Commerzbank ESG Presentation

Sustainability approach

Sustainability has been an integral part of our corporate strategy since 2020

We want to play our part in bringing global financial flows into line with the goals of the Paris Agreement and the European Union's Green Deal, thereby promoting climate-compatible development.

Sustainability as a business opportunity

- Every client is affected by transformation – we offer innovative products and services to support our clients in the best way
- Customers expect sustainable banking – only if we offer credible products and solutions we will sustain
- Digitisation and sustainability go hand in hand – we want to use those synergies

Sustainability has to be approached holistically

- We understand sustainability across all dimensions
- Sustainability affects all segments of our bank – operations, product offering, risk management

Sustainability needs to be managed consequently

- Climate and ESG related risks are potential risks for our clients and for us – we identify, monitor and manage these risks consequently
- Customer relationships which are not sharing our core beliefs will be carefully looked at

Through Commerzbank's strategy upgrade "Momentum", sustainability is deeply anchored within the organisation

- "Momentum" brings together the interests of our three main stakeholder groups: customers, investors, and employees
- The focus of this strategy upgrade is to maintain and strengthen the trust of stakeholders in Commerzbank. Key drivers for this are security, reliability, delivery, and responsibility
- **Responsibility, in this context, represents the entire sustainability spectrum of "Environmental, Social, and Governance (ESG)" – which we fully integrate into our actions**

Commerzbank's sustainability strategy follows a holistic view, shaped by ESG building blocks

» Our overarching goal is directed by our commitment to meet the global challenges as a responsible partner for sustainable economic and social development

Responsibility represents the entire sustainability spectrum of "Environment, Social and Governance (ESG)"

E nvironment

The protection of the environment and climate as well as the support of our customers in their efforts are firmly anchored in Commerzbank.

S ocial

We value an open corporate culture and actively contribute to society with various commitments.

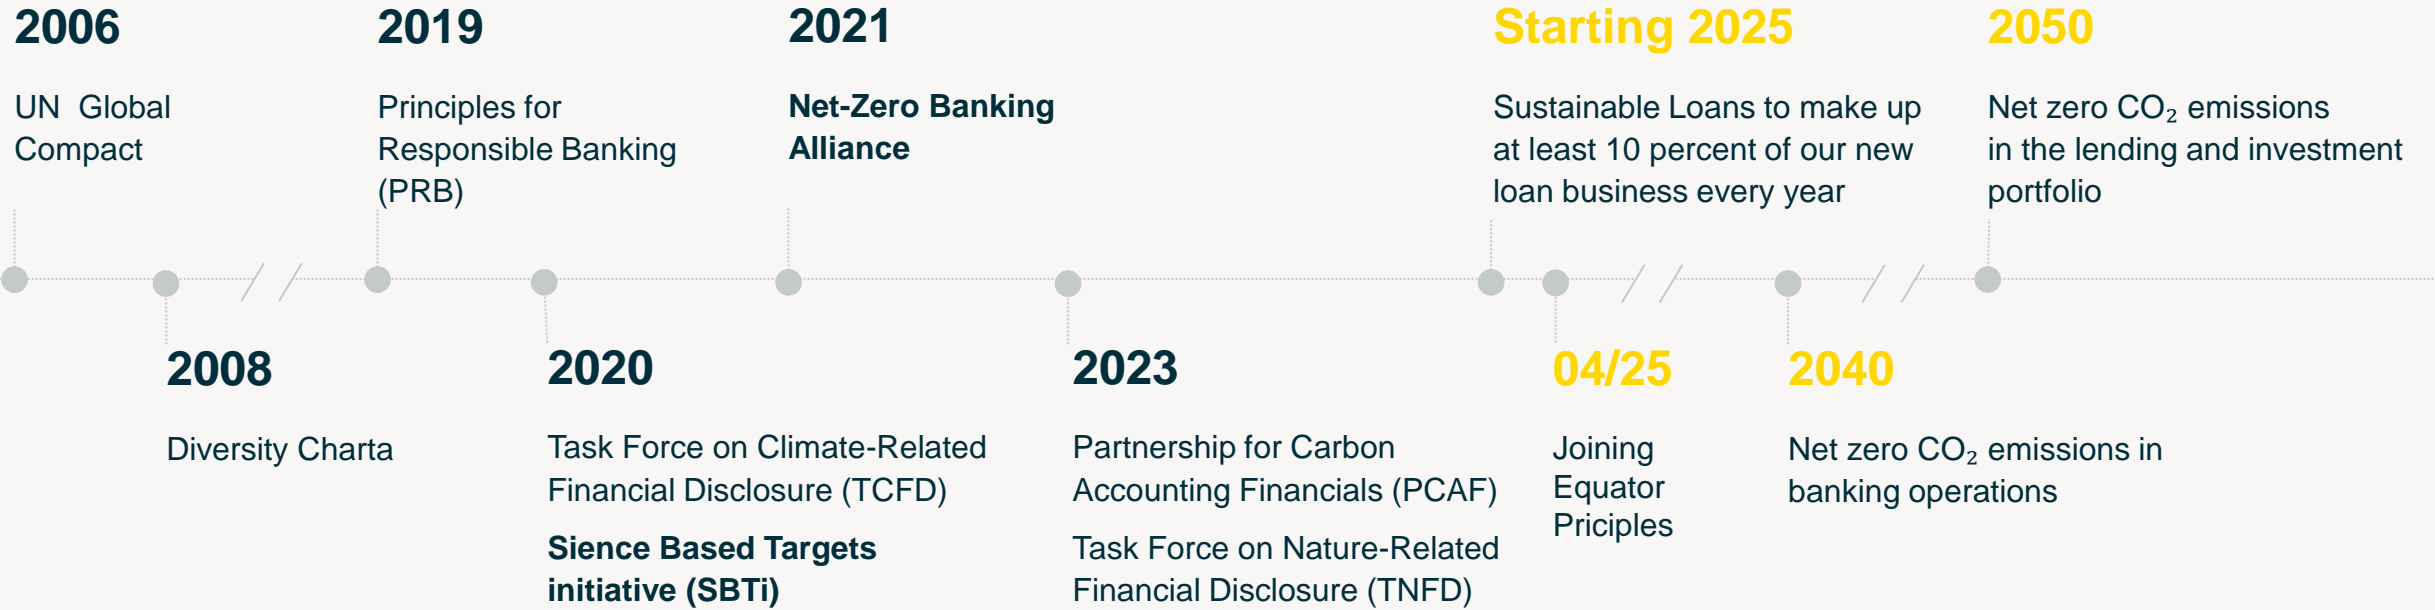

G overnance

Solid values, binding codes of conduct as well as demanding commitments form the framework of our business activities.

Strong commitments and partnerships build the foundation of Commerzbank's approach to sustainability

Regulatory requirements¹

- **EU Taxonomy**

Ensuring alignment of signatory Banks with SDGs and Paris Climate Agreement
- **Taskforce on Nature-related Financial Disclosures (TNFD)**
Disclosure of nature-related risks and opportunities
- **Science Based Targets Initiative (SBTi)**
Controlling the customer portfolio according to scientifically based goals
- **Equator Principles**
Ensuring best practice responsible banking approach to project related finance

1) Exemplary excerpt

Good progress on ESG priorities and consistent plan going forward on Commerzbank's pathway to net-zero

Key Achievements 2024

New position on deforestation

We strengthened and expanded our position on deforestation regarding the sectors of forestry, palm oil, beef and soy

Development on ESG risks

ESG risk management further developed by analysing financial materiality of social and governance risks

Majority stake in Aquila Capital

We accelerated our growth in the sustainability business by acquiring 74,9% of Aquila Capital Investmentgesellschaft

German price for inclusion

Commerzbank's commitment to inclusion was awarded the inclusion price for the economy

Corporate Knights

Commerzbank once again ranked among Corporate Knights' 100 most sustainable companies worldwide

Green saving account

Commerzbank launches green saving account which supports reforestation and ensures sustainable use of savings

Outlook

Driving our ESG strategy

Our net zero commitment is at the heart of our sustainability strategy. However, we seek for a holistic ESG strategy including Social & Governance.

Empowering our customers

We want to continuously enhance our sustainable finance product portfolio with a special focus on green infrastructure and ESG advisory activities.

Looking into the future

We are building a robust ESG data infrastructure to adjust to growing reporting requirements and keep screening new business opportunities.

Environment

Embracing our responsibility – for the environment: Our contribution to the sustainable transformation

Our net zero commitment is at the heart of our sustainability strategy and based on two pillars as we support our customers in their sustainable transformations and lead by example. We are pursuing this by means of three specific targets:

Target E1

Net zero portfolio

We aim to achieve net zero carbon emissions from the **loan and investment portfolio by 2050**. We have joined the Science Based Targets initiative (SBTi) to calculate and set intermediate portfolio targets.

Target E2

10 % sustainable loans

We want to **permanently allocate** at least 10 percent of our **new loan business** to sustainable projects and business models in order to actively support sustainable transformation.

Target E3

Net zero banking operations

We want to achieve **net zero carbon emissions** in our own operations **by 2040**.

1st KPI: Reduction of our financed emissions using science-based target setting

What is the SBTi?

- UK charity with CDP, UN Global Compact, World Resources Institute, We Mean Business Coalition and WWF as partner organisations
- Defines and promotes best practices for emissions reductions and net zero targets in line with the climate science
- Participation of about 9.800 companies worldwide, of which 178 are European financial institutions

What are the advantages?

- Enables scientifically sound CO₂ targets setting based on latest climate research
- Promotes standardisation of target setting through structured and extremely transparent framework
- External validation of set targets by SBTi

- **September 2020**
Commerzbank joins SBTi
- **2021**
Obtaining CO₂-data for financed emissions calculations
- **2021**
Portfolio baselining & analysis
- **October 2022**
Submission of the 2030 targets to the SBTi
- **March 2023**
Validation of targets by SBTi and start of portfolio steering
- **Since December 2023**
Disclosure and reporting in the non-financial report and CRR Pillar 3 ESG disclosure

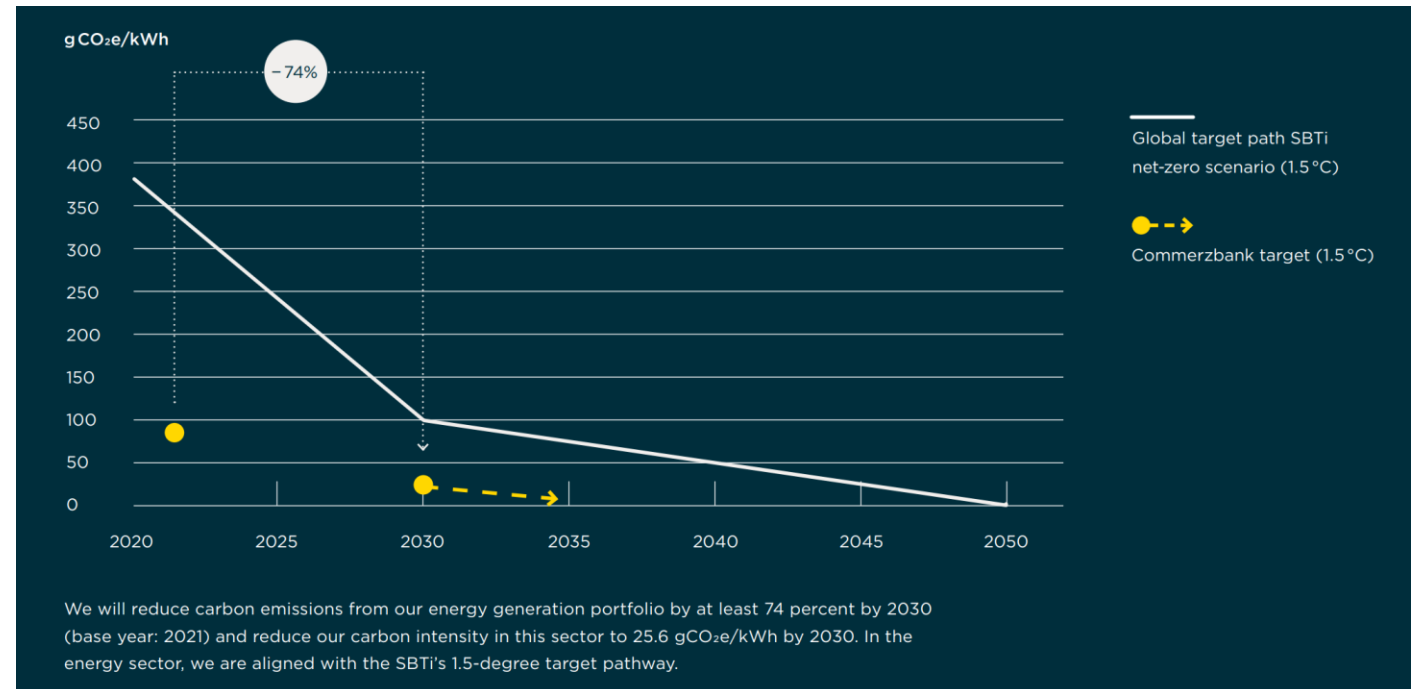

1st KPI: Sustainable portfolio steering based on reduction paths for CO₂-intensive sectors

Net-zero portfolio by 2050 (according to the SBTi)

- Within the SBTi framework, we use two different methodologies to set targets
 - The sectoral decarbonisation approach (SDA) is a method for defining sector-specific emission reduction pathways based on science-based emission budgets
 - The temperature score method determines the current “temperature value” of a portfolio based on borrowers’ reduction targets on public emissions

The following carbon-intensive sectors are covered by the SDA methodology (including exemplary diagram):

1st KPI: Reduction targets for CO₂-intensive sectors under the sectoral decarbonization approach (SDA)

1) If no emissions data are available for individual customers in SDA sectors, these are included in the temperature score. We comply with the SBTi minimum coverage rules.
 2) The specified carbon reduction pathways represent the actual or target status at the end of the respective period under review, with 2021 considered the base year and 2030 the target year.
 3) The SDA target for aviation generally does not yet form part of the current SBTi validation. This is because the SBTi's SDA methodology for aviation is currently still designed for the real economy and has not yet been approved for financial institutions.

Progress and challenges

- In the area of energy generation, the Commerzbank portfolio at the end of September 2024 performed much better than the target pathway
- Developments are especially challenging in the cement sector as well as in the private and commercial real estate finance sector
- The nationwide collapse in the real estate finance business, partly due to market uncertainties and price increases had a negative impact on achieving targets in this sub-portfolio

1st KPI: Reduction targets for CO₂-intensive sectors under the temperature score method

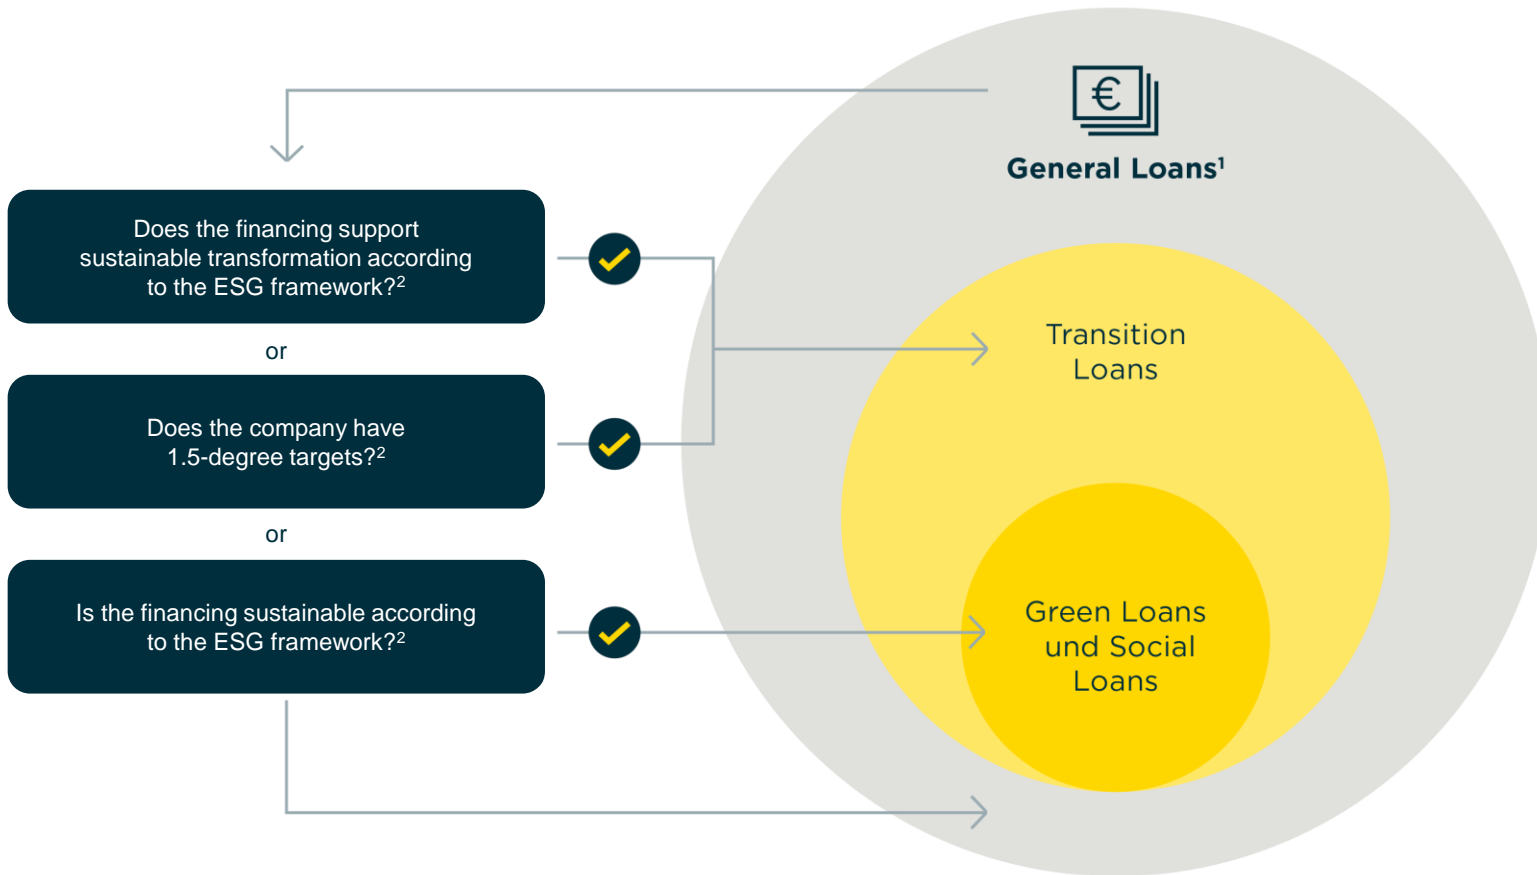

Asset Class	Sector	Metric	GHG Scope	Temperature Score ¹			Utilisation in € bn, per 09/2024	Financed emissions in Mt CO ₂ eq, per 09/2024

				09/2024 (Is)	2.91	° C			
				12/2030 (Target)	2.66	° C			

- 1) The specified temperature scores represent the actual or target status at the end of the respective period under review, with 2021 considered the base year and 2026 the target year.
 2) Utilisation in the investment asset class includes the Commerzbank AG stake in mBank (approximately €4.2bn as at September 2024); the information on financed emissions from this asset class does not include financed emissions from mBank.

In 2024, Commerzbank again made significant progress in the calculation and steering of targets. Still, the achievement of the 2030 SBTi targets is challenging and dependent on external conditions. We continue to accompany and facilitate the transformation in close cooperation with our clients.

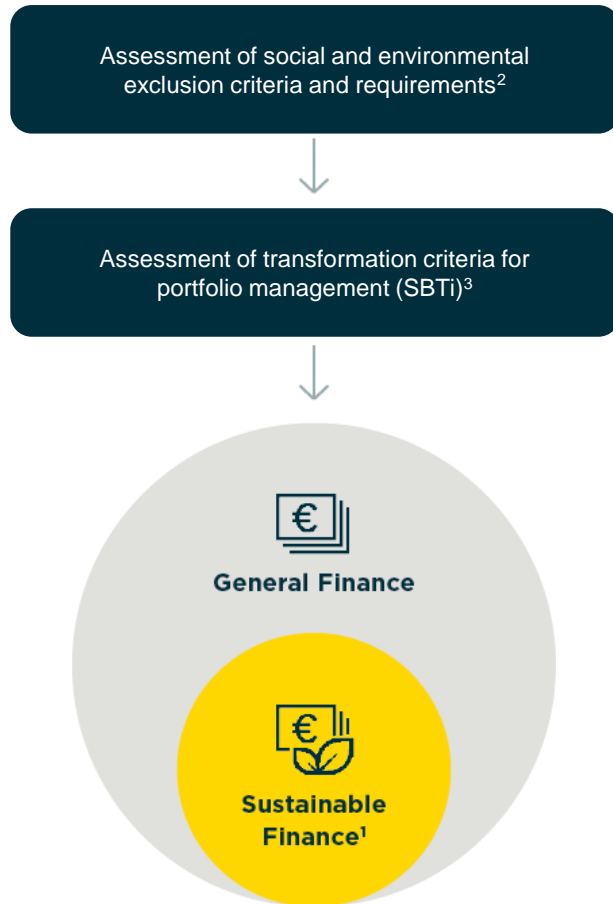

2nd KPI: 10 percent of our new loan business for sustainable projects and business models

- New target will be reported from Q1 2025 onwards
- We directly finance sustainable projects and business models (green loans and social loans) as well as initiatives that support the transition to more sustainable business models (transition loans)
- With our assessment scheme and sustainability requirements disclosed in our ESG framework, we clearly and transparently define which commitments can be categorized as sustainable loans (green, social or transition loans)

1) Our criteria for General Finance (including general loans) are set out in the ESG framework on page 13.
2) The assessment steps are detailed in the ESG framework on page 35.

General Finance Insight: Compliance with exclusion criteria is compulsory to be included in Commerzbank's portfolio

Exclusion criteria and requirements

- Commerzbank incorporates environmental and social aspects through sector-specific exclusion criteria and requirements
- We regularly assess transactions and business relationships and check compliance with standards on a case-by-case basis

- 1 Deforestation and agricultural commodities
- 2 Mining
- 3 Energy
- 4 Fossil fuels
- 5 Defence and surveillance technology
- 6 Shipbreaking
- 7 Textiles
- 8 Petrochemicals

1) The Sustainable Finance criteria and our assessment scheme for sustainable loans are described in the ESG framework from page 34 onwards.

2) Our criteria for General Finance (including general loans) are set out in the ESG framework on page 13.

3) The assessment transformation criteria for portfolio management (SBTi) is set out in the ESG framework on page 20.

3rd KPI: Net-zero CO₂ emissions in our own banking operations by 2040

Gross CO₂ emissions Commerzbank AG

(Scope 1, 2 and 3 emissions, excl. financed emissions and subsidiaries | '000 tCO₂)

Net zero target in accordance with the Science Based Targets initiative (SBTi)

Additional actions for CO₂ reductions are already in development

In 2040, residual CO₂ emissions will be reduced to net zero by actions like reforestation

Since 2015 Commerzbank AG is operating climate-neutrally in Germany and since 2021 on a worldwide basis. We offset remaining greenhouse gas emissions by purchasing and retiring high-quality CO₂ certificates.

Governance

Embracing our responsibility – for transparency: Integrating sustainability holistically

Commerzbank is committed to corporate responsibility. Strong values, binding codes of conduct and ambitious voluntary commitments form the framework for our business activities. They are reflected in our compliance and risk management as well as in our sustainability governance structure.

Target G1

Zero tolerance for corruption

Our **clear stance** against corruption is a key Group objective. We implement comprehensive measures to prevent and detect corruption.

Target G2

Award-winning culture of integrity

The **Culture of Integrity Score** measures our integrity as part of the Risk Culture Assessment. Our aim is to achieve top scores permanently.

Governance structure established sustainability as a top priority anchored holistically at all levels in the bank

Establishment of **various top management committees** to ensure tone from the top (Group Sustainability Board, Sustainability Advisory Board, ESG Committee)

Holistic management by **the central division "Group Sustainability Management"** with reporting line to the CEO

Discussion, development and implementation takes place within the framework of the **strategic initiative** and bank-wide **information and exchange formats**

ESG is gradually anchored in the Bank's Written Framework (Schriftlich fixierte Ordnung, SFO) in coordination with relevant units

Group Sustainability Board and ESG Committee demonstrate top-management commitment

Executive level

Group Sustainability Board (GSB)

- Cross-management decision-making body for strategic sustainability issues under the leadership of the CEO
- The GSB defines and monitors Commerzbank's strategic sustainability goals

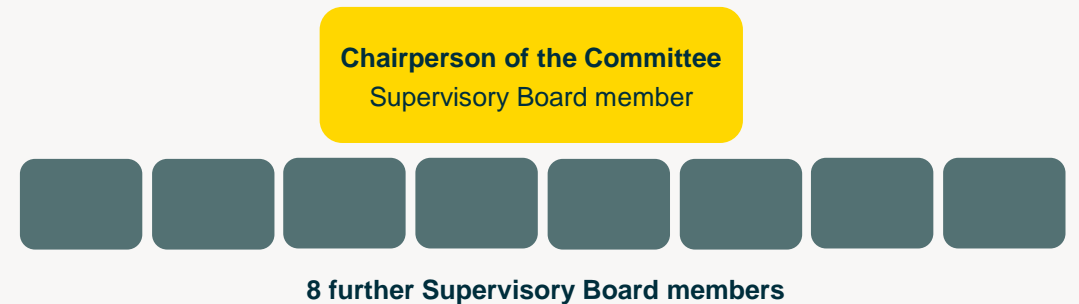

¹ Deputy Chair of the GSB | ² Organisation and implementation of the GSB | ³ No voting rights

Control level

ESG Committee of the Supervisory Board

- The Environmental, Social and Governance Committee advises the Board of Managing Directors regarding sustainability issues
- It also monitors the implementation of the sustainability strategy and compliance with regulatory requirements in the areas of ESG
- In 2024, the ESG Committee dealt with, among other things, the ESG framework, the expansion of taxonomy reporting, the materiality analysis required by the CSRD, a greenwashing risk analysis, Commerzbank's sustainability communications roadmap and mBank's sustainability strategy

Group-wide programme Sustainability 360° implements the sustainability strategy throughout Commerzbank

The customer segments, risk management and numerous other relevant Group divisions as well as Commerz Real are involved in the Group-wide initiative

The program forms a bracket around all sustainability activities and ensures a close linkage of overarching topics, coordinated action and stringent tracking

A steering committee consisting of members of the top management of the relevant divisions monitors progress every two months. The status of the programme is regularly reported to the Board of Managing Directors

- At year-end 2024 we achieved an outstanding volume for sustainable loan products of €13,1bn
- Since June 2024 we increased the benefit for A+ mortgage loans and additionally introduced benefits for energy efficiency classes B and C
- With the KlimaDarlehen we support small business clients to finance sustainable purposes in line with our ESG Framework

Saving resources by digitalization

- CO2-savings by reducing paper and optimizing physical mailing operations
- Continuous extension of digital channels and communication
- Continuous increase of the usage of digital banking activities by our customers

Building sustainable services & ecosystems

- Offering an ecosystem beyond core banking services in order to support the sustainable transformation of small business clients:
 - Impact Solutions platform: offering an emissions calculator, access to third party service providers & carbon offsetting solutions
 - Global Changer: a software service for decarbonisation management
 - Topic-related networking events
- Sustainability is part of advisory and consultation processes to reflect on sustainability-related considerations

New product launched

- **Sparkonto Plus:** Is a savings account with sustainable use of savings. Since the savings of Sparkonto Plus accounts are used solely to finance energy efficient residential buildings, it enables our private customers to save responsibly.

Equator Principles commitment ensures responsible banking in project-related corporate client business

Why Equator Principles

- International risk management framework voluntarily **established 2003 and adopted by ca. 130 Banks/ECAs** to manage and monitor project-related ESG impacts (e.g. DB, HSBC, Unicredit, ING, BNP, Santander)
- Set of 10 principles requiring referencing **national law and the Environmental and Social Performance Standards** of the International Finance Corporation
- Equator Principles membership and team signals **capacity and credibility to ECAs & banks to take on lead arranger roles** of large project-related transactions and reduces reputational & credit risk

Bank-wide commitment relevant for certain project-related financings

Effective implementation safeguarded by new EP Office Support

- Three ESG specialists supporting in structuring and monitoring EP-relevant transactions, guiding colleagues, clients, export credit agencies (ECA) and 3rd party consultants
- Arranger roles to coordinate large ECA financing and help clients align with international best practice in managing environmental, social, human rights and climate risks on projects
- Commerzbank confirmed as new member with probationary period from April 2025

Additional information

ESG framework – further links – contacts

The new ESG framework considers sustainability in all dimensions and offers a structured overview

With “acting responsibly, growing sustainably”, the ESG framework sends a clear message that is in line with our ESG position: *For us, sustainability is responsibility and success. We empower our clients with customised solutions and shape the sustainable transformation together.*

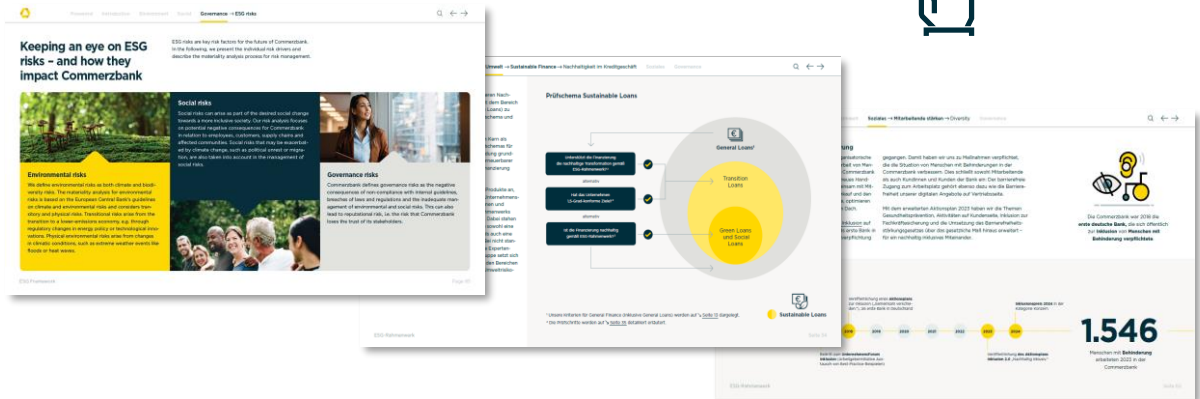

Structure follows the E, S and G logic

- All three dimensions E, S and G anchored in the content - chapters describe the bank's commitment in all dimensions
- The chapters focus on the bank's objectives (KPIs) as well as transparency about further banking activities in the areas, in particular risk management

Embracing our responsibility – for the environment

Embracing our responsibility – for people

Embracing our responsibility – for transformation

In addition to the ESG framework, ESG information is regularly published in various formats

Disclaimer

- This presentation contains forward-looking statements. Forward-looking statements are statements that are not historical facts; they include, inter alia, statements about Commerzbank's beliefs and expectations and the assumptions underlying them. These statements are based on plans, estimates, projections and targets as they are currently available to the management of Commerzbank. Forward-looking statements therefore speak only as of the date they are made, and Commerzbank undertakes no obligation to update any of them in light of new information or future events. By their very nature, forward-looking statements involve risks and uncertainties. A number of important factors could therefore cause actual results to differ materially from those contained in any forward-looking statement. Such factors include, among others, the conditions in the financial markets in Germany, in Europe, in the United States and elsewhere from which Commerzbank derives a substantial portion of its revenues and in which it holds a substantial portion of its assets, the development of asset prices and market volatility, potential defaults of borrowers or trading counterparties, the implementation of its strategic initiatives and the reliability of its risk management policies.
- In addition, this presentation contains financial and other information which has been derived from publicly available information disclosed by persons other than Commerzbank ("external data"). In particular, external data has been derived from industry and customer-related data and other calculations taken or derived from industry reports published by third parties, market research reports and commercial publications. Commercial publications generally state that the information they contain has originated from sources assumed to be reliable, but that the accuracy and completeness of such information is not guaranteed and that the calculations contained therein are based on a series of assumptions. The external data has not been independently verified by Commerzbank. Therefore, Commerzbank cannot assume any responsibility for the accuracy of the external data taken or derived from public sources.
