RAISING PRICE TARGET ON EARLIER FYB202 US LAUNCH DATE

Formycon and its commercialisation partner, Fresenius Kabi, announced the approval of the Stelara biosimilar FYB202 in both the EU and the US on 27 September. In its most recent corporate presentation, Formycon flagged decisions by the EU and US regulatory authorities on whether to approve FYB202 for early Q4/24 and September 2024 respectively. The timing of the announcements was thus widely anticipated in the market. The unexpected element in the news on FYB202 was the announcement that Formycon/Fresenius Kabi now have the right to market FYB202 in the US no later than 22 February 2025 (previously no later than 15 April). As far as we can ascertain, there have been no changes in competitors' launch dates and so Formycon/Fresenius Kabi will be joint third (previously fifth) in a queue of seven companies seeking to launch a Stelara biosimilar in the US market between 1 January and 15 May next year. We think this earlier launch date perceptibly improves FYB202's market share prospects and so have raised our forecasts, and the price target for the Formycon share from €80 to €82. We maintain our Buy recommendation.

FYB201 or FYB203 Stelara generated worldwide sales of USD10.9bn in 2023. This compares with USD3.6bn of sales for Lucentis in 2021, the last year before the launch of biosimilars of the drug, which included Formycon's FYB201. Furthermore, Formycon will earn a royalty of 30-45% on FYB202 sales. The current royalty on FYB201 sales is 7-8%. Worldwide sales of Eylea amounted to USD9.2bn in 2023 but here again, the mid-single to low-double-digit royalty rate on Formycon's FYB203 biosimilar (launch expected in 2025) is much lower than for FYB202.

We assume H1/25 EU launch date for FYB202 Formycon and its competitors have reached agreement with Stelara's developer, Johnson & Johnson, as to the timing of their respective biosimilar launches in the US. Currently expected launch dates are shown in figure 1 overleaf. (p.t.o.)

Buy recommendation maintained; price target raised from €80 to €82 We think the earlier than previously expected launch of Stelara in the US perceptibly increases the drug's market share prospects, We have increased our US Stelara royalty forecasts by 10% and our price target for the Formycon share from €80 to €82. We maintain our Buy recommendation.

ASSET VALUATION SYSTEM

First Berlin's system for asset valuation is divided into an asset recommendation and a risk assessment.

ASSET RECOMMENDATION

The recommendations determined in accordance with the share price trend anticipated by First Berlin in the respectively indicated investment period are as follows:

Category		1	2
Current market capitalisation (in €)		0 - 2 billion	> 2 billion
Strong Buy ¹	An expected favourable price trend of:	> 50%	> 30%
Buy	An expected favourable price trend of:	> 25%	> 15%
Add	An expected favourable price trend of:	0% to 25%	0% to 15%
Reduce	An expected negative price trend of:	0% to -15%	0% to -10%
Sell	An expected negative price trend of:	< -15%	< -10%

¹ The expected price trend is in combination with sizable confidence in the quality and forecast security of management.

Our recommendation system places each company into one of two market capitalisation categories. Category 1 companies have a market capitalisation of $\in 0 - \in 2$ billion, and Category 2 companies have a market capitalisation of $> \in 2$ billion. The expected return thresholds underlying our recommendation system are lower for Category 2 companies than for Category 1 companies. This reflects the generally lower level of risk associated with higher market capitalisation companies.

RISK ASSESSMENT

The First Berlin categories for risk assessment are low, average, high and speculative. They are determined by ten factors: Corporate governance, quality of earnings, management strength, balance sheet and financial risk, competitive position, standard of financial disclosure, regulatory and political uncertainty, strength of brandname, market capitalisation and free float. These risk factors are incorporated into the First Berlin valuation models and are thus included in the target prices. First Berlin customers may request the models.
