Letter to shareholders

Dear shareholders and friends of comdirect,

We have all been preoccupied with one issue in the last few weeks: the Commerzbank strategy 5.0 and, in particular, their associated plans to acquire the remaining free float shares in comdirect. Commerzbank's goal is to merge comdirect with Commerzbank. The Board of Managing Directors and the Supervisory Board of comdirect will issue a statement on Commerzbank's acquisition offer that will be published on our homepage.

According to Commerzbank's statement, it has decided to integrate comdirect fully as the two company's business models, especially in retail banking, are aligning more and more. Commerzbank also intends to pursue a mobile first strategy moving ahead, an approach that we at comdirect have already successfully been implementing for the last 3 years. A Commerzbank press release also states that, through the merger, it plans to directly use comdirect's extensive digital expertise for the Group as a whole even more so than before.

The first 3 quarters of 2019 show yet again that comdirect has proven digital expertise and the capacity for innovation. What have we achieved? comdirect has continued its growth in a difficult market environment. With currently 2.7m customers, we have consolidated our position as Germany's third-largest direct bank. We brought in a net total of 174k new customers in the first 9 months after 160k in the same period of the previous year. Assets under control climbed by more than 20% in the first 3 quarters of 2019, in particular as a result of the growth in the portfolio volume. We are continuing our growth path with net fund flows of €7.8bn, €5.0bn of which in custody accounts.

The disposal of ebase in July 2019 has allowed us to report a record pre-tax consolidated profit of €176m for the first 9 months of this year. Even without the proceeds from the sale of ebase, we generated a good pre-tax profit. In our core business we generated a pre-tax profit of €60.6m. Despite the persistent negative interest rate environment, we generated net interest income after provisions for possible loan losses of €94.3m in the first 3 quarters of 2019, around 9% more than in the same period of the previous year. Our net commission income also increased by around 3.7% year-on-year to €161.3m.

Our strategy is working. And we still have a lot of good ideas. For example, we are planning to offer our customers a service comparing and managing insurance policies as a digital insurance manager. As a brokerage platform, we wish to secure after Guidants also TraderFox for our interface. Through our cooperations with HSV and BVB, we are showing fans and friends alike what modern, mobile banking means – and we intend to keep on gaining customers and market share through our finanz-heldinnen initiative as well. comdirect is the bank on your mobile!

Whatever the future may bring: We have plotted a course for further growth, and we will continue to develop the best solutions and offers for our customers in future.

Best regards,

Arno Walter

Nine-month development of comdirect group

Preliminary remarks

The full sale of our wholly-owned subsidiary European Bank for Financial Services (ebase) GmbH, which was contractually agreed in July 2018, was successfully concluded on 16 July 2019. Following approval by the banking supervision and antitrust authorities, ebase was sold to the financial technology provider FNZ Group, London. The reason behind the disposal is the stronger focus on our core business.

The purchase price is around €154m. Taking into account the costs of the transaction, the book value of the assets and liabilities being transferred and ebase's current profit, the contribution from discontinued activities to comdirect's 2019 consolidated pre-tax profit amounts to around €115.1m. This consists of ebase's current profit until 16 July 2019 (€11.8m) and the realisation gain on disposal (€103.3m). Thanks to this realisation gain, the profit from discontinued activities is unusually high for the past quarter at €104.4m. comdirect acquired ebase at a purchase price of €24.9m from what was then Commerz Asset Management Holding in 2009.

As a result of the disposal of ebase agreed in July 2018 and closed in July 2019, a distinction must be made between continued and discontinued activities in accordance with IFRS 5 in the nine-month statement as of 30 September 2019. ebase's contributions are assigned to discontinued activities. Extensive information on this can be found in the 2018 annual report. The B2C and B2B (ebase) segments largely correspond to continued and discontinued activities. Deviations arise as a result of IFRS 5 provisions.

Business performance

Customers (B2C)

(in k)

↑ 6.9%
Growth

At 174k in the first 9 months of this year, the strong net new customer growth outperformed the high figure for the previous year (160k). We therefore had 2,696k customers as of 30 September 2019. In addition to the strong customer growth, total assets under control also grew significantly in the first 9 months by 21% to €75.1bn. These figures demonstrate that comdirect is still fully on track for growth.

As a result of the disposal of ebase that was completed in July 2019 and the realisation gain this entailed of €103.3m, comdirect achieved a record pre-tax consolidated profit of €175.7m in the first 9 months of 2019. There was also strong net commission income and lower other administrative expenses in the past quarter, resulting in a pre-tax profit from continued activities of €29.7m for Q3 2019. We recently revised our expectation for 2019 as a whole and are now projecting a pre-tax profit for comdirect group of more than €185m (previous expectation: more than €170m).

Business and earnings situation

Growth in B2C segment

We continued our accelerated customer growth in the first 9 months of 2019 and gained a net total of around 174k new customers, bringing comdirect's total as of the end of the reporting period to 2,696k customers. The sharp increase in the customer base went hand-in-hand with a number of new custody accounts. The total number of custody accounts rose by almost 10% as against the end of 2018 (1,384k) to 1,519k. And the number of trades also clearly surpassed the prior-year level at 18.1m (15.9m).

At €5.0bn, net fund flows into custody accounts were above the previous year's high level (€4.7bn), bringing the portfolio volume to a record figure of €46.9bn. Buoyed by positive market value effects of €5.3bn, total assets under control thus also reached an all-time high of €75.1bn as of the end of the reporting period (end of 2018: €62.1bn). The deposit volume climbed by €2.8bn in the first 9 months of this year.

Pre-tax profit from continued activities

The pre-tax profit from continued activities amounted to €60.6m in the reporting period, clearly bettering the prior-year figure (€53.4m). The annualised return on equity (ROE) before taxes was 11.9% (previous year: 11.8%).

Total income from continued activities (in €m)

- Other income components
- Net commission income
- Net interest income

↑ 8.3 %
Growth

Development of total income from continued activities

The increase in total income from continued activities of 8.3% to €273.1m (previous year: €252.2m) comes as a result of positive developments in net interest income and net commission income in addition to higher other income components.

The rise in net interest income before provisions for possible loan losses of 8.3% to €94.6m (previous year: €87.4m) essentially related to volume effects in deposit and lending business. Higher portfolio loan loss provisions as a result of growth in lending business were to a large extent offset by the validation of the parameters in the risk model. Net expenses for provisions for possible loan losses amounted to €0.3m in total (previous year: €1.2m). Accordingly, net interest income after provisions for possible loan losses totalled €94.3m (previous year: €86.2m).

Net commission income amounted to €161.3m in the reporting period, up on the previous year's figure of €155.5m. Commission income was higher than in the previous year at €201.0m (€189.9m), more than compensating for the rise in commission expenses in connection with gaining new customers from €34.3m to €39.7m in particular.

Other income components amounted to €17.5m in total in the reporting period, improving on the previous year's figure of €10.4m. The main factor behind this was the rise in the disposals and valuation result from financial assets to €13.8m (previous year: €4.2m). By contrast, the other operating result declined to €3.7m (previous year: €6.3m).

Development of administrative expenses from continued activities

The rise in administrative expenses from continued activities of 6.9% to €212.5m (previous year: €198.8m) is due to the increase in other administrative expenses, higher personnel expenses and higher depreciation on office furniture and equipment and intangible assets. The cost/income ratio fell slightly to 77.7% (previous year: 78.5%).

The increase in other administrative expenses from €129.1m in the same period of the previous year to currently €134.5m is essentially due to the expense effects of more intensive investment in growth in the first half of 2019. Furthermore, there were higher mandatory contributions to deposit insurance schemes as a result of increased customer deposits in particular.

Personnel expenses rose by 8.6% to €63.7m (previous year: €58.7m). In addition to standard pay increases, this also resulted from the higher number of employees in the first three months of this year on account of growth.

The growth in depreciation on office furniture and equipment and intangible assets to €14.3m (previous year: €11.0m) is essentially due to the adoption of IFRS 16 and the associated amortisation on capitalised right-of-use assets.

Income from discontinued activities

The pre-tax profit from discontinued activities of €115.1m consists of the gain on the disposal of ebase completed on 16 July 2019 of €103.3m and the current profit from discontinued activities of €11.8m before tax (previous year: €10.9m).

Consolidated profit

comdirect group generated a record pre-tax consolidated profit of €175.7m (previous year: €64.3m) in the first nine months of 2019. The consolidated net profit amounted to €154.0m (previous year: €47.3m). Earnings per share were therefore €1.09 (previous year: €0.34). The comprehensive income of comdirect group, including other comprehensive income for the period, was €160.0m (previous year: €46.2m).

Strategy implementation and product development in the third quarter

We again continued our growth strategy in the third quarter of 2019 and implemented further efficiency measures to make our business model more scalable.

As a smart financial companion for the mobile generation, comdirect is soon set to commence operations as an insurance broker on mobile phone as well. This will not only make life simpler for our customers, giving them more freedom when it comes to insurance, but will also allow us to tap a new source of income, making ourselves less dependent on the interest rate environment. comdirect will thus increasingly become a platform in its own right. This concept is also reflected by our banking partnership with one of the most beloved football clubs in the world, BVB. There is a banking app specifically just for BVB fans with its own VISA card, based on the same concept as for HSV. At the same time, as a brokerage platform with our brokerage API, we are an ideal platform for adding additional external providers (such as TraderFox) alongside Guidants moving ahead.

We have achieved key successes in cost and process management. For example, we are now receiving more than 50k of our customers' calls per week using our voice dialogue system, and our hybrid chat bot supports around 25% of the chats. comdirect is well on its way to soon being fully scalable. Other efficiency measures are being developed and implemented on an ongoing basis. For example, in the next few months, 5 new self-services will be launched in the voice dialogue system (including blocking a VISA card), which will make life both easier and freer for our customers. This enables us to serve a growing customer base while our use of resources remains the same.

Outlook

Our forecasts from our 2018 annual report have essentially been confirmed as the 2019 financial year has progressed.

For our continued activities, this specifically means that net interest income will be moderately higher than the previous year's level despite a consistently and clearly negative interest rate environment. Our guidance from the previous year on net commission income has also been confirmed as a result of increased trading activity compared to 2018 on the part of our customers. Administrative expenses will be slightly higher than the 2018 level.

On the basis of the strong income in the third quarter, we are raising the target for comdirect group's pre-tax consolidated profit for the year as a whole as communicated in the 2019 half-year report from more than €170m to more than €185m. This will consist of a pre-tax profit from discontinued activities of €115m and a pre-tax profit from continued activities of more than €70m. Consequently, comdirect group's pre-tax ROE will also be substantially higher than in 2018 at more than 25%.

comdirect group's risks and opportunities have not changed significantly since the 2018 annual report. The risk report can be found on pages 44 to 56, and note (54) on risk reporting on financial instruments can be found on pages 146 to 152. The opportunity report is on pages 57 and 58.

comdirect group has adequate risk buffers to outlast even sustained periods of market weakness. No realistic risks that could threaten comdirect group are currently discernible.

Supplementary report

There were no events or developments of special significance after 30 September 2019.
