of 2015.

Results of Operations

The following discussion of the Company's financial condition and results of operations provides information that will assist in understanding the financial statements and the changes in certain key items in those financial statements. FSS sales in the three months ended June 30, 2016 decreased \$74.8 or 13.2 percent compared to the same period of 2015, including net unfavorable currency impact of \$17.0 or 2.7 percent. FSS sales in the six months ended June 30, 2016 decreased \$123.3 or 11.6 percent compared to the same period of 2015, including net unfavorable currency impact of \$44.9 or 3.9 percent. The unfavorable currency impacts in the three and six months ended June 30, 2016 were related mainly to the Brazil real as well as smaller impacts from the South Africa rand, Turkish lira, India rupee, China renminbi and Canada dollar. The following results include the impact of foreign currency:

- NA FSS sales in the three and six months ended June 30, 2016 decreased \$26.0 and \$29.1 or 10.6 and 6.5 percent, respectively, compared to the prior year periods. Unfavorable currency impact of \$1.7 and \$4.1 negatively influenced the three and six months ended June 30, 2016, respectively. Additionally, the decline in both time periods principally resulted from lower product and installation revenue in the U.S. regional bank space related to the wind down of the Agilis 3/Windows 7 upgrade project and lower volume in Canada as a result of a large deposit automation upgrade project that ended in the third quarter of 2015. These declines were partially offset by higher service revenue attributable to increased multi-vendor service contracts as well as increased product sales with our national customer portfolio.
- AP FSS sales in the three and six months ended June 30, 2016 declined \$23.9 and \$53.0 or 22.9 and 25.1 percent, respectively, compared to the prior year periods. Unfavorable currency impact of \$5.2 and \$11.7 contributed to the decrease

in the three and six months ended June 30, 2016, respectively. In addition, the decrease in both time periods was largely attributable to a decline in product revenue stemming from lower volume primarily in China, where the government continues to encourage banks to increase their use of domestic ATM suppliers. India also contributed to the decline due to lower product sales volume and the correlating installation service revenue along with a decrease in managed services revenue compared to the prior periods.

- EMEA FSS sales in the three months ended June 30, 2016 were flat compared to the prior year period and impacted by unfavorable currency of \$3.7. On a constant currency basis, service revenue increased primarily due to incremental installation services projects in Switzerland and France. In addition, lower product volume in Turkey as we completed a large project in the prior year and distributor channels which was partially offset by higher product project activity in the UK and in Africa. FSS sales in the six months ended June 30, 2016 compared to the same period of 2015 decreased \$1.2 or 0.6 percent. Unfavorable currency of \$9.2 adversely impacted the six months ended June 30, 2016. On a constant currency basis, sales increased \$8.0 as a result of higher installation and maintenance revenue across a majority of the region while product sales remained relatively flat.
- LA FSS sales in the three and six months ended June 30, 2016 decreased \$24.9 and \$40.0 or 22.4 and 19.3 percent, respectively, compared to the prior year periods. Unfavorable currency impact of \$6.4 and \$19.9 related to the Brazil real negatively impacted the three and six months ended June 30, 2016, respectively. On a constant currency basis, the decrease in both time periods was principally a result of volume declines in Brazil, Central America and Chile that were partially offset by higher volume in Mexico and regional distributor channels. In addition, Venezuela contributed to the decrease in revenue for the six months ended June 30, 2016 as the Company sold its equity interest in the joint venture in April of 2015.

Security sales in the three and six months ended June 30, 2016 decreased \$3.7 and \$12.1 or 4.9 and 8.4 percent, respectively, compared to the same period in 2015 and was impacted by \$0.7 and \$1.9 of unfavorable currency, respectively. In addition to the currency impact, NA physical security business decreased due to overall volume declines more heavily weighted in the national bank space when compared to the prior year. The electronic security business declined in both the three and six months ended June 30, 2016 primarily in LA attributable to lower sales in Chile and Ecuador, which was partially offset by the transition services revenue in NA as a sub-contractor to Securitas.

Brazil other sales in the three and six months ended June 30, 2016 increased \$14.0 and \$5.7, respectively due to an increase in election equipment sales and a reduction in both information technology and lottery sales compared to the same prior year periods. Unfavorable currency impact of \$0.2 and \$3.3 adversely influenced the three and six months ended June 30, 2016.

Gross Profit

Service gross margins for the three and six months ended June 30, 2016 were relatively flat as favorable service gross margins and profit in EMEA and NA, driven primarily by higher service volume, were partially offset by declines in AP related to customer service level agreement contract requirements in India and sales price reductions in Thailand. Additionally, LA declined due to revenue mix and restructuring charges of \$1.3. In the three and six months ended June 30, 2016, service gross profit included restructuring charges of \$1.4 and \$1.7, respectively, compared to \$1.1 in both the three and six months ended June 30, 2015.

The decrease in product gross margin for the three months ended June 30, 2016 compared to the same period in 2015 was mainly due to lower volume combined with an unfavorable blend of country revenue and product solution mix as well as deteriorating market conditions in China. The decrease in product gross margin in the six months ended June 30, 2016 was due to the previously mentioned reasons for the decline in the three months ended June 30, 2016 with the exception of LA which had a product gross margin increase of 2.4 percent attributable to a favorable change in product solution mix in Brazil. Product gross profit included total restructuring charges and non-routine expenses of \$0.3 and \$0.6 in the three and six months ended June 30, 2016, respectively, compared to total restructuring charges and non-routine expenses of \$1.8 in both the three and six months ended June 30, 2015.

Operating Expenses

The following table represents information regarding our operating expenses:

	Three Months Ended			Six Months Ended		
	June 30,			June 30,		
	2016	2015	% Change	2016	2015	% Change
Selling and administrative expense	\$ 127.3	\$ 124.9	1.9	\$ 252.9	\$ 245.4	3.1
Research, development and engineering expense	17.6	23.9	(26.4)	36.1	46.2	(21.9)
Impairment of assets	—	(0.5)	100.0	—	18.9	(100.0)
(Gain) loss on sale of assets, net	(0.1)	(1.6)	93.8	0.3	(1.5)	N/M
Total operating expenses	\$ 144.8	\$ 146.7	(1.3)	\$ 289.3	\$ 309.0	(6.4)

The increase in selling and administrative expense in the three and six months ended June 30, 2016 compared to the same period of 2015 primarily resulted from higher non-routine charges. These increases were partially offset by favorable selling expense primarily related to the recovery of bad debt expense in Brazil, lower IT and marketing expense tied to transformation initiatives and a favorable currency impact. Non-routine expenses of \$17.9 and \$4.9 were included in the three months ended June 30, 2016 and 2015, respectively. The primary component of the non-routine expenses in the three months ended June 30, 2016 pertained to acquisition and divestiture costs totaling \$14.5 as well as \$3.4 of legal, indemnification and professional fees related to the corporate monitor. Selling and administrative expense included restructuring charges of \$3.7 and \$4.7 in the three months ended June 30, 2016 and 2015, respectively. Non-routine expenses of \$31.7 and \$9.5 were included in the six months ended June 30, 2016 and 2015, respectively. The primary component of the non-routine expenses in the six months ended June 30, 2016 pertained to acquisition and divestiture costs totaling \$25.5 as well as \$6.2 of legal, indemnification and professional fees related to the corporate monitor. Selling and administrative expense included restructuring charges of \$3.6 and \$7.3 in the six months ended June 30, 2016 and 2015, respectively.

Research, development and engineering expense as a percent of net sales in the three and six months ended June 30, 2016 were 3.0 percent and 3.3 percent, respectively, compared with the same periods in 2015, which were 3.7 percent and 3.8 percent, respectively. The decrease in the three and six months ended June 30, 2016 is primarily related to lower reinvestment associated with transformation initiatives compared to the same prior year period. The six months ended June 30, 2016 was partially offset by an increase in incremental expense associated with the Phoenix business operations.

The (gain) loss on sale of assets in the three and six months ended June 30, 2015 was primarily due to the sale of a building in NA.

The change in operating profit for the three and six months ended June 30, 2016 compared to the same periods in 2015 were driven by a decline in product gross profit associated with volume declines and country revenue mix in all of the regions as well as the deteriorating market conditions in China, while service gross profit remained relatively flat. Additionally, a decline in operating expense helped to partially offset the decrease in gross profit primarily due to lower selling and R&D expense offset by higher non-routine charges.

Other (Expense) Income

The following table represents information regarding our other (expense) income, net:

	Three Months Ended			Six Months Ended		
	June 30,			June 30,		
	2016	2015	% Change	2016	2015	% Change
Interest income	\$ 6.3	\$ 6.8	(7.4)	\$ 11.2	\$ 14.7	(23.8)

Other (expense) income, net	<u>\$ (46.0)</u>	<u>\$ (1.2)</u>	N/M	<u>\$ (20.4)</u>	<u>\$ (11.7)</u>	(74.4)

The decrease in interest income in the three and six months ended June 30, 2016, compared with the same period in 2015, was driven primarily by unfavorable currency impact and a decrease in customer financing in Brazil. Interest expense in the three and six months ended June 30, 2016 was higher than the prior year periods associated with the financing required for the Acquisition. The foreign exchange loss, net for the three months ended June 30, 2016 was flat compared to 2015. During the six months ended June 30, 2015, foreign exchange loss, net included \$7.5 related to the devaluation of Venezuela currency. Miscellaneous, net in the three months ended June 30, 2016 included a mark-to-market loss of \$22.7 associated with the Company's foreign currency forward contract entered into on April 29, 2016 and \$6.3 in financing fees related to the Company's bridge financing required for the debt undertaken for the acquisition of Wincor Nixdorf. In addition, the six months ended June 30, 2016 included a mark-to-market gain of \$35.6 associated with the Company's foreign currency option contracts entered into on November 23, 2015.

(Loss) Income From Continuing Operations, Net of Tax

The following table represents information regarding our (loss) income from continuing operations, net of tax:

	Three Months Ended			Six Months Ended		
	June 30,			June 30,		
	2016	2015	% Change	2016	2015	% Change
(Loss) income from continuing operations, net of tax	\$ (20.8)	\$ 19.7	N/M	\$ (0.1)	\$ 9.6	N/M
Percent of net sales	(3.6)%	3.1%		— %	0.8 %	
Effective tax rate	41.7 %	13.6%		99.4 %	(3.2)%	

(Loss) income from continuing operations, net of tax was \$(20.8) and \$19.7 for the three months ended June 30, 2016 and 2015, respectively, and was \$(0.1) and \$9.6 for the six months ended June 30, 2016 and 2015, respectively. The decrease is primarily due to the reasons described above and the change in income tax (benefit) expense.

The tax rate on the loss for the three and six months ended June 30, 2016 increased due to the recognition of favorable discrete items, including the release of an uncertain tax position and discrete expenses related to the Acquisition. The tax rate for these periods was also increased by a reduction in the deferred tax liability associated with the Company's undistributed foreign subsidiary earnings. The foreign currency hedges related to the Acquisition generated a loss for the three months ended June 30, 2016 and a net gain for six months ended June 30, 2016. The non-taxable treatment of these hedges had the impact of decreasing the rate in the three months ended June 30, 2016 and increasing the rate for the six months ended June 30, 2016. The tax rate on income for the three and six months ended June 30, 2015 benefited from a release of an uncertain tax position due to the expiration of the statute of limitations. Additionally, the tax rate for the six months ended June 30, 2015 benefited from discrete tax items related to the Venezuela divestiture and the release of a valuation allowance.

Income From Discontinued Operations, Net of Tax

Income from discontinued operations, net of tax was \$0.5 and \$4.2 for the three months ended June 30, 2016 and 2015, respectively, and was \$148.3 and \$8.7 for the six months ended June 30, 2016 and 2015, respectively. The closing of the NA electronic security divestiture occurred on February 1, 2016 and the Company recorded a gain on sale, net of tax, of \$0.5 and \$149.6 for the three and six months ended June 30, 2016. The closing purchase price is subject to a customary working capital adjustment which is expected to be finalized in the third quarter of 2016. Additionally, the income from discontinued operations, net of tax includes a net loss of \$1.3 as a result of the operations included through February 1, 2016 and net income of \$4.2 and \$8.7 for the three and six months ended June 30, 2015, respectively.

Net (Loss) Income

Net (loss) income decreased \$44.2 to a net loss of \$20.3 for the three months ended June 30, 2016, compared to income of \$23.9 for the same period in 2015, and increased \$129.9 to net income of \$148.2 for the six months ended June 30, 2016, compared to income of \$18.3 for the same period in 2015, due to the reasons described above.

Segment Revenue and Operating Profit Summary

The following tables represent information regarding our revenue and operating profit by reporting segment:

North America	Three Months Ended			Six Months Ended

Segment operating profit margin	22.9%	22.1%		22.1%	22.8%	

NA revenue in the three and six months ended June 30, 2016 decreased compared to the prior year period primarily due to lower product revenue in the Canadian and U.S. regional FSS businesses as well as lower revenue from physical security. These decreases were partially offset by higher service revenue in the U.S. as a result of increased multi-vendor service contracts, higher product sales with our national customer portfolio and the incremental benefit from Phoenix business operations. Segment operating profit decreased in both the three and six months ended June 30, 2016 due to lower product volume and unfavorable customer and product solution mix in the U.S., which adversely impacted gross profit and was partially offset by an increase in service gross profit driven by higher volume and incremental profit from Phoenix. Segment operating profit was also impacted by higher operating expense in both the three and six months ended June 30, 2016. In the three and six months ended June 30, 2015, segment operating profit was higher primarily due to the gain on sale of the Company's Lexington, North Carolina manufacturing plant. The six months ended June 30, 2016 included incremental operating expense associated with Phoenix.

AP revenue in the three and six months ended June 30, 2016 decreased from the prior year comparable periods mainly as a result of a decline in product revenue stemming from lower volume particularly in China, where the government continues to encourage banks to increase their use of domestic ATM suppliers. India also contributed to the decline due to lower product sales volume and corresponding installation service revenue as well as a decrease in managed services revenue. Revenue for the three and six months ended June 30, 2016 was also adversely impacted by unfavorable currency of \$5.5 and \$12.2, respectively. Segment operating profit in the three and six months ended June 30, 2016 compared to the same periods of 2015 decreased from a combination of lower product gross profit primarily driven by volume declines and deteriorating market conditions in China and lower service gross profit related to customer service level agreement contract requirements in India.

EMEA revenue in the three and six months ended June 30, 2016 was relatively flat compared to the prior year periods due to unfavorable currency impact of \$3.7 and \$9.2, respectively. Excluding currency impact, the three months ended June 30, 2016 increased \$4.1, or 4.0 percent, due to higher service revenue primarily in Switzerland and France. In addition, lower product volume in Turkey and with our distributor channels was partially offset by higher product volume in the UK and in Africa. In the six months ended June 30, 2016, revenue increased \$8.4, in constant currency, as a result of higher installation and contract service sales across a majority of the region while product sales remained relatively flat. Additionally, a significant increase in product volume in Switzerland was offset by a decline from the remaining region. Segment operating profit increased in the three months ended June 30, 2016 mainly due to higher service volume which was partially offset by a decrease in product gross profit mainly attributable to a volume decline and unfavorable product mix in our European distributor channels. In the six months ended June 30, 2016, segment operating profit was relatively flat compared to the prior year and increased \$1.3 in constant currency driven by higher service gross profit.

LA revenue decreased in the three and six months ended June 30, 2016 mainly driven by unfavorable currency impact related to the Brazil real of \$7.0 and \$24.5, respectively. On a constant currency basis, the decrease in both time periods resulted from lower FSS revenue in Brazil which was only partially offset by Brazil election systems and higher FSS volumes from Mexico and Argentina distributors. Segment operating profit in the three and six months ended June 30, 2016 increased as Brazil stabilized and lower product and service gross profit was more than offset by favorable operating expense which benefited from bad debt recovery and cost control measures.

Restricted cash	1,823.0	—
Short-term investments	26.6	39.9
Total cash and cash availability	<u>\$ 2,492.6</u>	<u>\$ 774.5</u>

Capital resources are obtained from income retained in the business, borrowings under the Company's senior notes, committed and uncommitted credit facilities and operating and capital leasing arrangements. Management expects that the Company's capital resources will be sufficient to finance planned working capital needs, research and development activities, investments in facilities or equipment, pension contributions, the payment of dividends on the Company's common shares and any repurchases of the Company's common shares for at least the next 12 months. As of June 30, 2016, \$298.4 or 82.4 percent of the Company's unrestricted cash and cash equivalents and short-term investments reside in international tax jurisdictions. Repatriation of these funds could

be negatively impacted by potential payments for foreign and domestic taxes. The Company has approximately \$150.0 that is available for repatriation with no additional tax expense as the Company has already provided for such taxes. Part of the Company's growth strategy is to pursue acquisitions complementary to the Company's future structure. The Company has made acquisitions in the past and intends to make acquisitions in the future. The Company intends to finance any future acquisitions with either cash and short-term investments, cash provided from operations, borrowings under available credit facilities, proceeds from debt or equity offerings and/or the issuance of common shares. The Company has successfully obtained the appropriate financing for the Acquisition with the revolver and term loans under the Credit Agreement and the 2016 Senior Notes.

The following table summarizes the results of our condensed consolidated statement of cash flows for the six months ended June 30:

<i>Summary of cash flows:</i>	2016	2015
Net cash used by operating activities - continuing operations	\$ (200.0)	\$ (99.4)
Net cash used by investing activities - continuing operations	(1,724.5)	(82.5)

Operating Activities

Cash flows from operating activities can fluctuate significantly from period to period as working capital needs and the timing of payments for income taxes, restructuring activities, pension funding and other items impact reported cash flows.

Net cash used by operating activities - continuing operations was \$200.0 for the six months ended June 30, 2016, an increase of \$100.6 from \$99.4 for the same period in 2015.

- The aggregate of trade accounts receivable, inventories and accounts payable used \$167.4 in operating cash flows during the six months ended June 30, 2016, compared to \$131.4 used during the same period of 2015. In general, the amount of cash flow provided or used by the aggregate of trade accounts receivable, inventories and trade accounts payable depends upon how effectively the Company manages the cash conversion cycle, which represents the number of days that elapse from the day it pays for the purchase of raw materials and components to the collection of cash from its customers and can be significantly impacted by the timing of collections and payments in a period. The accounts receivable use is lower due to an increase in collections compared to the prior year same period. Inventory was relatively consistent year over year. Accounts payable use is higher due to increased payments primarily in NA related to deal costs and reductions in purchases.
- In the aggregate the other combined certain assets and liabilities used \$60.7 of operating cash during the six months ended June 30, 2016, compared to \$44.3 provided in the same period of 2015. The decrease is primarily due to a reduction in collections of finance receivables and warranty accruals.
- Net income for the six months ended June 30, 2016 increased \$129.9, which is primarily attributable to the gain from the NA electronic security business divestiture. Net (loss) income from continuing operations, net of tax, decreased \$(9.7) primarily due to the increase in interest expense as a result of higher average outstanding borrowings during 2016 compared to the same period of 2015.

On November 23, 2015, the Company entered into two foreign currency option contracts to purchase €1,416.0 for \$1,547.1 to hedge against the effect of exchange rate fluctuations on the euro-denominated cash consideration related to the Acquisition and estimated euro denominated deal related costs and any outstanding Wincor Nixdorf borrowings. At that time, the cash component of the purchase price consideration approximated €1,162.2. The foreign currency option contracts were sold during the second quarter of 2016 for cash proceeds of \$42.6 which are included in investing activities in the condensed consolidated statements of cash flows resulting in a gain of \$35.6 during the six months ended June 30, 2016 and \$7.0 during the fourth quarter of 2015. The weighted average strike price was \$1.09 per euro. These foreign currency option contracts were non-designated and included in other current assets as of December 31, 2015 based on the net asset position.

On April 29, 2016, the Company entered into one foreign currency forward contract to purchase €713.0 for \$820.9 to hedge against the effect of exchange rate fluctuations on the euro-denominated cash consideration related to the Acquisition and estimated euro denominated deal related costs and any outstanding Wincor Nixdorf borrowings. The forward rate is \$1.1514. This foreign currency forward contract is non-designated and included in other current assets or other current liabilities based on the net asset or net liability position, respectively, in the condensed consolidated balance sheets. The gains and losses from the revaluation of the foreign currency forward contract are included in other (expense) income miscellaneous, net on the condensed consolidated statements of operations.

During the three and six months ended June 30, 2016, the Company recorded a \$(23.6) and \$12.9, respectively, mark-to-market (loss) gain on foreign currency and forward option contracts reflected in miscellaneous, net. The fair value of the Company's foreign currency forward and option contracts were \$(22.7) as of June 30, 2016 and \$7.0 as of December 31, 2015, respectively, and are included in other current liabilities and other current assets, respectively.

Investing Activities

Net cash used by investing activities - continuing operations was \$1,724.5 for the six months ended June 30, 2016 compared to net cash used by investing activities of \$82.5 for the same period in 2015. The \$1,642.0 change was primarily related to the 2016 activities related to \$1,768.1 restricted cash to be used for the Acquisition offset by the \$42.6 proceeds from sale of foreign currency option contract. In March 2015, payments for acquisition, net of cash acquired of \$59.4 related to the acquisition Phoenix.

Financing Activities

Net cash provided by financing activities was \$1,584.9 for the six months ended June 30, 2016 compared to net cash provided by financing activities of \$122.6 for the same period in 2015 for a period over period increase of \$1,462.3. The change was primarily due to the period over period increase of \$1,521.4 in debt borrowings, net of repayments and \$11.2 debt issuance costs associated with the debt borrowings for the Acquisition.

The cash flows related to debt borrowings and repayments were as follows:

Effect of exchange rate changes on cash and cash equivalents was negatively impacted by \$9.5 related to the currency devaluation in Venezuela for the six months ended June 30, 2015.

Debt As of June 30, 2016, the Company had various international short-term uncommitted lines of credit with borrowing limits of \$113.5. The weighted-average interest rate on outstanding borrowings on the short-term uncommitted lines of credit as of June 30, 2016 and December 31, 2015 was 10.49 percent and 5.66 percent, respectively. Short-term uncommitted lines mature in less than one year. The amount available under the short-term uncommitted lines at June 30, 2016 was \$97.5.

The Company entered into a revolving and term loan credit agreement (the Credit Agreement), dated as of November 23, 2015, among the Company and certain of the Company's subsidiaries, as borrowers, JPMorgan Chase Bank, N.A., as Administrative Agent, and the lenders named therein. The Credit Agreement included, among other things, mechanics for the Company's existing revolving and term loan A facilities to be refinanced under the Credit Agreement. On December 23, 2015, the Company entered into a Replacement Facilities Effective Date Amendment among the Company, certain of the Company's subsidiaries, the lenders identified therein and JPMorgan Chase Bank, N.A., as Administrative Agent, pursuant to which the Company refinanced its existing \$520.0 revolving and \$230.0 term loan A senior unsecured credit facilities (which have been terminated and repaid in full) with, respectively, a new unsecured revolving facility (the Revolving Facility) in an amount of up to \$520.0 and a new (non-delayed draw) unsecured Term Loan A Facility on substantially the same terms as the Delayed Draw Term Facility (as defined in the Credit Agreement) in the amount of up to \$230.0. The Delayed Draw Term Facility of \$250.0 may be drawn up to one year after the closing date of the Acquisition. The Revolving Facility and Term Loan A Facility will be subject to the same maximum consolidated net leverage ratio and minimum consolidated interest coverage ratio as the Delayed Draw Term Facility. On December 23, 2020, the Term Loan A Facility will mature and the Revolving Facility will automatically terminate. The weighted-average interest rate on outstanding revolving credit facility borrowings as of June 30, 2016 and December 31, 2015 was 1.88 percent and 2.33 percent, respectively, which is variable based on the LIBOR. The amount available under the revolving credit facility as of June 30, 2016 was \$210.0.

On April 19, 2016, the Company issued \$400.0 aggregate principal amount of the 2016 Senior Notes in an offering exempt from the registration requirements of the Securities Act of 1933 in connection with the Acquisition. The 2016 Senior Notes are and will be guaranteed by certain of the Company's existing and future domestic subsidiaries. If the Acquisition has not closed by November 21, 2016, the Company will be required to redeem the 2016 Senior Notes in whole at a redemption price equal to 100 percent of the aggregate principal amount, plus accrued and unpaid interest to, but excluding, the redemption date.

Also in April 2016, allocation and pricing of the Term Loan B Facility provided under the Credit Agreement (which Term Loan B Facility is intended to provide part of the financing for the Acquisition) was completed. The Term Loan B Facility consists of a \$1,000.0 U.S. dollar-denominated tranche that bears interest at LIBOR plus an applicable margin of 4.50 percent (or, at the Company's option, prime plus an applicable margin of 3.50 percent), and a €350.0 euro-denominated tranche that will bear interest at EURIBOR plus an applicable margin of 4.25 percent. Each tranche funded during the second quarter of 2016 at 99 percent of par.

The Company incurred \$10.4 and \$11.2 of fees in the three and six months ended June 30, 2016, respectively, related to the debt, which are amortized as a component of interest expense over the terms.

Following the close of the Acquisition, the debt facilities under the Credit Agreement will be secured by substantially all assets of the Company and its domestic subsidiaries that are borrowers or guarantors under the Credit Agreement, subject to certain exceptions and permitted liens.

In March 2006, the Company issued the 2006 Senior Notes in an aggregate principal amount of \$300.0. The Company funded the repayment of \$75.0 aggregate principal amount of the 2006 Senior Notes at maturity in March 2013 using borrowings under its revolving credit facility and the repayment of \$175.0 aggregate principal amount of the Company's 2006 Senior Notes which matured in March 2016 through the use of proceeds from the divestiture of the Company's NA electronic security business. Prepayment of the remaining \$50.0 aggregate principal amount of the 2006 Senior Notes were paid in full on May 2, 2016. The prepayment included a make-whole premium of \$3.9 which was paid in addition to the principal and interest of the 2006 Senior Notes and is included in interest expense for the six months ended June 30, 2016.

The Company's financing agreements contain various restrictive financial covenants, including net debt to capitalization, net debt to EBITDA and net interest coverage ratios. As of June 30, 2016, the Company was in compliance with the financial and other covenants in its debt agreements.

Restricted Cash As of June 30, 2016, the Company had \$1,823.0 in restricted cash to be used for the cash portion of the Acquisition, paying off existing debt and related interest, as well as any deal costs pursuant to the terms of the Credit Agreement. The carrying value of restricted cash approximates its fair value and is included in cash flows from investing and financing activities. Restricted cash in investing activities consists of the proceeds from the debt borrowings related to the Acquisition. Restricted cash in financing activities consists of the domestic net proceeds from the NA electronic security divestiture offset by the \$175.0 and \$50.0 payment of the 2006 Senior Notes during the first and second quarter of 2016, respectively. Restricted cash is expected to fully utilized or unrestricted no later than the fourth quarter of 2016.

Dividends The Company paid dividends of \$38.0 and \$37.8 in the six months ended June 30, 2016 and 2015, respectively. Quarterly dividends were \$0.2875 per share for both periods. The Company announced during the fourth quarter of 2015 its intention to pay a dividend at a rate less than the Company's current annual dividend rate following the close of the Acquisition which is expected during the third quarter of 2016.

Contractual Obligations In the first six months of 2015, the Company entered into purchase commitments due within one year for materials through contract manufacturing agreements for a total negotiated price. At June 30, 2016, the Company had purchase commitments due within one year totaling \$6.8 for materials through contract manufacturing agreements at negotiated prices.

The Company has funded the term loans available under the Credit Agreement and issued \$400.0 aggregate principal amount of the 2016 Senior Notes. Refer to the aforementioned debt section for more details.

Except for the items noted above, all contractual cash obligations with initial and remaining terms in excess of one year and contingent liabilities remained generally unchanged at June 30, 2016 compared to December 31, 2015.

Off-Balance Sheet Arrangements The Company enters into various arrangements not recognized in the condensed consolidated balance sheets that have or could have an effect on its financial condition, results of operations, liquidity, capital expenditures or capital resources. The principal off-balance sheet arrangements that the Company enters into are guarantees, operating leases and sales of finance receivables. The Company provides its global operations guarantees and standby letters of credit through various financial institutions to suppliers, regulatory agencies and insurance providers. If the Company is not able to make payment, the suppliers, regulatory agencies and insurance providers may draw on the pertinent bank. Refer to note 13 to the condensed consolidated financial statements for further details of guarantees. The Company has sold finance receivables to financial institutions while continuing to service the receivables. The Company records these sales by removing finance receivables from the condensed consolidated balance sheets and recording gains and losses in the condensed consolidated statements of operations.

Critical Accounting Policies and Estimates

Management's discussion and analysis of the Company's financial condition and results of operations are based upon the Company's condensed consolidated financial statements. The preparation of these financial statements requires management to make estimates and assumptions about future events. These estimates and the underlying assumptions affect the amounts of assets and liabilities reported, disclosures about contingent assets and liabilities and reported amounts of revenues and expenses. Such estimates include revenue recognition, the valuation of trade, finance lease receivables, inventories, goodwill, intangible assets, other long-lived assets, legal contingencies, guarantee obligations and assumptions used in the calculation of income taxes, pension and post-retirement benefits and customer incentives, among others. These estimates and assumptions are based on management's best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors. Management monitors the economic conditions and other factors and will adjust such estimates and assumptions when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates.

Management believes there have been no significant changes during the six months ended June 30, 2016 to the items that the Company disclosed as its critical accounting policies and estimates in Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's annual report on Form 10-K for the year ended December 31, 2015.

Forward-Looking Statement Disclosure

In this quarterly report on Form 10-Q, statements that are not reported financial results or other historical information are "forward-looking statements." Forward-looking statements give current expectations or forecasts of future events and are not guarantees of future performance. These forward-looking statements relate to, among other things, the Company's future operating performance, the Company's share of new and existing markets, the Company's short- and long-term revenue and earnings growth rates, and the Company's implementation of cost-reduction initiatives and measures to improve pricing, including the optimization of the Company's manufacturing capacity.

The use of the words "will," "believes," "anticipates," "expects," "intends" and similar expressions is intended to identify forward-looking statements that have been made and may in the future be made by or on behalf of the Company. Although the Company believes that these forward-looking statements are based upon reasonable assumptions regarding, among other things, the economy, its knowledge of its business, and on key performance indicators that impact the Company, these forward-looking statements involve risks, uncertainties and other factors that may cause actual results to differ materially from those expressed in or implied by the forward-looking statements. The Company is not obligated to update forward-looking statements, whether as a result of new information, future events or otherwise.

- variations in consumer demand for FSS technologies, products and services;
- potential disruptions, breaches or other violations of the Company's information technology systems;
- the investment performance of the Company's pension plan assets, which could require the Company to increase its pension contributions, and significant changes in healthcare costs, including those that may result from government action;
- the amount and timing of repurchases of the Company's common shares, if any; and
- the Company's ability to achieve benefits from its cost-reduction initiatives and other strategic changes as well as its business process outsourcing initiative.

Item 3: Quantitative and Qualitative Disclosures About Market Risk

On November 23, 2015, the Company entered into two foreign currency option contracts to purchase €1,416.0 for \$1,547.1 to hedge against the effect of exchange rate fluctuations on the euro-denominated cash consideration related to the Acquisition and estimated euro denominated deal related costs and any outstanding Wincor Nixdorf borrowings. At the time, the cash component of the purchase price consideration approximated €1,162.2. The foreign currency option contracts were sold during the second quarter of 2016 for cash proceeds of \$42.6 which are included in investing activities in the condensed consolidated statements of cash flows resulting in a gain of \$35.6 during the six months ended June 30, 2016 and \$7.0 during the fourth quarter of 2015. The weighted average strike price was \$1.09 per euro. These foreign currency option contracts were non-designated and included in other current assets on the condensed consolidated balance sheets as of December 31, 2015 based on the net asset position.

On April 29, 2016, the Company entered into one foreign currency forward contract to purchase €713.0 for \$820.9 to hedge against the effect of exchange rate fluctuations on the euro-denominated cash consideration related to the Acquisition and estimated euro denominated deal related costs and any outstanding Wincor Nixdorf borrowings. The forward rate is \$1.1514. This foreign currency forward contract is non-designated and included in other current assets or other current liabilities based on the net asset or net liability position, respectively, in the condensed consolidated balance sheets. The gains and losses from the revaluation of the foreign currency forward contract are included in other (expense) income miscellaneous, net on the condensed consolidated statements of operations. Item 4: Controls and Procedures

This quarterly report on Form 10-Q includes the certifications of our chief executive officer (CEO) and chief financial officer (CFO) required by Rule 13a-14 of the Securities Exchange Act of 1934 (the Exchange Act). See Exhibits 31.1 and 31.2. This Item 4 includes information concerning the controls and control evaluations referred to in those certifications.

Based on the performance of procedures by management, designed to ensure the reliability of financial reporting, management believes that the unaudited condensed consolidated financial statements fairly present, in all material respects, the Company's financial position, results of operations and cash flows as of the dates, and for the periods presented.

Disclosure Controls and Procedures

Disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) promulgated under the Exchange Act) are designed to ensure that information required to be disclosed in the reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to management, including the CEO and CFO as appropriate, to allow timely decisions regarding required disclosures.

In connection with the preparation of this quarterly report on Form 10-Q, the Company's management, under the supervision and with the participation of the CEO and CFO, conducted an evaluation of disclosure controls and procedures as of the end of the period covered by this report. Based on this evaluation, the CEO and CFO have concluded that such disclosure controls and procedures were effective as of June 30, 2016.

Change in Internal Controls

We continued a phased implementation of enterprise resource planning systems in our NA operations, a portion of which was completed during 2015 and the balance expected to be substantially completed during 2016. We believe we are maintaining and monitoring appropriate internal controls during the implementation period. During the quarter ended June 30, 2016, there have been no other changes in our internal control over financial reporting during the period covered by this quarterly report on 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II – Other Information

Item 1: Legal Proceedings

At June 30, 2016, the Company was a party to several lawsuits as well as several routine indirect tax claims from various taxing authorities globally that were incurred in the normal course of business, which neither individually nor in the aggregate are considered material by management in relation to the Company's financial position or results of operations. In addition, the Company has indemnification obligations with certain former employees and costs associated with these indemnifications are expensed as incurred. In management's opinion, the Company's condensed consolidated financial statements would not be materially affected by the outcome of those legal proceedings, commitments or asserted claims.

For more information regarding legal proceedings, please refer to Part I, Item 3 of the Company's annual report on Form 10-K for the year ended December 31, 2015. There have been no material developments with respect to the legal proceedings reported in the Company's annual report on Form 10-K for the year ended December 31, 2015.

Item 1A: Risk Factors

Refer to the Company's annual report on Form 10-K for the year ended December 31, 2015. Except as presented below, there has been no material change to this information since December 31, 2015.

Economic conditions and regulatory changes leading up to and following the United Kingdom's likely exit from the European Union could have a material adverse effect on our business and results of operations.

Following a referendum in June in which voters in the United Kingdom (U.K.) approved an exit from the European Union (EU), it is expected that the U.K. government will initiate a process to leave the EU (often referred to as Brexit) and begin negotiating the terms of the U.K.'s future relationship with the EU. The Company faces uncertainty regarding the impact of the likely exit of the U.K. from the EU. Adverse consequences such as deterioration in global economic conditions, stability in global financial markets, volatility in currency exchange rates or adverse changes in regulation of the cross-border agreements could have a negative impact on our operations, financial condition and results of operations.

Item 2: Unregistered Sales of Equity Securities and Use of Proceeds

Information concerning the Company's share repurchases made during the second quarter of 2016:

Period	Total Number of Shares Purchased ⁽¹⁾	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans ⁽²⁾	Maximum Number of Shares that May Yet Be Purchased Under the Plans (2)
April	2,554	\$ 28.58	—	2,426,177

June	9,776	\$ 26.38	—	2,426,177
Total	<u>21,617</u>	<u>\$ 26.61</u>	<u>—</u>	

⁽¹⁾ All shares were surrendered or deemed surrendered to the Company in connection with the Company's share-based compensation plans.

⁽²⁾ The total number of shares repurchased as part of the publicly announced share repurchase plan since its inception was 13,450,772 as of June 30, 2016. The plan was approved by the Board of Directors in 1997. The Company may purchase shares from time to time in open market purchases or privately negotiated transactions. The Company may make all or part of the purchases pursuant to accelerated share repurchases or Rule 10b5-1 plans. The plan has no expiration date. The following table provides a summary of Board of Directors approvals to repurchase the Company's outstanding common shares:

	Total Number of Shares Approved for Repurchase

CERTIFICATION OF CHIEF EXECUTIVE OFFICER
PURSUANT TO SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

I, Andreas W. Mattes, certify that:

- 1) I have reviewed this quarterly report on Form 10-Q of Diebold, Incorporated;
- 2) Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3) Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
- 4) The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
- 5) The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
