FROM EBITDA ADJUSTED TO EBITDA REPORTED

How we achieve value for our shareholders

OUR STATEMENT ON VALUE CREATION

"We do not accept cash burning. Our company never did."

"We have to acquire companies for **fair values**, meaning **badwill** is not an exception. And we develop their **value over time**."

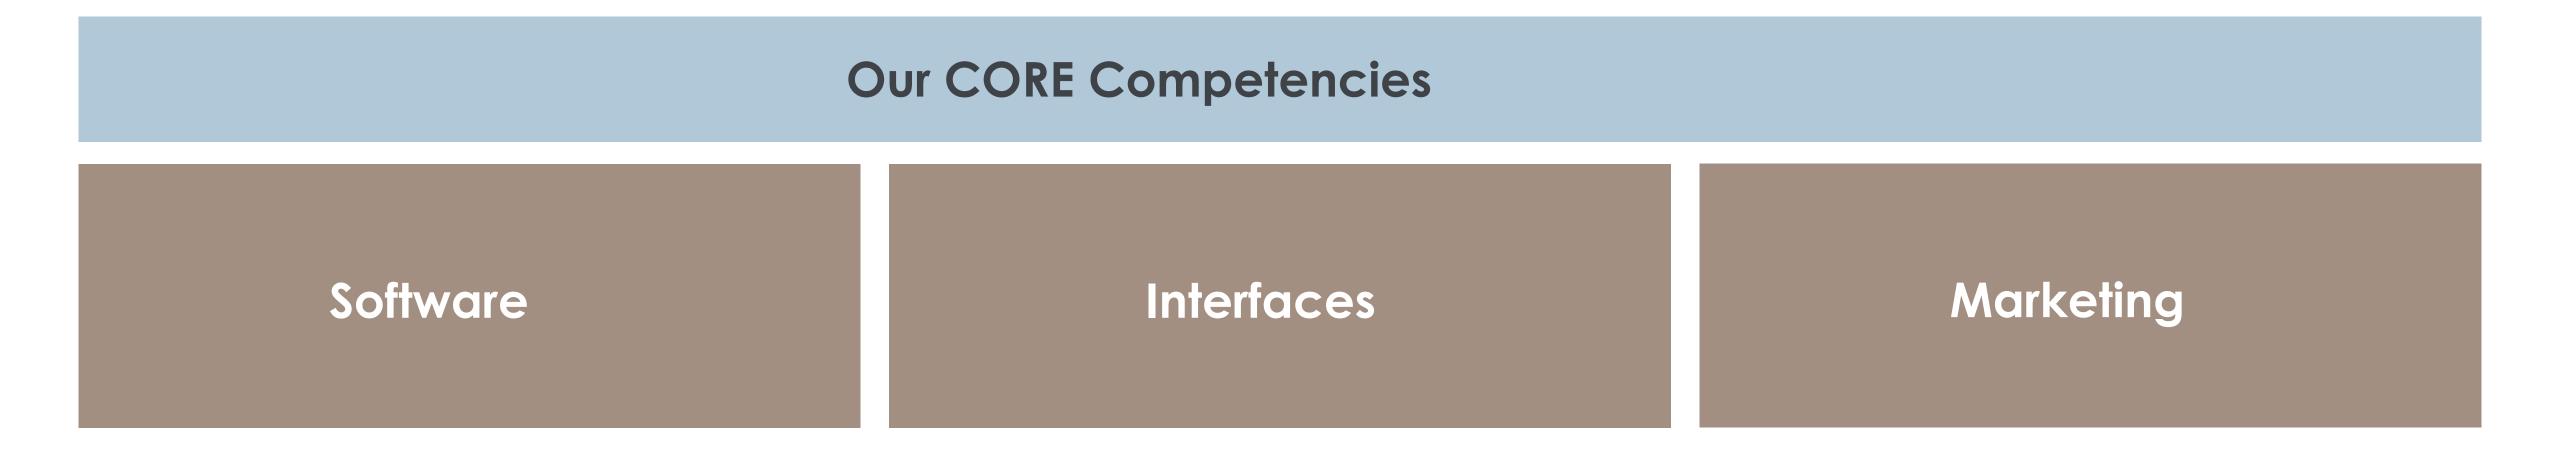

"Our TPG-approach gives us the opportunity to buy highly attractive online-players in niche markets, make a great PMI and achieve **long-term cashflow-streams**."

"Each year, we see more than 1.500 offered online-companies, most of them does not fit to us (industry, losses etc). But when we make the process of M&A, the seller understands **our additional value** compared to other bidders – and we are **not looking for exits.** That convinces the seller in many times and management stays on board."

OUR CORE COMPETENCIES

SAAS-MODELS

Why do we NOT make SaaS-Revenues?

Control

We want to have full control on the eCommerce Value Chain. Means: Not just offering software, we make A-Z as a full service for our 11.800 partners.

Starting from coding ERP-interfaces, offering excellent software solution, manage the full payment process and take care about tax-declarations and customs for our partners, we have full control on the Value Chain.

Value creation

We can achieve higher €-margins when we fully control the eCommerce Value Chain, cover all processes and services for our partners.

Replaceability

When we would offer only SAAS-solutions to external parties, we would have nice "margins, but after 2-3 years (contract time) we always would have a higher risk of being replaced by another software.

Because we develop and run our own software solutions for our partners and cover the full Value Chain of eCommerce, our risk of

replaceability is low.

OUR DECISION FUNNEL FOR NEW INDUSTRIES

TPG decision funnel for entering new industries

Selection of Industry:

- Are more than 150 potential platform partners in the industry?
- Is the product attractive in terms of margin, average order value and logistics?
- Have the industry partners local ERP-systems?

Entering Industry:

- Classic make or buy decision
- If there are already platform players in the industry, acquisition of one platform or alternatively buy a pure onlineplayer and change it to a platform (after the acquisition)

Value Creation:

- Our holding is <u>not</u> a financial holding, we are an <u>operative holding</u> with more than 120 people in software, marketing, logistics and other functions.
- Our subsidiary-management is highly effective: Using our central functions, we can reduce costs, increase the number of partners/products and bring higher margins to our subsidiaries.
