Disclaimer

This presentation contains forward-looking statements and information relating to Befesa and its affiliates that are based on the beliefs of its management, including assumptions, opinions and views of Befesa and its affiliates as well as information cited from third party sources. Such statements reflect the current views of Befesa and its affiliates or of such third parties with respect to future events and are subject to risks, uncertainties and assumptions.

Many factors could cause the actual results, performance or achievements of Befesa and its affiliates to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others: changes in general economic, political, governmental and business conditions globally and in the countries in which Befesa and its affiliates do business; changes in interest rates; changes in inflation rates; changes in prices; changes to national and international laws and policies that support industrial waste recycling; legal challenges to regulations, subsidies and incentives that support industrial waste recycling; extensive governmental regulation in a number of different jurisdictions, including stringent environmental regulation; management of exposure to credit, interest rate, exchange rate and commodity price risks; acquisitions or investments in joint ventures with third parties; inability to obtain new sites and expand existing ones; failure to maintain safe work environments; effects of catastrophes, natural disasters, adverse weather conditions, unexpected geological or other physical conditions, or criminal or terrorist acts at one or more of our plants; insufficient insurance coverage and increases in insurance cost; loss of senior management and key personnel; unauthorised use of Befesa's intellectual property and claims of infringement by Befesa of others' intellectual property; Befesa's ability to generate cash to service its indebtedness changes in business strategy and various other factors. Should one or more of these risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected or targeted.

Befesa and its affiliates do not assume any guarantee that the assumptions underlying forward-looking statements are free of errors nor do they accept any responsibility for the future accuracy of the opinions expressed herein or the actual occurrence of the forecasted developments. No representation (express or implied) is made as to, and no reliance should be placed on, any information, including projections, estimates, targets and opinions, contained herein, and no liability whatsoever is accepted as to any errors, omissions or misstatements contained herein or otherwise resulting, directly or indirectly, from the use of this document.

This presentation is intended for information only and should not be treated as investment advice. It is not intended as an offer for sale, or as a solicitation of an offer to purchase or subscribe to, any securities in any jurisdiction. Neither this presentation nor anything contained therein shall form the basis of, or be relied upon in connection with, any commitment or contract whatsoever. This presentation may not, at any time, be reproduced, distributed or published (in whole or in part) without prior written consent of Befesa.

First quarter 2021 figures contained in this presentation have not been audited or reviewed by external auditors.

This presentation includes Alternative Performance Measures (APM), including EBITDA, EBITDA margin, EBIT, EBIT margin, net debt and capital expenditures which are not measures of liquidity or financial performance under International Financial Reporting Standards (IFRS). EBITDA is defined as operating profit for the period (i.e. EBIT) before the impact of amortisation, depreciation, impairment and provisions. EBITDA margin is defined as EBITDA divided by revenue. EBIT is defined as Operating profit for the year. The Company uses EBIT to monitor its financial return after both operating expenses and a charge representing the cost of usage of both its property, plant and equipment and definite-life intangible assets. EBIT margin is defined as EBIT as a percentage of revenue. These non-IFRS measures should not be considered in isolation or as an alternative to results from operating activities, cash flow from operating, investing or financing activities, or other financial measures of Befesa's results of operations or liquidity derived in accordance with IFRS. Befesa believes that the APM included in this report are useful measures of its performance and liquidity. Other companies, including those in the industry in which Befesa operates, may calculate similarly titled financial measures differently than Befesa does. Because all companies do not calculate these financial measures in the same manner, Befesa's presentation of such financial measures may not be comparable to other similarly titled measures of other companies. These APM are not audited.

- **FY EBITDA of €165 to €190m**, +30% to +50% yoy
- **Dividend guidance narrowed to €40m (€1.17 / share);**
Proposing to AGM (30 June 2021)

At continued current Zinc LME prices of
~\$2900/t expecting to beat upper end
closer to €200m EBITDA

c. 3 years

Hedge book extended to April 2024,
providing increased earnings and cash flow visibility

China expansion

on schedule and on budget:

- Jiangsu: Construction completed;
Commissioning in process
- Henan: Construction scheduled to be completed
after the summer of 2021

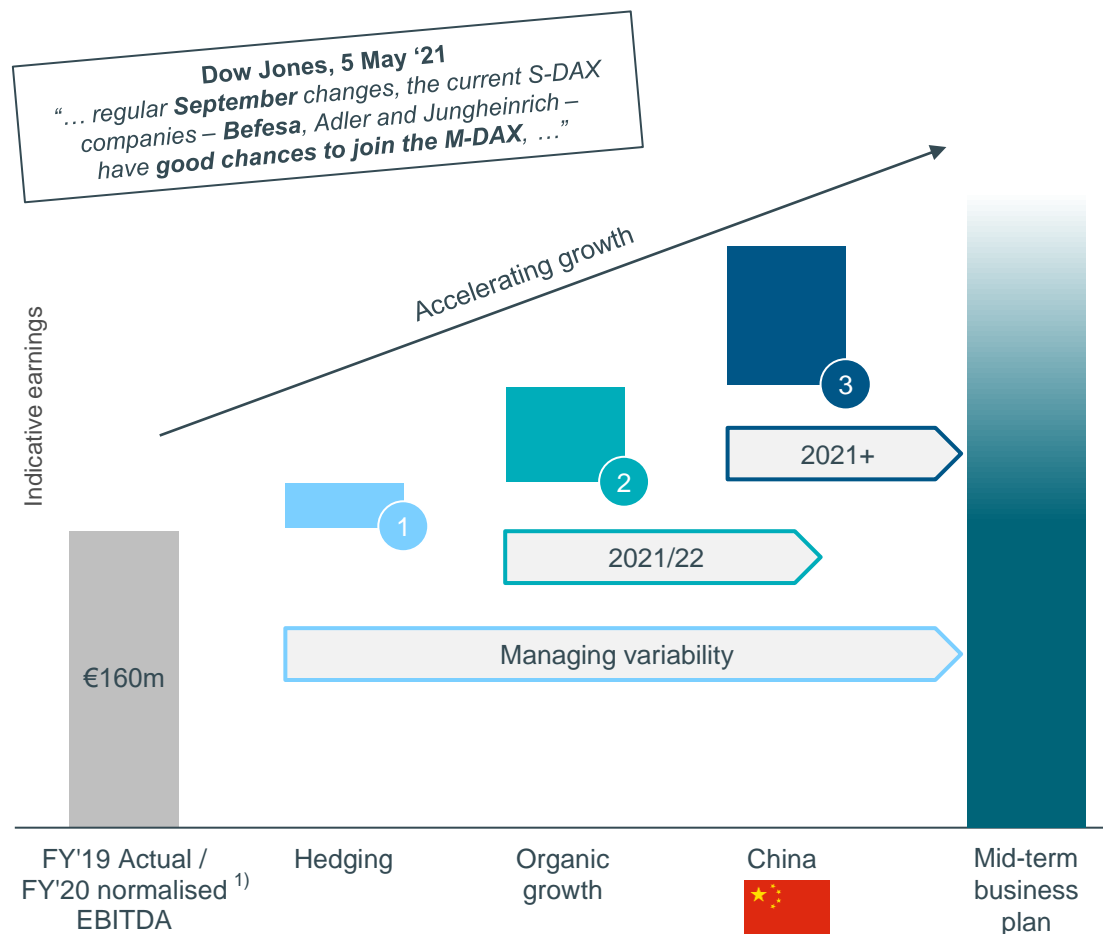

ESG

- Befesa as a vital player within **circular economy**
with **strong ESG ratings**
- **2020 ESG Progress Update published** on 27 April

Note: L12M and L6M stand for last-twelve and last-six months period, respectively

Mid-term growth roadmap

Executing well defined growth roadmap even during COVID-19;
Focus 2021: Ramping up operations at the first two EAF steel dust recycling plants in China

Note: Chart is illustrative and size of respective arrows in the chart is not indicative to the underlying growth potential

¹⁾ FY 2020 normalised for a) Zinc LME @ \$2,500/t (long-term consensus), and b) TC @ \$225/t (9% \$2,500/t LME)

1 HEDGING

- 2020: 92.4kt @ €2,239/t
- 2021: 92.4kt @ c. €2,150/t
- 2022: 92.4kt @ c. €2,200/t

China I

Changzhou plant, Jiangsu province

Key facts of the plant:

- 1st EAF steel dust recycling plant in China
- Capacity to recycle 110kt EAF steel dust p.a.
- Total investment: c. €42m
- Location: Changzhou (Jiangsu province)

Status update:

- ✓ Long-term financing closed July 2020
- ✓ Construction completed, on time and on budget
- Commissioning in process; Targeting commercial output in H2 2021

↑ Changzhou plant, mid-April 2021

China II

Xuchang plant, Henan province

Key facts of the plant:

- 2nd EAF steel dust recycling plant in China
- Capacity to recycle 110kt EAF steel dust p.a.
- Total investment: c. €42m
- Location: Xuchang (Henan province)

Status update:

- ✓ Long-term financing closed December 2020
- Construction progressing on schedule; Completion expected after the summer of 2021; Targeting ramp up in H2 2021

↑ Xuchang construction site, mid-April 2021

Sustainability at Befesa

Key player within the circular economy, with c. 1.5 million tonnes recycled and c. 1.3 million tonnes of valuable materials recovered annually, that contributes significantly to increase efficiency of raw material use in the metals industry and promotes the transition towards a more sustainable economy

Lost Time Injury Rate (LTIR)

- Excellence in health & safety is a priority for Befesa
- Aiming to reduce LTIR by at least 50% by 2024 vs. 2019

¹⁾ Excluding internal revenue; revenue split is calculated on revenues including internal revenue

²⁾ Including recycling of SPL (a hazardous waste generated in primary aluminium production)

Key milestones

Befesa has grown successfully through organic initiatives and acquisitions

¹⁾ Through 51/49 JV with Canadian Silvermet

²⁾ By acquiring subsequent stakes in the Korean Hankook

³⁾ Free-float at 100% after Triton's exit on 6 June 2019

Investment highlights

Environmental solutions

in high demand for the steel and aluminium industry improving sustainability

Favourable mega trends

supporting secondary steel and aluminium markets e.g. CO₂ reduction, emission controls

Market leader

in Europe & Asia, in niche recycling markets, applying best available technology with plant footprint close to clients

Strong regulation

getting stricter and expanding into new geographies to protect the environment

Robust & long-term service

supports business model with strong barriers to entry and high captive demand

Proven resilience

through the cycle with strong growth, margins and cash flow generation

Expansion opportunities

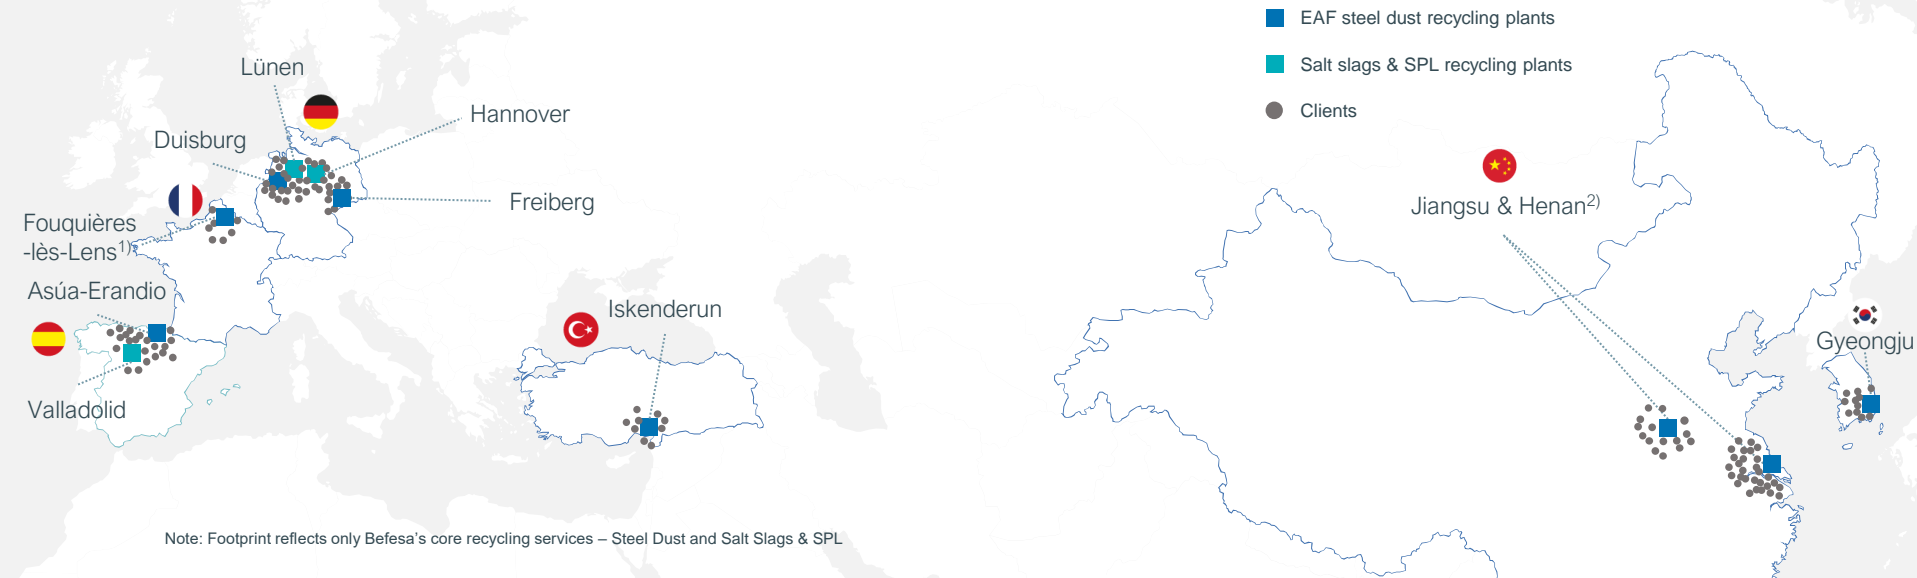

organic & inorganic, focused on core segments with attractive returns

Experienced team

focused on compliance, ESG and profitable growth = shareholder value

Market leader in Europe & Asia

Befesa is the market leader in steel dust and salt slags recycling services with a competitive advantage due to its close-proximity to key clients

STEEL DUST RECYCLING

ALU SALT SLAGS RECYCLING

¹⁾ 50/50 joint venture with Recylex

²⁾ Changzhou, Jiangsu province: construction completed in Q1 2021, commissioning in process and commercial output expected in H2; Xuchang, Henan province: completion of construction expected after summer of 2021, with ramp-up in H2

Highly regulated & critical service model

Befesa is the leading environmental services partner in the circular economy of the 2nd steel and aluminium industry by recycling and avoiding the landfilling of c. 1.5 MT hazardous residues and recovering c. 1.3 MT of new valuable materials

All figures are the average of the fiscal years 2018, 2019 and 2020

Value chains are simplified and only reflect Befesa's core business segments (i.e. Steel Dust; Aluminium Salt Slags):

- Within Steel Dust Recycling Services business segment Befesa manages a Stainless sub-segment (94 kt stainless steel dust throughput, average over L3Y period 2018-2020)

- Within Aluminium Salt Slags Recycling Services business segment Befesa manages a Secondary Aluminium sub-segment (173 kt 2nd aluminium alloys produced, average over L3Y period 2018-2020)

Experienced management team

Senior management team delivering results through long-standing industry expertise, entrepreneurial spirit and focus on operational excellence as well as governance and compliance processes

Javier Molina
CEO

- CEO since 2000
- Leading Befesa for >20 years

Wolf Lehmann
CFO;
incl. responsibilities
for operational
excellence & IT

- CFO since 2014
- 20+ years in finance & operational leadership roles, 50/50 General Electric / PE

Asier Zarraonandia
Vice-president
Steel Dust
Recycling Services

- 15+ years with Befesa
- Running Befesa's Steel Dust business for >15 years

Federico Barredo
Vice-president
Aluminium Salt Slags
Recycling Services

- 25+ years with Befesa
- Running Befesa's Aluminium Salt Slags business for >20 years

Key achievements / track record

Extensive experience in steel and aluminium recycling business, including managing through the cycle

Strong performance results through focus on operational excellence

Building strong business foundation of ESG, compliance and health & safety processes

Successful international expansion

Track record of successful acquisitions and turnarounds, e.g., BUS, Agor, Alcasa, Hankook, Silvermet

Experience in developing greenfield projects, e.g., Gravelines, South Korea, Bernburg, China

Waelz kiln at EAF steel dust recycling plant in Gyeongju, South Korea
