Strategy Focus on Continued Profitable Growth

Top Initiative – Turned-over Business

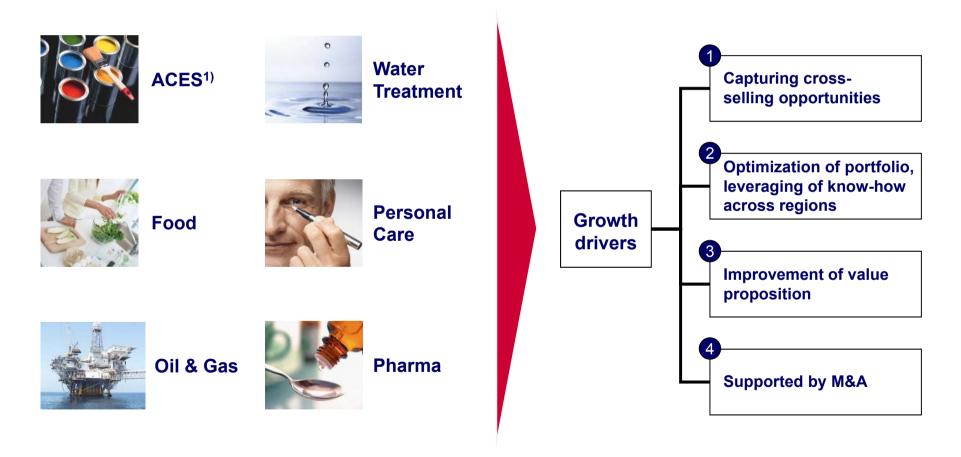

Substantially increase supplier penetration by proactively taking over smaller customers from suppliers

Top Initiative – Focused Segment Growth

Significantly increase share in customer industries where Brenntag can achieve above average growth

1) Adhesives, coatings, elastomers, sealants

Increase business with pan-regional / global key customers based on increased demand

BRENNTAG

Concept

- Management believes customers' distribution chemical spend may be 15% 25% of their total chemical spend
- Partnering with an international distributor can greatly reduce the cost and time of supplier management, allowing customer procurement to focus on strategic materials
- International distribution can bundle customers' global usage to simplify the interaction with producers
- Knowledge gain at one customer site can be rapidly transferred to all other sites, thus lessening project development time, approval of alternate sources, or implementing best-in-class logistics
- One contract or working document applies to all business interactions leading to quicker implementation, reduced misunderstandings and elimination of regional differences
- An international distributor can grow with the customer as the customer enters new geographical and business markets

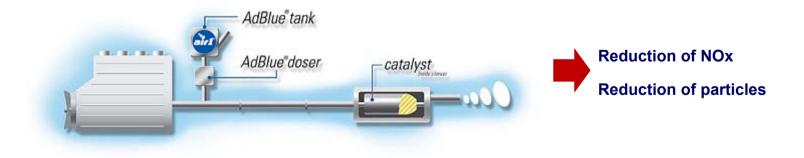

Top Initiative – Air1 / DEF¹⁾

High volume growth of high quality urea solution needed for catalytic reaction in trucks to fulfill regulatory requirements in Europe (Air1) and North America (DEF)

Concept

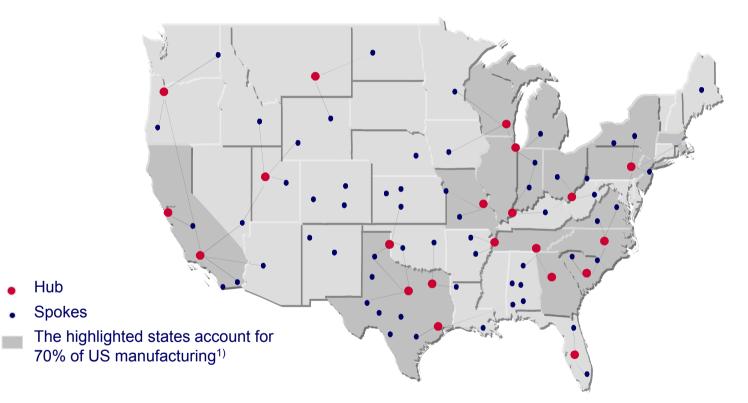

- In Europe and North America new trucks have to meet specific norms for reduced emissions
- High quality urea solution is needed for catalyst reaction to fulfill those norms
- Brenntag has developed special logistics and consultancy concepts to facilitate supply of our customers with Air1 / DEF. This concept focuses on guaranteeing a consistently high quality standard throughout the supply chain from production and all logistics services to the arrival of the product at the customer's premises

North America – Efficient Hub & Spoke System

Hub & spoke system – Efficient management of stock and storage utilization

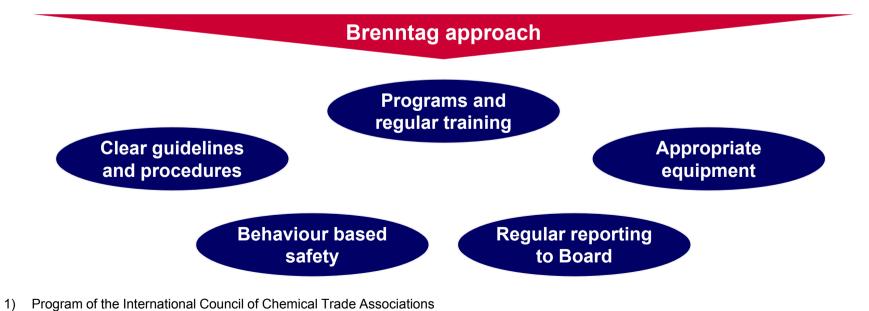

- Larger distribution sites ("hubs") are fully equipped with tanks, filling stations, mixing and blending facilities and storage facilities for packaged products
- Smaller distribution sites ("spokes") represent warehouse facilities for packaged products that are supplied from the larger sites
- 1) BEA Bureau of Economic Analysis

Committed to Health, Safety and the Environment

Committed to the Principles of Responsible Care / Responsible Distribution¹⁾

- Product responsibility
- Plant safety
- Occupational safety and health
- Comprehensive environmental protection (air, water, soil, raw materials, waste)
- Transport safety

Acquisitions have Achieved Three Main Objectives

Building up Scale and Efficiencies

- Germany, 2002 Biesterfeld
- UK and Ireland, 2006
 Albion
- Switzerland, 2006
 Schweizerhall
- Western US, 2006 Quadra and LA Chemicals
- Mid-South US, 2007 Ulrich Chemicals
