Forward Looking Statements

Safe Harbor Statement: This presentation includes certain forward-looking statements within the meaning of Section 27A of the U.S. Securities Act of 1933, as amended, and Section 21E of the U.S. Securities Act of 1934, as amended. Actual results could differ materially from those included in the forward-looking statements due to various risk factors and uncertainties, including changes in business, economic competitive conditions, regulatory reforms, foreign exchange rate fluctuations, uncertainties in litigation or investigative proceedings and the availability of financing. These and other risks and uncertainties are discussed in detailed in the Company's reports filed with the Securities and Exchange Commission (SEC) and the German Exchange Commission (Deutsche Börse).

Rule FAS 160: We adopted FAS 160 in our financial statement presentation. The effect of this adoption is factually just a relabeling of certain line items in the income statement, most prominently what was "net income" prior to FAS 160 is now called "net income attributable to Fresenius Medical Care AG & Co. KGaA". There are no earnings effects on operating income or other income and expense items.

Exchange Rate Sensitivity

Weakness in the Euro and some other currencies present challenges for reported results

- ► Largest translation exposure in Euro/US\$
 - First half comparison expected to be more challenging
- Weakness in non-Euro European currencies presents additional exposure

However:

- Underlying business is strong and on target
- Exchange rates developing favorably in some key markets
- Strong US\$ favorable for Euro valuation

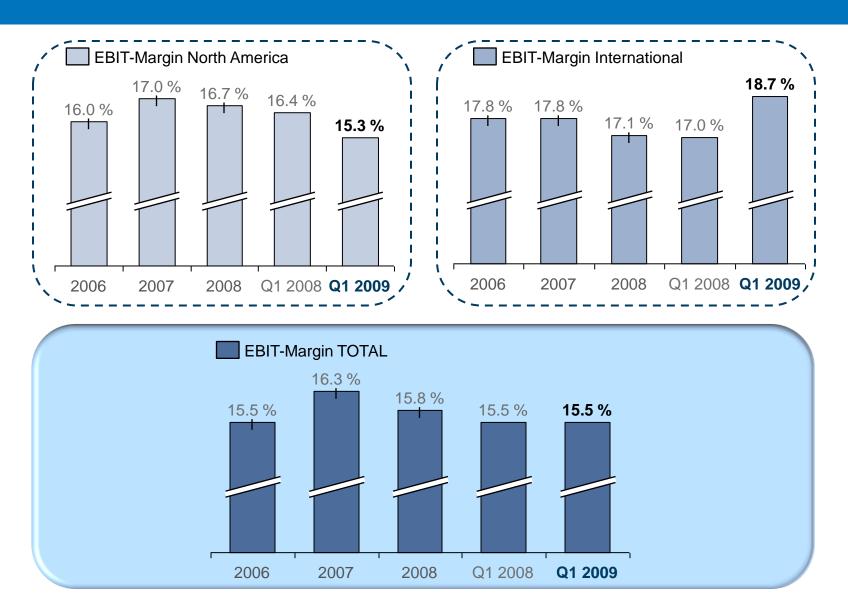

A 10% Appreciation in Currencies versus the US-Dollar would result in the following impacts on the Earnings after Tax

<u>/</u>		as % of 2008 revenue
Euro (10 cents = 1.2%)	1.7%	16%
Europe – Non-Euro	1.3%	8%
Chinese Yuan & Hong Kong Dollar	0.4%	1%
`、 Other Asia	0.7%	4%
