OVERVIEW

2nd Quarter 2012

2ND QUARTER 2012 SUMMARY

Table 1

Net revenue	\$ 3,428 M	+9%
Operating income (EBIT)	\$ 589 M	+16%
Net income attributable to shareholders of Fresenius Medical Care AG & Co. KGaA	\$ 289 M	+11%
Earnings per ordinary share	\$ 0.95	+10%
Earnings excluding investment gain:		
Net income attributable to shareholders of Fresenius Medical Care AG & Co. KGaA	\$ 276 M	+6%
Earnings per ordinary share	\$ 0.91	+5%

FIRST HALF 2012 SUMMARY

Table 2

Net revenue	\$ 6,677 M	+9%
Operating income (EBIT)	\$ 1,092 M	+14%
Net income attributable to shareholders of Fresenius Medical Care AG & Co. KGaA	\$ 660 M	+37%
Earnings per ordinary share	\$ 2.17	+36%
Earnings excluding investment gain:		
Net income attributable to shareholders of Fresenius Medical Care AG & Co. KGaA	\$ 520 M	+8%
Earnings per ordinary share	\$ 1.71	+7%

2ND QUARTER 2012

REVENUE

Net revenue for the second quarter of 2012 increased by 9% to \$3,428 M (+13% at constant currency) compared to the second quarter of 2011. Organic revenue growth worldwide was 4%. Dialysis services revenue grew by 13% to \$2,605 M (+16% at constant currency) and dialysis product revenue decreased by 1% to \$823 M and increased by +6% at constant currency.

North America revenue for the second quarter of 2012 increased by 14% to \$2,249 M. Dialysis services revenue grew by 15% to \$2,043 M with a same market growth of 4%. Average revenue per treatment for u.s. clinics increased to \$351 in the second quarter of 2012 compared to \$348 for the corresponding quarter in 2011. Dialysis product revenue increased by 3% to \$206 M mainly as a result of higher sales of hemodialysis products.

International revenue increased by 1% to \$1,171 M (+11% at constant currency). Organic revenue growth was 6%. Dialysis services revenue increased by 5% to \$562 M (+16% at constant currency). Dialysis product revenue decreased by 3% to \$609 M and increased by 6% at constant currency, mainly driven by higher sales of dialysis machines and dialyzers.

EARNINGS

Operating income (EBIT) for the second quarter of 2012 increased by 16% to \$589 M compared to \$510 M in the second quarter of 2011. This resulted in an operating margin of 17.2% for the second quarter of 2012 compared to 16.2% for the corresponding quarter in 2011.

2nd Quarter 2012
Overview

In North America, the operating margin increased from 17.7% to 19.2%. Average costs per treatment for U.S. clinics decreased by \$3 to \$280 in the second quarter of 2012 as compared to \$283 in the second quarter of 2011.

In the International segment, the operating margin increased from 17.5% to 17.7%.

Net interest expense for the second quarter of 2012 was \$104 M, compared to \$75 M in the second quarter of 2011. This development was mainly attributable to the higher level of financial debt as a result of the issuance of various tranches of senior notes over the course of 2011 and 2012.

Net income attributable to shareholders of Fresenius Medical Care AG & Co. KGaA for the second quarter of 2012 was \$289 M, an increase of 11% compared to the corresponding quarter of 2011. This includes a non-taxable investment gain of \$13 M related to the acquisition of Liberty Dialysis Holdings, Inc., including its 51% stake in Renal Advantage Partners, LLC (RAI). The gain is a result of measuring the 49% equity interest in RAI held by the company at its fair value at the time of the Liberty acquisition and represents an adjustment to the amount recorded in the first quarter of 2012 as part of the continuing finalization of the Liberty purchase accounting. Excluding this investment gain net income attributable to shareholders of Fresenius Medical Care AG & Co. KGaA increased by 6% to \$276 M.

Income tax expense was \$172 M for the second quarter of 2012 compared to \$149 M in the second quarter of 2011, reflecting effective tax rates of 34.6% and 34.2%, respectively. Excluding the investment gain the effective tax rate was 35.5%.

Earnings per ordinary share (EPS) for the second quarter of 2012 was \$0.95 and \$0.91 if excluding the investment gain. This represents an increase compared to the second quarter of 2011 of 10% and of 5%, respectively. The weighted average number of ordinary shares outstanding for the second quarter of 2012 was approximately 300.4 M shares, compared to 298.6 M shares for the second quarter of 2011. The increase in shares outstanding resulted from stock option exercises in the past 12 months.

CASH FLOW

In the second quarter of 2012, the company generated \$451 M in **cash from operations**, an increase of 45% compared to the corresponding figure last year and representing 13.2% of revenue. The cash flow generation was supported by a favorable development of days sales outstanding.

A total of \$151 M was spent for **capital expenditures**, net of disposals. **Free cash flow before acquisitions** was \$300 M compared to \$194 M in the second quarter of 2011. A total of \$6 M in cash was generated from **divestitures, net of acquisitions**. **Free cash flow after acquisitions and divestitures** was \$306 M, compared to (\$590) M in the second quarter of 2011.

FIRST HALF 2012

REVENUE AND EARNINGS

Net revenue for the first half of 2012 increased by 9% to \$6,677 M (+12% at constant currencies) compared to the first half of 2011. Organic revenue growth was 4% in the first half of 2012.

Operating income (EBIT) for the first half of 2012 increased by 14% to \$1,092 M compared to \$955 M in the first half of 2011. The operating income margin increased to 16.4% for the first half of 2012 as compared to 15.6% in the same period in 2011.

Net interest expense for the first half of 2012 was \$203 M compared to \$146 M in the same period of 2011.

For the first half of 2012, **net income** attributable to shareholders of Fresenius Medical Care AG & Co. KGaA was \$660 M, up by 37% from the first half of 2011. This includes a non-taxable investment gain of \$140 M related to the acquisition of Liberty Dialysis Holdings, Inc., including its 51% stake in Renal Advantage Partners, LLC (RAI). The gain is a result of measuring the 49% equity interest in RAI held by the company at its fair value at the time of the Liberty acquisition. Excluding this investment gain net income attributable to shareholders of Fresenius Medical Care AG & Co. KGaA increased by 8% to \$520 M.

Income tax expense for the first half of 2012 was \$309 M compared to \$273 M in the same period in 2011, reflecting effective **tax rates** of 30.1% and 33.8%, respectively. Excluding the investment gain the effective tax rate was 34.8%.

In the first half of 2012, **earnings per ordinary share** rose by 36% to \$2.17 and by 7% to \$1.71 if excluding the investment gain. The weighted average number of ordinary shares outstanding during the first half of 2012 was approximately 300.3 M.

CASH FLOW

Cash from operations during the first half of 2012 was \$932 M compared to \$487 M for the same period in 2011, representing 14% of revenue.

A total of \$274 M in cash was spent for **capital expenditures**, net of disposals. **Free cash flow before acquisitions** for the first half of 2012 was \$658 M compared to \$256 M in the same period in 2011. A total of \$1,520 M in cash was spent for **acquisitions**, net of divestitures. **Free cash flow after acquisitions and divestitures** was (\$862) M compared to (\$866) M in the first half of last year.

PATIENTS – CLINICS – TREATMENTS

As of June 30, 2012, Fresenius Medical Care treated 256,456 **patients** worldwide, which represents a 14% increase compared to the previous year's figure. North America provided dialysis treatments for 164,058 patients, an increase of 17%. Including 28 clinics managed by Fresenius Medical Care North America, the number of patients in North America was 166,282. The International segment provided dialysis treatment to 92,398 patients, an increase of 7% over the prior year's figure.

2nd Quarter 2012
Overview

As of June 30, 2012, the Company operated a total of 3,123 clinics worldwide, which represents a 10% increase compared to the previous year's figure. The number of clinics is comprised of 2,046 clinics in North America (2,074 including managed clinics), and 1,077 clinics in the International segment, representing an increase of 12% and 6%, respectively.

During the first half quarter of 2012, Fresenius Medical Care delivered approximately 18.89 M dialysis treatments worldwide. This represents an increase of 14%, compared to last year's figure. North America accounted for 11.89 M treatments, an increase of 12%. The International segment delivered 7.0 M treatments, an increase of 18%.

EMPLOYEES

As of June 30, 2012, Fresenius Medical Care had 84,194 employees (full-time equivalents) worldwide, compared to 79,159 employees at the end of 2011. This increase of more than 5,000 employees is due to overall growth in the Company's business and acquisitions including Liberty Dialysis Holdings, Inc.

DEBT/EBITDA RATIO

The ratio of debt to earnings before interest, taxes, depreciation and amortization (EBITDA) increased from 2.77 at the end of the second quarter of 2011 to 2.92 at the end of the second quarter of 2012. The debt/EBITDA ratio at the end of 2011 was 2.69.

RATING

Moody's affirmed the Company's corporate credit as 'Ba1' with a 'stable' outlook, and Fitch rates the Company's corporate credit as 'BB+' with a 'stable' outlook. Standard & Poor's placed the Company's corporate credit on review as 'BB+' with a possible downgrade from 'stable' to 'negative'. For further information on Fresenius Medical Care's credit ratings, maturity profiles and credit instruments, please visit our website at [www.fmc-ag.com/Investor Relations/Credit Relations](http://www.fmc-ag.com/Investor_Relations/Credit_Relations).

SALES AND EARNINGS OUTLOOK FOR 2012 CONFIRMED

For the full year 2012, the Company confirms its sales and earnings outlook.

The Company expects revenue to grow to ~\$14 BN in 2012¹.

Net income is expected to grow to ~\$1.3 BN and net income attributable to shareholders of Fresenius Medical Care AG & Co. KGaA is expected to grow to ~\$1.14 BN¹. This does not include the investment gain in the amount of \$140 M in the first half of 2012.

For 2012, the Company expects to spend ~\$700 M on capital expenditures and ~\$1.8 BN on acquisitions. The debt/EBITDA ratio is expected to be below 3.0 by the end of 2012.

¹ We define the ~ sign as a +/- 0-2% deviation from the respective numbers.

INTERIM REPORT OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

2nd Quarter 2012

FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of the results of operations of Fresenius Medical Care AG & Co. KGaA (FMC AG & Co. KGaA or the Company) and its subsidiaries in conjunction with our unaudited consolidated financial statements and related notes contained elsewhere in this report and our disclosures and discussions in our Annual Report on Form 20-F for the year ended December 31, 2011, as amended. In this report, "FMC AG & Co. KGaA" or the "Company," "we," "us" or "our" refers to the Company or the Company and its subsidiaries on a consolidated basis, as the context requires.

Forward-looking Statements

This report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. When used in this report, the words "expects," "anticipates," "intends," "plans," "believes," "seeks," "estimates" and similar expressions are generally intended to identify forward looking statements. Although we believe that the expectations reflected in such forward-looking statements are reasonable, forward-looking statements are inherently subject to risks and uncertainties, many of which cannot be predicted with accuracy and some of which might not even be anticipated, and future events and actual results, financial and otherwise, could differ materially from those set forth in or contemplated by the forward-looking statements contained elsewhere in this report. We have based these forward-looking statements on current estimates and assumptions made to the best of our knowledge. By their nature, such forward-looking statements involve risks, uncertainties, assumptions and other factors which could cause actual results, including our financial condition and profitability, to differ materially and be more negative than the results expressly or implicitly described in or suggested by these statements. Moreover, forward-looking estimates or predictions derived from third parties' studies or information may prove to be inaccurate. Consequently, we cannot give any assurance regarding the future accuracy of the opinions set forth in this report or the actual occurrence of the developments described herein. In addition, even if our future results meet the expectations expressed here, those results may not be indicative of our performance in future periods.

These risks, uncertainties, assumptions, and other factors that could cause actual results to differ from our projected results include, among others, the following:

- ▶ changes in governmental and commercial insurer reimbursement for our complete products and services portfolio, including the expanded United States (U.S.) Medicare reimbursement system for dialysis services;
- ▶ changes in utilization patterns for pharmaceuticals and in our costs of purchasing pharmaceuticals;
- ▶ the outcome of ongoing government investigations;
- ▶ the influence of private insurers and managed care organizations;
- ▶ the impact of recently enacted and possible future health care reforms;
- ▶ product liability risks;
- ▶ the outcome of ongoing potentially material litigation;
- ▶ risks relating to the integration of acquisitions and our dependence on additional acquisitions;
- ▶ the impact of currency fluctuations;
- ▶ introduction of generic or new pharmaceuticals that compete with our pharmaceutical products;
- ▶ changes in raw material and energy costs; and
- ▶ the financial stability and liquidity of our governmental and commercial payors.

Important factors that could contribute to such differences are noted in the "Overview" section below, in Note 11 and in our Annual Report for the year ended December 31, 2011 in chapter 2.8 "Risk and Opportunities Report" and elsewhere in that report.

2nd Quarter 2012
Interim Report

Our business is also subject to other risks and uncertainties that we describe from time to time in our public filings. Developments in any of these areas could cause our results to differ materially from the results that we or others have projected or may project.

Our reported financial condition and results of operations are sensitive to accounting methods, assumptions and estimates that are the basis of our financial statements. The actual accounting policies, the judgments made in the selection and application of these policies, and the sensitivities of reported results to changes in accounting policies, assumptions and estimates, are factors to be considered along with our financial statements and the discussion below under "Results of Operations". For a discussion of our critical accounting policies — see chapter 4.1 "Operating and Financial Review and Prospects – Critical Accounting Policies" in our Annual Report for the year ended December 31, 2011.

Overview

We are engaged primarily in providing dialysis services and manufacturing and distributing products and equipment for the treatment of end-stage renal disease (ESRD). In the U.S., we also provide inpatient dialysis services and other services under contract to hospitals. We estimate that providing dialysis services and distributing dialysis products and equipment represents a worldwide market of approximately \$75 BN with expected annual worldwide market growth of around 4%, adjusted for currency. Patient growth results from factors such as the aging population and increased life expectancies; shortage of donor organs for kidney transplants; increasing incidence and better treatment of and survival of patients with diabetes and hypertension, which frequently precede the onset of ESRD; improvements in treatment quality, which prolong patient life; and improving standards of living in developing countries, which make life-saving dialysis treatment available. Key to continued growth in revenue is our ability to attract new patients in order to increase the number of treatments performed each year. For that reason, we believe the number of treatments performed each year is a strong indicator of continued revenue growth and success. In addition, the reimbursement and ancillary services utilization environment significantly influences our business. In the past we experienced, and after the implementation of the case-mix adjusted bundled prospective payment system (ESRD PPS) in the U.S., also expect in the future, generally stable reimbursements for dialysis services. This includes the balancing of unfavorable reimbursement changes in certain countries with favorable changes in other countries. The majority of treatments are paid for by governmental institutions such as Medicare in the U.S. As a consequence of the pressure to decrease healthcare costs, reimbursement rate increases have historically been limited. Our ability to influence the pricing of our services is limited.

With the enactment of Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) in 2008, Congress mandated the development of an expanded ESRD bundled payment system for services furnished on or after January 1, 2011. On July 26, 2010, Centers of Medicare and Medicaid Services (CMS) published a final rule implementing the ESRD PPS for ESRD dialysis facilities in accordance with MIPPA. Under the prospective payment system, CMS reimburses dialysis facilities with a single payment for each dialysis treatment, inclusive of (i) all items and services included in the former composite rate, (ii) oral vitamin D analogues, oral levocarnitine (an amino acid derivative) and all Erythropoietin stimulating agents (ESAs) and other pharmaceuticals (other than vaccines) furnished to ESRD patients that were previously reimbursed separately under Part B of the Medicare program, (iii) most diagnostic laboratory tests and (iv) certain other items and services furnished to individuals for the treatment of ESRD. ESRD-related drugs with only an oral form will be reimbursed under the ESRD PPS starting in January 2014 with an adjusted payment amount to be determined by the Secretary of Health and Human Services to reflect the additional cost to dialysis facilities of providing these medications. The initial ESRD PPS base reimbursement rate was set at \$229.63 per dialysis treatment. The base ESRD PPS payment is subject to case mix adjustments that take into account individual patient characteristics (e.g., age, body surface area, body mass, time on dialysis) and certain co-morbidities. The base payment is also adjusted for (i) certain high cost patient outliers due to unusual variations in medically necessary care, (ii) disparately high costs incurred by low volume facilities relative to other facilities, (iii) provision of home dialysis training and (iv) wage-related costs in the geographic area in which the provider is located.

2nd Quarter 2012
Interim Report

The ESRD PPS is being phased in over four years with full implementation for all dialysis facilities on January 1, 2014. However, providers were required to elect in November 2010 whether to become fully subject to the new system starting in January 2011 or to participate in the phase-in. Nearly all of our U.S. dialysis facilities elected to be fully subject to the ESRD PPS effective January 1, 2011. As part of the base payment for 2011, CMS included a negative 3.1% adjustment for each facility in order to ensure a budget-neutral transition, the "Transition Adjuster", based on its estimation that only 43% of dialysis facilities would elect to participate fully in the ESRD PPS in 2011. In April 2011, however, CMS reduced the Transition Adjuster to zero percent for the remainder of 2011, based on the actual number of facilities that elected to fully participate in the ESRD PPS. CMS retained a zero percent Transition Adjuster for 2012 and has proposed the same for 2013.

Beginning in 2012, the ESRD PPS payment amount is subject to annual adjustment based on increases in the costs of a "market basket" of certain healthcare items and services less a productivity adjustment. On November 10, 2011, CMS published a final rule finalizing the 2012 ESRD PPS rate. In the rule, CMS established the 2012 productivity adjusted market basket update at 2.1%, which was based on a market basket update of 3.0% less a productivity adjustment of 0.9%. Additionally, CMS set the 2012 wage index budget-neutrality adjusted base rate of \$234.81 per treatment. CMS has proposed an adjusted base rate of \$240.88 per treatment for 2013.

The ESRD PPS's quality incentive program (QIP), initially focusing on anemia management and dialysis adequacy, affects payments starting January 1, 2012. Dialysis facilities that fail to achieve the established quality standards will have payments reduced by up to 2%, measured against performance in 2010 as an initial performance period. In the November 2011 final rule, CMS established the quality measures for payment year 2013, which will once again focus on anemia management and dialysis adequacy. The 2013 measures will be measured against performance in 2011. Commencing in 2014, CMS has adopted four additional measures to determine whether dialysis patients are receiving high quality care. The new measures include (i) prevalence of catheter and A/V fistula use; (ii) reporting of infections to the Centers for Disease Control and Prevention; (iii) administration of patient satisfaction surveys; and (iv) monthly monitoring of phosphorus and calcium levels. For 2015 and subsequent years, CMS has proposed to continue certain of the existing QIP clinical and reporting measures, expand the scope of certain existing measures and add new measures. The proposed clinical measures include anemic management, hypoglycaemia, vascular access type, hemodialysis adequacy (adult and pediatric patients) and peritoneal dialysis adequacy. The proposed reporting measures include patient satisfaction surveys, mineral metabolism reporting, anemic management reporting and infection reporting. For a discussion of the impact of ESRD PPS and the above implementation plan on our business — see chapter 4.0 "Operating and Financial Review and Prospects - Financial Condition and Results of Operations" in our Annual Report for the year ended December 31, 2011 and the discussion of our North America segment in "Results of Operations" below.

The Patient Protection and Affordable Care Act was enacted in the U.S. on March 23, 2010 and subsequently amended by the Health Care and Educational Affordability Reconciliation Act (as amended, ACA). ACA implements broad healthcare system reforms, including (i) provisions to facilitate access to affordable health insurance for all Americans, (ii) expansion of the Medicaid program, (iii) an industry fee on pharmaceutical companies that began in 2011 based on sales of brand name pharmaceuticals to government healthcare programs, (iv) a 2.3% excise tax on manufacturers' medical device sales starting in 2013, (v) increases in Medicaid prescription drug rebates effective January 1, 2010, (vi) commercial insurance market reforms that protect consumers, such as bans on lifetime and annual limits, coverage of pre-existing conditions, limits on administrative costs, and limits on waiting periods, (vii) provisions encouraging integrated care, efficiency and coordination among providers and (viii) provisions for reduction of healthcare program waste and fraud. ACA does not modify the dialysis reimbursement provisions of MIPPA. ACA's medical device excise tax, Medicaid drug rebate increases and annual pharmaceutical industry fees will adversely impact our product business earnings and cash flows. We expect long-term modest favorable impact from potentially both the ACA's and CMS's integrated care and commercial insurance consumer protection provisions.

*2nd Quarter 2012
Interim Report*

On August 2, 2011 the U.S. Budget Control Act of 2011 (Budget Control Act) was enacted, which raised the U.S.'s debt ceiling and put into effect a series of actions for deficit reduction. In addition, the Budget Control Act created a 12-member Congressional Joint Select Committee on Deficit Reduction that was tasked with proposing additional revenue and spending measures to achieve additional deficit reductions of at least \$1.5 TN over ten years, which could include reductions in Medicare and Medicaid. The Joint Congressional Committee failed to make recommendations to Congress by the November 23, 2011 deadline established by the Budget Control Act. As a result of this failure, and unless Congress acts in some other fashion, automatic across the board reductions in spending of \$1.2 TN over nine fiscal years (fiscal years 2013-2021) will be triggered on January 2, 2013. The President has stated that he will veto any legislation that would repeal the automatic budget cuts without a bipartisan solution to deficit reduction. Medicare payments to providers and suppliers would be subject to the triggered reductions, but any such reductions will be capped at 2% annually. Any such reductions would be independent of annual inflation update mechanisms, such as the market basket update pursuant to the ESRD PPS.

Our plans to mitigate the impact of the ESRD PPS and the other legislative initiatives referenced above include two broad measures. First, we are working with medical directors and treating physicians to make clinical protocol changes used in treating patients consistent with the QIP and good clinical practices, and are negotiating pharmaceutical acquisition cost savings. In addition, we are seeking to achieve greater efficiencies and better patient outcomes by introducing new initiatives to improve patient care upon initiation of dialysis, increase the percentage of patients using home therapies and achieve additional cost reductions in our clinics.

Any significant decreases in Medicare reimbursement rates could have material adverse effects on our provider business and, because the demand for products is affected by Medicare reimbursement, on our products business. To the extent that increases in operating costs that are affected by inflation, such as labor and supply costs, are not fully reflected in a compensating increase in reimbursement rates, our business and results of operations may be adversely affected.

Effective February 15, 2011, the Department of Veterans Affairs (VA) adopted payment rules which reduce its payment rates for non-contracted dialysis services to coincide with those of the Medicare program. As a result of the enactment of these new rules, we have experienced variability in our aggregated VA reimbursement rates for contracted, non-contracted services and volume of VA patients treated in our facilities and anticipate this to continue in the future.

We have identified three operating segments, North America, International, and Asia-Pacific. For reporting purposes, we have aggregated the International and Asia-Pacific segments as "International." We aggregated these segments due to their similar economic characteristics. These characteristics include same services provided and same products sold, same type patient population, similar methods of distribution of products and services and similar economic environments. Our general partner's Management Board member responsible for the profitability and cash flow of each segment's various businesses supervises the management of each operating segment. The accounting policies of the operating segments are the same as those we apply in preparing our consolidated financial statements under accounting principles generally accepted in the U.S. (U.S. GAAP). Our management evaluates each segment using a measure that reflects all of the segment's controllable revenues and expenses.

2nd Quarter 2012
Interim Report

With respect to the performance of our business operations, our management believes the most appropriate measure in this regard is operating income which measures our source of earnings. Financing is a corporate function which segments do not control. Therefore, we do not include interest expense relating to financing as a segment measurement. We also regard income taxes to be outside the segments' control. Similarly, we do not allocate "corporate costs," which relate primarily to certain headquarters overhead charges, including accounting and finance, professional services, etc. because we believe that these costs are also not within the control of the individual segments. As of January 1, 2011, production of products, production asset management, quality management and procurement are centrally managed in corporate by Global Manufacturing Operations. These corporate activities do not fulfill the definition of an operating segment. Products are transferred to the operating segments at cost, therefore no internal profit is generated. The associated internal revenues for the product transfers and their elimination are recorded as corporate activities — see Note 13. Capital expenditures for production are based on the expected demand of the operating segments and consolidated profitability considerations. In addition, certain revenues, acquisitions and intangible assets are not allocated to a segment but are accounted for as "corporate." Accordingly, all of these items are excluded from our analysis of segment results and are discussed below in the discussion of our consolidated results of operations.

2nd Quarter 2012
Interim Report

Results of operations

The following tables summarize our financial performance and certain operating results by principal business segment for the periods indicated. Inter-segment sales primarily reflect sales of medical equipment and supplies. We prepared the information using a management approach, consistent with the basis and manner in which our management internally disaggregates financial information to assist in making internal operating decisions and evaluating management performance.

2nd Quarter 2012
Interim Report

Three months ended June 30, 2012 compared to three months ended June 30, 2011

Consolidated financials

KEY INDICATORS FOR CONSOLIDATED FINANCIAL STATEMENTS

Table 4

	Three months ended June 30,		Change	
	2012	2011	as reported	at constant exchange rates ¹
Number of treatments	9,672,567	8,384,473	15%	–
Same market treatment growth in %	3.7	3.9	–	–
Revenue in \$ M	3,428	3,138	9%	13%
Gross profit in % of revenue	32.9	32.8	–	–
Selling, general and administrative costs as a % of revenue	15.7	16.0	–	–
Net income attributable to shareholders of FMC AG & Co. KGaA in \$ M	289	261	11%	–

¹ For further information on "at constant exchange rates," see "Non-U.S. GAAP Measures – Constant currency" below.

Treatments increased by 15% for the second quarter of 2012 as compared to the same period in 2011. The increase is due to our acquisition of Liberty Dialysis Holdings, Inc. (LD Holdings), the owner of Liberty Dialysis and a 51% stake in Renal Advantage Partners, LLC, which we completed on February 28, 2012 (the Liberty Acquisition), net of the divestitures (6%), contributions from other acquisitions (6%) and same market treatment growth (4%), partially offset by the effect of closed or sold clinics (1%).

At June 30, 2012, we owned, operated or managed (excluding those managed but not consolidated in the U.S.) 3,123 clinics compared to 2,838 clinics at June 30, 2011. During the second quarter of 2012, we acquired 15 clinics (net of clinics divested in connection with the Liberty Acquisition discussed below), opened 21 clinics and combined or closed 32 clinics. The number of patients treated in clinics that we own, operate or manage (excluding patients of clinics managed but not consolidated in the U.S.) increased by 14% to 256,456 at June 30, 2012 from 225,909 at June 30, 2011. Including 28 clinics managed but not consolidated in the U.S., the total number of patients was 258,680.

Net revenue increased by 9% (13% at constant exchange rates) for the second quarter of 2012 over the comparable period in 2011, due to growth in dialysis care, partially offset by a decrease in dialysis product revenue.

Net dialysis care revenue increased by 13% (16% at constant exchange rates) to \$2,605 M for the second quarter of 2012 from \$2,305 M in the same period of 2011, mainly due to contributions from acquisitions (14%), growth in same market treatments (4%), partially offset by a negative effect from exchange rate fluctuations (3%), the effect of closed or sold clinics (1%) and decreases in organic revenue per treatment (1%).

Dialysis product revenue decreased by 1% (an increase of 6% at constant exchange rates) to \$823 M from \$832 M in the same period of 2011, due to negative effect of exchange rate fluctuations partially offset by increased sales of hemodialysis products, especially of machines, dialyzers and bloodlines.

The increase in gross profit margin mainly reflects an increase in gross profit margin for North America. The increase in North America was due to a higher revenue per treatment rate associated with Medicare and expanded service offerings and increased product margins, as well as the impact of the Liberty Acquisition, which contributed higher gross margins, partially offset by higher personnel expenses.

2nd Quarter 2012
Interim Report

Selling, general and administrative (SG&A) expenses increased to \$540 M in the second quarter of 2012 from \$502 M in the same period of 2011. SG&A expenses as a percentage of revenues decreased to 15.7% for the second quarter of 2012 in comparison with 16.0% during the same period of 2011 attributable to a decrease in International, partially offset by an increase in North America. The decrease in International as a percentage of revenue was largely driven by favorable foreign exchange effects, reduced acquisition costs and business growth in Asia, partially offset by increased bad debt expense. The increase in North America as a percentage of revenue was mainly driven by higher personnel expenses and one time costs related to the Liberty Acquisition, partially offset by the impact from the Liberty Acquisition, which has lower SG&A expenses as a percentage of sales.

We agreed to divest a total of 62 clinics in connection with the regulatory clearance of the Liberty Acquisition from the United States Federal Trade Commission (FTC). During the three months ended June 30, 2012, 12 clinics were sold including 9 FMC AG&CO. KGAA clinics which resulted in a gain of \$24 M, partially offset by the cost of the Liberty Acquisition—— see Note 2.

R&D expenses remained constant at \$27 M in the second quarter of 2012 as compared to \$27 M in the same period in 2011 and decreased as a percentage of revenue to 0.8% from 0.9%.

Income from equity method investees decreased to \$4 M for the second quarter of 2012 from \$9 M for the same period of 2011 mainly due to reduced income from Vifor Fresenius Medical Care Renal Pharma Ltd. (VFMCPRP), our renal pharmaceuticals joint venture.

Operating income increased to \$589 M in the second quarter of 2012 from \$510 M for the same period in 2011. Operating income margin increased to 17.2% for the second quarter of 2012 from 16.2% for the same period in 2011 mainly due to the gain from the sale of FMC AG&CO. KGAA clinics, lower SG&A expense as a percentage of revenue and an increase in gross profit margin, partially offset by lower income from equity method investees, all as discussed above.

The non-taxable investment gain of \$127 M due to our acquisition of LD Holdings recorded in the first quarter of 2012 increased by \$13 M in the second quarter of 2012 to a total of \$140 M for the six months ended June 30, 2012. This increase is due to fair value re-measurements related to developments in the finalization of our acquisition accounting.

Interest expense increased by 29% to \$117 M for the second quarter of 2012 from \$91 M for the same period in 2011 mainly as a result of increased debt.

Income tax expense increased to \$172 M for the second quarter of 2012 from \$149 M for the same period in 2011. The effective tax rate increased to 34.6% from 34.2% for the same period of 2011 as a result of a higher tax resulting from a different tax basis for the gain from the divestiture of FMC AG&CO. KGAA clinics in the U.S. in connection with the Liberty Acquisition, partially offset by the effect of the non-taxable investment gain.

Net income attributable to shareholders of FMC AG&CO. KGAA for the second quarter of 2012 increased to \$289 M from \$261 M for the same period in 2011 as a result of the combined effects of the items discussed above.

We employed 84,194 people (full-time equivalents) as of June 30, 2012 compared to 77,081 as of June 30, 2011, an increase of 9.2%, primarily due to overall growth in our business and acquisitions.

The following discussions pertain to our business segments and the measures we use to manage these segments.

2nd Quarter 2012
Interim Report

North America Segment

KEY INDICATORS FOR NORTH AMERICA SEGMENT

Table 5

	Three months ended June 30,		Change
	2012	2011	
Number of treatments	6,141,414	5,379,508	14 %
Same market treatment growth <i>in %</i>	3.6	3.2	–
Revenue <i>in \$ M</i>	2,249	1,971	14 %
Depreciation and amortization <i>in \$ M</i>	79	67	19 %
Operating income <i>in \$ M</i>	431	348	24 %
Operating income margin <i>in %</i>	19.2	17.7	–

Revenue

Treatments increased by 14% for the second quarter of 2012 as compared to the same period in 2011 mostly due to the Liberty Acquisition, net of divestitures (10%), other acquisitions (1%) and same market growth (4%), partially offset by the effect of closed or sold clinics (1%). At June 30, 2012, 164,058 patients (a 17% increase over June 30, 2011) were being treated in the 2,046 clinics that we own or operate in the North America segment, compared to 139,906 patients treated in 1,826 clinics at June 30, 2011. Average North America revenue per treatment, before bad debt expense, was \$344 for the second quarter of 2012 and \$340 for the same period in 2011. In the U.S., the average revenue per treatment was \$351 for the second quarter of 2012 in comparison to \$348 for the same period in 2011. The increase was influenced by a number of factors. In the quarter, we saw an increase due to further development of our expanded service offerings, the updated Medicare reimbursement rate which came into effect in January 2012 and benefits associated with our Liberty Acquisition. This improvement was partially offset by reduced pharmaceutical utilization in non-bundled commercial treatments, a reduction in the rates we charge the Veterans Administration and a reduction in treatment rates for certain bundled commercial payors.

Net revenue for the North America segment for the second quarter of 2012 increased in comparison to the same period of 2011 as a result of a 15% increase in net dialysis care revenue to \$2,043 M from \$1,772 M and a 3% increase in dialysis product revenue to \$206 M from \$199 M as compared to same period in 2011.

The net dialysis care revenue increase was driven by contributions from acquisitions (15%), growth in same market treatments (4%), partially offset by decreases in organic revenue per treatment (2%) and the effect of closed or sold clinics (2%).

The dialysis product revenue increase was driven by increased sales of hemodialysis products, particularly machines and bloodlines, partially offset by decreased sales of dialyzers.

Operating Income

Operating income increased to \$431 M for the second quarter of 2012 from \$348 M for the same period in 2011. Operating income margin increased to 19.2% for the second quarter of 2012 from 17.7% for the same period in 2011, mainly due to the gain from the sale of FMC AG & CO. KGAA clinics, increases in Medicare reimbursement and the further development of our expanded service offerings, the positive impact of the Liberty Acquisition, including divestiture gains, partially offset by higher personnel expenses and the costs related to the Liberty Acquisition. The cost per treatment for North America decreased to \$275 for the second quarter of 2012 from \$277 in the same period of 2011.

2nd Quarter 2012
Interim Report

International Segment

KEY INDICATORS FOR INTERNATIONAL SEGMENT

Table 6

	Three months ended June 30,		Change	
	2012	2011	as reported	at constant exchange rates ¹
Number of treatments	3,531,153	3,004,965	18%	–
Same market treatment growth <i>in %</i>	3.9	5.2	–	–
Revenue <i>in \$ M</i>	1,171	1,163	1%	11%
Depreciation and amortization <i>in \$ M</i>	43	43	0%	–
Operating income <i>in \$ M</i>	207	203	2%	–
Operating income margin <i>in %</i>	17.7	17.5	–	–

¹ For further information on "at constant exchange rates," see "Non-U.S. GAAP Measures – Constant currency" below.

Revenue

Treatments increased by 18% in the second quarter of 2012 over the same period in 2011 mainly due to contributions from acquisitions (14%) and same market growth (4%). As of June 30, 2012, we had 92,398 patients (a 7% increase over June 30, 2011) being treated at the 1,077 clinics that we own, operate or manage in the International segment compared to 86,003 patients treated at 1,012 clinics at June 30, 2011. Average revenue per treatment for the second quarter of 2012 decreased to \$159 in comparison with \$178 for the same period of 2011 due to the weakening of local currencies against the U.S. dollar (\$17) as well as decreased reimbursement rates and changes in country mix (\$2).

Net revenues for the International segment for the second quarter of 2012 increased by 1% (11% increase at constant exchange rates) as compared to the same period in 2011 as a result of an increase in dialysis care revenue, partially offset by decreased dialysis product revenues. Organic growth was 6% and acquisitions contributed 5%. This was nearly offset by the negative effect of exchange rate fluctuations.

Including the effects of acquisitions, European region revenue decreased 3% (9% increase at constant exchange rates), Latin America region revenue increased 9% (20% increase at constant exchange rates), and Asia-Pacific region revenue increased 6% (8% increase at constant exchange rates).

Total dialysis care revenue for the International segment increased during the second quarter of 2012 by 5% (16% increase at constant exchange rates) to \$562 M from \$534 M in the same period of 2011. This increase is a result of contributions from acquisitions (12%), growth in same market treatments for the period (4%) and growth in organic revenue per treatment (1%), partially offset by the negative effect of exchange rate fluctuations (11%) and the effect of closed or sold clinics (1%).

Total dialysis product revenue for the second quarter of 2012 decreased by 3% (6% increase at constant exchange rates) to \$609 M from \$629 M in the same period of 2011. The decrease in product revenue was driven by exchange rate fluctuations (9%), partially offset with organic growth (6%). Growth at constant exchange rates was driven by increased sales of hemodialysis products, especially of machines, dialyzers, bloodlines and peritoneal dialysis products as well as increased renal pharmaceuticals sales.

Operating Income

Operating income increased by 2% to \$207 M for the second quarter of 2012 from \$203 M for the same period in 2011. Operating income margin increased to 17.7% for the second quarter of 2012 from 17.5% for the same period in 2011 due to favorable foreign exchange effects and business growth in Asia, partially offset by increased bad debt expense and growth in areas with lower margins.

2nd Quarter 2012
Interim Report

Six months ended June 30, 2012 compared to six months ended June 30, 2011.

Consolidated Financials

KEY INDICATORS FOR CONSOLIDATED FINANCIAL STATEMENTS

Table 7

	Six months ended June 30,		Change	
	2012	2011	as reported	at constant exchange rates ¹
Number of treatments	18,885,213	16,559,315	14 %	–
Same market treatment growth in %	3.8	4.1	–	–
Revenue in \$ M	6,677	6,121	9 %	12 %
Gross profit as a % of revenue	32.9	32.3	–	–
Selling, general and administrative costs as a % of revenue	16.4	16.1	–	–
Net income attributable to shareholders of FMC AG & Co. KGaA in \$ M	660	481	37 %	–

¹For further information on "at constant exchange rates," see "Non-U.S. GAAP Measures – Constant currency" below.

Treatments increased by 14% for the six months ended June 30, 2012 as compared to the same period in 2011. The increase is due to the Liberty Acquisition, net of the divestitures (5%), other acquisitions (5%), same market treatment growth contributed (4%) and an increase in the dialysis treatment days (1%), partially offset by the effect of closed or sold clinics (1%).

Net revenue increased by 9% (12% at constant exchange rates) for the six months ended June 30, 2012 over the comparable period in 2011 due to growth in both dialysis care and dialysis products revenues.

Dialysis care revenue increased by 12% to \$5,082 M (14% at constant exchange rates) in the six-month period ended June 30, 2012 from \$4,537 M in the same period of 2011, mainly due to contributions from acquisitions (11%), growth in same market treatments (4%) and an increase in the dialysis treatment days (1%), partially offset by the negative effect of exchange rate fluctuations (2%), decreases in organic revenue per treatment (1%) and the effect of closed or sold clinics (1%).

Dialysis product revenue increased by 1% to \$1,595 M (increased by 6% at constant exchange rates) from \$1,584 M in the same period of 2011, driven by increased sales of hemodialysis products, especially of machines, dialyzers and bloodlines as well as peritoneal dialysis products, partially offset by lower sales of renal pharmaceuticals.

The increase in gross profit margin mostly reflects an increase in gross profit margin in North America. The increase in North America was due to a higher revenue rate associated with Medicare and expanded service offerings as well as the impact from the Liberty Acquisition, which contributed higher gross margins, partially offset by higher personnel expenses.

SG&A expenses increased to \$1,092 M in the six-month period ended June 30, 2012 from \$986 M in the same period of 2011. SG&A expenses as a percentage of sales increased to 16.4% in the first six months of 2012 from 16.1% in the same period of 2011 as a result of an increase in North America, partially offset by a decrease in the International segment. The increase in North America was a result of one-time costs related to the Liberty Acquisition and higher personnel expenses, partially offset by the impact of the Liberty Acquisition, which has lower SG&A expenses as a percentage of sales, lower charitable donations. The decrease in International was driven by foreign exchange effects, business growth in Asia, mainly China, partially offset by increased bad debt expense.

2nd Quarter 2012
Interim Report

For the six months ended 2012, we had a \$33 M gain from the sale of 24 FMC AG & CO. KGAA clinics, in connection with regulatory clearance of the Liberty Acquisition, which occurred in the first quarter of 2012. This gain was partially offset by the cost of the acquisition. Income tax expense related to the sale of these clinics of approximately \$22 M has been recorded in the line item "Income tax expense," resulting in a net gain of approximately \$12 M — see Note 2.

Research and development (R&D) expenses increased to \$55 M in the six-month period ended June 30, 2012 as compared to \$53 M in the same period in 2011.

Income from equity method investees decreased to \$9 M for the six months ended June 30, 2012 from \$16 M for the same period of 2011 due to reduced income from the VFMRP renal pharmaceuticals joint venture.

Operating income increased to \$1,092 M in the six-month period ended June 30, 2012 from \$955 M for the same period in 2011. Operating income margin increased to 16.4% for the six-month period ended June 30, 2012 as compared to 15.6% for the same period in 2011 as a result of the increase in gross profit margin and the gain on the sale of FMC AG & CO. KGAA clinics, partially offset by higher SG & A as a percentage of revenue and lower income from equity method investees.

The non-taxable investment gain related to our acquisition of LD Holdings for the six months ended June 30, 2012 was \$140 M. The increase from \$127 M in the first quarter of 2012 is a result of fair value re-measurement due to developments in the finalization of our acquisition accounting.

Interest expense increased by 37% to \$236 M for the six months ended June 30, 2012 from \$172 M for the same period in 2011 mainly as a result of increased debt. Interest income increased to \$33 M for the six months ended June 30, 2012 from \$26 M for the same period in 2011 as a result of favorable impact from the interest component related to the hedging of intercompany loans.

Income tax expense increased to \$309 M for the six-month period ended June 30, 2012 from \$273 M for the same period in 2011. The effective tax rate decreased to 30.1% from 33.8% for the same period of 2011, as a result of nontaxable investment gain and higher tax from divestiture of FMC AG & CO. KGAA clinics in connection with the Liberty Acquisition.

Net income attributable to FMC AG & CO. KGAA for the six months ended June 30, 2012 increased to \$660 M from \$481 M for the same period in 2011 as a result of the combined effects of the items discussed above.

The following discussions pertain to our business segments and the measures we use to manage these segments.

2nd Quarter 2012
Interim Report

North America Segment

KEY INDICATORS FOR NORTH AMERICA SEGMENT

Table 8

	Six months ended June 30,		Change
	2012	2011	
Number of treatments	11,887,400	10,621,160	12%
Same market treatment growth <i>in %</i>	3.5	3.5	–
Revenue <i>in \$ M</i>	4,353	3,896	12%
Depreciation and amortization <i>in \$ M</i>	151	135	12%
Operating income <i>in \$ M</i>	779	661	18%
Operating income margin <i>in %</i>	17.9	17.0	–

Revenue

Treatments increased by 12% for the six months ended June 30, 2012 as compared to the same period in 2011 mostly due to the Liberty Acquisition, net of divestitures (7%) same market growth (4%), contributions from other acquisitions (1%) and changes in dialysis treatment days (1%), partially offset by the effect of closed or sold clinics (1%). Average North America revenue per treatment was \$345 for the six months ended June 30, 2012 and \$340 in the same period in 2011. In the U.S., the average revenue per treatment was \$352 for the six months ended June 30, 2012 and \$348 for the same period in 2011. The increase was mainly attributable to further development of our expanded service offerings and an increase in Medicare reimbursement from the updated Medicare reimbursement rate and removal of the Transition Adjustor which both came into effect in January 2012. This improvement was partially offset by reduced pharmaceutical utilization in non-bundled commercial treatments and a reduction in the rates we charge the Veterans Administration.

Net revenue for the North America segment for the first six months of 2012 increased as a result of an increase in dialysis care revenue by 13% to \$3,960 M from \$3,501 M in the same period of 2011 partially offset by a decrease in dialysis product revenue by 1% to \$393 M from \$395 M in the first six months of 2011.

The dialysis care revenue increase was driven by contributions from acquisitions (11%), same market treatment growth (4%) and an increase in dialysis treatment days (1%), partially offset by decreases in organic revenue per treatment (2%) and the effect of closed or sold clinics (1%).

The dialysis product revenue decrease was driven by lower sales of renal pharmaceuticals, partially offset by higher sales of hemodialysis products.

Operating Income

Operating income increased to \$779 M for the six-month period ended June 30, 2012 from \$661 M for the same period in 2011. Operating income margin increased to 17.9% for the six months ended June 30, 2012 from 17.0% for the same period in 2011, primarily due to the gain from sale of FMC AG & CO. KGAA clinics, higher revenue per treatment rate associated with Medicare and expanded service offerings, positive impact from the Liberty Acquisition, including divestiture gains, partially offset by higher personnel expenses, costs related to the Liberty Acquisition as well as lower income from equity method investees due to income from the Vifor joint venture. Cost per treatment for North America decreased to \$277 for the first six months of 2012 from \$279 in the same period of 2011. Cost per treatment in the U.S. decreased to \$283 for the first six months of 2012 from \$285 in the same period of 2011.

2nd Quarter 2012
Interim Report

International Segment

KEY INDICATORS FOR INTERNATIONAL SEGMENT

Table 9

	Six months ended June 30,		Change	
	2012	2011	as reported	at constant exchange rates
Number of treatments	6,997,813	5,938,155	18%	–
Same market treatment growth <i>in %</i>	4.3	5.4	–	–
Revenue <i>in \$ M</i>	2,307	2,217	4%	11%
Depreciation and amortization <i>in \$ M</i>	86	83	3%	–
Operating income <i>in \$ M</i>	402	374	7%	–
Operating income margin <i>in %</i>	17.4	16.9	–	–

Revenue

Treatments increased by 18% in the six months ended June 30, 2012 over the same period in 2011 mainly due to contributions from acquisitions (14%), same market growth (4%) and an increase in dialysis treatment days (1%), partially offset by the effect of closed or sold clinics (1%). Average revenue per treatment for the six months ended June 30, 2012 decreased to \$160 in comparison with \$175 for the same period of 2011 due to the weakening of local currencies against the U.S. dollar (\$12) and decreased reimbursement rates and changes in country mix (\$3).

Net revenues for the International segment for the six months ended June 30, 2012 increased by 4% (11% increase at constant exchange rates) as compared to the same period in 2011 as a result of an increase in dialysis care. Organic growth during the period was 6% and acquisitions during the period contributed 5%, partially offset by the negative effect of exchange rate fluctuations (7%).

Including the effects of acquisitions, European region revenue increased by 1% (10% increase at constant exchange rates), Latin America region revenue increased 15% (23% increase at constant exchange rates), and Asia-Pacific region revenue increased 6% (7% increase at constant exchange rates).

Total dialysis care revenue for the International segment increased during the six months ended June 30, 2012 by 8% (16% increase at constant exchange rates) to \$1,122 M from \$1,037 M in the same period of 2011. This increase is a result of contributions from acquisitions (11%), same market treatment growth (4%), increases in organic revenue per treatment (1%) as well as an increase in dialysis treatment days (1%), partially offset by the negative effect of exchange rate fluctuations (8%) and the effect of closed or sold clinics (1%).

Total dialysis product revenue for the six months ended June 30, 2012 remained fairly flat (7% increase at constant exchange rates) at \$1,185 M compared to \$1,180 M in the same period of 2011. The 7% increase in product revenue at constant currency was driven by increased sales of hemodialysis products, especially of machines and dialyzers as well as peritoneal dialysis products, renal pharmaceuticals as well as products for acute care treatments, mostly offset by exchange rate fluctuations of 7%.

Operating Income

Operating income increased by 7% to \$402 M for the six months ended June 30, 2012 from \$374 M for the same period in 2011. Operating income margin increased to 17.4% for the six months ended June 30, 2012 from 16.9% for the same period in 2011 due to favorable foreign exchange effects and business growth in Asia, partially offset by impact of increased bad debt expense and lower margin sales in the Middle East.

2nd Quarter 2012
Interim Report

LIQUIDITY AND CAPITAL RESOURCES

Six months ended June 30, 2012 compared to six months ended June 30, 2011

Liquidity

Our primary sources of liquidity have historically been cash from operations, cash from borrowings from third parties and related parties, as well as cash from issuance of debt and equity securities. We require this capital primarily to finance working capital needs, to fund acquisitions and joint ventures, to develop free-standing renal dialysis centers, to purchase equipment for existing or new renal dialysis centers and production sites, to repay debt and to pay dividends.

At June 30, 2012, we had cash and cash equivalents of \$677 M. For information regarding utilization and availability under our Amended 2006 Senior Credit Agreement — see Note 7.

Operations

In the first six months of 2012 and 2011, we generated net cash from operations of \$932 M and \$487 M, respectively. Cash from operations is impacted by the profitability of our business, the development of our working capital, principally receivables, and cash outflows that occur due to a number of specific items (especially payments in relation to disallowed tax deductions and legal proceedings). The increase in the first six months of 2012 versus 2011 was mainly a result of a 3 day decrease in days sales outstanding (DSO) as compared to a 6 day increase in the same period of 2011 and a lower increase in inventory level.

The profitability of our business depends significantly on reimbursement rates. Approximately 76% of our revenues are generated by providing dialysis services, a major portion of which is reimbursed by either public health care organizations or private insurers. For the six months ended June 30, 2012, approximately 31% of our consolidated revenues were attributable to U.S. federal health care benefit programs, such as Medicare and Medicaid reimbursement. Legislative changes could affect Medicare reimbursement rates for a significant portion of the services we provide, as well as the scope of Medicare coverage. A decrease in reimbursement rates or the scope of coverage could have a material adverse effect on our business, financial condition and results of operations and thus on our capacity to generate cash flow. In the past we experienced, and after the implementation of the ESRD PPS in the U.S., also expect in the future, generally stable reimbursements for dialysis services. This includes the balancing of unfavorable reimbursement changes in certain countries with favorable changes in other countries.

Our working capital, which is defined as current assets less current liabilities, was \$193 M at June 30, 2012 which decreased from \$1,432 M at December 31, 2011, mainly as a result of an increase in the current portion of long-term debt due to the reclassification of our Amended 2006 Senior Credit Agreement, which matures on March 31, 2013. At June 30, 2012, the obligations under the Amended 2006 Senior Credit Agreement represented \$2.668 BN of our debt. We anticipate that the obligations under this agreement will be refinanced prior to maturity — see Note 7. Our ratio of current assets to current liabilities was 1.0 at June 30, 2012.

We intend to continue to address our current cash and financing requirements by the generation of cash from operations, our existing and future credit agreements, and the issuance of debt securities. In addition, when funds are required for acquisitions or to meet other needs, we expect to successfully complete long-term financing arrangements, such as the issuance of senior notes, see "Financing" below. We aim to preserve financial resources with a minimum of \$300 to \$500 M of committed and unutilized credit facilities.

Cash from operations depends on the collection of accounts receivable. Customers and governments generally have different payment cycles. A lengthening of their payment cycles could have a material adverse effect on our capacity to generate cash flow. In addition, we could face difficulties in enforcing and collecting accounts receivable under some countries' legal systems and due to the economic conditions in some countries. Accounts receivable balances at June 30, 2012 and December 31, 2011, net of valuation allowances, represented DSO of approximately 77 and 80, respectively.

2nd Quarter 2012
Interim Report

DSO by segment is calculated by dividing the segment's accounts receivable, as converted to U.S. Dollars using the average exchange rate for the period presented, less any value added tax included in the receivables, by the average daily sales for the last twelve months of that segment, as converted to U.S. Dollars using the average exchange rate for the period. Receivables and sales are adjusted for amounts related to significant acquisitions made during the periods presented. The development of DSO by reporting segment is shown in the table below:

DEVELOPMENT OF DAYS SALES OUTSTANDING		
<i>in days</i>	<i>Table 10</i>	
	June 30, 2012	December 31, 2011
North America	54	55
International	120	121
► FMC AG & CO. KGA AVERAGE	77	80

DSO decreased for both the North American and International segments between December 31, 2011 and June 30, 2012. The North American segment's DSO decrease is due to timing differences of receipts. The International segment's DSO decrease reflects significant cash collections from Spain, mostly offset by slight payment delays, particularly in countries with budget deficits and growth in China. Due to the fact that a large portion of our reimbursement is provided by public health care organizations and private insurers, we expect that most of our accounts receivable will be collectible, albeit slightly more slowly in the International segment in the immediate future.

There are a number of tax and other items we have identified that will or could impact our financial results and cash flows from operations in the immediate future as follows:

We filed claims for refunds contesting the Internal Revenue Service's (IRS) disallowance of civil settlement payment deductions taken by Fresenius Medical Care Holdings, Inc. (FMCH) in prior year tax returns. As a result of a settlement agreement with the IRS, we received a partial refund in September 2008 of \$37 M, inclusive of interest and preserved our right to pursue claims in the United States courts for refunds of all other disallowed deductions. On December 22, 2008, we filed a complaint for complete refund in the United States District Court for the District of Massachusetts, styled as Fresenius Medical Care Holdings, Inc. v. United States. The court has denied motions for summary judgment by both parties and the litigation is proceeding towards trial scheduled to begin August 6, 2012.

We are subject to ongoing and future tax audits in the U.S., Germany and other jurisdictions. We have received notices of unfavorable adjustments and disallowances in connection with certain of the audits, including those described above. We are contesting, including appealing, certain of these unfavorable determinations. If our objections and any final audit appeals are unsuccessful, we could be required to make additional tax payments, including payments to state tax authorities reflecting the adjustments made in our federal tax returns in the U.S. With respect to other potential adjustments and disallowances of tax matters currently under review, we do not anticipate that an unfavorable ruling could have a material impact on our results of operations. We are not currently able to determine the timing of these potential additional tax payments.

W.R. Grace & Co. and certain of its subsidiaries filed for reorganization under Chapter 11 of the U.S. Bankruptcy Code (the Grace Chapter 11 Proceedings) on April 2, 2001. The settlement agreement with the asbestos creditors committees on behalf of the W.R. Grace & Co. bankruptcy estate — see Note 11 provides for payment by us of \$115 M upon approval of the settlement agreement by the U.S. District Court, which has occurred, and confirmation by the U.S. District Court of a W.R. Grace & Co. bankruptcy reorganization plan

2nd Quarter 2012
Interim Report

that includes the settlement. In January and February 2011, the u.s. Bankruptcy Court entered orders confirming the plan of reorganization. These confirmation orders were affirmed by the u.s. District Court on January 31, 2012. Multiple parties have appealed to the Third Circuit Court of Appeals and the plan of reorganization will not be implemented until the appeals are finally resolved. The \$115 M obligation was included in the special charge we recorded in 2001 to address 1996 merger-related legal matters — see Note 11. The payment obligation is not interest-bearing.

Investing

We used net cash of \$1,794 M and \$1,353 M in investing activities in the six-month periods ended June 30, 2012 and 2011, respectively.

Capital expenditures for property, plant and equipment, net of disposals were \$274 M and \$231 M in the first six months of 2012 and 2011, respectively. In the first six months of 2012, capital expenditures were \$132 M in the North America segment, \$80 M for the International segment and \$62 M at Corporate. Capital expenditures in the first six months of 2011 were \$104 M in the North America segment, \$72 M for the International segment and \$55 M at Corporate. The majority of our capital expenditures was used for maintaining existing clinics, equipping new clinics, maintenance and expansion of production facilities primarily in Germany, North America and France and capitalization of machines provided to our customers, primarily in the International segment. Capital expenditures were approximately 4% of total revenue in the first six months of 2012 and 2011.

We invested approximately \$1,748 M cash in the first six months of 2012, primarily through the \$1,455 M acquisition of Liberty, net of divestitures (\$1,730 M in the North America segment — see Note 2, \$17 M in the International segment and \$1 M at Corporate). In the first six months of 2011, we invested approximately \$1,122 M cash through the acquisition of International Dialysis Centers, the dialysis service business of Euromedic International, loans provided to Renal Advantage Partners LLC, the parent company of Renal Advantage, Inc., a provider of dialysis services, and investments in majority owned joint ventures (\$358 M in the North America segment, \$759 M in the International segment and \$5 M at Corporate).

We anticipate capital expenditures of approximately \$0.7 BN and expect to make acquisitions of approximately \$1.8 BN net of divestitures in 2012, including all acquisitions to date, see the Notes and the “Outlook” below.

Financing

Net cash provided by financing was \$1,089 M in the first six months of 2012 compared to net cash provided by financing of \$742 M in the first six months of 2011, respectively.

In the six-month period ended June 30, 2012, cash was provided by the issuance of senior notes and short-term borrowings, partially offset by repayment of long-term debt, the accounts receivable facility, borrowings from related parties as well as the payment of dividends. For further information on the issuance of senior notes in 2012, see below. In the first six months of 2011, cash was provided by the issuance of \$1,062 M in senior notes in February 2011, drawings under our revolving credit facility, short-term borrowings and short-term borrowings from related parties and drawings under the accounts receivable facility, partially offset by the repayment of the trust preferred securities, repayment of long-term debt and the payment of dividends.

On May 11, 2012, we paid a dividend with respect to 2011 of €0.69 per ordinary share (for 2010 paid in 2011: €0.65) and €0.71 per preference share (for 2010 paid in 2011: €0.67). The total dividend payment was €210 M (\$272 M) as compared with €197 M (\$281 M) in the prior year.

On January 26, 2012, Fresenius Medical Care us Finance II, Inc. (us Finance II), a wholly-owned subsidiary, issued \$800 M aggregate principal amount of senior unsecured notes with a coupon of 5 5/8% (the 5 5/8% Senior Notes) at par and \$700 M aggregate principal amount of senior unsecured notes with a coupon of

*2nd Quarter 2012
Interim Report*

5 7/8% (the 5 7/8% Senior Notes) at par (together, the Dollar-denominated Senior Notes). In addition, FMC Finance VIII S.A. (Finance VIII), a wholly-owned subsidiary, issued €250 M aggregate principal amount (\$329 M at date of issuance) of senior unsecured notes with a coupon of 5.25% (the Euro-denominated Senior Notes) at par. Both the 5 5/8% Senior Notes and the Euro-denominated Senior Notes are due July 31, 2019 while the 5 7/8% Senior Notes are due January 31, 2022. US Finance II and Finance VIII may redeem the Dollar-denominated Senior Notes and Euro-denominated Senior Notes, respectively, at any time at 100% of principal plus accrued interest and a premium calculated pursuant to the terms of the applicable indenture. The holders of the Dollar-denominated Senior Notes and the Euro-denominated Senior Notes have a right to request that the respective issuers of the notes repurchase the applicable issue of notes at 101% of principal plus accrued interest upon the occurrence of a change in control of FMC AG & CO. KGAA followed by a decline in the rating of the respective notes. We used the net proceeds of approximately \$1,807 M for acquisitions, including the acquisition of Liberty Dialysis Holdings, Inc., which closed on February 28, 2012, to refinance indebtedness and for general corporate purposes. The Dollar-denominated Senior Notes and the Euro-denominated Senior Notes are guaranteed on a senior basis jointly and severally by us, Fresenius Medical Care Holdings, Inc. (FMCH) and Fresenius Medical Care Deutschland GmbH (D-GmbH) (together, the Guarantor Subsidiaries).

Non-U.S. GAAP Measures

Constant Currency

Changes in revenue include the impact of changes in foreign currency exchange rates. We use the non-GAAP financial measure "at constant exchange rates" in our filings to show changes in our revenue without giving effect to period-to-period currency fluctuations. Under U.S. GAAP, revenues received in local (non-U.S. dollar) currency are translated into U.S. dollars at the average exchange rate for the period presented. When we use the term "constant currency," it means that we have translated local currency revenues for the current reporting period into U.S. dollars using the same average foreign currency exchange rates for the conversion of revenues into U.S. dollars that we used to translate local currency revenues for the comparable reporting period of the prior year. We then calculate the change, as a percentage, of the current period revenues using the prior period exchange rates versus the prior period revenues. This resulting percentage is a non-GAAP measure referring to a change as a percentage "at constant exchange rates."

We believe that revenue growth is a key indication of how a company is progressing from period to period and that the non-GAAP financial measure constant currency is useful to investors, lenders, and other creditors because such information enables them to gauge the impact of currency fluctuations on a company's revenue from period to period. However, we also believe that the usefulness of data on constant currency period-over-period changes is subject to limitations, particularly if the currency effects that are eliminated constitute a significant element of our revenue and significantly impact our performance. We therefore limit our use of constant currency period-over-period changes to a measure for the impact of currency fluctuations on the translation of local currency revenue into U.S. dollars. We do not evaluate our results and performance without considering both constant currency period-over-period changes in non-U.S. GAAP revenue on the one hand and changes in revenue prepared in accordance with U.S. GAAP on the other. We caution the readers of this report to follow a similar approach by considering data on constant currency period-over-period changes only in addition to, and not as a substitute for or superior to, changes in revenue prepared in accordance with U.S. GAAP. We present the fluctuation derived from U.S. GAAP revenue next to the fluctuation derived from non-GAAP revenue. Because the reconciliation is inherent in the disclosure, we believe that a separate reconciliation would not provide any additional benefit.

Debt covenant disclosure – EBITDA

EBITDA (earnings before interest, tax, depreciation and amortization expenses) was approximately \$1,386 M, 20.8% of revenues for the six-month period ended June 30, 2012, and \$1,227 M, 20.0% of revenues for the same period of 2011. EBITDA is the basis for determining compliance with certain covenants contained in our Amended 2006 Senior Credit Agreement, Euro Notes, EIB agreements, and the indentures relating to our Senior Notes. You should not consider EBITDA to be an alternative to net earnings determined in accordance with U.S. GAAP or to cash flow from operations, investing activities or financing activities. In addition, not all

2nd Quarter 2012
Interim Report

funds depicted by EBITDA are available for management's discretionary use. For example, a substantial portion of such funds are subject to contractual restrictions and functional requirements for debt service, to fund necessary capital expenditures and to meet other commitments from time to time as described in more detail elsewhere in this report. EBITDA, as calculated, may not be comparable to similarly titled measures reported by other companies. A reconciliation of EBITDA to cash flow provided by operating activities, which we believe to be the most directly comparable U.S. GAAP financial measure, is calculated as follows:

RECONCILIATION OF MEASURES FOR CONSOLIDATED TOTALS

<i>in \$ M</i>		<i>Table 11</i>	
		<i>Six months ended June 30,</i>	
		2012	2011
► TOTAL EBITDA		1,386	1,227
Interest expense (net of interest income)		(203)	(146)
Income tax expense, net		(309)	(273)
Change in deferred taxes, net		65	53
Changes in operating assets and liabilities		27	(329)
Stock compensation expense		13	15
Other items, net		(47)	(60)
► NET CASH PROVIDED BY OPERATING ACTIVITIES		932	487

BALANCE SHEET STRUCTURE

Total assets as of June 30, 2012 increased to \$21.7BN compared to \$19.5BN at December 31, 2011. Current assets as a percent of total assets decreased to at 28% at June 30, 2012 compared to 29% as of December 31, 2011. The equity ratio, the ratio of our equity divided by total liabilities and shareholders' equity, decreased to 39% at June 30, 2012 from 41% at December 31, 2011.

OPPORTUNITES AND RISK REPORT

Opportunities Report

In comparison to the information contained within the Annual Report for December 31, 2011, there have been no material changes for the second quarter of 2012 — *please refer to chapter 2.8 "Risk and Opportunities Report" in our Annual Report for the year ended December 31, 2011.*

Risk Report

For information regarding the Company's risk — *please refer to notes 11, 12 and the chapter "Financial condition and results of operations" and specifically the Forward looking statement and Overview sections in this report.* For additional information — *please see chapter 2.8 "Risk and Opportunities Report" in our Annual Report for the year ended December 31, 2011.*

2nd Quarter 2012
Interim Report

REPORT ON EXPECTED DEVELOPMENTS

We confirm our outlook for the full year 2012 as depicted in the table below:

OUTLOOK	
<i>Table 12</i>	
<i>in \$ M</i>	2012
Net revenues ¹	~14,000
Net income attributable to shareholders of FMC AG & Co. KGaA ^{1, 2}	~1,140
Debt/EBITDA ratio	< 3.0
Capital expenditures	~700
Acquisitions, net of divestitures	~1,800

¹ We are defining the ~ sign as a +/- 0-2% deviation from the respective numbers.

² The net income attributable to shareholders of FMC AG & Co. KGaA does not include the year-to-date investment gain in the amount of approximately \$140 M. In addition, the amount of the gain is subject to finalization of the Liberty acquisition accounting.

SUBSEQUENT EVENTS

No significant activities have taken place since the balance sheet date June 30, 2012 that have a material impact on the key figures and business earnings presented.

2nd Quarter 2012
Consolidated Financial Statements

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited. In thousands, except share and per share data.

1. The Company and basis of presentation

The Company

Fresenius Medical Care AG & Co. KGaA (FMC AG & Co. KGaA or the Company), a German partnership limited by shares (Kommanditgesellschaft auf Aktien), is the world's largest kidney dialysis company, operating in both the field of dialysis services and the field of dialysis products for the treatment of end-stage renal disease (ESRD). The Company's dialysis business is vertically integrated, providing dialysis treatment at dialysis clinics it owns or operates and supplying these clinics with a broad range of products. In addition, the Company sells dialysis products to other dialysis service providers. In the United States, the Company also provides inpatient dialysis services and other services under contract to hospitals.

In this report, "FMC AG & Co. KGaA," or the "Company," "we," "us" or "our" refers to the Company or the Company and its subsidiaries on a consolidated basis, as the context requires.

Basis of presentation

The accompanying consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP).

The consolidated financial statements at June 30, 2012 and for the three- and six-month periods ended June 30, 2012 and 2011 contained in this report are unaudited and should be read in conjunction with the consolidated financial statements contained in the Company's 2011 Annual Report on Form 20-F. The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Such financial statements reflect all adjustments that, in the opinion of management, are necessary for a fair presentation of the results of the periods presented. All such adjustments are of a normal recurring nature.

The accounting policies applied in the accompanying consolidated financial statements are the same as those applied in the consolidated financial statements as at and for the year ended December 31, 2011, contained in the Company's 2011 Annual Report on Form 20-F, except for the update noted below:

Certain items in the prior periods's comparative consolidated financial statements have been reclassified to conform to the current period's presentation. Revenues have been restated to reflect the retrospective adoption of Accounting Standards Update 2011-07, Health Care Entities. Specifically, bad debt expense in the amount of \$56,429 and \$108,966 was reclassified from selling general and administrative (SG & A) as a reduction of revenue for the three and six months ended June 30, 2011, respectively. In addition, freight expense in the amount of \$36,492 and \$71,167 was reclassified from SG & A to cost of revenue to harmonize the presentation for all business segments for the three and six months ended June 30, 2011, respectively.

The results of operations for the six-month period ended June 30, 2012 are not necessarily indicative of the results of operations for the year ending December 31, 2012.

2. Acquisition of Liberty Dialysis Holdings

On February 28, 2012, the Company acquired 100% of the equity of Liberty Dialysis Holdings, Inc. (LD Holdings), the owner of Liberty Dialysis and owner of a 51% stake in Renal Advantage Partners, LLC (the Liberty Acquisition). The Company accounted for this transaction as a business combination, subject to finalization of the acquisition accounting which will be finalized when certain information arranged to be obtained has

2nd Quarter 2012
Consolidated Financial Statements

been received. LD Holdings mainly provides dialysis services in the United States through the 263 clinics it owns (the Acquired Clinics). As the Company expressly discloses in its Annual Report — see chapter 2.1 “Operations and Business Environment – Strategy, Objectives, and Corporate Management” it is part of the Company’s stated strategy to expand and complement its existing business through acquisitions. Generally, these acquisitions do not change the Company’s business model and are easy to integrate without disruption to its existing business, requiring little or no realignment of its structures. The Liberty Acquisition is consistent in this regard as it involves the acquisition of dialysis clinics, a business in which the Company is already engaged and, therefore, merely supplements its existing business.

Total consideration for the Liberty Acquisition was \$2,177,804, consisting of \$1,681,418 cash, net of cash acquired and \$496,386 non-cash consideration. Accounting standards for business combinations require previously held equity interests to be fair valued with the difference to book value to be recognized as a gain or loss in income. Prior to the Liberty Acquisition, the Company had a 49% equity investment in Renal Advantage Partners, LLC, the fair value of which, \$201,915, is included as non-cash consideration. The estimated fair value has been determined based on the discounted cash flow method, utilizing an approximately 13% discount rate. In addition to the Company’s investment, it also had a loan receivable from Renal Advantage Partners, LLC of \$279,793, at a fair value of \$282,784, which was retired as part of the transaction. Finally, \$11,687 of assumed obligations from the acquisition is still outstanding and will be repaid during 2012 bringing the total non-cash consideration in the Liberty Acquisition to \$496,386.

The following table summarizes the estimated fair values of assets acquired and liabilities assumed at the date of the acquisition. This preliminary acquisition accounting is based upon the best information available to management. The information is still preliminary due to difficulties in obtaining the required information as of June 30, 2012. Any adjustments to acquisition accounting, net of related income tax effects, will be recorded with a corresponding adjustment to goodwill:

PRELIMINARY PURCHASE PRICE ALLOCATION	
<i>in \$ THOUS</i>	<i>Table 21</i>
Assets held for sale	153,360
Trade accounts receivable	156,380
Other current assets	44,637
Property, plant and equipment	174,400
Intangible assets and other assets	102,921
Goodwill	1,967,135
Accounts payable, accrued expenses and other current liabilities	(124,366)
Income tax payable and deferred taxes	(36,098)
Short-term borrowings and other financial liabilities and long-term debt and capital lease obligations	(69,065)
Other liabilities	(26,400)
Noncontrolling interests (subject and not subject to put provisions)	(165,100)
► TOTAL ACQUISITION COST	2,177,804
Less, at fair value, non-cash contributions	
Investment at acquisition date	(201,915)
Long-term notes receivable	(282,784)
Obligations assumed in connection with acquisition	(11,687)
► TOTAL NON-CASH ITEMS	(496,386)
► NET CASH PAID	1,681,418

It is currently estimated that amortizable intangible assets acquired in this acquisition will have weighted average useful lives of 6-8 years.

2nd Quarter 2012
Consolidated Financial Statements

Goodwill, in the amount of \$1,967,135 was acquired as part of the Liberty Acquisition and is allocated to the North America Segment. Goodwill is an asset representing the future economic benefits arising from other assets acquired in a business combination that are not individually identified and separately recognized. Goodwill arises principally due to the fair value placed on acquiring an established stream of future cash flows versus building a similar franchise. Of the goodwill recognized in this acquisition, approximately \$436,000 is expected to be deductible for tax purposes and amortized over a 15 year period.

The noncontrolling interests acquired as part of the acquisition are stated at estimated fair value, subject to finalization of the acquisition accounting, based upon utilized implied multiples used in conjunction with the Liberty Acquisition, as well as the Company's overall experience and contractual multiples typical for such arrangements.

The results of Liberty Dialysis Holdings, Inc. have been included in the consolidated statement of income since February 29, 2012. Revenue and operating income of Liberty Dialysis Holdings, Inc. amount to \$295,568 and \$72,668 before taxes, respectively. This amount for operating income does not include synergies and the operating income of subsidiaries that supply products to the acquired entities nor does it exclude the effect of divested FMC AG & CO. KGAA clinics.

The fair valuation of the Company's investment at the time of the Liberty Acquisition resulted in a non-taxable gain of approximately \$139,600 and is presented in the separate line item "Investment Gain" in the Consolidated Statement of Income. The retirement of the loan receivable resulted in a benefit of \$8,501 which was recognized in interest income.

Divestitures

In connection with the FTC consent order relating to the Liberty Acquisition, the Company agreed to divest a total of 62 renal dialysis centers. For the six months ended June 30, 2012, 24 of the 61 clinics sold were FMC AG & CO. KGAA clinics. The sale of these clinics resulted in a \$33,490 gain, partially offset by the cost of the acquisition. \$24,233 of which was recognized in the second quarter of 2012.

For the six months ended June 30, 2012, the income tax expense related to the sale of these clinics of approximately \$21,900 has been recorded in the line item "Income tax expense," resulting in a net gain of approximately \$11,590.

Pro forma financial information

The following financial information, on a pro forma basis, reflects the consolidated results of operations as if the Liberty Acquisition and the divestitures described above had been consummated on January 1, 2011. The pro forma information includes adjustments primarily for elimination of the investment gain and the gain from the retirement of debt. The pro-forma financial information is not necessarily indicative of the results of operations as it would have been had the transactions been consummated on January 1, 2011.

PRO FORMA FINANCIAL INFORMATION

2nd Quarter 2012
Consolidated Financial Statements

3. Sources of revenue, bad debt provision and allowance for doubtful accounts

a) Sources of revenue

Below is a table showing the sources of our U.S. patient service revenue (net of contractual allowance and discounts) for the six months ended June 30, 2012 and 2011.

U.S. PATIENT SERVICE REVENUE		
<i>in \$</i>	<i>Table 23</i>	
	<i>Six months ended June 30,</i>	
	2012	2011
Medicare ESRD program	1,926,433	1,805,775
Private/alternative payors	1,775,378	1,499,652
Medicaid and other government sources	194,154	111,674
Hospitals	201,709	192,844
► TOTAL PATIENT SERVICE REVENUE	4,097,674	3,609,945

b) Bad debt provision

The Company's dialysis care revenues represent dialysis services rendered in the process of dialysis treatment. In the U.S., this revenue is recorded based upon contractual rates with third party payors during the period the health care services are provided. The Company estimates a provision for dialysis care doubtful accounts which is based upon the payment terms applicable to the related contractual agreements and historical payment patterns. The Company's major sources of revenues include third-party payors, including federal and state agencies (including Medicare and Medicaid programs), managed care health plans and commercial insurance companies.

Based on historical collection experience, a significant portion of net dialysis care revenues related to patients without adequate insurance coverage, patient co-payments and deductibles for patients who have third party health care coverage are ultimately uncollectible. For this reason a provision for doubtful accounts related to the uninsured portion of patient accounts is recorded to adjust net dialysis care revenue and related accounts receivable to estimated net collectible amounts.

c) Allowance for doubtful accounts

Accounts receivables are reduced by an allowance for doubtful accounts to reduce the carrying value of such receivables to their estimated net realizable value. The sufficiency of the allowance for doubtful accounts is estimated based upon management's detailed periodic assessment of historical write-offs and recoveries by major payor groups, trends in federal, state and private employer health care coverage and other collection trends. A significant portion of the allowance for doubtful accounts relate to amounts due directly from patients without adequate insurance coverage, patient co-payment and deductible amounts from patients who have health care coverage. Although outcomes vary, the Company attempts to collect amounts due from all patients, including co-payments and deductibles due from patients with insurance. Account balances are written off and deducted from the allowance for doubtful accounts after all reasonable collection efforts have been performed. Additions to the allowance for doubtful accounts are made by means of the provision for doubtful accounts. The amount of the provision for doubtful accounts is based upon management's historical collection experience and expected net collections from net patient service revenue during the period.

*2nd Quarter 2012
Consolidated Financial Statements*

4. Related party transactions

The Company's parent, Fresenius SE & Co. KGaA, is a German partnership limited by shares resulting from the change of legal form effective January 28, 2011, of Fresenius SE, a European Company (Societas Europaea), and which, prior to July 13, 2007, was called Fresenius AG, a German stock corporation. In these Consolidated Financial Statements, Fresenius SE refers to that company as a partnership limited by shares, effective on and after January 28, 2011, as well as both before and after the conversion of Fresenius AG from a stock corporation into a European Company. Fresenius SE owns 100% of the share capital of Fresenius Medical Care Management AG, the Company's general partner (General Partner). From November 16, 2011 until February 29, 2012, Fresenius SE purchased 3.5 M ordinary shares of FMC AG & CO. KGAA. Fresenius SE, the Company's largest shareholder, owns approximately 31.4% of the Company's voting shares as of June 30, 2012.

a) Service and lease agreements

The Company is party to service agreements with Fresenius SE and certain of its affiliates (collectively the Fresenius SE Companies) to receive services, including, but not limited to: administrative services, management information services, employee benefit administration, insurance, information technology services, tax services and treasury management services. During the six-month periods ended June 30, 2012 and 2011, amounts charged by Fresenius SE to the Company under the terms of these agreements were \$38,418 and \$34,251, respectively. The Company also provides certain services to the Fresenius SE Companies, including research and development, central purchasing and warehousing. The Company charged \$3,184 and \$3,144 for services rendered to the Fresenius SE Companies during the first six months of 2012 and 2011 respectively.

Under real estate operating lease agreements entered into with the Fresenius SE Companies, which are leases for the corporate headquarters in Bad Homburg, Germany and production sites in Schweinfurt and St. Wendel, Germany, the Company paid the Fresenius SE Companies \$12,660 and \$12,910 during the six-month periods ended June 30, 2012 and 2011, respectively. The majority of the leases expire in 2016 and contain renewal options.

The Company's Articles of Association provide that the General Partner shall be reimbursed for any and all expenses in connection with management of the Company's business, including remuneration of the members of the General Partner's supervisory board and the General Partner's management board. The aggregate amount reimbursed to the General Partner was \$6,453 and \$6,108, respectively, for its management services during the six-month periods ended June 30, 2012 and 2011.

b) Products

For the first six months of 2012 and 2011, the Company sold products to the Fresenius SE Companies for \$12,646 and \$9,812 respectively. During the same periods, the Company made purchases from the Fresenius SE Companies in the amount of \$24,488 and \$25,989, respectively.

In addition to the purchases noted above, the Company currently purchases heparin supplied by APP Pharmaceuticals Inc. (APP Inc.), through an independent group purchasing organization (GPO). APP Inc. is wholly-owned by Fresenius Kabi AG, a wholly-owned subsidiary of Fresenius SE. The Company has no direct supply agreement with APP Inc. and does not submit purchase orders directly to APP Inc. During the six-month periods ended June 30, 2012 and 2011, Fresenius Medical Care Holdings, Inc. (FMCH) acquired approximately \$8,565 and \$12,869, respectively, of heparin from APP Inc. through the GPO contract, which was negotiated by the GPO at arm's length on behalf of all members of the GPO.

c) Financing provided by and to Fresenius SE and the General Partner

As of June 30, 2012, the Company had borrowings outstanding with Fresenius SE of €26,100 (\$32,860 as of June 30, 2012) at an interest rate of 1.632%, due and repaid on July 2, 2012.

2nd Quarter 2012
Consolidated Financial Statements

As of June 30, 2012, the Company had loans of CNY 110,982 (\$17,463 as of June 30, 2012) outstanding with a subsidiary of Fresenius SE at a weighted average interest rate of 6.15%, due on April 14, 2013 and May 23, 2014.

On August 19, 2009, the Company borrowed €1,500 (\$1,889 as of June 30, 2012) from the General Partner at 1.335%. The loan repayment, originally due on August 19, 2010, was originally extended until August 19, 2011 and has been further extended until August 20, 2012 at an interest rate of 3.328%.

5. Inventories

As of June 30, 2012 and December 31, 2011, inventories consisted of the following:

INVENTORIES		
<i>Table 24</i>		
<i>in \$ THOUS</i>	June 30, 2012	<i>December 31, 2011</i>
Finished goods	652,414	610,569

	8,628,728	7,084,586	
Less current maturities	(3,085,803)	(1,589,776)	
► TOTAL	5,542,925	5,494,810	

Amended 2006 Senior Credit Agreement

The following table shows the available and outstanding amounts under the Amended 2006 Senior Credit Agreement at June 30, 2012 and December 31, 2011:

AVAILABLE AND OUTSTANDING CREDITS				
<i>in \$ THOUS</i>		<i>Table 27</i>		
	<i>Maximum amount available</i>		<i>Balance outstanding</i>	
	<i>June 30, 2012</i>	<i>December 31, 2011</i>	<i>June 30, 2012</i>	<i>December 31, 2011</i>
Revolving Credit	1,200,000	1,200,000	374,950	58,970
Term Loan A	1,155,000	1,215,000	1,155,000	1,215,000
Term Loan B	1,138,187	1,521,619	1,138,187	1,521,619
► TOTAL	3,493,187	3,936,619	2,668,137	2,795,589

In addition, at June 30, 2012 and December 31, 2011, the Company had letters of credit outstanding in the amount of \$160,984 and \$180,766, respectively, which are not included above as part of the balance outstanding at those dates but which reduce available borrowings under the revolving credit facility.

Senior Notes issued January 2012

On January 26, 2012, Fresenius Medical Care us Finance II, Inc. (us Finance II), a wholly-owned subsidiary of the Company, issued \$800,000 aggregate principal amount of senior unsecured notes with a coupon of 5 5/8% (the 5 5/8% Senior Notes) at par and \$700,000 aggregate principal amount of senior unsecured notes with a coupon of 5 7/8% (the 5 7/8% Senior Notes) at par (together, the Dollar-denominated Senior Notes). In addition, FMC Finance VIII S.A. (Finance VIII), a wholly-owned subsidiary of the Company, issued €250,000 aggregate principal amount (\$328,625 at date of issuance) of senior unsecured notes with a coupon of 5.25% (the Euro-denominated Senior Notes) at par. Both the 5 5/8% Senior Notes and the Euro-denominated

2nd Quarter 2012
Consolidated Financial Statements

Senior Notes are due July 31, 2019 while the 5 7/8% Senior Notes are due January 31, 2022. US Finance II and Finance VIII may redeem the Dollar-denominated Senior Notes and Euro-denominated Senior Notes, respectively, at any time at 100% of principal plus accrued interest and a premium calculated pursuant to the terms of the applicable indenture. The holders of the Dollar-denominated Senior Notes and the Euro-denominated Senior Notes have a right to request that the respective issuers of the notes repurchase the applicable issue of notes at 101% of principal plus accrued interest upon the occurrence of a change of control of the Company followed by a decline in the rating of the respective notes. The Company used the net proceeds of approximately \$1,807,139 for acquisitions, including the acquisition of Liberty Dialysis Holdings, Inc., which closed on February 28, 2012, to refinance indebtedness and for general corporate purposes. The Dollar-denominated Senior Notes and the Euro-denominated Senior Notes are guaranteed on a senior basis jointly and severally by the Company, Fresenius Medical Care Holdings, Inc. (FMCH) and Fresenius Medical Care Deutschland GmbH (D-GmbH) (together, the Guarantor Subsidiaries).

8. Earnings per share

The following table contains reconciliations of the numerators and denominators of the basic and diluted earnings per share computations for the three- and six-month periods ended June 30, 2012 and 2011:

RECONCILIATION OF BASIC AND DILUTED EARNINGS PER SHARE

2nd Quarter 2012
Consolidated Financial Statements

9. Employee benefit plans

The Company currently has two principal pension plans, one for German employees, the other covering employees in the United States, the latter of which was curtailed in 2002. Plan benefits are generally based on years of service and final salary. As there is no legal requirement in Germany to fund defined benefit plans, the Company's pension obligations in Germany are unfunded. Each year FMCH, a wholly-owned subsidiary of the Company and its principal North American subsidiary, contributes to the plan covering United States employees at least the minimum required by the Employee Retirement Income Security Act of 1974, as amended.

The following table provides the calculations of net periodic benefit cost for the three- and six-month periods ended June 30, 2012 and 2011.

EMPLOYEE BENEFIT PLANS				
<i>Table 29</i>				
<i>in \$ THOUS</i>	<i>Three months ended June 30,</i>		<i>Six months ended June 30,</i>	
	2012	2011	2012	2011
Components of net periodic benefit cost				
Service cost	2,645	2,735	5,337	5,357
Interest cost	6,446	6,139	12,938	12,175
Expected return on plan assets	(3,825)	(4,275)	(7,650)	(8,550)
Amortization of unrealized losses	4,370	1,801	8,743	3,601
► NET PERIODIC BENEFIT COSTS	9,636	6,400	19,368	12,583

10. Noncontrolling interests subject to put provisions

The Company has potential obligations to purchase the noncontrolling interests held by third parties in certain of its consolidated subsidiaries. These obligations are in the form of put provisions and are exercisable at the third-party owners' discretion within specified periods as outlined in each specific put provision. If these put provisions were exercised, the Company would be required to purchase all or part of third-party owners' noncontrolling interests at the appraised fair value at the time of exercise. The methodology the Company uses to estimate the fair values of the noncontrolling interest subject to put provisions assumes the greater of net book value or a multiple of earnings, based on historical earnings, development stage of the underlying business and other factors. The estimated fair values of the noncontrolling interests subject to these put provisions can also fluctuate and the implicit multiple of earnings at which these noncontrolling interest obligations may ultimately be settled could vary significantly from our current estimates depending upon market conditions.

As of June 30, 2012 and December 31, 2011 the Company's potential obligations under these put options are \$540,980 and \$410,491, respectively, of which, at June 30, 2012, \$149,815 were exercisable. One put option was exercised for a total consideration of \$3,087 during the first six months of 2012.

2nd Quarter 2012
Consolidated Financial Statements

Following is a roll forward of noncontrolling interests subject to put provisions for the six months ended June 30, 2012 and the year ended December 31, 2011:

NONCONTROLLING INTERESTS SUBJECT TO PUT PROVISIONS		
<i>in \$ THOUS</i>	<i>Table 30</i>	
	2012	2011
Beginning balance as of January 1, 2012 and 2011	410,491	279,709
Contributions to noncontrolling interests	(25,880)	(43,104)
Purchase/sale of noncontrolling interests	85,113	37,786
Contributions from noncontrolling interests	3,809	7,222
Changes in fair value of noncontrolling interests	40,173	86,233
Net income	27,449	42,857
Other comprehensive income (loss)	(175)	(212)
► ENDING BALANCE AS OF JUNE 30, 2012 AND DECEMBER 31, 2011	540,980	410,491

11. Commitments and contingencies

Legal Proceedings

The Company is routinely involved in numerous claims, lawsuits, regulatory and tax audits, investigations and other legal matters arising, for the most part, in the ordinary course of its business of providing health-care services and products. Legal matters that the Company currently deems to be material are described below. For the matters described below in which the Company believes a loss is both reasonably possible and estimable, an estimate of the loss or range of loss exposure is provided. For the other matters described below, the Company believes that the loss probability is remote and/or the loss or range of possible losses cannot be reasonably estimated at this time. The outcome of litigation and other legal matters is always difficult to predict accurately and outcomes that are not consistent with the Company's view of the merits can occur. The Company believes that it has valid defenses to the legal matters pending against it and is defending itself vigorously. Nevertheless, it is possible that the resolution of one or more of the legal matters currently pending or threatened could have a material adverse effect on its business, results of operations and financial condition.

Commercial litigation

The Company was originally formed as a result of a series of transactions it completed pursuant to the Agreement and Plan of Reorganization dated as of February 4, 1996, by and between W.R. Grace & Co. and Fresenius SE (the Merger). At the time of the Merger, a W.R. Grace & Co. subsidiary known as W.R. Grace & Co.-Conn. had, and continues to have, significant liabilities arising out of product-liability related litigation (including asbestos-related actions), pre-Merger tax claims and other claims unrelated to National Medical Care, Inc. (NMC), which was W.R. Grace & Co.'s dialysis business prior to the Merger. In connection with the Merger, W.R. Grace & Co.-Conn. agreed to indemnify the Company, FMCH, and NMC against all liabilities of W.R. Grace & Co., whether relating to events occurring before or after the Merger, other than liabilities arising from or relating to NMC's operations. W.R. Grace & Co. and certain of its subsidiaries filed for reorganization under Chapter 11 of the U.S. Bankruptcy Code (the Grace Chapter 11 Proceedings) on April 2, 2001.

Prior to and after the commencement of the Grace Chapter 11 Proceedings, class action complaints were filed against W.R. Grace & Co. and FMCH by plaintiffs claiming to be creditors of W.R. Grace & Co.-Conn., and by the asbestos creditors' committees on behalf of the W.R. Grace & Co. bankruptcy estate in the Grace Chapter 11 Proceedings, alleging among other things, that the Merger was a fraudulent conveyance, violated the uniform fraudulent transfer act and constituted a conspiracy. All such cases have been stayed and transferred to or are pending before the U.S. District Court as part of the Grace Chapter 11 Proceedings.

*2nd Quarter 2012
Consolidated Financial Statements*

In 2003, the Company reached agreement with the asbestos creditors' committees on behalf of the w.R. Grace & Co. bankruptcy estate and w.R. Grace & Co. in the matters pending in the Grace Chapter 11 Proceedings for the settlement of all fraudulent conveyance and tax claims against it and other claims related to the Company that arise out of the bankruptcy of w.R. Grace & Co. Under the terms of the settlement agreement as amended (the Settlement Agreement), fraudulent conveyance and other claims raised on behalf of asbestos claimants will be dismissed with prejudice and the Company will receive protection against existing and potential future w.R. Grace & Co. related claims, including fraudulent conveyance and asbestos claims, and indemnification against income tax claims related to the non-NMC members of the w.R. Grace & Co. consolidated tax group upon confirmation of a w.R. Grace & Co. bankruptcy reorganization plan that contains such provisions. Under the Settlement Agreement, the Company will pay a total of \$115,000 without interest to the w.R. Grace & Co. bankruptcy estate, or as otherwise directed by the Court, upon plan confirmation. No admission of liability has been or will be made. The Settlement Agreement has been approved by the u.s. District Court. In January and February 2011, the u.s. Bankruptcy Court entered orders confirming the plan of reorganization and the confirmation orders were affirmed by the u.s. District Court on January 31, 2012. Multiple parties have appealed to the Third Circuit Court of Appeals and the plan of reorganization will not be implemented until the appeals are finally resolved.

Subsequent to the Merger, w.R. Grace & Co. was involved in a multi-step transaction involving Sealed Air Corporation (Sealed Air, formerly known as Grace Holding, Inc.). The Company is engaged in litigation with Sealed Air to confirm its entitlement to indemnification from Sealed Air for all losses and expenses incurred by the Company relating to pre-Merger tax liabilities and Merger-related claims. Under the Settlement Agreement, upon final confirmation of a plan of reorganization that satisfies the conditions of the Company's payment obligation, this litigation will be dismissed with prejudice.

On April 4, 2003, FMCH filed a suit in the u.s. District Court for the Northern District of California, styled Fresenius USA, Inc., et al., v. Baxter International Inc., et al., Case No. C 03-1431, seeking a declaratory judgment that FMCH does not infringe patents held by Baxter International Inc. and its subsidiaries and affiliates (Baxter), that the patents are invalid, and that Baxter is without right or authority to threaten or maintain suit against FMCH for alleged infringement of Baxter's patents. In general, the asserted patents concern the use of touch screen interfaces for hemodialysis machines. Baxter filed counterclaims against FMCH seeking more than \$140,000 in monetary damages and injunctive relief, and alleging that FMCH willfully infringed on Baxter's patents. On July 17, 2006, the court entered judgment on a jury verdict in favor of FMCH finding all asserted claims of Baxter patents invalid as obvious and/or anticipated in light of prior art.

On February 13, 2007, the court granted Baxter's motion to set aside the jury's verdict in favor of FMCH and reinstated the patents and entered judgment of infringement. Following a trial on damages, the court entered judgment on November 6, 2007 in favor of Baxter on a jury award of \$14,300. On April 4, 2008, the court denied Baxter's motion for a new trial, established a royalty payable to Baxter of 10% of the sales price for continuing sales of FMCH's 2008K hemodialysis machines and 7% of the sales price of related disposables, parts and service beginning November 7, 2007, and enjoined sales of the touchscreen-equipped 2008K machine effective January 1, 2009. The Company appealed the court's rulings to the United States Court of Appeals for the Federal Circuit (Federal Circuit). In October 2008, the Company completed design modifications to the 2008K machine that eliminate any incremental hemodialysis machine royalty payment exposure under the District Court order. On September 10, 2009, the Federal Circuit reversed the district court's decision and determined that the asserted claims in two of the three patents at issue are invalid. As to the third patent, the Federal Circuit affirmed the district court's decision; however, the Court also vacated the injunction and award of damages. These issues were remanded to the District Court for reconsideration in light of the invalidity ruling on most of the claims. As a result, FMCH is no longer required to fund the court-approved escrow account set up to hold the royalty payments ordered by the district court. Funds of \$70,000 were contributed to the escrow fund. Upon remand, the district court reduced the post verdict damages award to \$10,000 and \$61,000 of the escrowed funds was returned to FMCH. In the parallel reexamination of the last surviving patent, the u.s. Patent and Trademark Office and the Board of Patent Appeals and Interferences ruled that the remaining Baxter patent is invalid. On May 17, 2012 the Federal Circuit affirmed the u.s.

*2nd Quarter 2012
Consolidated Financial Statements*

Patent and Trademark Office's ruling and invalidated the final remaining Baxter patent. Baxter has requested a rehearing by the Federal Circuit.

Other litigation and potential exposures

Renal Care Group, Inc. (RCG), which the Company acquired in 2006, is named as a nominal defendant in a complaint originally filed September 13, 2006 in the Chancery Court for the State of Tennessee Twentieth Judicial District at Nashville styled *Indiana State District Council of Laborers and Hod Carriers Pension Fund v. Gary Brukart et al.* Following the trial court's dismissal of the complaint, plaintiff's appeal in part, and reversal in part by the appellate court, the cause of action purports to be a class action on behalf of former shareholders of RCG and seeks monetary damages only against the individual former directors of RCG. The individual defendants, however, may have claims for indemnification and reimbursement of expenses against the Company.

On July 17, 2007, resulting from an investigation begun in 2005, the United States Attorney filed a civil complaint in the United States District Court for the Eastern District of Missouri (St. Louis) against Renal Care Group, Inc., its subsidiary RCG Supply Company, and FMCH in its capacity as RCG's current corporate parent. The complaint seeks monetary damages and penalties with respect to issues arising out of the operation of RCG's Method II supply company through 2005, prior to FMCH's acquisition of RCG in 2006. The complaint is styled *United States of America ex rel. Julie Williams et al. vs. Renal Care Group, Renal Care Group Supply Company and FMCH*. On August 11, 2009, the Missouri District Court granted RCG's motion to transfer venue to the United States District Court for the Middle District of Tennessee (Nashville). On March 22, 2010, the Tennessee District Court entered judgment against defendants for approximately \$23,000 in damages and interest under the unjust enrichment count of the complaint but denied all relief under the six False Claims Act counts of the complaint. On June 17, 2011, the District Court entered summary judgment against RCG for \$82,643 on one of the False Claims Act counts of the complaint. On June 23, 2011, the Company appealed to the United States Court of Appeals for the Sixth Circuit. Although the Company cannot provide any assurance of the outcome, the Company believes that RCG's operation of its Method II supply company was in compliance with applicable law, that no relief is due to the United States, that the decisions made by the District Court on March 22, 2010 and June 17, 2011 will be reversed, and that its position in the litigation will ultimately be sustained.

On November 27, 2007, the United States District Court for the Western District of Texas (El Paso) unsealed and permitted service of two complaints previously filed under seal by a *qui tam* relator, a former FMCH local clinic employee. The first complaint alleged that a nephrologist unlawfully employed in his practice an assistant to perform patient care tasks that the assistant was not licensed to perform and that Medicare billings by the nephrologist and FMCH therefore violated the False Claims Act. The second complaint alleged that FMCH unlawfully retaliated against the relator by constructively discharging her from employment. The United States Attorney for the Western District of Texas declined to intervene and to prosecute on behalf of the United States. On March 30, 2010, the District Court issued final judgment in favor of the defendants on all counts based on a jury verdict rendered on February 25, 2010 and on rulings of law made by the Court during the trial. The plaintiff appealed from the District Court judgment. On July 30, 2012, the Court of Appeals affirmed the District Court's judgment in the Company's favor.

On February 15, 2011, a *qui tam* relator's complaint under the False Claims Act against FMCH was unsealed by order of the United States District Court for the District of Massachusetts and served by the relator. The United States has not intervened in the case *United States ex rel. Chris Drennen v. Fresenius Medical Care Holdings, Inc.*, 2009 Civ. 10179 (D. Mass.). The relator's complaint, which was first filed under seal in February 2009, alleges that the Company seeks and receives reimbursement from government payors for serum ferritin and hepatitis B laboratory tests that are medically unnecessary or not properly ordered by a physician. FMCH has filed a motion to dismiss the complaint. On March 6, 2011, the United States Attorney for the District of Massachusetts issued a Civil Investigative Demand seeking the production of documents related to the same laboratory tests that are the subject of the relator's complaint. FMCH has cooperated fully in responding to the additional Civil Investigative Demand, and will vigorously contest the relator's complaint.

*2nd Quarter 2012
Consolidated Financial Statements*

On June 29, 2011, FMCH received a subpoena from the United States Attorney for the Eastern District of New York (E.D.N.Y.). On December 6, 2011, a single company facility in New York received a subpoena from the OIG that was substantially similar to the one issued by the U.S. Attorney for the E.D.N.Y. These subpoenas are part of a criminal and civil investigation into relationships between retail pharmacies and outpatient dialysis facilities in the State of New York and into the reimbursement under government payor programs in New York for medications provided to patients with ESRD. Among the issues encompassed by the investigation is whether retail pharmacies may have provided or received compensation from the New York Medicaid program for pharmaceutical products that should be provided by the dialysis facilities in exchange for the New York Medicaid payment to the dialysis facilities. The Company has cooperated in the investigation.

The Company has received communications alleging certain conduct that may violate the U.S. Foreign Corrupt Practices Act (FCPA) and other anti-bribery laws. In response to the allegations, the Audit and Corporate Governance Committee of the Company's Supervisory Board is conducting an internal review with the assistance of counsel retained for such purpose. The Company has voluntarily advised the U.S. Securities and Exchange Commission and the U.S. Department of Justice that allegations have been made and of the Company's internal review. The Company is fully committed to FCPA compliance. It cannot predict the outcome of its review.

The Company filed claims for refunds contesting the Internal Revenue Service's (IRS) disallowance of FMCH's civil settlement payment deductions taken by FMCH in prior year tax returns. As a result of a settlement agreement with the IRS, the Company received a partial refund in September 2008 of \$37,000, inclusive of interest and preserved our right to pursue claims in the United States Courts for refunds of all other disallowed deductions. On December 22, 2008, the Company filed a complaint for complete refund in the United States District Court for the District of Massachusetts, styled as Fresenius Medical Care Holdings, Inc. v. United States. The court has denied motions for summary judgment by both parties and the litigation is proceeding towards trial scheduled to begin August 6, 2012.

From time to time, the Company is a party to or may be threatened with other litigation or arbitration, claims or assessments arising in the ordinary course of its business. Management regularly analyzes current information including, as applicable, the Company's defenses and insurance coverage and, as necessary, provides accruals for probable liabilities for the eventual disposition of these matters.

The Company, like other healthcare providers, conducts its operations under intense government regulation and scrutiny. It must comply with regulations which relate to or govern the safety and efficacy of medical products and supplies, the operation of manufacturing facilities, laboratories and dialysis clinics, and environmental and occupational health and safety. The Company must also comply with the laws of the United States, including the federal Anti-Kickback Statute, the federal False Claims Act, the federal Stark Law, and other federal and state fraud and abuse laws. Applicable laws or regulations may be amended, or enforcement agencies or courts may make interpretations that differ from the Company's interpretations or the manner in which it conducts its business. Enforcement has become a high priority for the federal government and some states. In addition, the provisions of the False Claims Act authorizing payment of a portion of any recovery to the party bringing the suit encourage private plaintiffs to commence "qui tam" or "whistle blower" actions. In May 2009, the scope of the False Claims Act was expanded and additional protections for whistle blowers and procedural provisions to aid whistle blowers' ability to proceed in a False Claims Act case were added. By virtue of this regulatory environment, the Company's business activities and practices are subject to extensive review by regulatory authorities and private parties, and continuing audits, investigative demands, subpoenas, other inquiries, claims and litigation relating to the Company's compliance with applicable laws and regulations. The Company may not always be aware that an inquiry or action has begun, particularly in the case of "whistle blower" actions, which are initially filed under court seal.

The Company operates many facilities throughout the United States and other parts of the world. In such a decentralized system, it is often difficult to maintain the desired level of oversight and control over the thousands of individuals employed by many affiliated companies. The Company relies upon its management

*2nd Quarter 2012
Consolidated Financial Statements*

structure, regulatory and legal resources, and the effective operation of its compliance program to direct, manage and monitor the activities of these employees. On occasion, the Company may identify instances where employees or other agents deliberately, recklessly or inadvertently contravene the Company's policies or violate applicable law. The actions of such persons may subject the Company and its subsidiaries to liability under the Anti-Kickback Statute, the Stark Law, the False Claims Act and the Foreign Corrupt Practices Act, among other laws and comparable laws of other countries.

Physicians, hospitals and other participants in the healthcare industry are also subject to a large number of lawsuits alleging professional negligence, malpractice, product liability, worker's compensation or related claims, many of which involve large claims and significant defense costs. The Company has been and is currently subject to these suits due to the nature of its business and expects that those types of lawsuits may continue. Although the Company maintains insurance at a level which it believes to be prudent, it cannot assure that the coverage limits will be adequate or that insurance will cover all asserted claims. A successful claim against the Company or any of its subsidiaries in excess of insurance coverage could have a material adverse effect upon it and the results of its operations. Any claims, regardless of their merit or eventual outcome, could have a material adverse effect on the Company's reputation and business.

The Company has also had claims asserted against it and has had lawsuits filed against it relating to alleged patent infringements or businesses that it has acquired or divested. These claims and suits relate both to operation of the businesses and to the acquisition and divestiture transactions. The Company has, when appropriate, asserted its own claims, and claims for indemnification. A successful claim against the Company or any of its subsidiaries could have a material adverse effect upon its business, financial condition, and the results of its operations. Any claims, regardless of their merit or eventual outcome, could have a material adverse effect on the Company's reputation and business.

Accrued special charge for legal matters

At December 31, 2001, the Company recorded a pre-tax special charge of \$258,159 to reflect anticipated expenses associated with the defense and resolution of pre-Merger tax claims, Merger-related claims, and commercial insurer claims. The costs associated with the Settlement Agreement and settlements with insurers have been charged against this accrual. With the exception of the proposed \$115,000 payment under the Settlement Agreement in the Grace Chapter 11 Proceedings, all other matters included in the special charge have been resolved. While the Company believes that its remaining accrual reasonably estimates its currently anticipated costs related to the continued defense and resolution of this matter, no assurances can be given that its actual costs incurred will not exceed the amount of this accrual.

12. Financial instruments

As a global supplier of dialysis services and products in more than 120 countries throughout the world, the Company is faced with a concentration of credit risks due to the nature of the reimbursement systems which are often provided by the governments of the countries in which the Company operates. Changes in reimbursement rates or the scope of coverage could have a material adverse effect on the Company's business, financial condition and results of operations and thus on its capacity to generate cash flow. In the past the Company experienced and, after the implementation of the bundled reimbursement system in the U.S., also expects in the future generally stable reimbursements for dialysis services. This includes the balancing of unfavorable reimbursement changes in certain countries with favorable changes in other countries. Due to the fact that a large portion of the Company's reimbursement is provided by public health care organizations and private insurers, the Company expects that most of its accounts receivables will be collectable, albeit somewhat more slowly in the International segment in the immediate future, particularly in countries which continue to be severely affected by the global financial crisis.

2nd Quarter 2012
Consolidated Financial Statements

Non-derivative financial instruments

The following table presents the carrying amounts and fair values of the Company's non-derivative financial instruments at June 30, 2012, and December 31, 2011.

NON-DERIVATIVES					
Table 31					
<i>in \$ THOUS</i>					
	Fair value hierarchy	June 30, 2012		December 31, 2011	
		Carrying amount	Fair value	Carrying amount	Fair value
Assets					
Cash and cash equivalents	1	677,378	677,378	457,292	457,292
Accounts receivable	2	3,139,335	3,139,335	2,909,326	2,909,326
Long-term notes receivable ¹	3	–	–	234,490	233,514
Liabilities					
Accounts payable	2	703,487	703,487	652,649	652,649
Short-term borrowings	2	102,980	102,980	98,801	98,801
Short-term borrowings from related parties	2	52,212	52,212	28,013	28,013
Long term debt, excluding Amended 2006 Senior Credit Agreement, Euro Notes and Senior Notes	2	1,052,530	1,052,530	1,147,209	1,147,209
Amended 2006 Senior Credit Agreement	2	2,668,137	2,655,855	2,795,589	2,774,951
Senior notes	2	4,663,343	4,852,192	2,883,009	2,989,307
Euro notes	2	244,718	249,956	258,780	265,655
Noncontrolling interests subject to put provisions	3	540,980	540,980	410,491	410,491

¹ As of February 28, 2012, the loan to Renal Advantage Partners LLC and Liberty Dialysis, Inc. has been retired.

The carrying amounts in the table are included in the consolidated balance sheet under the indicated captions or in the case of long-term debt, as noted in the captions — shown in Note 7.

The significant methods and assumptions used in estimating the fair values of non-derivative financial instruments are as follows:

Cash and cash equivalents are stated at nominal value which equals the fair value.

Short-term financial instruments such as accounts receivable, accounts payable and short-term borrowings are valued at their carrying amounts, which are reasonable estimates of the fair value due to the relatively short period to maturity of these instruments.

The valuation of long-term notes receivable is determined using significant unobservable inputs. They are valued using a constructed index based upon similar instruments with comparable credit ratings, terms, tenor, interest rates and that are within the Company's industry. The Company tracked the prices of the constructed index from the note issuance date to the reporting date to determine fair value.

*2nd Quarter 2012
Consolidated Financial Statements*

The fair values of major long-term financial liabilities are calculated on the basis of market information. Instruments for which market quotes are available are measured using these quotes. The fair values of the other long-term financial liabilities are calculated at the present value of the respective future cash flows. To determine these present values, the prevailing interest rates and credit spreads for the Company as of the balance sheet date are used.

The valuation of noncontrolling interests subject to put provisions is determined using significant unobservable inputs — *See Note 10* for a discussion of the Company's methodology for estimating the fair value of these noncontrolling interests subject to put obligations.

Currently, there is no indication that a decrease in the value of the Company's financing receivables is probable. Therefore, the allowances on credit losses of financing receivables are immaterial.

Derivative financial instruments

The Company is exposed to market risk from changes in foreign exchange rates and interest rates. In order to manage the risk of currency exchange rate and interest rate fluctuations, the Company enters into various hedging transactions by means of derivative instruments with highly rated financial institutions as authorized by the Company's General Partner. On a quarterly basis the Company performs an assessment of its counterparty credit risk. The Company currently considers this risk to be low. The Company's policy, which has been consistently followed, is that financial derivatives be used only for the purpose of hedging foreign currency and interest rate exposure.

In certain instances, the Company enters into derivative contracts that do not qualify for hedge accounting but are utilized for economic purposes (economic hedges). The Company does not use financial instruments for trading purposes.

The Company established guidelines for risk assessment procedures and controls for the use of financial instruments. They include a clear segregation of duties with regard to execution on one side and administration, accounting and controlling on the other.

Foreign exchange risk management

The Company conducts business on a global basis in various currencies, though a majority of its operations are in Germany and the United States. For financial reporting purposes, the Company has chosen the U.S. dollar as its reporting currency. Therefore, changes in the rate of exchange between the U.S. dollar and the local currencies in which the financial statements of the Company's international operations are maintained affect its results of operations and financial position as reported in its consolidated financial statements.

The Company's exposure to market risk for changes in foreign exchange rates relates to transactions such as sales and purchases. The Company has significant amounts of sales of products invoiced in euro from its European manufacturing facilities to its other international operations and, to a lesser extent, sales of products invoiced in other non-functional currencies. This exposes the subsidiaries to fluctuations in the rate of exchange between the euro and the currency in which their local operations are conducted. For the purpose of hedging existing and foreseeable foreign exchange transaction exposures the Company enters into foreign exchange forward contracts and, on a small scale, foreign exchange options. As of June 30, 2012 the Company had no foreign exchange options.

Changes in the fair value of the effective portion of foreign exchange forward contracts designated and qualifying as cash flow hedges of forecasted product purchases and sales are reported in accumulated other comprehensive income (loss) (AOCI). Additionally, in connection with intercompany loans in foreign currency, the Company uses foreign exchange swaps thus assuring that no foreign exchange risks arise from those loans, which, if they qualify for cash flow hedge accounting, are also reported in AOCI. These amounts recorded in AOCI are subsequently reclassified into earnings as a component of cost of revenues for those

*2nd Quarter 2012
Consolidated Financial Statements*

contracts that hedge product purchases or as an adjustment of interest income/expense for those contracts that hedge loans, in the same period in which the hedged transaction affects earnings. The notional amounts of foreign exchange contracts in place that are designated and qualify as cash flow hedges totaled \$644,837 and \$1,278,764 at June 30, 2012 and December 31, 2011, respectively.

The Company also enters into derivative contracts for forecasted product purchases and sales and for inter-company loans in foreign currency that do not qualify for hedge accounting but are utilized for economic hedges as defined above. In these cases, the change in value of the economic hedge is recorded in the income statement and usually offsets the change in value recorded in the income statement for the underlying asset or liability. The notional amounts of economic hedges that do not qualify for hedge accounting totaled \$1,300,655 and \$2,149,440 at June 30, 2012 and December 31, 2011, respectively.

Interest rate risk management

The Company enters into derivatives, particularly interest rate swaps and to a certain extent, interest rate options, to protect against the risk of rising interest rates. These interest rate derivatives are designated as cash flow hedges and have been entered into in order to effectively convert payments based on variable interest rates into payments at a fixed interest rate. The euro-denominated interest rate swaps expire in 2016 and have an interest rate of 1.73%. Interest payable and receivable under the swap agreements is accrued and recorded as an adjustment to interest expense.

As of June 30, 2012 and December 31, 2011, the notional amount of the euro-denominated interest rate swaps in place was €100,000 and €200,000 (\$125,900 and \$258,780 as of June 30, 2012 and December 31, 2011, respectively). As of June 30, 2012 the Company had no U.S. dollar-denominated interest rate swaps and at December 31, 2011 the notional amount was \$2,650,000.

2nd Quarter 2012
Consolidated Financial Statements

Derivative financial instruments valuation

The following table shows the carrying amounts of the Company's derivatives at June 30, 2012 and December 31, 2011.

DERIVATIVES				
<i>Table 32</i>				
<i>in \$ THOUS</i>				
	June 30, 2012		December 31, 2011	
	<i>Assets²</i>	<i>Liabilities²</i>	<i>Assets²</i>	<i>Liabilities²</i>
Derivatives in cash flow hedging relationships¹				
Current				
Foreign exchange contracts	2,739	(23,259)	4,117	(24,908)
Interest rate contracts	-	-	-	(130,579)
Non-current				
Foreign exchange contracts	141	-	742	(3,706)
Interest rate contracts	-	(3,989)	-	(1,076)
► TOTAL	2,880	(27,248)	4,859	(160,269)
Derivatives not designated as hedging instruments¹				
Current				
Foreign exchange contracts	15,184	(20,967)	56,760	(37,242)
Non-current				
Foreign exchange contracts	1,244	(1,307)	1,382	(1,459)
► TOTAL	16,428	(22,274)	58,142	(38,701)

¹ As of June 30, 2012 and December 31, 2011, the valuation of the Company's derivatives was determined using significant other observable inputs (level 2) in accordance with the fair value hierarchy levels established in U.S. GAAP.

² Derivative instruments are marked to market each reporting period resulting in carrying amounts being equal to fair values at the reporting date.

The carrying amounts for the current portion of derivatives indicated as assets in the table above are included in Prepaid expenses and other current assets in the Consolidated Balance Sheets while the current portion of those indicated as liabilities are included in Accrued expenses and other current liabilities. The non-current portions indicated as assets or liabilities are included in the Consolidated Balance Sheets in Other assets or Other liabilities, respectively.

The significant methods and assumptions used in estimating the fair values of derivative financial instruments are as follows:

The fair value of interest rate swaps is calculated by discounting the future cash flows on the basis of the market interest rates applicable for the remaining term of the contract as of the balance sheet date. To determine the fair value of foreign exchange forward contracts, the contracted forward rate is compared to the current forward rate for the remaining term of the contract as of the balance sheet date. The result is then discounted on the basis of the market interest rates prevailing at the balance sheet date for the applicable currency.

The Company includes its own credit risk for financial instruments deemed liabilities and counterparty-credit risks for financial instruments deemed assets when measuring the fair value of derivative financial instruments.

		2012	2011
Derivatives not designated as hedging instruments			
Foreign exchange contracts	Selling, general and administrative expense	(1,458)	(24,714)
Foreign exchange contracts	Interest income/expense	3,066	5,559
► TOTAL		1,608	(19,155)

For foreign exchange derivatives, the Company expects to recognize \$11,518 of losses deferred in accumulated other comprehensive income at June 30, 2012, in earnings during the next twelve months.

For foreign exchange hedges, the amount of ineffectiveness in the hedging relationship is reflected as a gain in earnings. This amount totaled \$226 at June 30, 2012. In the prior year, there was no ineffectiveness.

The Company expects to incur additional interest expense of \$18,734 over the next twelve months which is currently deferred in accumulated other comprehensive income. This amount reflects the projected amortization of the settlement amount of the terminated swaps and the current fair value of the additional interest payments resulting from the remaining interest rate swap maturing in 2016 at June 30, 2012.

As of June 30, 2012, the Company had foreign exchange derivatives with maturities of up to 41 months and interest rate swaps with maturities of up to 52 months.

*2nd Quarter 2012
Consolidated Financial Statements*

13. Business segment and corporate information

The Company has identified three business segments, North America, International, and Asia Pacific, which were determined based upon how the Company manages its businesses. All segments are primarily engaged in providing dialysis care services and the distribution of products and equipment for the treatment of ESRD. In the U.S., the Company is engaged in providing inpatient dialysis services and other services under contract to hospitals. The Company has aggregated the International and Asia Pacific operating segments as "International." The segments are aggregated due to their similar economic characteristics. These characteristics include the same services provided and products sold, the same type patient population, similar methods of distribution of products and services and similar economic environments.

Management evaluates each segment using a measure that reflects all of the segment's controllable revenues and expenses. Management believes that the most appropriate measure in this regard is operating income which measures the Company's source of earnings. Financing is a corporate function, which the Company's segments do not control. Therefore, the Company does not include interest expense relating to financing as a segment measure. Similarly, the Company does not allocate "corporate costs," which relate primarily to certain headquarters overhead charges, including accounting and finance, professional services, etc., because the Company believes that these costs are also not within the control of the individual segments. As of January 1, 2011, production of products, production asset management, quality management and procurement is centrally managed in Corporate by Global Manufacturing Operations. These corporate activities do not fulfill the definition of an operating segment. Products are transferred to the operating segments at cost, therefore no internal profit is generated. The associated internal revenues for the product transfers and their elimination are recorded as corporate activities. Capital expenditures for production are based on the expected demand of the operating segments and consolidated profitability considerations. In addition, certain revenues, investments and intangible assets, as well as any related expenses, are not allocated to a segment but are accounted for as "Corporate." The Company also regards income taxes to be outside the segment's control.

Information pertaining to the Company's business segments for the three- and six-month periods ended June 30, 2012 and 2011 is set forth below.
