¹ Before acquisitions and dividends

² Including FMC dividends

Fresenius Group: Temporary headwinds driven by geopolitical turmoil and the COVID-19 pandemic weighing on FY/22 earnings growth

Headwinds for net income development FY/22e
Reconciliation to new guidance

Material, supply chain and energy costs

- Meaningful increases across all segments

Missing growth

- Staff shortages limit growth e.g. onboarding opportunities for new patients in dialysis clinics

Labor costs

- Headwinds primarily at FMC in the U.S. patient-facing service business

Offset

- Including monies from the U.S. government's Provider Relief Fund
- Compensating measures include tight cost control and product price increases wherever possible

Expectations H2/2022

- Neither meaningful worsening of macro challenges nor major COVID-19 pandemic effects leading to lock-downs factored in

→ **Overall, we consider headwinds as temporary and not structural**

Assumptions for Guidance FY/22

Special items are excluded.

The acquisitions of Ivenix and of the majority stake in mAbxience as well as any further potential acquisitions are excluded from guidance.

Fresenius expects significantly more pronounced headwinds from supply chain disruptions and cost inflation, including energy prices. Furthermore, significant negative effects from ongoing labor shortages and associated wage inflation, especially at Fresenius Medical Care in the U.S. are expected.

COVID-19 will continue to impact Fresenius Group operations in 2022; an unlikely but possible significant deterioration of the situation triggering containment measures that could have a significant and direct impact on the health care sector without any appropriate compensation is not reflected in the Group's FY/22 guidance.

The war in Ukraine is directly and indirectly affecting Fresenius Group operations. Fresenius will continue to closely monitor the potential further consequences of the war, including balance sheet valuations. The guidance does not consider a significant disruption of gas or electricity supplies in Europe.

FMC's updated guidance assumptions also apply to FSE guidance.
