Reperforming Loans are a cornerstone of our portfolio. Credit performance has been stable given home price appreciation and the fully seasoned nature of our loans.

OUR POSITIONING 2023

Capital	<ul style="list-style-type: none"> ✓ Equity extraction from our existing RPL portfolio serves as a significant source of capital. ✓ 14 deals callable in 2023, 4 deals callable in 2024, and 6 deals callable in 2025. ✓ The longer these deals are outstanding, the greater the potential equity take-out. ✓ At the current rate of paydowns, estimated equity take-out of approximately \$1 billion if not called through 2025.
Portfolio Investments	<ul style="list-style-type: none"> ✓ Deployed capital into Seasoned RPL, Non-QM (DSCR) Investor Loans, and BPL sectors in Q1 2023 and will continue to grow residential credit portfolio as opportunities arise. ✓ Looking to rebuild Agency RMBS, Agency CMBS, and Senior Non-Agency RMBS portfolio given the attractive returns and liquidity profile.
Credit Performance	<ul style="list-style-type: none"> ✓ Our existing loan portfolio remains stable given low-LTVs (Wavg HPI LTV of 48%) and 182 months of seasoning. ✓ Potential for equity book value to increase approximately \$400 million if the accretable discount (net of premiums) on all assets and securitized debt were to be realized with current loss assumptions. Potential for equity book value to increase approximately \$500 million assuming all assets and securitized debt were repaid at par value.
Financing & Liquidity	<ul style="list-style-type: none"> ✓ Chimera has \$225 million in cash and \$420 million in unencumbered assets⁽¹⁾. ✓ Recourse leverage of 1.1x down from 1.3x in Q4 2022⁽²⁾.
Interest Rate Hedging ⁽¹⁾⁽²⁾	<ul style="list-style-type: none"> ✓ Current hedges are positioned in anticipation of the end of the Fed tightening cycle. ✓ 1 Year Swap will protect 48% of the floating rate repos and the 1x1 Swaptions gives us flexibility in case the Fed holds rates higher through 2024.

EARNINGS AVAILABLE FOR DISTRIBUTION

Earnings available for distribution is a non-GAAP measure and is defined as GAAP net income excluding unrealized gains or losses on financial instruments carried at fair value with changes in fair value recorded in earnings, realized gains or losses on the sales of investments, gains or losses on the extinguishment of debt, interest expense on long term debt, changes in the provision for credit losses, other gains or losses on equity investments, and transaction expenses incurred. In addition, stock compensation expense charges incurred on awards to retirement eligible employees is reflected as an expense over a vesting period (36 months) rather than reported as an immediate expense.

Earnings available for distribution is the Economic net interest income, reduced by compensation and benefits expenses (adjusted for awards to retirement eligible employees), general and administrative expenses, servicing and asset manager fees, income tax benefits or expenses incurred during the period, as well as the preferred dividend charges. Economic net interest income is a non-GAAP financial measure that equals GAAP net interest income adjusted for interest expense on long term debt, net periodic interest cost of interest rate swaps and excludes interest earned on cash. See a reconciliation of Economic net interest income to the most relevant GAAP measure below.

We view Earnings available for distribution as one measure of our investment portfolio's ability to generate income for distribution to common stockholders. Earnings available for distribution is one of the metrics, but not the exclusive metric, that our Board of Directors uses to determine the amount, if any, of dividends on our common stock. Other metrics that our Board of Directors may consider when determining the amount, if any, of dividends on our common stock include (among others) REIT taxable income, dividend yield, book value, cash generated from the portfolio, reinvestment opportunities and other cash needs. In addition, Earnings available for distribution is different than REIT taxable income and the determination of whether we have met the requirement to distribute at least 90% of our annual REIT taxable income (subject to certain adjustments) to our stockholders in order to maintain qualification as a REIT is not based on Earnings available for distribution.

Therefore, Earnings available for distribution should not be considered as an indication of our REIT taxable income, a guaranty of our ability to pay dividends, or as a proxy for the amount of dividends we may pay. We believe Earnings available for distribution as described above helps us and investors evaluate our financial performance period over period without the impact of certain transactions. Therefore, Earnings available for distribution should not be viewed in isolation and is not a substitute for net income or net income per basic share computed in accordance with GAAP. In addition, our methodology for calculating Earnings available for distribution may differ from the methodologies employed by other REITs to calculate the same or similar supplemental performance measures, and accordingly, our Earnings available for distribution may not be comparable to the Earnings available for distribution reported by other REITs.

Earnings available for distribution is presented on an adjusted dilutive shares basis. Certain prior period amounts have been reclassified to conform to the current period's presentation.
