Significant silver grades intersected with 962 g/t over 9.75 m

Hole DSB-75 yielded the highest-grade and longest silver intersection recorded by Eloro Resources to date in the definition drill program within the potential Santa Barbara starter pit area of the Iska Iska silver-tin polymetallic project in Bolivia. The drill hole returned 135 meters grading 151.47 g/t Ag (from 174 m to 309 m) within a broader 309-meter section averaging 90.92 g/t Ag (from 174 m to 483 m). Notably, the high-grade interval in hole DSB-75 includes 9.75 m at 962.23 g/t Ag within a wider 34.50-meter zone grading 440.09 g/t Ag.

This indicates that as definition drilling has expanded to cover a larger area in Santa Barbara, the concentration of high-grade silver values exceeding 50 g/t Ag has increased significantly. Additionally, the drilling data suggest that high-grade silver mineralization is likely quite extensive and that Iska Iska has strong potential for open-pit mining, which, in our view, could enable more economically attractive extraction.

We reiterate our Buy rating and raise our price target to CAD 12.50 from CAD 12.40 per share, adjusted for a higher number of shares and a more favourable USD/CAD exchange rate, representing a significant upside from the current share price of CAD 0.86. Our price target is based on the in-situ valuation of the Santa Barbara Breccia Pipe within the Iska Iska property in Bolivia, while fully excluding all other assets. Focusing on the higher-grade mineral resource, we estimate a net asset value (NAV) of USD 1,236 million. Applying a 0.70x multiple to our NAVPS estimate, we arrive at a target price of CAD 12.50 per share, indicating a potential 1,273.6% increase relative to the latest share price of CAD 0.91. We view the pullback in the company's share price as an attractive entry opportunity for long-term investors, driven in part by erratic analyst downgrades and misunderstandings regarding the intrinsic value of the Iska Iska project. Additionally, we emphasize that our price target could rise further once the recently reported higher tin and silver grades are incorporated into the planned PEA. Additionally, given the fundamental undervaluation of the stock, we consider Eloro Resources a potential takeover candidate.

* Silver equivalent grades are calculated using 3-year average metal prices Ag = USD 24.14/oz, Zn = USD 1.36/lb, Pb = USD 0.98/lb and Sn = USD 13.74/lb, and preliminary metallurgical recoveries of Ag = 88%, Zn = 87%, Pb= 80% and Sn = 50%.

As definition drilling has expanded to cover additional areas in the Santa Barbara region, the density of high-grade silver values greater than 50 g/t has significantly increased, highlighting the importance of tighter drill spacing to obtain a more accurate grade estimate (see exhibit 1):

Value of Equity CAD 12.50 per share

We reiterate our Buy rating and raise our price target to CAD 12.50 from CAD 12.40 per share, adjusted for a higher number of shares and a more favourable USD/CAD exchange rate, representing a significant upside from the current share price of CAD 0.91. Our price target is based on the in-situ valuation of the Santa Barbara Breccia Pipe within the Iska Iska property in Bolivia, while fully excluding all other assets. Focusing on the higher-grade mineral resource, we estimate a net asset value (NAV) of USD 1,236 million. Applying a 0.70x multiple to our NAVPS estimate, we arrive at a target price of CAD 12.50 per share, indicating a potential 1,273.6% increase relative to the latest share price of CAD 0.91.

Valuation assumptions

We value Eloro Resources based on the in-situ value of its Santa Barbara Breccia Pipe, focusing on the higher-grade mineral resource. Given the current market prices for zinc, lead, and silver, we calculate revenues of USD 2,916 (per metric ton), USD 2,031 (per metric ton), and USD 0.97 (per gram), respectively, resulting in average revenues per tonne of USD 66.20.

TABLE 2: CALCULATION OF AVERAGE REVENUES PER TONNE

High grade zone		Zinc (Sn)	Lead (Pb)	Silver (Ag)
Grades		1.11%	0.50%	24.3
Price	USD per metric ton/USD per gram	2,915.76	2,031.20	0.97
Revenue per metric ton	USD	32.40	10.20	23.60
Average revenues per metric ton	USD			66.20

SOURCE: SPHENE CAPITAL FORECAST

It is noteworthy, in our view, that significant upside potential could arise from the silver grades in the starter pit, which are expected to increase along with tonnages as a result of the recent infill drilling campaign.

Applying an NSR cut-off of USD 25 per tonne, the polymetallic area contains 132 million tonnes. Using an economically usable share of 30% of the tonnage—which could be criticized as overly pessimistic—we calculate the following economic tonnage:

TABLE 3: CALCULATING THE ECONOMIC TONNAGE

Quantity	mn ton	132
thereof economically usable	%	30%
Economic tonnage	mn ton	40

SOURCE: SPHENE CAPITAL FORECAST

Assuming drilling costs of USD 35 per ton, we calculate a net asset value of USD 1,267 million.

We assume that the shares of Eloro Resources will be trading at a P/NAV multiple of 0.70x. This gives us a price target of CAD 12.50 per share (based on 100.6 million shares outstanding, fully diluted):

No resource expansion scenario

In what we consider an unlikely scenario where Eloro Resources does not expand its resource base across any of its projects, the company could still be viewed as undervalued based on its in-situ value.

Additionally, the tin domain—adjacent to the polymetallic domain and estimated to contain a mineral resource of 110 million tonnes at 0.12% Sn, 14.2 g Ag/t, and 0.14% Pb—is not included in this valuation.

Catalysts of the share price development

Over the next **three months**, we see the following share price catalysts:

- ➊ Further drill results from the drill program at Iska Iska.

Over a period of **nine to twelve months**, we see the following share price catalysts:

- ⑤ More detailed metallurgical analysis;
- ⑤ Potential increase of the starter pit to 200 million tonnes from 132 million tonnes in an upcoming PEA, demonstrating a 3 to 4 years payback on a throughput of around 50,000 tonnes a day and significantly increasing the NAV of Eloro Resources;
- ⑤ Publication of a NI 43-101 Preliminary Economic Assessment (PEA);
- ⑤ Potential takeover of the company.

Eloro Resources is a Canadian-based exploration and development company that controls a portfolio of high-grade gold and silver projects in mostly stable jurisdictions in Bolivia, Peru, and the Canadian province of Québec. Eloro Resources states that it has recently intersected very encouraging silver, gold, and base metals mineralisation at its most valuable Iska Iska flagship property in Bolivia – a stable mining jurisdiction in close proximity to world-class polymetallic mines and mineral deposits like the world’s largest silver deposit Cerro Rico de Potosí, attracting increasing interest from major miners.

Overview of the assets

With a portfolio of gold, silver, and base metal properties in Bolivia, Peru, and Québec, we regard Toronto-based Eloro Resources as a promising resource exploration and development company. Currently, the investment portfolio of the company consists of the following assets:

- ⑤ Eloro Resources’ undoubtedly most valuable asset at present is the **Iska Iska** property in the Potosí region in the prolific Southern Mineral Belt of Bolivia. In close proximity to world-class polymetallic mines and mineral deposits operated by Sumitomo and Pan American Silver, Iska Iska is a polymetallic deposit, where (genetically determined) several metal phases are found in the ore – in addition to silver mainly zinc, lead, gold, copper, bismuth, tin, and indium. With an area of approximately 900 hectares, the road-accessible and royalty-free property benefits from a well-developed infrastructure, being located 50 kilometres from high voltage powerlines and 48 kilometres by unpaved road to the township of Tupiza. The metals discovered are precisely those (Ag, Zn, Pb, Cu, Sn, In, Bi and Cd) that would ideally be discovered in a prolific "Potosí-type" deposit. In our view, Iska Iska has a strong potential for a polymetallic medium to high grade deposit.
- ⑤ In October 2020, **nine additional mining properties** in the Potosí region were each acquired at 100%, one of them is directly adjacent to Iska Iska. The total area of the acquired mining areas amounts to 311.75 square kilometres.
- ⑤ Eloro Resources also holds an 82% interest in the **La Victoria** gold and silver project, an 89.3 square kilometre property located in the north-central mineral belt of Peru, approximately 50 kilometres south of Barrick’s Lagunas Norte gold mine and Pan American Silver’s La Arena gold mine, two well-known low-cost gold producers. La Victoria consists of eight mining concessions and eight mining claims. According to company data, the property has good infrastructure with access to roads, water, and electricity and is located at an elevation of 3,150 m to 4,400 m above sea level.
- ⑤ In addition, Eloro Resources holds a **portfolio of gold and base metal properties** in northern and western Québec in the highly prospective and under-explored, La Grande and Eastmain Greenstone Belts.

Statements pursuant to § 85 (1) WpHG and Article 20 of Regulation (EU) No 596/2014 and Delegated Regulation (EU) 2016/958:

This publication is based on information obtained from carefully selected public sources, especially suppliers of financial data, the publications of the analysed company and other publicly available media.

Rating principles/Methodology/Risks

For the preparation of the publication, company-specific methods from the fundamental stock analysis were used, such as quantitative statistical methods and models, and practices used in technical analysis (inter alia, historical valuation models, net asset value models or sum-of-the-parts valuation models, discounted cash flow models, economic profit models, multiplier models or peer-group comparisons). Valuation models are dependent on macroeconomic factors such as currencies, interest rates, commodities and on assumptions about the economy. In addition to that, market sentiment and political developments may impact the valuation of companies. Selected approaches are also based on expectations, which may change depending on the industry-specific developments without warning. Consequently, recommendations and price targets based on these models may change accordingly. Investment recommendations cover a period of twelve months and may be subject to market conditions. The expected price developments can be achieved faster or slower or be revised upwards or downwards.

Statement on compliance

Sphene Capital GmbH has taken internal organisational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of Sphene Capital GmbH involved in the preparation of the research report are subject to internal compliance regulations. No part of the Analyst's compensation is directly or indirectly related to the preparation of this financial analysis. Responsible for compliance with these arrangements: Susanne Hasler, susanne.hasler@sphene-capital.de.

Sources of Information

Part of the information required for this research report was made available by the issuer of the financial instrument. Furthermore, this report is based on publicly available sources (such as, for example, Bloomberg, Reuters, VWV-Trader, and the relevant daily press) believed to be reliable. Sphene Capital GmbH has checked the information for plausibility but not for accuracy or completeness.

Analyst certification

This research report was prepared by the research analyst(s) named on the front page (the "Analyst"). Views expressed do not necessarily reflect the opinion of Sphene Capital GmbH or any of its subsidiaries/affiliates. The Analyst(s) is(are) solely responsible for the views and estimates expressed in this report. The author(s) of this publication certify that their views about the companies and their securities discussed in this report are accurately expressed and that they have not received and will not receive direct or indirect compensation in exchange for expressing specific recommendations or views in this publication. The content of the research report was not influenced by the issuer of the analysed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.
