

COMPANY PRESENTATION

12.2012

COMPANY

Equity Story

- Deutsche EuroShop is Germany's only public company that invests solely in shopping centers.
- Shopping centers are attractive investments because of
 - continuously positive development of rents
 - stable long term growth
 - prime locations
 - high quality standards
- Deutsche EuroShop does not seek short-term success, but rather long-term growth and the resulting stable increase in the value of the portfolio.

COMPANY

At a Glance

20 shopping centers on high street and in established locations –
 16 in Germany, 2 in Poland and one each in Austria and Hungary

Lettable space	approx. 960,000 sqm
Retail shops	approx. 2,450

^{*} German centers on a like-for-like basis

Our partner: ECE

ECE,

- ECE develops, plans, builds, leases and manages large commercial real estate in the sectors shopping, office, industries since 1965
- originally ECE was an abbreviation for the German word Einkaufscenterentwicklung (Shopping center development)
- 100% privately owned by the Otto family
- active in 16 European countries
- European market leader in the shopping center business
- Assets under management:
 - 185 shopping centers
 - 6 million sqm overall sales area
 - approx.17,500 retail businesses
 - €19 billion in annual sales

MANY INVESTORS RELY ON ECE:

APPENIDID

Environment

- Climate protection is one of the most important issues for Deutsche EuroShop. We believe that sustainability and profitability, the shopping experience and environmental awareness are not opposing forces. Long-term thinking is part of our strategy. This includes playing our part in environmental protection.
- In 2011, all our German shopping centers had contracts with suppliers that use regenerative energy sources such as hydroelectric power for their electricity needs. The "EnergieVision" organisation certified the green electricity for our centers in Germany with the renowned "ok-power" accreditation in 2011. We plan to switch the centers in other countries to green electricity as well in the next few years.

- The German centers used a total of around 59.4 million kWh of green electricity in 2011. This represented 100% of the electricity requirements in these shopping centers, which also used 1.1 kWh less than in the previous year. As a result, based on conservative calculations this meant a reduction of around 23,400 tonnes in carbon dioxide emissions this equates to the annual CO₂ emissions of around 1,060 two-person households. We have already reduced the energy consumption of our shopping centers by using heat exchangers and energy-saving light bulbs.
- Deutsche EuroShop, through its shopping centers, also supports a range of activities at local and regional level in the areas of ecology, society and economy.
