

COMPANY PRESENTATION

EQUITY STORY

Deutsche EuroShop is Germany's only public company that invests solely in shopping centers

Shopping centers are attractive investments because of

- Continuously positive development of rents
- Stable long term growth
- Prime locations
- High quality standards

Deutsche EuroShop does not seek short-term success, but rather long-term growth and the resulting stable increase in the value of the portfolio

OUR PARTNER: ECE

- ECE develops, plans, builds, leases and manages large commercial real estate in the sectors shopping, office, industries since 1965
- originally ECE was an abbreviation for the German word **Einkaufszentrumentwicklung** (Shopping center development)
- 100% privately owned by the Otto family
- Active in 14 European countries
- European market leader in the shopping center business
- Assets under management:
 - 196 shopping centers
 - 7.2 million sqm overall sales area
 - approx. 21,000 retail businesses
 - 4.5 million daily visitors
 - €30 billion assets under management

APPENDIX

Many investors rely on ECE:

ENVIRONMENT

- Climate protection is one of the most important issues for Deutsche EuroShop. We believe that sustainability and profitability, the shopping experience and environmental awareness are not opposing forces. Long-term thinking is part of our strategy. This includes playing our part in environmental protection
- In 2015, all our German shopping centers had contracts with suppliers that use renewable energy sources, such as hydroelectric power, for their electricity needs. The “EnergieVision” organisation certified the green electricity for our centers in Germany with the renowned “ok-power” accreditation in 2015. We also plan to switch our centers in other countries over to green electricity wherever possible within the next few years

Reduction in CO₂ emissions
in tonnes

- The German centers used a total of around 66.6 million kWh of green electricity in 2015. This represented 100% of the electricity requirements in these shopping centers. Based on conservative calculations, this meant a reduction of around 21,760 tonnes in carbon dioxide emissions, which equates to the annual CO₂ emissions of around 1,000 two-person households. The use of heat exchangers and energy-saving light bulbs allows us to further reduce energy consumption in our shopping centers
- Deutsche EuroShop, through its shopping centers, also supports a range of activities at local and regional level in the areas of ecology, society and economy
