Game changing cooperation with Union Investment; chg

Recently, LAIQON has announced to have closed the game changing cooperation with Union Investment. With that, LAIQON provided a new promising guidance for its subsidiary LAIC, mainly reflecting the potential of the new cooperation. Further, LAIQON announced a capital raise on the level of LAIC and published FY23 prelims that came in rather weak. In detail:

Cooperation with Union is heralding a new era. Together Union and LAIQON will launch new type of fund-based investment product for wealthy Volksbanken and Raiffeisenbanken (VR) customers in Q4 '24. The core of the joint product is an **individual fund asset management (IFVV)** that is providing an **individually tailored portfolio**, based on dozens of AI-generated decision parameters of the WealthTech LAIC considering both – classic and sustainable (ESG-compliant) investments constraints. While LAIQON is providing the technology and the reporting via its wealth tech LAIC (DAP 4.0) as well as a fully digital onboarding, Union Investment is providing the distribution channels and the sales power within VR ecosystem. The VR banks sell the product to customers by advising and onboarding them. The joint goal is to attract **new customers for individual fund- and AI-based wealth management**.

New promising guidance for LAIC. While the management expects AuM's of LAIC to increase by € 5-6bn until FY28e to € 5.5-6.5bn, mainly driven by the new cooperation with Union, we are slightly more conservative expecting AuM's to increase to only € 4.5bn AuM.

Financing secured. In order to finance the initial costs of the cooperation (eNuW: c. € 3m), LAIQON plans to raise up to € 6.8m, partially via **emission of new "LAIC token 24"**, partially via **sale of existing token at a valuation of € 65m**.

Weak FY23 prelims of € 30.7m sales (eNuW: € 33.4m) and € -4.8m EBITDA (vs eNuW: € -1.6m) reflecting the frustrating situation on the capital markets in FY23.

In this piece, we take a closer look at 1) the Digital Asset segment and the cooperation with Union Investment, 2) the Asset Management and 3) the Wealth Management.

As we consider the cooperation as a game changer for LAIQON, we reiterate **BUY** with a new **PT of € 10.00**, based on DCF.

1. Digital Wealth – Game changing cooperation with Union Investment

The recently closed joint-venture contract for the launch of a new type of fund-based investment product between LAIQON's subsidiary and WealthTech LAIC and Union Investment – one Germany's largest asset manager, is heralding a new era for LAIQON.

The objective of the cooperation is to offer a **jointly developed, unique, fully-automated and AI-based individual wealth management solution (iFVV) to wealthy individuals** of the Volksbanken & Raiffeisenbanken, which should be reached and made acquainted with the product through the long-lasting connections between Union Investment and Volksbanken & Raiffeisenbanken. Expecting the launch of the joint product within Q4 2024, it should fuel AuM's and sales from FY25 onwards, marking the **breakthrough point of LAIC**.

With the new investment product, Union Investment improves its offering for the high-end customer segment of the Volksbanken & Raiffeisenbanken. The iFVV represents an **investment solution that is fully tailored to the individual customer** by proposing and adapting portfolio combinations according to the exact needs, objectives, risk preferences and other restrictions of the individual client. In other words, the iFVV enable customers to find its individually optimized portfolio.

Importantly, the iFVV is not at all addressing the clients "Visual Vest" – the robo advisor of Union Investment. Visual Vest is expected to remain the standardized wealth management solution of Union that is offering up to ten ETF portfolios directly to retail clients.

As of now, the wealth management solution for wealthy clients of Volksbanken & Raiffeisenbanken is "**Vermögen Plus**", introduced in 2019. Even though, c. € 5-6bn (eNuW) are invested via "Vermögen Plus" until today, we expect that the client advisors of Volksbanken & Raiffeisenbanken as well as the clients itself are not satisfied with the product as it is too static and not able to adapt restrictions demanded by the clients. Still, collecting c. € 5-6bn (eNuW) within five years is quite impressive and give us a rough idea of what we can expect for the joint iFVV of LAIC and Union.

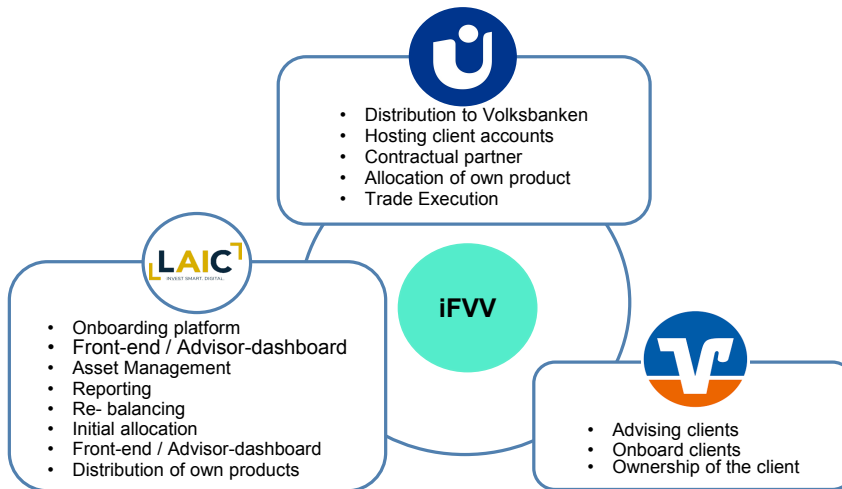

Utilizing the strengths of each partner

As part of the agreement, **LAIQON will provide the technology via its WealthTech LAIC and its Digital Asset Platform 4.0 (DAP 4.0)**. The fully digital client onboarding process of the new product is essentially an adoption of the onboarding process of the LAIC ADVISOR, DAP 4.0, which is also the core of the LAIC ADVISOR and the LAIC funds. DAP 4.0 of LAIC is also delivering the AI-based algorithm, the decision parameters for the asset-allocation, the asset management and portfolio surveillance itself, as well as the reporting.

Union Investment will take care of providing the targeted distribution channels and the sales power within the Volksbanken & Raiffeisenbanken ecosystem (eNuW: Starting with a few pilot VR's), is hosting the client's accounts and is contract partner of the client.

VR banks own the clients relationship, advise clients and will eventually place and sell the iFVV to selected private clients that belongs to the category "wealthy clients" and "high-net-worth-individuals (HNWI)".

The cooperation at a glance

Source: NuWays Research

Attractive fee structure

The **annual service fee should be up to 1.0-1.2%** (eNuW), depending on the individual AuM, which is not overly expensive comparing it to other selected wealth management solutions. We expect the three cooperation partners to split the proceeds each retaining a pre-established portion of the fee imposed on the single customer (eNuW: c. 0.5% to Volksbanken & Raiffeisenbanken, c. 0.4% to Union Investment and c. 0.25-0.35% to LAIC).

On top of the service fee, we expect **further product and other fees to the amount of 1.0-1.2%** of the volume (eNuW), resulting in a **total expense ratio (TER) for the customers of 2.2-2.4%** (eNuW). The product costs could potentially become very important for LAIQON, as we expect that **LAIQON could partially include its own LAIC funds to the proposed portfolio solution** (eNuW).

In this case, LAIQON would naturally retain 100% of management fees of the included LAIC funds that we model with 0.15% (eNuW).

Promising Outlook

As we expect the launch of the iFVV earliest in Q4'24, it is too early to deliver an accurate prediction regarding the ramp-up of AuM's and revenues stemming from the cooperation. Nonetheless, we strongly believe that the introduction of the iFVV is a game-changer for LAIC and for LAIQON and should fuel LAIC's AuM growth from Q4'24 onwards. As mentioned before, the ramp-up of "Vermögen Plus" delivers a rough idea regarding the growth trajectory of the new product.

While we expect only **€ 200m inflows in 2024** that should not have a significant effect on the topline, AuM's from the cooperation should increase to **€ 1.4bn in FY25**. Until FY28, we conservatively expect AuM's from the cooperation of € 4.5bn. That, plus the AuM's from other LAIC products and growney (together € 0.9bn in FY28e vs € 0.5bn in FY23e) result in **€ 5.4bn overall AuM of LAIC (incl. growney) in FY28e**, which is slightly below **management guidance of € 5.5-6.5bn (excl. growney)**.

Combining the anticipated AuM ramp-up with the expectation regarding the revenue split described earlier, we expect **sales from the cooperation to grow from € 0.4m in FY24e to € 15.2m in FY28e**. **Overall sales of LAIC should stand at € 18.6m**. Despite the fact, that the earnings of LAIC are a blackbox for us, we expect LAIC to deliver a significant EBITDA contribution from FY26 onwards.

The cooperation to fuel AuM and sales of LAIC

Source: NuWays Research

Financing secured

In order to deliver a tailored solution for Union Investment and Volksbanken & Raiffeisenbanken, we expect **ramp-up and development cost for LAIQON to amount to some € 3m**. While c. € 1m was already invested in FY23, the remaining c. € 2m should burden the bottom-line in FY24 (development costs and personnel expenses). In 2025 and beyond, after the onboarding and the frontend is implemented, the maintenance costs should remain rather low (eNuW: slowly increasing from € 0.3m to € 0.5m) as the same algorithm that is already managing the LAIC funds and the LAIC ADVISOR, can manage the new investment product. Hence, no further personnel ramp-up (after the initial ramp-up) are necessary.

The financing of the ramp-up and the development costs, should be secured by the recently issued the "LAIC-Token 24", which is basically a special AIF fund. By purchasing the token, the investors enter a trust relationship as a limited partner in a special AIF fund in the legal form of a GmbH & Co. KG with a 5-year term. The purpose of the special AIF fund is to acquire up 9.98% (post money) of the **LAIC Capital GmbH at a valuation of € 65m**. Mind you that the valuation of the "LAIC-Token 21" was € 50m, implying 9% CAGR.

In a first step, the AIF is expected to purchase **5.25% of the LAIC Capital GmbH** from LAIQON for up to **€ 3.4m**, already in Q1. In a second step the special AIF fund is expected acquire another 5.25% for up to **€ 3.4m via a capital increase on the level of the LAIC Capital GmbH** that should come in Q2.

After the successful issuance of the second token (LAIC-Token 24), LAIQON should still own some 80.76% of LAIC Capital, which is remarkable given that **LAIQON should have financed half of the € 20m total ramp-up costs via issuance of LAIC-Token 21 and LAIC Token 24**.

2. Asset Management – Sustainability and performance fees ahead

LAIQON recently announced the conversion of 4 already present funds into Art.9 public funds (i.e. funds with at least 80% volume focused on sustainable investing) and the introduction of 3 new Art.8 public funds (i.e. funds with at least 10% volume dedicated to green investing). The introduction of the new ESG-characterized public funds comes as the second fundamental milestone after the implementation of LAIQON’s sustainability focused growth strategy that came along with the closure of the partnership with the green investment fund Atacama Partners in Q3 last year.

We expect that with the consequent focus on sustainability, LAIQON is ahead of the curve, anticipating significant future inflow into ESG conform investments. The new Art. 8/9 funds should hence attract new institutional and private customer resulting in additional inflows within the next quarters and years.

In the short-term, the active managed funds should benefit from the recovery of the capital markets. While expecting **AuM to stand at € 4.1bn in FY23e** (including some € 2.0-2.5bn stemming from MFI Asset Management), it should increase to **€ 6.7bn in FY28e**, assuming moderate capital markets performance. **Sales should grow accordingly from € 15.3m in FY23e to € 25.5m in FY28e**. Mind you, potential performance fees are not included in our estimates and could lift sales significantly (visible i.e. in FY21).

Steady AuM and sales growth

Source: NuWays Research

Performance fees on the horizon

Thanks to the sound capital markets performance in Q4'23 and the solid start in 2024, the actively managed funds come closer to their high-water marks. As of now, no fund would generate performance related fees, but some funds such as the "LF-European Hidden Chamions", the "LF Green Dividend World", the "LF Sustainable Yield Opportunities" and the "LF ASSET Defense Opportunities" are close to its individual high water marks, performance fees are possible in FY24. Again, we have not included any performance fees in our estimates.

Performance fees in reach

Source: NuWays Research, Morningstar, *) data as of 27.02.2024

3. Wealth Management – Positive effects from business combination with BV

The completion of the 100% acquisition and integration of Bayerische Vermögen (BV) in 2023 represents an important milestone for LAIQON, making LAIQON to **one of the top 5 independent German asset managers**. The acquisition has enabled the combined company to benefit from enormous cross-selling potentials, strong operating synergy effects and scaling opportunities. While the positive synergies and scaling effects revealed themselves already in 2022 – immediately after the acquisition of BV. Nonetheless, we expect them to persist, having a positive impact on AuM and sales on the one hand due to cross-selling and on costs on the other hand thanks to synergy and scale effects.

Remaining rather conservative, we expect **AuM's in the Wealth Management segment to stand at € 1.5bn in FY23e and increase to € 2.3bn in FY28e**. This should translate into sales of **€ 7.1m in FY23e growing accordingly to AuM to € 10.5m in FY28e**. The implied margin on the AuM is 0.4% in FY23e.

Cross-selling to increase AuM and sales

Source: NuWays Research

Valuation

The price target of € 10.00 is derived from a DCF model. The key assumptions of the model are:

- **Terminal EBIT margin of 25%:** Thanks to the highly scalable asset management platform, a rising share of the fully automated LAIC business and the strict focus on strong growing niche markets should enable EBIT margins of >25%. The terminal EBIT margin is conservatively set as we do not consider any performance related fees.
- **Terminal-year growth rate of 2.5%:** Mid-term growth is still seen at a dynamic 16% (CAGR 2026-30E) as Lloyd Fonds should continue to benefit from secular growth trends towards robo-advisory and sustainability. Long-term growth is nevertheless conservatively set at 2%.
- **WACC:** The discount factor of **9.0%** is based on a risk-free rate of 2.5%, an equity risk premium of 4% and a beta of 1.5x.

Looking at the sensitivity analysis below emphasizes that even a materially lower terminal margin of 22.5% would still yield substantial upside to € 9.20.

Disclosures

Disclosures regarding research publications of NuWays AG pursuant to section 85 of the German Securities Trading Act (WpHG)

Indication of conflict of interest

It is essential that any research recommendation is fairly presented and discloses interests of indicates relevant conflicts of interest. Pursuant to section 85 of the German Securities Trading Act (WpHG) a research report has to point out possible conflicts of interest in connection with the analysed company. A conflict of interest is presumed to exist in particular if NuWays AG

- (1) or any other person belonging to the same group with it was part of a consortium within the past twelve months that issued the financial instruments of the analysed company by way of a public offer.
- (2) or any other person belonging to the same group with it has entered into an agreement on the production of the research report with the analysed company.
- (3) or any other person belonging to the same group with it has been party to an agreement on the provision of investment banking services with the analysed company or have received services or a promise of services under the term of such an agreement within the past twelve month.
- (4) The analysed company holds 5% or more of the share capital of NuWays AG.
- (5) holds (a) a net short position or (b) a net long position of 0.5% of the outstanding share capital of the analysed company.
- (6) or any other person belonging to the same group with it is a market maker or liquidity provider in the financial instruments of the issuer.
- (7) or the analyst has any other significant financial interests relating to the analysed company such as, for example, exercising mandates in the interest of the analysed company.
- (8) The research report has been made available to the analysed company prior to its publication. Thereafter, only factual changes have been made to the report.

Conflicts of interest that existed at the time when this research report was published:

1. General Information/Liabilities

This research report has been produced for the information purposes of institutional investors only, and is not in any way a personal recommendation, offer or solicitation to buy or sell the financial instruments mentioned herein. The document is confidential and is made available by NuWays AG exclusively to selected recipients in the European Union (EU) or, in individual cases, also in other countries. It is not allowed to pass the research report on to persons other than the intended recipient without the permission of NuWays AG. Reproduction of this document, in whole or in part, is not permitted without prior permission NuWays AG. All rights reserved.

Under no circumstances shall NuWays AG, any of its employees involved in the preparation, have any liability for possible errors or incompleteness of the information included in this research report – neither in relation to indirect or direct nor consequential damages. Liability for damages arising either directly or as a consequence of the use of information, opinions and estimates is also excluded. Past performance of a financial instrument is not necessarily indicative of future performance.

2. Responsibilities

This research report was prepared by the research analyst named on the front page (the "Producer"). The Producer is solely responsible for the views and estimates expressed in this report. The report has been prepared independently. The content of the research report was not influenced by the issuer of the analysed financial instrument at any time. It may be possible that parts of the research report were handed out to the issuer for information purposes prior to the publication without any major amendments being made thereafter.

3. Organisational Requirements

NuWays AG took internal organisational and regulative precautions to avoid or accordingly disclose possible conflicts of interest in connection with the preparation and distribution of the research report. All members of NuWays AG involved in the preparation of the research report are subject to internal compliance regulations. No part of the Producer's compensation is directly or indirectly related to the preparation of this financial analysis. In case a research analyst or a closely related person is confronted with a conflict of interest, the research analyst is restricted from covering this company.

4. Information Concerning the Methods of Valuation/Update

The determination of the fair value per share, i.e. the price target, and the relevant rating is done on the basis of the adjusted free cash flow (adj. FCF) method and on the basis of the discounted cash flow – DCF model. Furthermore, a peer group comparison is made.

The adj. FCF method is based on the assumption that investors purchase assets only at a price (enterprise value) at which the operating cash flow return after taxes on this investment exceeds their opportunity costs in the form of a hurdle rate of 7.5%. The operating cash flow is calculated as EBITDA less maintenance capex and taxes.

Within the framework of the DCF approach, the future free cash flows are calculated initially on the basis of a fictitious capital structure of 100% equity, i.e. interest and repayments on debt capital are not factored in initially. The adjust-

ment towards the actual capital structure is done by discounting the calculated free cash flows with the weighted average cost of capital (WACC), which takes into account both the cost of equity capital and the cost of debt. After discounting, the calculated total enterprise value is reduced by the interest-bearing debt capital in order to arrive at the equity value.

NuWays AG uses the following three-step rating system for the analysed companies:

Buy: Sustainable upside potential of more than 20% within 12 months

Sell: Sustainable downside potential of more than 20% within 12 months.

Hold: Upside/downside potential is limited. No immediate catalyst visible.

The decision on the choice of the financial instruments analysed in this document was solely made by NuWays AG. The opinions and estimates in this research report are subject to change without notice. It is within the discretion of NuWays AG whether and when it publishes an update to this research report, but in general updates are created on a regular basis, after 6 months at the latest. A sensitivity analysis is included and published in company's initial studies.

5. Major Sources of Information

Part of the information required for this research report was made available by the issuer of the financial instrument. Furthermore, this report is based on publicly available sources (such as, for example, Bloomberg, Reuters, VWD-Trader and the relevant daily press) believed to be reliable. NuWays AG has checked the information for plausibility but not for accuracy or completeness.

6. Competent Supervisory Authority

NuWays AG is an affiliated company of Hauck Aufhäuser Lampe Privatbank AG which is under supervision of the BaFin – German Federal Financial Supervisory Authority (Bundesanstalt für Finanzdienstleistungsaufsicht), Graurheindorfer Straße 108, 53117 Bonn and Marie-Curie-Straße 24 – 28, 60439 Frankfurt a.M.

7. Specific Comments for Recipients Outside of Germany

This research report is subject to the law of the Federal Republic of Germany and the European Union (EU). The distribution of this information to other states in particular to the USA, Canada, Australia and Japan may be restricted or prohibited by the laws applicable within this state. If this communication is distributed in the United Kingdom it is solely directed at (i) investment professionals as defined in Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (the "FPO") or (ii) high net-worth entities as defined in article 49 of the FPO. This document should not be distributed or forwarded, either directly or indirectly, to any other individuals.

8. Miscellaneous

According to Article 4(1) No. i of the delegated regulation 2016/958 supplementing regulation 596/2014 of the European Parliament, further information regarding investment recommendations of the last 12 months are published under: www.nuways-ag.com
