Responsibilities and interfaces of Corporate Environmental Protection

Daimler environmental protection targets 2022 structured by...

Product

Climate Protection & Energy

Europa		Weltweit	
Reduction CO ₂ emissions passenger cars	-30% 2007 - 2016	Reduction CO ₂ emissions passenger cars and Light-Duty-Trucks USA	-25% 2012 - 2019
	-44% 2007 - 2021		
Reduction CO ₂ emissions CV light	-10% 2014 - 2018	Reduction CO ₂ emissions passenger cars China	-25% 2012 - 2019
Reduced consumption CV heavy	-20% 2005 - 2020	Reduced consumption CV heavy (NAFTA)	-10% 2015 - 2019
Reduced consumption of buses	-20% 2005 - 2020		
Reduction of CO ₂ and nitrogen oxide emissions over the entire life cycle for each new model generation			10-20% compere predecessor
Achieve a leading position in premium segment of electric and hybrid vehicles			End 2017

Air Quality & Health

Market launch of ten models, which conform to the future legislation Real Driving Emissions (Step 1)	End 2017
Ensure allergy sufferer friendly interiors for all new passenger car models	By 2020

Resource Conservation

Use of renewable raw materials (MBC)	+25% 2010 - 2015
Use of recyclates (MBC)	+25% 2010 - 2015
Evaluate recourse efficiency of MBC	By 2020
Increased use of car2go	X 10 2011 - 2015
Construction of a hydrogen infrastructure	400 By 2023

Production

Reduction absolute CO ₂ emissions in plants (EU)	-20% 1990 - 2020	Reduction specific CO ₂ emissions in plants	-20% 2007 - 2015
		Reductions specific energy consumption MBC plants	-25% 2015 - 2022

■ New in 2015

Reduction specific water consumption of MBC plants	-15% 2015 - 2022
Reduction specific waste amount of MBC plants	-25% 2015 - 2022

DAIMLER

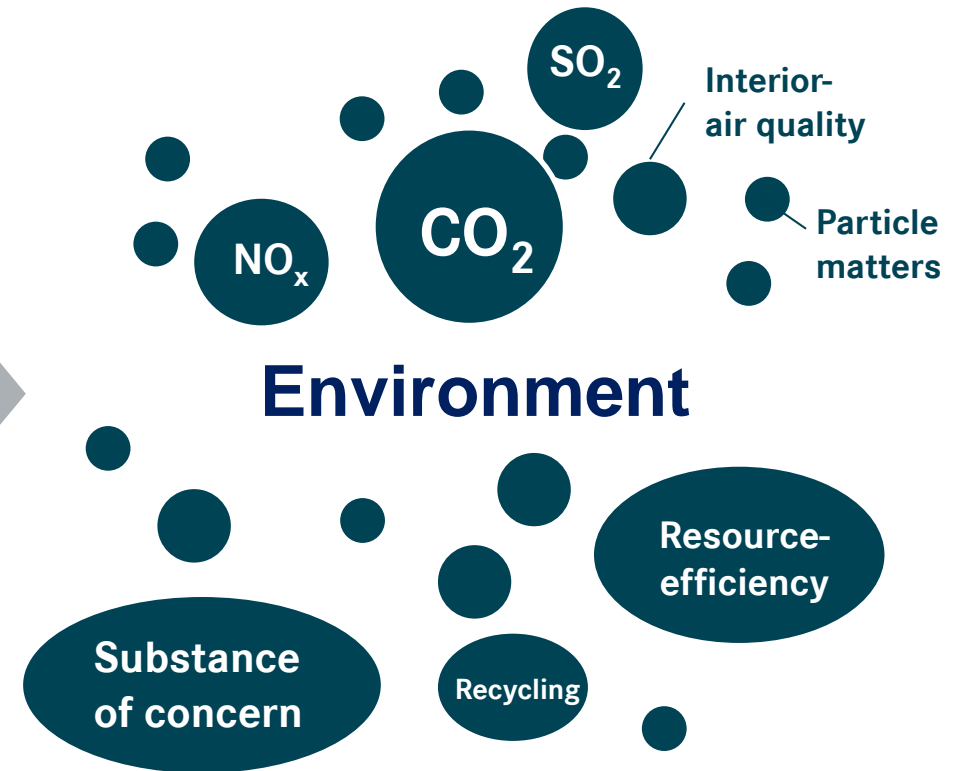

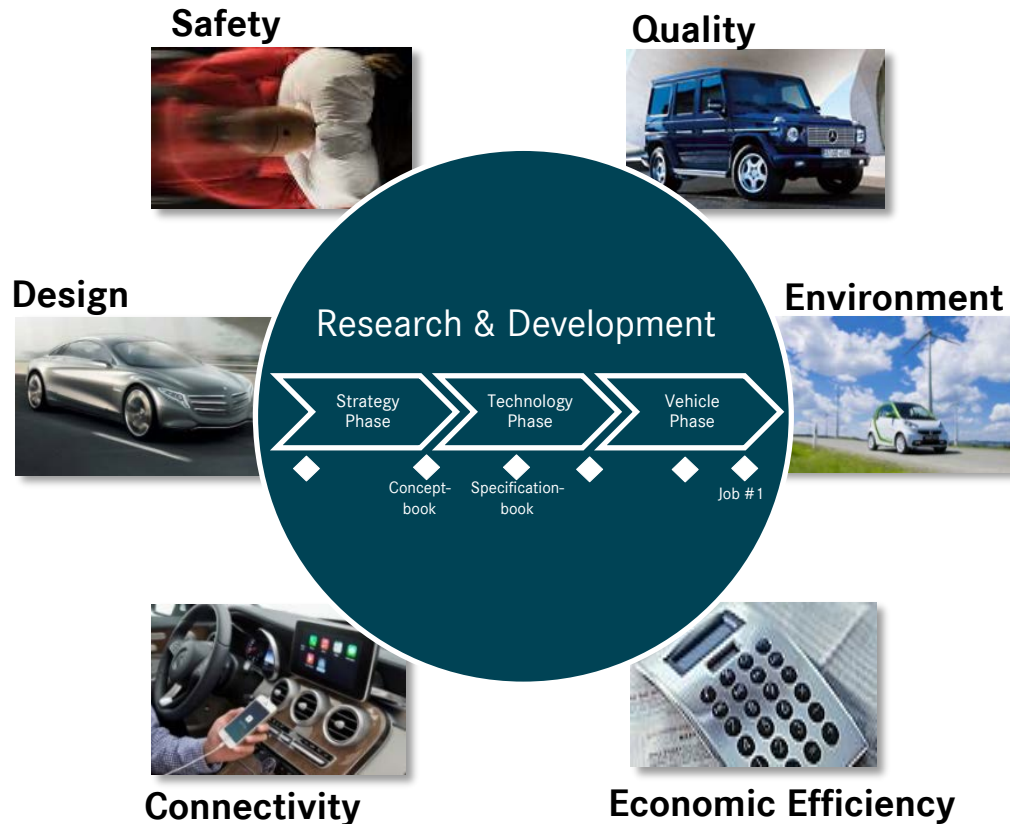

- I. Organisation, Scope & Targets
- II. Holistic approach towards Environmental Challenges
- III. Production related Issues
- IV. CO₂ & Electrification
- V. CASE

Elements of the environmental management system RD with focus on design for environment

Challenges for research & development of automobiles

Balancing of disparate requirements in a permanent task in Research & Development

Within the different environmental targets contradictory effects are possible

For our Products a look at the whole life cycle is crucial – E-Class Plug-In Hybrid E 350 e

The resource input of C 250 and C 350 e

Comparison of Material Composition

+ 270 kg additional weight of C 350 e compared with C 250

Comparison of Modules [kg] (C 250 vs. C 350 e)

- Steel/Ferrous Materials
- Light Metal
- Polymer Material
- Other Metals
- Operating Liquids
- Other Materials

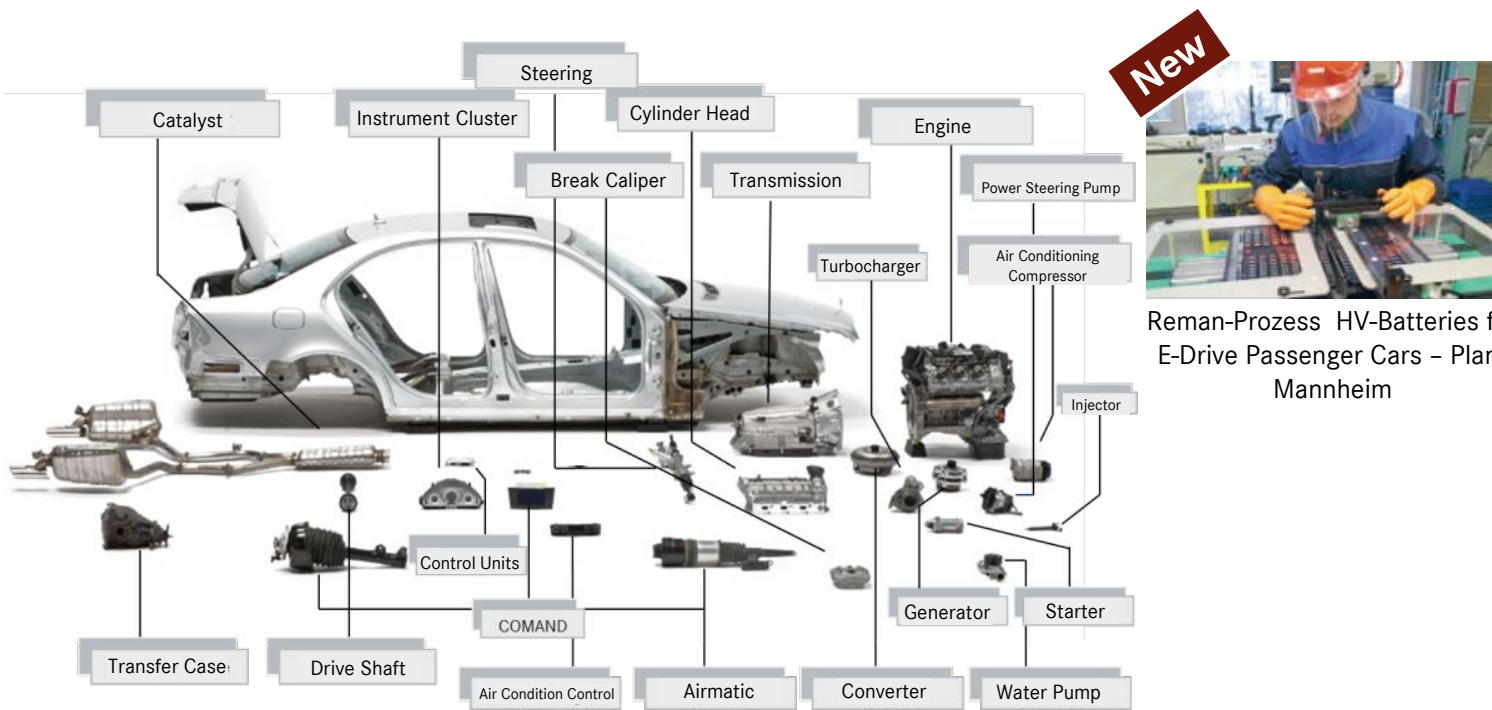

Remanufacturing / Product Recycling

New Life for Used Parts

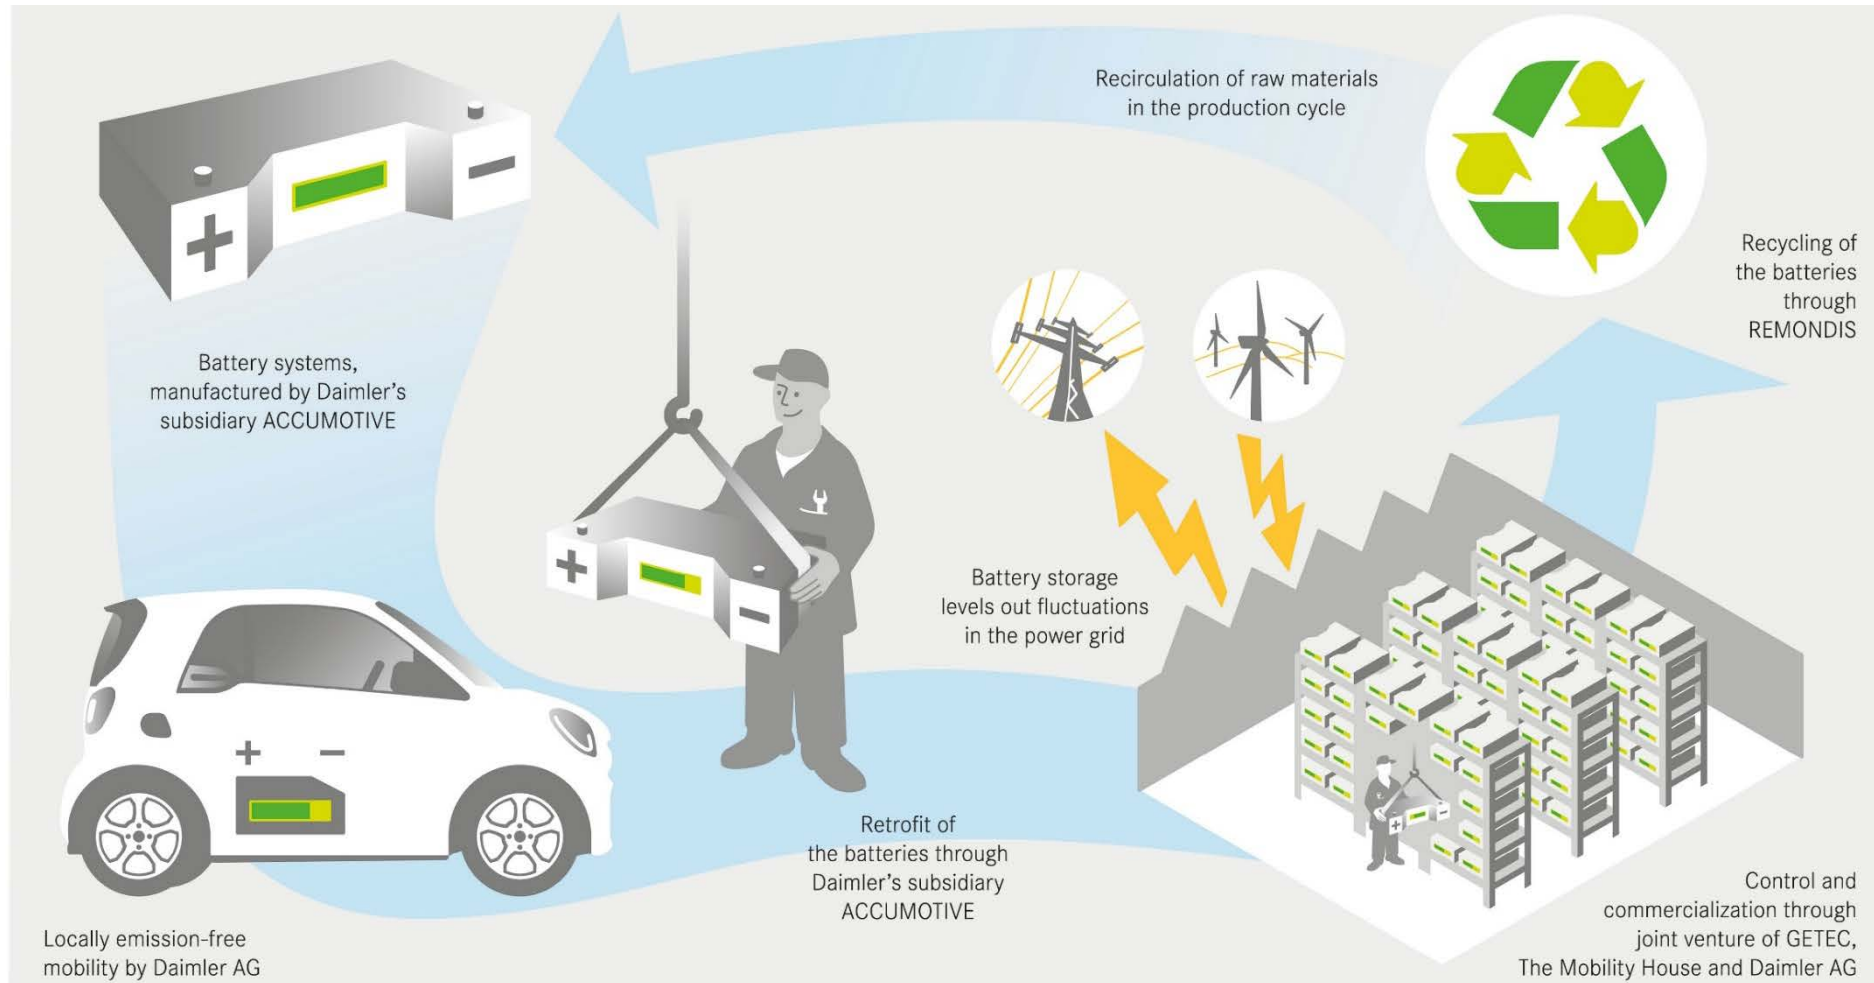

Over 12,000 Parts in Reman Portfolio - incl. E-Drive Components...

...with significant environmental benefits

E-Mobility thought to the end

World's largest 2nd-use battery storage (13MW) in operation

DAIMLER

- II. Holistic approach towards Environmental Challenges
- III. Production related Issues
- IV. CO₂ & Electrification
- V. CASE

Despite massive quantity increase, we reduced essential environmental impacts of **Daimler plants** in 2015

* Produced vehicle without joint ventures/contract manufacture

The relative environmental performance of MBC production improved significantly compared to the previous year

Energy Consumption

- **5.5%** per veh.

CO₂ Emissions

- **5.7%** per veh.

Waste amount

- **3.9%** per veh.

Water Consumption

- **2.2%** per veh.

VOC Emissions

- **1.8%** per veh.

Production

Units* 2015: 292,000 1.7 Mio. 508,000 29,000

Changes to 2014

+12%

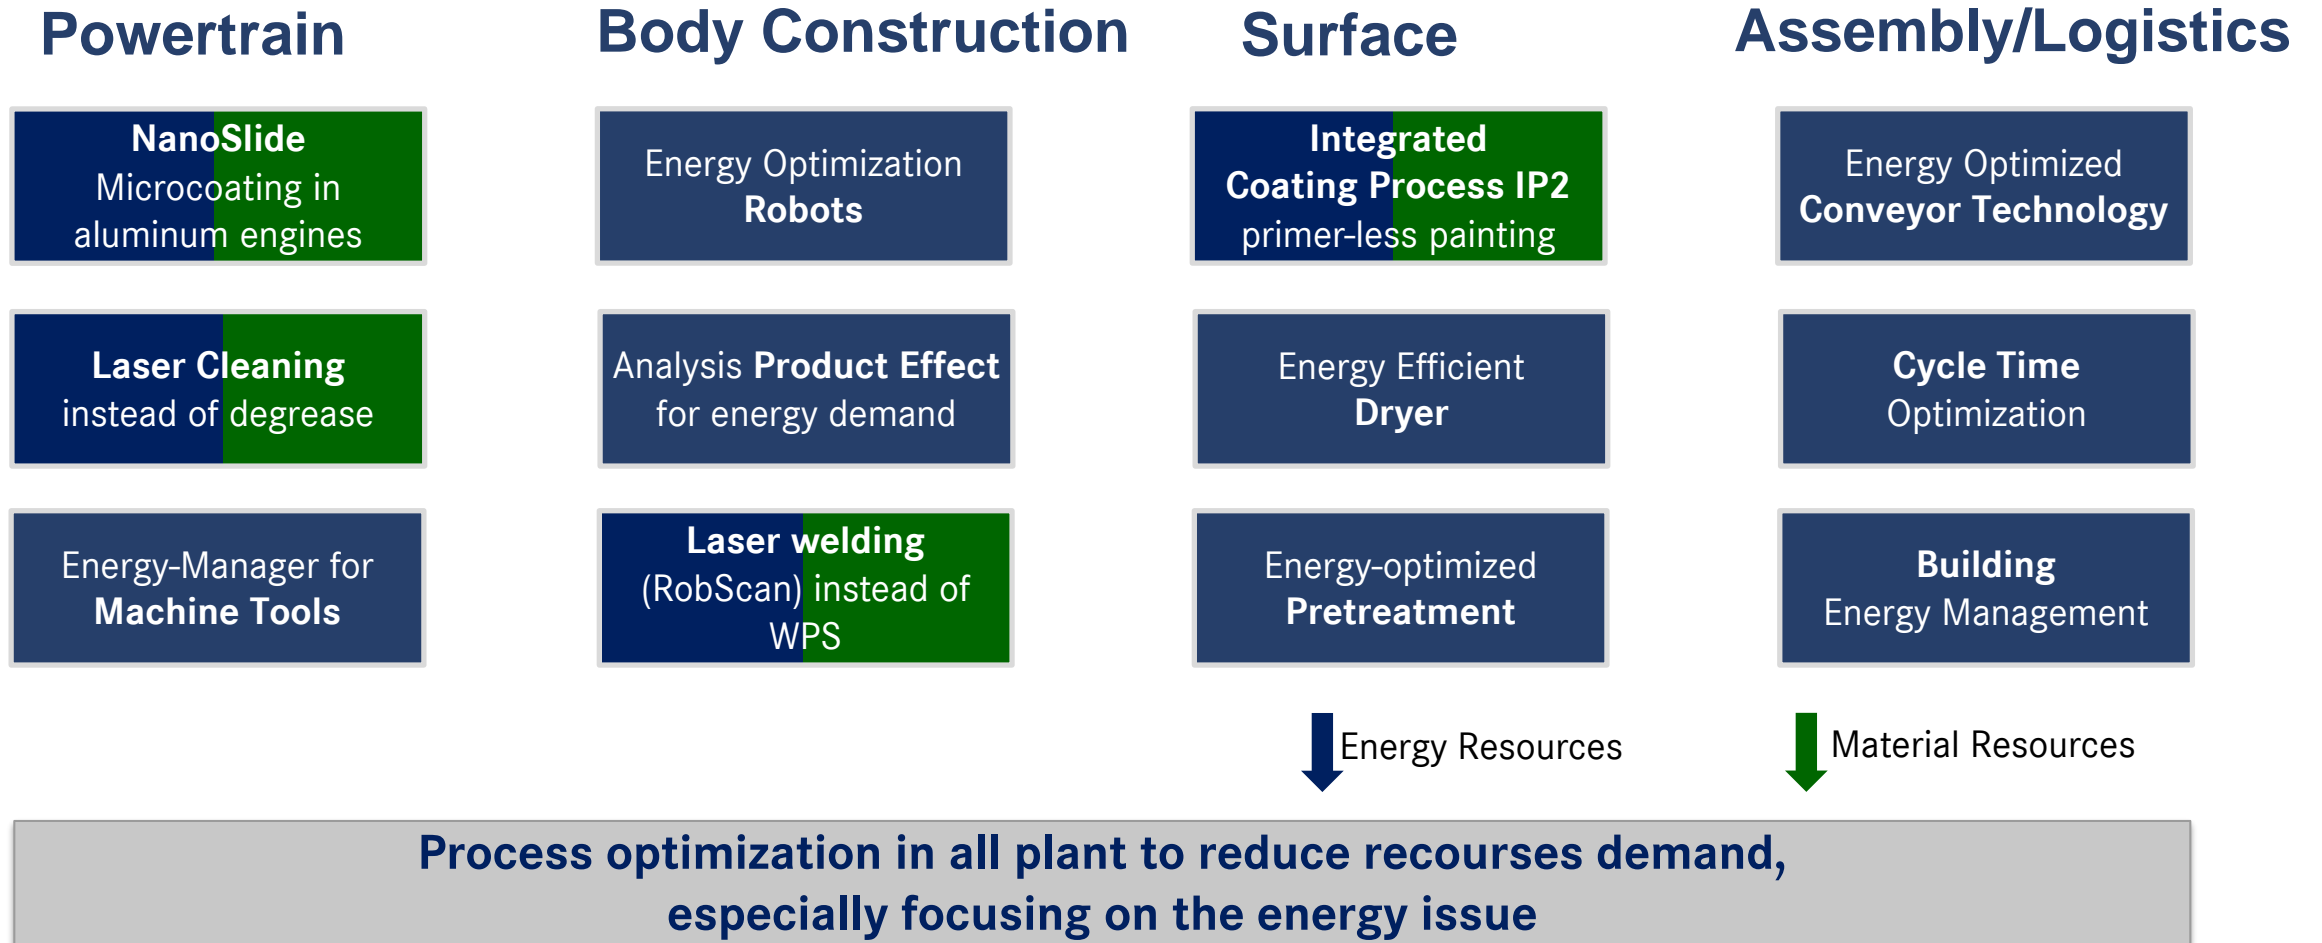

+9%

+2%

-9%

* Produced vehicle without joint ventures/contract manufacture

Production: Technical Modules to improve environmental performance

And how do we achieve these values...

For example new Nanoslide Coating Technology

Aluminum Engine Block

Grey Cast Iron Cylinder Liners

Nanoslide Coating

Process Optimization

(2nd Generation*)

Mechanically Roughening

instead of

High-Pressure Water Jet

Electric Energy

- ca. 700 MWh/a per module (Plan: 4 modules)
- ca. 22,500 MWh over life cycle

Process Water

- ca. 15,000 m³/a per module (Plan: 4 modules)
- ca. 480,000 m³ water over life cycle

Recirculation of aluminum chips

- Reduction of 8% primary aluminum
- Elimination of 15 t/a aluminum slurry

*) FAME = Family of Modular Engines = new family of state-of-the-art
ku = kilo units

Our road to emission-free driving

Mercedes-Benz Cars Fleet in Europe

MBC Flee Europe

DAIMLER

Our road to emission-free driving

High-tech
combustion engines

Consequent
hybridization

Electric vehicles
with battery and fuel-cell

Powerful and efficient: The new 4-Cylinder Diesel OM 654 sets standards in terms of environmental compatibility

- ↘ **17%** Weight Reduction
- ↘ **24%** Friction Losses
- ↘ **13%** CO₂-Reduction
- ↘ **80%** NOx-Reduction
- ↗ **14%** Performance Increase
- ↗ **11%** Improved Acceleration

- Aluminum-Crankcase
- Nanoslide Coating
- Stepped Combustion Bowls
- Engine-Related Emission Control

Introduction of 10 plug-in-hybrid vehicles by 2017

Electric drive vehicles

Next generation fuel-cell system: huge technological progress

2010: Underfloor package

206 g Platinum

4 kW / m² active area

Screw compressor

2017: Compartment package

20 g Platinum

9 kW / m² active area

Electric turbo charger with turbine

- ↘ **30%** reduction fuel cell engine size
- ↘ **90%** reduction of Platinum
- ↗ **30%** higher electric range in future vehicles
- ↗ **40%** higher system performance

Emission regulations and battery technology development favour battery cost position

Ambitious Re-Definition of our EV market targets

Foundation of new Mercedes-Benz electric vehicle strategy

Modular set up of next generation drive train technologies will allow a variety of derivatives

Investment of 500 million euros in our second battery plant in Germany

Deutsche ACCUMOTIVE GmbH & Co. KG, Kamenz, Germany

- Production space stocked up from 20,000 to 60,000 m²
- 2nd plant start of operations: summer 2017
- Production of Li-Ion batteries for hybrid as well as electric vehicles and energy storage systems

Disclaimer

This document contains forward-looking statements that reflect our current views about future events. The words “anticipate,” “assume,” “believe,” “estimate,” “expect,” “intend,” “may,” “can,” “could,” “plan,” “project,” “should” and similar expressions are used to identify forward-looking statements. These statements are subject to many risks and uncertainties, including an adverse development of global economic conditions, in particular a decline of demand in our most important markets; a deterioration of our refinancing possibilities on the credit and financial markets; events of force majeure including natural disasters, acts of terrorism, political unrest, armed conflicts, industrial accidents and their effects on our sales, purchasing, production or financial services activities; changes in currency exchange rates; a shift in consumer preferences towards smaller, lower-margin vehicles; a possible lack of acceptance of our products or services which limits our ability to achieve prices and adequately utilize our production capacities; price increases for fuel or raw materials; disruption of production due to shortages of materials, labor strikes or supplier insolvencies; a decline in resale prices of used vehicles; the effective implementation of cost-reduction and efficiency-optimization measures; the business outlook for companies in which we hold a significant equity interest; the successful implementation of strategic cooperations and joint ventures; changes in laws, regulations and government policies, particularly those relating to vehicle emissions, fuel economy and safety; the resolution of pending government investigations or of investigations requested by governments and the conclusion of pending or threatened future legal proceedings; and other risks and uncertainties, some of which we describe under the heading “Risk and Opportunity Report” in the current Annual Report. If any of these risks and uncertainties materializes or if the assumptions underlying any of our forward-looking statements prove to be incorrect, the actual results may be materially different from those we express or imply by such statements. We do not intend or assume any obligation to update these forward-looking statements since they are based solely on the circumstances at the date of publication.
