### **ONLINE VS. STATIONARY RETAIL?**

#### TURNOVER DISTRIBUTION OF A FASHION RETAILER

- Stationary retail transforms from "Point of Purchase" to "Touch Point" (product experience)
- New store concepts (flagship store, show room, multi-channel store, pick-up store),
  click & collect, augmented reality, online goes offline, mobile services
- "Location, location, location" newly interpreted: "Convenience, attractivity & likeability"

### **ENVIRONMENT**

- Climate protection is one of the most important issues for Deutsche EuroShop. We believe that sustainability and profitability, the shopping experience and environmental awareness are not opposing forces. Long-term thinking is part of our strategy. This includes playing our part in environmental protection
- In 2015, all our German shopping centers had contracts with suppliers that use renewable energy sources, such as hydroelectric power, for their electricity needs. The "EnergieVision" organisation certified the green electricity for our centers in Germany with the renowned "ok-power" accreditation in 2015. We also plan to switch our centers in other countries over to green electricity wherever possible within the next few years

- The German centers used a total of around 66.6 million kWh of green electricity in 2015. This represented 100% of the electricity requirements in these shopping centers. Based on conservative calculations, this meant a reduction of around 21,760 tonnes in carbon dioxide emissions, which equates to the annual CO<sub>2</sub> emissions of around 1,000 two-person households. The use of heat exchangers and energy-saving light bulbs allows us to further reduce energy consumption in our shopping centers
- Deutsche EuroShop, through its shopping centers, also supports a range of activities at local and regional level in the areas of ecology, society and economy
