

COMPANY PRESENTATION

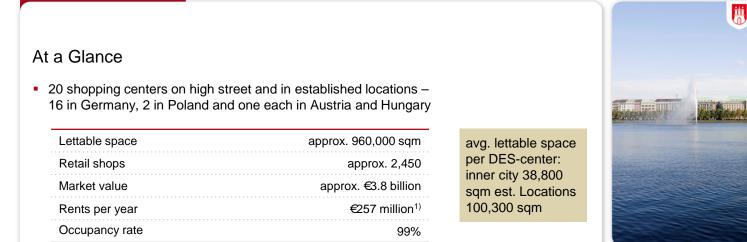

Equity Story

- Deutsche EuroShop is Germany's only public company that invests solely in shopping centers.
- Shopping centers are attractive investments because of
 - continuously positive development of rents
 - stable long term growth
 - prime locations
 - high quality standards
- Deutsche EuroShop does not seek short-term success, but rather long-term growth and the resulting stable increase in the value of the portfolio.

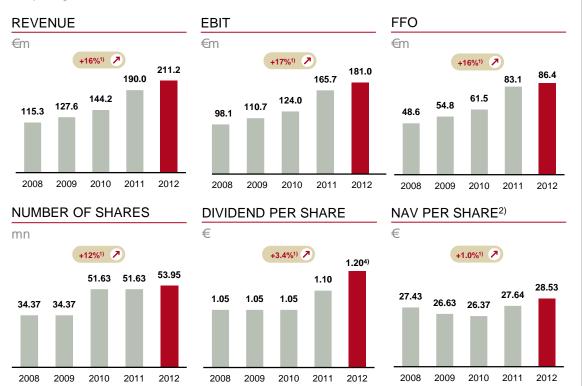

- 2012 portfolio valuation: 5.98% net initial yield (EPRA)
- Professional center management by ECE, the European market leader in this industry

1) 100%-view

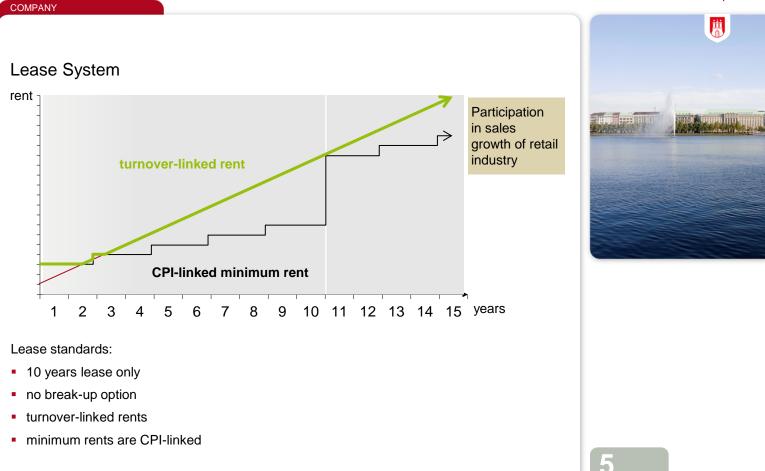

Key Figures

- ¹⁾ 2008-2012, Compound Annual Growth Rate (CAGR)
- 2) since 2010: EPRA NAV
- 4) proposal to the AGM

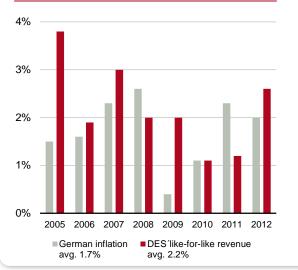

Lease System

- avg. rent per sqm and year: €250
- avg. turnover per sqm and year: €4,700¹ (avg. German retail: €3,430)
- Rent-to-sales-ratio: 7-11%
- weighted maturity of rental contracts: 7.0 years¹⁾

LIKE-FOR-LIKE REVENUE

1) Status: 31 December 2012

Targets

- Long term net asset value enhancement
- Main focus on NAV and dividend
- "buy & hold"-strategy, Continuous growth
- Stable and attractive dividends Dividend yield: currently 3.6%
- Investment-focus: At least 75% Germany and up to 25% Europe
- Portfolio extension by 10% per year
 - by acquisition of new shopping centers
 - by increasing existing amounts of holdings
 - by expansion of portfolio centers

Environment

- Climate protection is one of the most important issues for Deutsche EuroShop. We believe that sustainability and profitability, the shopping experience and environmental awareness are not opposing forces. Long-term thinking is part of our strategy. This includes playing our part in environmental protection.
- In 2011, all our German shopping centers had contracts with suppliers that use regenerative energy sources such as hydroelectric power for their electricity needs. The "EnergieVision" organisation certified the green electricity for our centers in Germany with the renowned "ok-power" accreditation in 2011. We plan to switch the centers in other countries to green electricity as well in the next few years.
- The German centers used a total of around 59.4 million kWh of green electricity in 2011. This represented 100% of the electricity requirements in these shopping centers, which also used 1.1 kWh less than in the previous year. As a result, based on conservative calculations this meant a reduction of around 23,400 tonnes in carbon dioxide emissions – this equates to the annual CO₂ emissions of around 1,060 two-person households. We have already reduced the energy consumption of our shopping centers by using heat exchangers and energy-saving light bulbs.
- Deutsche EuroShop, through its shopping centers, also supports a range of activities at local and regional level in the areas of ecology, society and economy.
