Summary

Program of contrasts in fall of 2018: Sales grow faster than at any time in past four-and-a-half years but earnings are held back by higher costs

- Further acceleration in sales in fall of 2018: Q3 consolidated sales up 7.7%, nine-month sales up 4.8%
 - DIY stores with garden centers post like-for-like, currency-adjusted sales growth of plus 6.2% in Q3 and plus 3.8% in nine-month period – DIY retail business outside Germany continues to generate above-average growth
 - Builders' merchant business increases sales by 11.0% in Q3 2018/19 and by 5.5% in first nine months
- Adjusted operating earnings (adjusted EBIT) below previous year in Q3 and down 11.1% to € 180.6 million in nine-month period
- Full-year earnings forecast for 2018/19 adjusted – sales forecast confirmed

The HORNBACH Group's business performance showed divergent developments in the third quarter of 2018/19 (September 1 to November 30, 2018). On the one hand, the Group increased its sales by 7.7% in the fall quarter (Q3), its strongest sales growth for four-and-a-half years. On the other hand, it was not possible to translate this increasingly dynamic sales performance into earnings growth. Operating earnings adjusted to exclude non-operating earnings items (adjusted EBIT) fell from € 28.8 million in the previous year's quarter to € 19.7 million. This was mainly due to gross profit rising less rapidly than sales. The growth in gross profit was insufficient to offset the increase in store and administration expenses in the third quarter.

In the first nine months of 2018/19, we improved group-wide net sales by 4.8% to € 3,475.5 million. Adjusted EBIT for the nine-month period fell by 11.1% to € 180.6 million (2017/18: € 203.1 million). To account for the unsatisfactory third-quarter earnings performance, the full-year earnings forecast has been amended. Adjusted operating earnings (adjusted EBIT) are now expected to fall more than 10% short of the previous year's figure (€ 165.6 million). By contrast, the Board of Management has not made any amendments to the 2018/19 sales forecast.

Earnings, Financial, and Asset Position

Seasonal and calendar-related factors

Unlike in the first and second quarters of the current financial year, weather conditions in the third quarter of the 2018/19 financial year were favorable for the DIY retail business in Germany and the eight countries in the Other European countries region. Large parts of Europe witnessed unusually low volumes of precipitation accompanied by moderate temperatures.

The third quarter of 2018/19 had a group-wide average of 0.5 business days more than the equivalent period in the previous year. The first nine months of 2018/19 had an average of 0.3 more business days than the previous year's period.

Sales performance of the HORNBACH Group

The HORNBACH Group's sales grew by 7.7% to € 1,084.9 million (2017/18: € 1,007.3 million) in the third quarter of the 2018/19 financial year (September 1 to November 30, 2018), and by 4.8% to € 3,475.5 million in the first nine months (2017/18: € 3,317.6 million).

The HORNBACH Holding AG & Co. KGaA Group comprises the HORNBACH Baumarkt AG, HORNBACH Baustoff Union GmbH, and HORNBACH Immobilien AG subgroups.

HORNBACH Baumarkt AG subgroup

In the first nine months, we expanded our store network with three new DIY megastores and garden centers. In the first quarter of 2018, we opened new stores in Zwolle (Netherlands) and Affoltern (Switzerland). These were followed by the opening of a store in Borås (Sweden) in the third quarter. One location in Alzey (Rhineland-Palatinate) was closed in the first quarter. As of November 30, 2018, the HORNBACH Baumarkt AG subgroup therefore operated 158 retail outlets (February 28, 2018: 156) with total sales areas of 1.85 million m², of which 97 stores in Germany and 61 in other European countries. The online store in Luxembourg was extended to include a direct mailing option in October 2018. This means that the delivery of products directly to customers' homes or buildings sites is now possible in all HORNBACH regions.

The pace of sales growth accelerated from quarter to quarter as the 2018/19 financial year progressed (see table below). The subgroup's sales for the third quarter of 2018/19 grew by 7.5% to € 1,006.4 million (2017/18: € 936.5 million). On a like-for-like basis and net of currency items [→ [Glossary](#) on Page 8], consolidated sales rose by 6.2% in the third quarter (including currency items: plus 6.0%). In the nine-month period, we improved our consolidated sales by 4.7% to € 3,256.1 million (2017/18: € 3,109.6 million). On a like-for-like basis, subgroup-wide net sales grew by 3.8% excluding and by 3.3% including currency items. The Other European countries region continued to generate significantly higher growth than the Germany region. By the end of the first three quarters, the international share of the subgroup's sales came to 48.2% (2017/18: 46.7%).

¹⁾ Excluding currency items

HORNBACH Baustoff Union GmbH subgroup

The HORNBACH Baustoff Union GmbH (HBU) subgroup, which focuses on the needs of professional customers in its key target groups in the main construction and subconstruction trades, as well as on private construction clients, operated a total of 28 builders' merchants outlets in south-western Germany and at two locations close to the border in France (Lorraine) as of November 30, 2018 (2017/18: 27). One new outlet was opened in Buchen (Odenwald) in the third quarter.

In the third quarter of 2018/19, the HBU subgroup's sales grew by 11.0% to € 77.9 million (2017/18: € 70.2 million). On a cumulative basis for the first nine months, the HORNBACH Baustoff Union GmbH subgroup increased its net sales by 5.5% to € 217.7 million (2017/18: € 206.3 million).

¹⁾ Year-on-year change in base points (bp)

The following information refers to the earnings performance of the overall HORNBAACH Holding AG & Co. KGaA Group.

3rd quarter of 2018/19

The HORNBAACH Group's earnings fell significantly short of the previous year's level in the third quarter of 2018/19.

- Gross profit grew less rapidly than sales, rising by 5.7% to € 379.2 million (2017/18: € 358.8 million). As a result, the gross margin decreased from 35.6% to 35.0%. The reduction in the **gross margin** [\rightarrow Glossary on Page 9] was chiefly due to higher procurement prices. Most of the price movements related to the Construction Materials/Timber/Prefabricated Construction Components product division and resulted from higher raw materials prices or production capacity shortages. Due to competitive factors, these less favorable procurement terms could only be partly offset by raising retail prices. Not only that, the margin was also negatively affected by higher freight costs in B2C logistics, as well as by base effects and one-off items resulting from higher write-downs on delisted articles.
- **Selling and store expenses** rose by 7.6%, and thus more or less in line with sales, in the period under report. The store expense ratio [\rightarrow Glossary on Page 9] remained unchanged at 27.8%.
- The **pre-opening expense ratio** [\rightarrow Glossary on Page 9] remained unchanged at 0.1%.
- **General and administration expenses** rose by 14.7%, and thus significantly faster than sales. This was due in particular to the HORNBAACH Baumarkt AG subgroup continuing to invest disproportionate amounts in expanding its e-commerce activities within its interconnected retail strategy. The administration expense ratio [\rightarrow Glossary on Page 9] amounted to 5.4% (2017/18: 5.1%).
- The growth in gross profit was insufficient to offset the increase in store and head office expenses in the third quarter of 2018/19. The adverse margin-related effects referred to above impacted above all on profitability in November 2018.
- Earnings before interest, taxes, depreciation and amortization (**EBITDA**) [\rightarrow Glossary on Page 8] decreased by 11.3% to € 48.2 million in the third quarter of 2018/19 (2017/18: € 54.4 million). **Consolidated operating earnings (EBIT)** fell by 28.5% to € 20.9 million (2017/18: € 29.2 million). Non-operating income amounted to € 1.2 million in the quarter under report, leading to **adjusted EBIT** of € 19.7 million (2017/18: € 28.8 million).
- Net financial expenses improved from minus € 8.1 million to minus € 4.8 million, a development mainly due to positive currency items.

- Consolidated earnings before taxes decreased year-on-year by 23.9% to € 16.1 million (2017/18: € 21.1 million). Based on a tax rate of 26.5% (2017/18: 25.1%), consolidated net income amounted to € 11.8 million (2017/18: € 15.8 million). Earnings per share came to € 0.72 in the third quarter (2017/18: € 0.92).

1st nine months of 2018/19

The unsatisfactory earnings performance in the third quarter meant that, unlike still expected at the end of the first half, the Group could not make up for the shortfall in earnings. Due in particular to less favorable cost ratios, as well as to a lower gross margin, the HORNBACH Group was unable to match the previous year's level of earnings. **Operating earnings (EBIT)** for the period from March to November 2018 fell by 11.4% to € 181.7 million (2017/18: € 205.0 million). Cumulative **adjusted EBIT** fell by 11.1% to € 180.6 million (2017/18: € 203.1 million).

Net financial expenses improved from minus € 22.3 million to minus € 15.9 million. This was chiefly due to positive currency items of € 0.9 million, which contrasted with negative currency items of € 4.1 million in the equivalent period in the previous year. Consolidated earnings before taxes fell by 9.3% to € 165.8 million (2017/18: € 182.7 million). Based on a tax rate of 26.4% (2017/18: 25.8%), consolidated net income amounted to € 122.1 million (2017/18: € 135.5 million). Cumulative earnings per Holding share came to € 6.26 (2017/18: € 6.94).

Earnings performance by segment in 1st nine months of 2018/19

Operating earnings (EBIT) at the **HORNBACH Baumarkt AG subgroup** decreased by 12.0% to € 135.2 million (2017/18: € 153.7 million). Given non-operating earnings items of € 0.9 million, adjusted EBIT for the first nine months of 2018/19 fell by 12.6% to € 134.3 million (2017/18: € 153.6 million). Further details on the earnings performance can be found in the quarterly statement separately published by the HORNBACH Baumarkt AG subgroup.

The EBIT of € 6.6 million reported by the **HORNBACH Baustoff Union GmbH subgroup** also fell short of the previous year's figure (**€ 8.8 million**). This was due to a lower gross margin in the third quarter and the scheduled increase in personnel and operating expenses in connection with the subgroup's expansion, as well as higher depreciation and amortization. As in the previous year's period, there were no non-operating earnings items in the first nine months of 2018/19.

Nine-month EBIT at the **HORNBACH Immobilien AG subgroup** decreased by 5.4% to € 42.5 million (2017/18: € 44.9 million). This was chiefly due to a base effect, namely disposal gains of € 1.8 million resulting from the sale of land in the previous year's period, whereas disposal gains of only € 0.1 million were generated in the first nine months of the 2018/19 financial year. Adjusted EBIT at the subgroup decreased by 1.8% to € 42.3 million in the first nine-months of 2018/19 (2017/18: € 43.1 million).

Financial and asset position

Financial position

Investments rose significantly from € 98.3 million in the previous year's period to € 158.3 million in the first nine months of 2018/19. A large share of the additional investment total related to the acquisition of a piece of land with a building in Switzerland in the first quarter and to the buyback of two stores previously leased in the Greater Berlin region in the second quarter. Furthermore, the company also acquired land for its medium-term expansion in Europe. At € 110.2 million, around 70% of investments were channeled into land and buildings, while the remaining sum involved plant and office equipment at new and existing stores, as well as intangible assets (mainly IT software). The investments were fully financed from the cash flow of € 169.2 million from operations (2017/18: € 188.8 million). Detailed information about the financing and investing activities of the HORNBACH Group can be found in the cash flow statement on Page 13.

HORNBACH Holding B.V. agreed two promissory note loans as of September 6, 2018. These have a total amount of € 95 million and are guaranteed by HORNBACH Baumarkt AG. The first tranche has a volume of € 52 million and a five-year term, while the second tranche has a volume of € 43 million and a seven-year term. Both tranches were disbursed on September 13, 2018 and

have fixed interest coupons through to maturity. These funds serve to finance the company's expansion in the Netherlands, as well as the aforementioned buyback of the two locations previously leased in Germany.

Asset position

Total assets grew to € 2,839.7 million as of November 30, 2018, up 6.4% compared with the balance sheet date on February 28, 2018. This growth was mainly due to an € 82.0 million increase in property, plant and equipment. This was countered by a reduction of € 11.3 million in investment properties. Overall, non-current assets rose by € 69.1 million. Current assets rose by € 102.9 million, a development driven in particular by the increase of € 64.5 million in cash and cash equivalents.

Shareholders' equity as reported in the balance sheet amounted to € 1,556.9 million as of November 30, 2018 (February 28, 2018: € 1,462.9 million). The **equity ratio** [↪ [Glossary](#) on Page 8] remained constant at 54.8%. Non-current liabilities increased by € 66.8 million to € 759.8 million (2017/18: € 693.0 million). Current liabilities rose by € 11.3 million to € 523.1 million (2017/18: € 511.7 million). **Net financial debt** [↪ [Glossary](#) on Page 8] came to € 473.9 million as of November 30, 2018 (February 28, 2018: € 460.0 million).

Other Disclosures

Employees

The HORNBACH Holding AG & Co. KGaA Group had a total of 20,554 permanent employees across Europe at the reporting date on November 30, 2018 (February 28, 2018: 19,614).

Statement of figures

Figures have been rounded up or down to the nearest million euro amount. Such rounding up or down may result in minor discrepancies between the various presentations. Percentages have been calculated on the basis of thousand euro figures.

Events after Balance Sheet Date

In December 2018, we were notified that the planned buyback of two HORNBACH locations in the Netherlands from an external investor would not materialize. This will reduce the volume of investments in the current 2018/19 financial year. Gross investments are now expected to range between € 190 million and € 220 million. In our 2018/19 Half-Year Financial Report, we previously expected gross investments of between € 220 million and € 250 million.

Outlook

The Board of Management has confirmed the 2018/19 sales forecast and thus expects sales growth in a medium single-digit percentage range.

The forecast concerning the Group's expected earnings performance in the 2018/19 financial year was adjusted in an ad-hoc announcement published on December 10, 2018. Adjusted operating earnings (adjusted EBIT) are now expected to fall more than 10% short of the figure reported for the 2017/18 financial year (€ 165.6 million).

Brief Glossary of Key Performance Figures

In this quarterly statement we also refer to the following key performance figures that are not defined under IFRS to comment on our asset, financial, and earnings position. These figures should also be viewed in the overall context of the information published in the Annual Report concerning the Group's management system.

Like-for-like sales net of currency items (change in %)	<i>Alternative key performance figure to measure the operating business performance and indicate the organic growth achieved by our retail activities (stationary stores and online shops)</i>	The calculation of like-for-like sales is based on all DIY stores with garden centers that have been in operation for at least one full year. No account is taken of stores newly opened, closed, or subject to substantial conversion measures in the past twelve months. Like-for-like sales are calculated excluding sales tax (net) and based on the local currency for the reporting period under comparison (currency-adjusted). The rate of change in like-for-like sales net of currency items is therefore a performance indicator independent of exchange rate factors. On a euro basis, like-for-like sales are also calculated including currency items for those countries in our European store network that have currencies other than the euro.
EBITDA	<i>Alternative key performance figure to comment on earnings performance</i>	EBITDA stands for earnings before interest, taxes, depreciation and amortization (on property, plant and equipment and on intangible assets). EBITDA is a cash flow-based figure, as depreciation and amortization, which do not impact on liquidity, are added to operating earnings (EBIT).
Adjusted EBIT	<i>Major key performance figure to comment on operating earnings performance</i>	To calculate this key figure, earnings before interest and taxes (EBIT) are adjusted to exclude non-operating earnings items. Non-operating expenses (e.g. impairment losses on assets, additions to provisions for onerous contracts) are added to EBIT, while non-operating income (e.g. income from disposals of properties, income from write-ups of assets impaired in previous years) are deducted. Adjusted EBIT is therefore particularly useful for management purposes and for comparing the operating earnings performance over time or in forecasts.

Cost ratios

Alternative key performance figures for the development in store, pre-opening, and administration expenses as a percentage of net sales

The **store expense ratio** is obtained by dividing selling and store expenses by net sales. Selling and store expenses comprise those costs incurred in connection with the operation of stationary DIY stores with garden centers and the online shops. They mainly include personnel expenses, costs of premises, and advertising expenses, as well as depreciation, amortization, and general operating expenses, such as transport expenses, service and maintenance.

The **pre-opening expense ratio** is calculated by dividing pre-opening expenses by net sales. Costs incurred in connection with and upon the construction of a new stationary DIY store with a garden center through to opening are reported as pre-opening expenses. Pre-opening expenses largely comprise personnel expenses, costs of premises, and administration expenses.

The **administration expense ratio** is the quotient of administration expenses and net sales. Administration expenses include all administrative expenses incurred in connection with the operation or construction of stationary DIY stores with garden centers and with the development and operation of online retail (e-commerce) and which cannot be directly allocated to such. They mainly consist of personnel expenses, legal and advisory expenses, depreciation and amortization, costs of premises, and IT, travel, and vehicle expenses. As well as purely administrative expenses, they also include project-related expenses and in particular the expenses incurred for the increasing digitization of our business model (multichannel retail).

Equity ratio

Alternative key performance figure to comment on asset position

The equity ratio is derived by dividing shareholders' equity as reported in the balance sheet (equity posted) by total capital (balance sheet total).

Net financial debt

Alternative key performance figure to comment on financial position

This key figure is calculated as total current and non-current financial debt less cash and cash equivalents and – where applicable – less current financial assets. To avoid negative interest on cash investments, starting at the beginning of the 2016/17 financial year the Group channeled part of its cash and cash equivalents into near-liquid short-term financial investments with terms of between more than three months and a maximum of twelve months. These fixed-term deposits were repaid in full as of November 30, 2017. The inclusion of current financial assets in the calculation of net financial debt enhances comparability with the previous reporting period.

Gross margin

Further key performance figure to comment on earnings performance

The gross margin is defined as gross profit (net balance of sales and cost of goods sold) as a percentage of net sales. This key management figure is chiefly influenced by developments in procurement and retail prices, changes in the product mix, and currency items resulting from international procurement.

DISCLAIMER

This interim report contains forward-looking statements based on assumptions and estimates made by the Board of Management of HORNBACH. Statements referring to the future are always only valid at the time at which they are made. Although we assume that the expectations reflected in these forecast statements are realistic, the company can provide no guarantee that these expectations will also turn out to be accurate. The assumptions may involve risks and uncertainties which could result in actual results differing significantly from the forecast statements. The factors which could produce such variances include changes in the economic and business environment, particularly in respect of consumer behavior and the competitive environment in those retail markets of relevance for HORNBACH. Furthermore, they include exceptional weather conditions, a lack of acceptance of new sales formats or new product ranges, as well as changes to the corporate strategy. HORNBACH has no plans to update the forecast statements, neither does it accept any obligation to do so.
