Financial debt	million EUR	6,681	6,018	6,681	6,018	663
Cash and cash equivalents	million EUR	453	657	453	657	-204

For computational reasons, rounding differences may occur in some of the tables and charts of this half-year financial report.

Note: Due to the first-time application of IFRS 16 "Leases" as of January 1, 2019, the figures regarding the group earnings, financial and net asset positions for the first half of 2019 are only comparable with the previous year to a limited extent. Unless stated otherwise, prior-year figures refer to the regulations for leasing agreements in accordance with IAS 17. Additionally, as a result of the change in presentation of the consolidated income statement, the previous year's values have been adjusted.

<sup>1</sup> Key operating figures and return figures refer to the respective reporting period. The comparison of the balance sheet key figures as well as the financial key figures relates to the balance sheet date 31 December 2018.

<sup>2</sup> Return on invested capital (ROIC) is calculated as the ratio between operating profit after tax (NOPAT) and invested capital (total assets excluding cash and cash equivalents less liabilities excluding financial liabilities and lease obligations). The ratio is calculated on an annualised basis and in US dollars.

## MAIN DEVELOPMENTS IN H1 2019

- Transport volume rises by 2.0% in the first 6 months of 2019 compared to the previous year
- Positive freight rate development: The freight rate stands at USD 1,071 / TEU, which is 5.0% higher than in the previous year (H1 2018: USD 1,020 / TEU)
- A clear increase in average bunker consumption prices<sup>1</sup> of USD 44 to USD 429 per tonne (H1 2018: USD 385 per tonne) leads to an increase in fuel expenses by 18.6%
- Transport expenses are up 5.9% compared with the previous year due to the clear rise in the bunker consumption price as well as capacity and price-related increases charter costs. On the other hand, the first-time application of IFRS 16 leads to a reduction in transport expenses
- Clearly positive EBITDA of EUR 956.2 million in the first 6 months of 2019 (H1 2018: EUR 427.2 million). This includes a positive effect from the first-time application of IFRS 16 in the amount of approximately EUR 217 million. EBITDA margin of 15.3% in H1 2019 (H1 2018: 7.9%)
- The first-time application of IFRS 16 increased depreciation and amortisation in the first 6 months of the year by 68.4% to EUR 566.8 million (H1 2018: EUR 336.6 million)
- Operating result (EBIT) of EUR 389.4 million (including IFRS 16 effect of around EUR 14 million) is also significantly higher than in the previous year (H1 2018: EUR 90.7 million)
- Group net result of EUR 146.3 million (including IFRS 16 effect of around EUR –19 million) is substantially higher than in the previous year (H1 2018: EUR –100.9 million)
- Strong operating cash flow of EUR 884.8 million (H1 2018: EUR 411.1 million), positively affected by the first-time application of IFRS 16 in the amount of approximately EUR 227 million.
- Liquidity reserve totals EUR 931.5 million as at 30 June 2019
- Early redemption of bond due in 2022 in the amount of 450 million EUR as part of deleveraging plan
- Balance sheet total increases to EUR 16,059.2 million compared with 31 December 2018, primarily as a result of the first-time application of IFRS 16
- Equity ratio decreases slightly to 39.4% (31 December 2018: 40.9%) due to IFRS 16

<sup>1</sup> Weighted average MFO&MDO

**Disclaimer:** This report contains statements relating to the future development of Hapag-Lloyd. Actual results may differ materially from those expected due to market fluctuations, the development of the competitive situation and world market prices for raw materials as well as changes in exchange rates and the economic environment. Hapag-Lloyd neither intends nor assumes any obligation to update any forward-looking statements to reflect events or developments after the date of this report.

For computational reasons, rounding differences may occur in some of the tables and charts of this report.

**This quarterly financial report was published on 7 August 2019.**

# INTERIM GROUP MANAGEMENT REPORT

## BUSINESS ACTIVITIES

The Hapag-Lloyd Group is Germany’s largest container liner shipping company and is one of the world’s leading container liner shipping companies in terms of global market coverage. The Group’s core business is the shipping of containers by sea, but also encompasses transport services from door to door.

The Hapag-Lloyd fleet comprises 237 container ships as at 30 June 2019 (30 June 2018: 226). The Group currently has 399 sales offices in 128 countries and offers its customers worldwide access to a network of 118 liner services. In the first 6 months of 2019, Hapag-Lloyd served approximately 24,000 customers around the world.

### Network of Hapag-Lloyd services

Since 1 April 2017, Hapag-Lloyd has been operating THE Alliance together with Kawasaki Kisen Kaisha Ltd. (Japan) (“K” Line), Mitsui O.S.K. Lines Ltd. (Japan) (MOL), Nippon Yusen Kabushiki Kaisha Ltd. (Japan) (NYK) and Yang Ming Marine Transport Corp. Ltd. (Taiwan) (Yang Ming). The Japanese alliance partners merged their container shipping activities on 1 April 2018 and have been operating as Ocean Network Express (ONE) since then.

As at 30 June 2019, THE Alliance covers all East–West trades with around 247 container ships.

Hapag-Lloyd conducts its container liner shipping business in an international business environment. Transactions are invoiced mainly in US dollars and payment procedures are handled in US dollars. This relates not only to operating business transactions, but also to investment activities and the corresponding financing of investments. The functional currency of Hapag-Lloyd AG and its main subsidiaries is the US dollar. The reporting currency of Hapag-Lloyd AG is, however, the euro. For reporting purposes, the assets and liabilities of the Hapag-Lloyd Group are translated into euros using the mean exchange rate on the balance sheet date (closing rate). The cash flows listed in the consolidated statement of cash flows and the expenses, income and result shown in the consolidated income statement are translated at the average exchange rate for the reporting period. The resulting differences are recognised in other comprehensive income.

#### **Changes to the composition of the Hapag-Lloyd AG Executive Board**

According to a resolution of the Supervisory Board of 17 December 2018, Dr. Maximilian Rothkopf was appointed as a new Executive Board member with effect from 1 May 2019. Dr. Rothkopf succeeds Management Board member Anthony J. Firmin, who retired on 30 June 2019, as COO of the Company.

#### **Shareholder structure of Hapag-Lloyd AG**

The shareholder structure of Hapag-Lloyd AG is dominated by its 5 major shareholders, which together hold around 92% of the Company's share capital. These are CSAV Germany Container Holding GmbH (CSAV), Hamburger Gesellschaft für Vermögens- und Beteiligungsmanagement mbH (HGV) and Kühne Maritime GmbH together with Kühne Holding AG (Kühne) and Qatar Holding LLC on behalf of the Qatar Investment Authority (QIA) and Public Investment Fund Saudi Arabia (PIF). CSAV, HGV and Kühne Maritime GmbH have also agreed under a shareholders' agreement to exercise their voting rights from the shares in Hapag-Lloyd AG by issuing a common voting proxy, thereby making important decisions together. During the second quarter of 2019, CSAV increased its share in Hapag-Lloyd to a total of 27.5% and Kühne increased its share to 26.2%. This reduced the percentage of shares in free float to less than 10%.

The shareholder structure of Hapag-Lloyd AG as at 30 June 2019 is as follows:

#### **Voting rights as at 30 June 2019**

Shares in %	
CSAV Germany Container Holding GmbH	27.5
Kühne Holding AG and Kühne Maritime GmbH	26.2
Qatar Holding Germany GmbH	14.5
HGV Hamburger Gesellschaft für Vermögens- und Beteiligungsmanagement mbH	13.9
The Public Investment Fund of the Kingdom of Saudi Arabia	10.2
Free float	7.7
<b>Total</b>	<b>100.0</b>

## CORPORATE OBJECTIVES AND STRATEGY

The prime strategic objective of the Hapag-Lloyd Group is to achieve long-term profitable growth measured on the basis of developments in the transport volume and the key performance indicators of EBITDA, EBIT and return on invested capital (ROIC).

The growing global demand for container transportation is the very foundation of the organic growth which Hapag-Lloyd hopes to achieve.

IHS Markit (May 2019) has forecast a rise in global container shipments of 3.8% to around 171 million TEU in 2019. Generally, Hapag-Lloyd intends to increase the transport volume organically in line with market growth.

The key internal performance indicators for the Company's operating activities are earnings before interest, taxes, depreciation and amortisation (EBITDA) and earnings before interest and taxes (EBIT). The performance of these key financial indicators is outlined in the section "Group earnings, financial and net asset position". EBITDA is an important indicator of the achievement of sustainable company results and gross cash flows. It has a special significance for capital-intensive companies. Hapag-Lloyd uses EBITDA as an important parameter for investment decisions.

The main factors influencing the development of the operating result indicators are transport volume, freight rate, the US dollar exchange rate against the euro and operating costs including bunker price.

The generation of sustainable cash flows, solid corporate financing, and therefore in particular a sufficient liquidity and equity base, are once again key cornerstones of the Hapag-Lloyd Group's corporate strategy in the 2019 financial year. As at 30 June 2019, the Hapag-Lloyd Group has a liquidity reserve (consisting of cash, cash equivalents and unused credit facilities) totalling EUR 931.5 million (31 December 2018: EUR 1,133.0 million).

### Strategy 2023

The Executive Board of Hapag-Lloyd AG first reported on the Group's new strategy ("Strategy 2023") at a capital market day in November 2018. Strategy 2023 is also described in detail on pages 62ff. of the Group management report in the 2018 annual report.

The 3 core objectives of Strategy 2023 are:

- Becoming number one for quality
- Remain a global player
- Profitability throughout the entire economic cycle

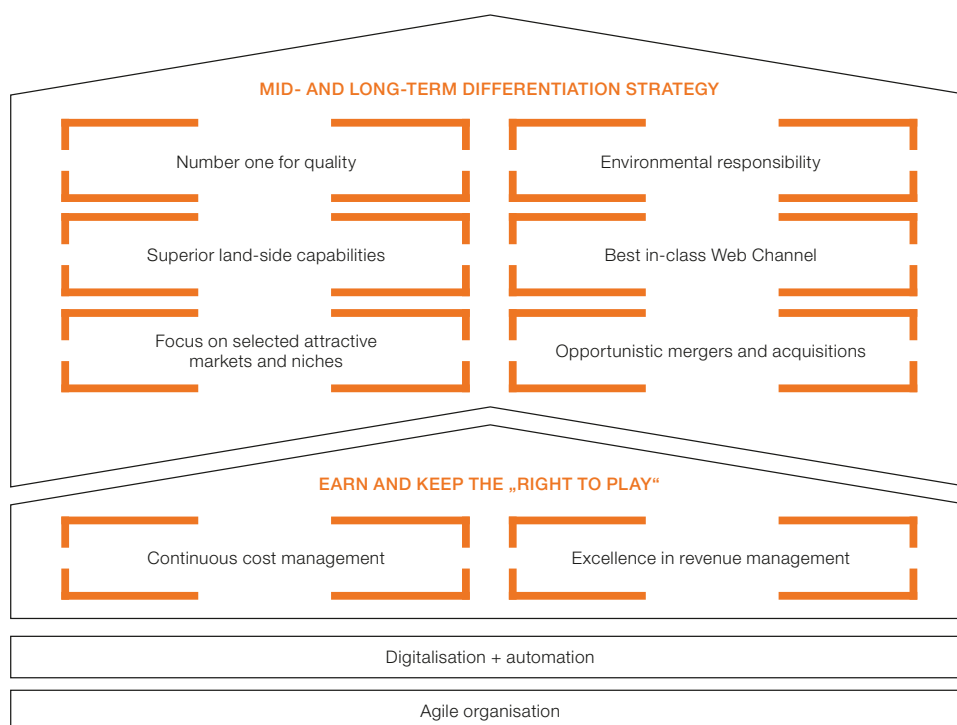

The focus of Strategy 2023 is on quality leadership and profitable growth based on continuous, consistent cost and revenue management. Internal processes will be improved through increased agility and the exploitation of technological opportunities such as digitalisation and automation.

Hapag-Lloyd has already launched a number of projects to ensure that its total cost structure is competitive. Thanks to improved cost structures, it is expected that an earnings contribution of between USD 350 and 400 million per year can be achieved by 2021. The Executive Board of Hapag-Lloyd AG has made a positive assessment of the cost savings achieved so far and is confident that a low triple-digit million euro figure can be achieved by the end of 2019.

In the area of revenue management, Hapag-Lloyd has identified the key places in which optimisations can be made and has launched initial measures. In addition, initial digitalisation measures such as the web channel with Quick Quotes have already been implemented.

The planning period for Strategy 2023 will run until the end of the year 2023. Although further implementation will take place in 2019, most of the measures and their effects on earnings will be seen in the subsequent years.

The most important elements of Strategy 2023 are presented in the following illustration. The focus here is on clearly differentiating the Company from its competitors.

The Hapag-Lloyd Group's key financial indicators will continue to be EBITDA and EBIT. Hapag-Lloyd is also aiming to be profitable throughout the entire economic cycle, i.e. to achieve a return on invested capital (ROIC) that is at least equal to the Company's weighted average cost of capital (WACC). The reduction of debt remains a priority, and the Company's target is to achieve a ratio of net debt to EBITDA of 3.0x or less by the end of 2023. Furthermore, Hapag-Lloyd is aiming for an equity ratio of over 45% and a liquidity reserve of around USD 1.1 billion.

In addition to the key financial indicators, the following new non-financial goals have been set:

Quality leadership is to be measured using a Net Promoter Score (NPS). In addition, the Company intends to improve reliability, i.e. punctuality, to clearly define its pledge on punctuality and to put in place the technical requirements for measuring and reporting on punctuality on a standardised basis.

Hapag-Lloyd aims to increase the percentage of door-to-door business to over 40% by 2023. This cargo type requires additional services which Hapag-Lloyd offers customers and which enable it to generate higher revenue and a higher margin.

Hapag-Lloyd is aiming for a global market share (worldwide, excluding Intra-Asia) of more than 10%. To achieve this goal, Hapag-Lloyd wants to increase its presence in attractive growth markets and in the area of special cargo as well as reefer cargo. Hapag-Lloyd already sees its strength in these areas today.

The success of Hapag-Lloyd's digitalisation strategy is to be measured by whether it increases the volume of cargo booked via the web channel to 15% of total volume by 2023.

As a company with a tradition of environmental awareness, it is a matter of course for Hapag-Lloyd that the Company complies with the stricter environmental requirements, such as IMO 2020, and that it implements the necessary technical and organisational changes with the greatest care and attention. In the context of the International Maritime Organization's (IMO) requirements from 2020 to reduce sulphur dioxide emissions, Hapag-Lloyd will install exhaust gas cleaning systems (EGCS) on 10 larger container ships and test the use of liquid gas (LNG) by converting one of its large vessels. All of this is in addition to its predominant use of low-sulphur fuel.

Strategy 2023, including the aforementioned targets and goals, will become even more concrete as the strategy is implemented and it will be flexibly adapted to the changing operating environment if necessary.

In the 2019 financial year the focus will be on:

- Strategy 2023
- Achieving further cost savings, which are expected to reach USD 350–400 million p.a. by 2021
- Further implementing measures to improve revenue quality
- Enhancing Hapag-Lloyd's partnership within THE Alliance
- Technical and organisational preparations for the IMO's new exhaust gas standards

## IMPORTANT FINANCIAL PERFORMANCE INDICATORS

Important financial performance indicators for the Hapag-Lloyd Group include EBITDA, EBIT, the transport volume and freight rates. Transport volume and freight rates are important factors influencing revenue development. The development of the financial performance indicators in the first 6 months of 2019 is presented in the section “Group earnings position”. Since the 2015 financial year, the return on invested capital (ROIC) has also been used as a performance indicator.

ROIC compares net operating profit after tax (NOPAT), defined as EBIT less income taxes, with invested capital as at the reporting date. Invested capital is defined as assets excluding cash and cash equivalents less liabilities excluding financial debt and lease obligations. To facilitate comparison with other international shipping companies, the return on invested capital is calculated and presented exclusively on the basis of the functional currency, the US dollar.

Calculation of the return on invested capital is as follows:

	million EUR		million USD	
	H1 2019	H1 2018	H1 2019	H1 2018
Non-current assets	13,691.5	12,729.5	15,585.3	14,818.4
Inventory	250.5	257.1	285.2	299.3
Accounts receivables	1,272.8	703.2	1,448.8	818.6
Other assets	391.6	755.6	445.8	879.7
<b>Assets</b>	<b>15,606.4</b>	<b>14,445.4</b>	<b>17,765.0</b>	<b>16,816.0</b>
Provisions	720.5	575.3	820.1	669.7
Accounts payable	1,768.8	1,766.7	2,013.4	2,056.6
Other liabilities	556.3	339.7	633.5	395.5
<b>Liabilities</b>	<b>3,045.6</b>	<b>2,681.7</b>	<b>3,467.0</b>	<b>3,121.8</b>
<b>Invested Capital</b>	<b>12,560.8</b>	<b>11,763.7</b>	<b>14,298.0</b>	<b>13,694.2</b>
EBIT	389.4	90.7	439.8	109.7
Taxes	17.3	16.9	19.5	20.6
<b>Net Operating Profit after Tax (NOPAT)</b>	<b>372.1</b>	<b>73.8</b>	<b>420.3</b>	<b>89.1</b>
<b>Return on Invested Capital (ROIC)</b>			<b>5.9%</b>	<b>1.3%</b>

ROIC in USD, rounded, aggregated and calculated on an annualised basis. As a result of the change in presentation of the consolidated income statement, the previous year's values have been adjusted.

## IMPORTANT NON-FINANCIAL PRINCIPLES

The optimum utilisation of the available ship and container capacities has a substantial influence on whether Hapag-Lloyd achieves long-term profitable growth. Sustainable and quality-conscious corporate governance and highly qualified and motivated employees are also important principles for Hapag-Lloyd's targeted profitable growth.

### Flexible fleet and capacity development

As at 30 June 2019, Hapag-Lloyd's fleet comprises a total of 237 container ships (31 December 2018: 227 vessels). All of the vessels are certified in accordance with the ISM (International Safety Management) Code and have a valid ISSC (ISPS) certificate.

The majority of the vessels are certified as per ISO 9001 (quality management) and ISO 14001 (environmental management). The TEU capacity of the entire Hapag-Lloyd fleet as at 30 June 2019 stands at 1,707,463 TEU, which is a moderate increase compared to 31 December 2018 (1,643,371 TEU). The share of vessels chartered by Hapag-Lloyd is approximately 39% as at 30 June 2019 based on TEU capacity (31 December 2018: approximately 36%).

As at 30 June 2019, the average age of Hapag-Lloyd's total fleet (capacity-weighted) is 8.4 years. The average ship size within the Hapag-Lloyd Group fleet is 7,204 TEU, which is approximately 19% above the comparable average figure for the 10 largest container liner shipping companies (30 June 2019: 6,033 TEU) and around 71% above the average ship size in the global fleet (30 June 2019: 4,219 TEU).

As at 30 June 2019, Hapag-Lloyd owns or rents 1,573,216 containers (31 December 2018: 1,554,423) with a capacity of 2,580,401 TEU for shipping cargo (31 December 2018: 2,559,316 TEU). The capacity-weighted share of leased containers is around 47% as at 30 June 2019 (31 December 2018: 48%). To facilitate further growth in the strategically important reefer segment, Hapag-Lloyd ordered 13,420 new reefer containers in June 2019. The containers are scheduled for delivery in November 2019. In connection with this, Hapag-Lloyd is also launching a programme to fit its entire fleet of reefer containers with the latest IOT monitoring technology. The resulting customer products will be marketed under the name Hapag-Lloyd LIVE and include a real-time GPS, information on the temperature inside the container and a notification system/alarm management system.

Hapag-Lloyd's service network comprises 118 services as at 30 June 2019 (31 December 2018: 119 services).

### Structure of Hapag-Lloyd's container ship fleet

	30.6.2019	31.12.2018	30.6.2018
Number of vessels	237	227	226
thereof			
Own vessels <sup>1</sup>	112	112	112
Chartered vessels	125	115	114
Aggregate capacity of vessels (TTEU)	1,707	1,643	1,608
Aggregate container capacity (TTEU)	2,580	2,559	2,487
Number of services	118	119	120

<sup>1</sup> Including 17 lease agreements with purchase option/obligation at maturity. Previous year's figures have been adjusted accordingly.

Bunker consumption totalled approximately 2.2 million tonnes in the first 6 months of 2019 and was therefore on a par with the previous year (H1 2018: approximately 2.2 million tonnes). Around 15% (H1 2018: approximately 12%) of this comprised bunkers with a low proportion of sulphur (MFO low sulphur [0.1%], MDO). The efficiency of the container ship fleet is also reflected in the bunker consumption data per slot (as measured by the average annual container storage space) of 2.6 tonnes (H1 2018: 2.8 tonnes). In terms of transported TEU, bunker consumption of 0.37 tonnes per TEU was the same as in the previous year (H1 2018: 0.37 tonnes per TEU).

Since the merger with UASC, Hapag-Lloyd has had a very young and efficient fleet. The existing fleet, additional chartered ships and cooperation with the partners in THE Alliance will make it possible to utilise the short-term expansion opportunities resulting from market growth and to realise economies of scale in ship operations. However, in order to remain competitive in the medium term, the Executive Board of Hapag-Lloyd AG believes that the Group will invest in new ship systems again at the appropriate time. In the context of the International Maritime Organization's (IMO) requirements to reduce sulphur dioxide emissions starting in 2020, Hapag-Lloyd will install exhaust gas cleaning systems (EGCS) on 10 larger container ships and test the use of liquid gas (LNG) by converting one of its large vessels.

### Customers

Long-term, close business relations with customers are also important in driving value for corporate development. A global key account team manages relationships with major customers. This enables the Company to establish and maintain sustainable customer relationships.

In the first 6 months of the 2019 financial year, Hapag-Lloyd completed transport contracts for approximately 24,000 customers (H1 2018: approximately 24,000).

### Employees

The Hapag-Lloyd Group employed 12,861 people as at 30 June 2019 (30 June 2018: 12,277). Of this total, 10,634 were shore-based employees (30 June 2018: 10,131), while 2,033 people were sea-based (30 June 2018: 1,948). Hapag-Lloyd also employed 194 apprentices as at 30 June 2019 (30 June 2018: 198).

## Number of employees

	30.6.2019	31.12.2018	30.6.2018
Marine personnel	2,033	1,970	1,948
Shore-based personnel	10,634	10,561	10,131
Apprentices	194	234	198
<b>Total</b>	<b>12,861</b>	<b>12,765</b>	<b>12,277</b>

## ECONOMIC REPORT

### General economic conditions

The experts at the International Monetary Fund (IMF) anticipate global economic growth of 3.2% and 3.5% in 2019 and 2020 respectively (IMF, World Economic Outlook Update, July 2019). The IMF has slightly lowered its growth prediction for both 2019 and 2020 by 0.1 percentage points compared to its forecast published in April 2019. The current forecast includes the increase in US tariffs on Chinese imports from 10% to 25% in May 2019 as well as the retaliatory actions by China. In addition, the uncertainties around Brexit as well as geopolitical tensions weigh on demand worldwide. The expected recovery in 2020 is based on the assumptions that the temporary growth weakness in the euro area will gradually turn around, that currently troubled emerging markets will gradually stabilise and that current trade conflicts will be solved over time.

Based on its current forecast, the IMF predicts that the volume of global trade, which is key to the demand for container shipping services, will grow by 2.5% in 2019 compared with the previous year. The institute has therefore cut its forecast from April 2019 again substantially by 0.9 percentage points. Growth of 3.7% is expected in 2020 (April forecast: 3.9%).

### Developments in global economic growth (GDP) and world trade volume

in %	2020e	2019e	2018	2017	2016	2015	2014
Global economic growth	3.5	3.2	3.6	3.8	3.4	3.4	3.6
Industrialised countries	1.7	1.9	2.2	2.4	1.7	2.3	2.1
Developing and newly-industrialised countries	4.7	4.1	4.5	4.8	4.6	4.3	4.7
World trade volume (goods and services)	3.7	2.5	3.7	5.5	2.2	2.8	3.9

Source: IMF, July 2019

### Sector-specific conditions

Based on current forecasts, the global cargo volume could rise to approximately 171 million TEU in 2019 (IHS Markit, May 2019). IHS Markit expects the global container shipping volume to increase by 3.8% in 2019, once again outpacing the forecast rate of growth for global trade. IHS has lowered its forecast by 0.9 percentage points compared to the last publication in January 2019. However, in its last publication, the Institute changed its forecasting methodology and thus also adjusted the previous year's figure. Comparability with previous publications is therefore only possible to a limited extent. For the period 2020 to 2024, IHS Markit is currently predicting an average annual growth of 3.2% in the global container shipping volume. As a result, container shipping will continue to be a growth industry.

According to IHS Markit, the anticipated growth will be spread relatively evenly across the individual trades. The strongest growth is currently expected in the Middle East and Indian subcontinent and in the Intra-Asia trade.

#### Development of world trade volume

	2020e	2019e	2018	2017	2016	2015	2014
million TEU	175	171	164	156	150	147	144
Growth rate in %	2.5	3.8	5.2	4.2	1.8	2.5	–

Source: IHS Markit (May 2019). The data for 2020 is currently being re-assessed internally by IHS Markit and it cannot be ruled out that these may change after the publication of this half-year financial report.

At the beginning of 2019, the aggregate capacity of the global container ship fleet was approximately 22 million TEU (Drewry Container Forecaster Q2 2019, June 2019). Based on the container ships on order and planned deliveries, the globally available transport capacity should see increases of around 0,7 million TEU in 2019 and around 0,8 million TEU in 2020 (Drewry Container Forecaster Q2 2019, June 2019). This includes the expected delays of deliveries in the current financial year and the expected scrapping. The tonnage of the commissioned container ships of approximately 2.4 million TEU (MDS Transmodal, July 2019) is equivalent to around 10% of the present global container fleet's capacity (approximately 23 million TEU as at July 2019). It therefore remains well below the highest level seen to date, which was around 61% in 2007, and the average over the last 5 years (around 16%).

In the period from January to June 2019, orders were placed for the construction of 34 container ships with a transport capacity totalling approximately 0.2 million TEU (FY 2018: capacity of approximately 1.2 million TEU [Clarksons Research, July 2019]).

#### Expected development of global container fleet capacity

million TEU	2020e	2019e	2018	2017
Existing fleet (beginning of the year)	22.7	22.0	20.8	20.1
Planned deliveries	1.4	1.1	1.5	1.5
Expected scrappings	0.4	0.2	0.1	0.4
Postponed deliveries and other changes	0.1	0.1	0.2	0.4
<b>Net capacity growth</b>	<b>0.8</b>	<b>0.7</b>	<b>1.2</b>	<b>0.7</b>

Source: Drewry Container Forecaster Q2 2019, June 2019. Expected nominal capacity based on planned deliveries. Based on existing orders and current predictions for scrapping and postponed deliveries. Figures rounded. Rounding differences may be the result of changes in the databases.

While net capacity growth is forecast at 0.7 million TEU (Drewry Container Forecaster Q2, June 2019), the global container shipping volume is expected to increase by 6.3 million TEU in 2019 (IHS Markit, May 2019).

The actual growth in the global container ship fleet's transport capacity is regularly lower than the projected nominal increase, as old and inefficient vessels are scrapped and deliveries of new-builds are postponed. Based on figures from MDS Transmodal, a total of 66 container ships with a transport capacity of approximately 0.5 million TEU were placed into service in the first 6 months of 2019 (H1 2018: 94 ships with a transport capacity of approximately 0.8 million TEU). At around 0.1 million TEU, the scrapping of inefficient vessels was significantly lower in 2018 than in previous years (2017: 0.4 million TEU; 2016: 0.7 million TEU). According to Drewry (Container Forecaster Q2, June 2019), however, the figure is expected to rise again slightly in 2019 to approximately 0.2 million TEU. At the start of the year, Drewry expected scrapping to increase to around 0.5 million TEU (Drewry Container Forecaster 4Q 2018). According to Clarksons, around 0.1 million TEU was scrapped in the first 6 months of 2019.

Idle capacity was around 0.4 million TEU at the end of June 2019 (Alphaliner Weekly, July 2019), accounting for approximately 1.6% of the global fleet. The majority of idle vessels have a capacity of up to 5,100 TEU.

### Consolidation of the industry and alliances

The following 3 alliances have existed since the start of the second quarter of 2017: the "2M Alliance" consists of the two market leaders – Maersk Line (Denmark) (Maersk) and Mediterranean Shipping Company S.A. (Switzerland) (MSC) – and started operating in early 2015. The "Ocean Alliance" consists of CMA CGM S.A. (France), including its subsidiary APL (Singapore), China COSCO Shipping (China) (COSCO), including Orient Overseas (International) Limited (Hong Kong) (OOIL), which was taken over by COSCO in July 2018, and Evergreen Marine Corp. Ltd. (Taiwan) (Evergreen). Hapag-Lloyd operates THE Alliance in partnership with Ocean Network Express (Singapore) (ONE) and Yang Ming Marine Transport Corp. Ltd. (Taiwan) (Yang Ming). ONE was created on 1 April 2018 from the merger of the 3 Japanese alliance partners Kawasaki Kisen Kaisha Ltd. (Japan) ("K" Line), Mitsui O.S.K. Lines Ltd. (Japan) (MOL) and Nippon Yusen Kabushiki Kaisha Ltd. (Japan) (NYK). On 19 June 2019 in Taipei, the members of THE Alliance agreed to establish a new partnership of four members, with a term ending in 2030. Subject to the necessary approval of the regulatory authorities, the South Korean liner shipping company Hyundai Merchant Marine (HMM) will become a new member of THE Alliance on 1 April 2020. HMM's order book currently comprises 12 large vessels which have a transport capacity of 23,000 TEU each and are scheduled for delivery in the second quarter of 2020. The 23,000 TEU newbuilds are to be used in Far East–Northern Europe trades and will further strengthen the service portfolio and competitiveness of THE Alliance. Furthermore, 8 15,000 TEU newbuilds will be added to the HMM fleet in the second quarter of 2021.

### Capacity share of alliances based on selected trades

in %	Far East trade	Transpacific trade	Atlantic trade
2M	39	20	46
Ocean Alliance	36	41	10
<b>THE Alliance</b>	<b>24</b>	<b>27</b>	<b>34</b>
Other	1	12	10

Source: Alphaliner, July 2019

There has been significant consolidation within the container shipping industry in recent years. As a result, the 10 biggest container liner shipping companies accounted for around 84% of the total capacity of the global container ship fleet as at 30 June 2019, up from around 61% in 2013 (MDS Transmodal, July 2019 and Drewry Container Forecaster, 2Q19). This consolidation was driven by Hapag-Lloyd's mergers with the container shipping activities of Compañía Sud Americana de Vapores (CSAV) in 2014 and United Arab Shipping Company Ltd. (UASC) in 2017, the merger between China COSCO Shipping (COSCO) and China Shipping Container Lines Company Limited (CSCL) in 2016, the acquisition of Hamburg Südamerikanische Dampfschiffahrts-Gesellschaft ApS & Co (Hamburg Süd) by Maersk Line A/S (Maersk) (2017), the joint venture involving the container liner activities of the 3 Japanese shipping companies Kawasaki Kisen Kaisha Ltd. ("K" Line), Mitsui O.S.K. Lines Ltd. (MOL) and Nippon Yusen Kabushiki Kaisha Ltd. (NYK) to form Ocean Network Express (ONE) in 2018, the acquisition of Orient Overseas (International) Limited (OOIL) by China COSCO Shipping (COSCO) in 2018 and the insolvency of Hanjin Shipping Co. Ltd. (Hanjin) in 2016, which was the world's eighth-largest container liner shipping company at the time.

## GROUP EARNINGS, FINANCIAL AND NET ASSET POSITION

Due to the first-time application of IFRS 16 "Leases" as at 1 January 2019, the presentation of the group earnings, financial and net asset positions is only comparable with that of the corresponding prior year period to a limited degree. Unless stated otherwise, the figures for the first half of 2018 refer to the regulations for leases pursuant to IAS 17.

To increase transparency and standardise the externally communicated structure of the income statement in line with the management perspective, Hapag-Lloyd changed the presentation of the consolidated income statement since 1 January 2019. As a result, the previous period's values have been adjusted in line with the new presentation. The change in presentation has led to modifications within the income statement compared to the values reported in the half-year financial report as at 30 June 2018.

### Group earnings position

Against the backdrop of unwavering intense competition the earnings performance in the first half of the 2019 financial year was clearly positive and within the Executive Board's expectations. On the contrary the growth of the transport volume amounting to 2,0% was slightly below the expectation at the beginning of the year. Compared to the first half of 2018, the development of the average freight rate, the increase in the transport volume and a strengthening of the US dollar against the euro had a positive effect on the earnings position. At USD 1.13/EUR, the average US dollar/euro exchange rate was stronger than in the prior year period (USD 1.21 /EUR). By contrast, increased bunker costs as well as the rise in charter costs reduced the half-yearly earnings in 2019. Hapag-Lloyd generated an operating result before interest and taxes (EBIT) of EUR 389.4 million in the first half of 2019 (prior year period: EUR 90.7 million) and a group result of EUR 146.3 million (prior year period: EUR -100.9 million).

**Consolidated income statement<sup>1</sup>**

million EUR	Q2 2019	Q2 2018	H1 2019	H1 2018

<b>Group profit/loss</b>	<b>50.0</b>	<b>-66.6</b>	<b>146.3</b>	<b>-100.9</b>
thereof profit/loss attributable to shareholders of Hapag-Lloyd AG	46.2	-70.4	137.9	-108.0
thereof profit/loss attributable to non-controlling interests	3.8	3.8	8.4	7.1
Basic/diluted earnings per share (in EUR)	0.26	-0.40	0.78	-0.61
<b>EBITDA</b>	<b>466.9</b>	<b>210.8</b>	<b>956.2</b>	<b>427.2</b>
<b>EBITDA margin (%)</b>	<b>14.7</b>	<b>7.5</b>	<b>15.3</b>	<b>7.9</b>
<b>EBIT</b>	<b>175.7</b>	<b>40.0</b>	<b>389.4</b>	<b>90.7</b>
<b>EBIT margin (%)</b>	<b>5.5</b>	<b>1.4</b>	<b>6.2</b>	<b>1.7</b>

<sup>1</sup> Due to the change in presentation of the consolidated income statement, the previous year's values have been adjusted. As a result EBIT for the first half of 2018 rose by EUR 2.0 million, from EUR 88.7 million to EUR 90.7 million.

The average freight rate in the first half of 2019 was USD 1,071/TEU, which was USD 51/TEU up on the prior year period (USD 1,020/TEU). In an ongoing difficult market environment, freight rates were down slightly by USD 16/TEU in the second quarter of 2019 (USD 1,063/TEU) compared with the first quarter of 2019 (USD 1,079/TEU).

Compared with the first half of 2018, increased freight rates particularly on the Atlantic, Transpacific, Far East, Intra-Asia, Latin America and EMAO trades, had a positive effect on the average freight rate in the reporting period and therefore on earnings. However, the freight rate decrease on the Middle East trade had the opposite effect.

**Freight rates per trade<sup>1</sup>**

USD/TEU	Q2 2019	Q2 2018	H1 2019	H1 2018
Atlantic	1,361	1,303	1,356	1,298
Transpacific	1,289	1,209	1,312	1,229
Far East	858	872	895	884
Middle East	753	773	755	780
Intra Asia	548	502	538	512
Latin America	1,144	1,090	1,162	1,110
EMAO (Europe – Mediterranean – Africa – Oceania)	1,101	1,031	1,100	1,036
<b>Total (weighted average)</b>	<b>1,063</b>	<b>1,010</b>	<b>1,071</b>	<b>1,020</b>

<sup>1</sup> Due to an organisational change, the transport volumes to/from Djibouti, Sudan and Eritrea have been assigned to the EMAO trade since 1 January 2019. The previous year's values have been adjusted accordingly.

With its balanced positioning on the relevant trades, Hapag-Lloyd was able to increase its transport volume by 118 TTEU to 5,966 TTEU (prior year period: 5,848 TTEU), representing a rise of 2.0% in the first half of 2019 compared to the first half of 2018. Therefore, the growth of the transport volume in the first half of 2019 was slightly lower than the expectation of the company at the beginning of the year.

Transport volume increases, particularly on the Atlantic, Far East, Latin America and EMAO trades, had a positive impact on the transport volume in the reporting period. However, transport volume decreases, particularly on the Middle East and Intra-Asia trades, had a negative effect on the transport volume.

**Transport volume per trade<sup>1</sup>**

TTEU	Q2 2019	Q2 2018	H1 2019	H1 2018
Atlantic	513	475	982	914
Transpacific	494	484	944	939
Far East	545	525	1,101	1,044

<b>Total</b>	<b>3,038</b>	<b>2,987</b>	<b>5,966</b>	<b>5,848</b>

<sup>1</sup> Due to an organisational change, the transport volumes to/from Djibouti, Sudan and Eritrea have been assigned to the EMAO trade since 1 January 2019. The previous year's values have been adjusted accordingly.

The Hapag-Lloyd Group's revenue rose by EUR 806.9 million to EUR 6,238.1 million in the first half of 2019 (prior year period: EUR 5,431.2 million), representing an increase of 14.9%. The main reasons for this were the increased transport volumes, the average freight rates and the strengthening of the US dollar. Adjusted for exchange rate movements, revenue would have risen by EUR 416.0 million (7.7%).

The EUR 74.1 million increase in revenues not assigned to trades was mainly due to higher revenues from the surrender of container slots (slot charter).

**Revenue per trade<sup>1</sup>**

million EUR	Q2 2019	Q2 2018	H1 2019	H1 2018
Atlantic	620.3	517.9	1,179.4	979.5
Transpacific	566.3	489.8	1,096.7	952.6
Far East	416.6	383.4	872.1	762.1
Middle East	230.6	235.1	464.4	466.7
Intra Asia	105.0	111.4	207.5	219.4
Latin America	725.2	629.9	1,428.7	1,239.1
EMAO (Europe – Mediterranean – Africa – Oceania)	210.0	161.6	407.8	304.5
Revenue not assigned to trades	301.2	282.7	581.5	507.4
<b>Total</b>	<b>3,175.2</b>	<b>2,811.7</b>	<b>6,238.1</b>	<b>5,431.2</b>

<sup>1</sup> Due to an organisational change, the transport volumes to/from Djibouti, Sudan and Eritrea have been assigned to the EMAO trade since 1 January 2019. The previous year's values have been adjusted accordingly.  
As a result of the change in presentation of the consolidated income statement, revenue for H1 2018 increased by EUR 6.5 million, from EUR 5,424.7 million to EUR 5,431.2 million.

Transport expenses rose by EUR 268.9 million in the first half of the 2019 financial year to EUR 4,825.3 million (prior year period: EUR 4,556.4 million). This represents an increase of 5.9% that is due to the increased transport volume, a stronger US dollar, the higher bunker price, the increase in charter capacity as well as higher charter rates.

At USD 1.13/EUR, the average US dollar/euro exchange rate was 6.7% stronger than in the prior year period (USD 1.21/EUR). The conversion of transport expenses from functional currency US dollar into the reporting currency resulted in an increase in transport expenses due to the strengthening of the US dollar in the first half of 2019 compared to the prior year period.

The increase in bunker expenses of EUR 129.0 million (18.6%) to EUR 822.2 million primarily results from the significantly higher bunker price in the current reporting period. In the first 6 months of the 2019 financial year, the average bunker consumption price for Hapag-Lloyd was USD 429 per tonne, up USD 44 per tonne (11.4%) on the figure of USD 385 per tonne for the prior year period. Furthermore, the stronger US dollar led to a rise in the bunker expenses reported in euros.

The first-time application of IFRS 16 "Leases" had a positive effect on the development of transport expenses in the first half of 2019. As a result of the application of the standard, expenses for leases which were previously classified as operating leases (essentially medium and long-term charter expenses for vessels and container rental) are no longer recognised within the transport expenses position but rather as amortisation on right of use of leased assets and interest expenses for lease liabilities. As a result, the transport expenses recognised in the first half of 2019 decreased compared to the first half of 2018 by the amount of the lease expenses previously reported under IAS 17. This was compensated by an increase in charter expenses due to higher volumes and prices as well as higher port- and canal costs in the first half of 2019 compared to the prior year period.

Personnel expenses rose by EUR 14.9 million (4.7%) to EUR 331.8 million in the first half of 2019 (prior year period: EUR 316.9 million). The increase in the number of employees and the strengthening of the US dollar against the euro caused expenses to increase.

Depreciation and amortisation came to EUR 566.8 million in the first half of the 2019 financial year (prior year period: EUR 336.5 million). The year-on-year increase in depreciation and amortisation was primarily due to the effects of the first-time recognition of leased assets in accordance with IFRS 16. The amortisation of rights of use relating to leased and first-time recognised assets (essentially vessels, containers, buildings) led to additional amortisation of EUR 204.2 million (prior year period: EUR 0.0 million).

The other operating result came to total expenses of EUR 142.6 million in the first half of 2019 (prior year period: total expenses of EUR 146.2 million) and contained the other operating expenses and income. This included mainly IT expenses (EUR 70.3 million), administrative expenses (EUR 19.7 million) and consultancy fees (EUR 16.7 million).

### Operating expenses <sup>1</sup>

million EUR	Q2 2019	Q2 2018	H1 2019	H1 2018

<b>Total operating expenses</b>	<b>2,868.6</b>	<b>2,651.1</b>	<b>5,866.5</b>	<b>5,356.0</b>

<sup>1</sup> As a result of the change in presentation of the consolidated income statement, the previous year's values have been adjusted.

In the reporting period earnings before interest and taxes (EBIT) amounted to EUR 389.4 million (including a positive effect from the first-time application of IFRS 16 in the amount of approximately EUR 14 million). They were therefore well above the corresponding figure in the prior year period (EUR 90.7 million). Earnings before interest, taxes, depreciation and amortisation (EBITDA) came in at EUR 956.2 million in the first half of the 2019 financial year (prior year period: EUR 427.2 million). This includes a positive effect from the first-time application of IFRS 16 in the amount of approximately EUR 217 million. The annualised return on invested capital (ROIC) for the first 6 months of 2019 amounted to 5.9% (prior year period: 1.3%). Basic earnings per share in the reporting period came to EUR 0.78 per share (prior year period: EUR -0.61 per share).

**Earnings indicators<sup>1</sup>**

million EUR	Q2 2019	Q2 2018	H1 2019	H1 2018
Revenue	3,175.2	2,811.8	6,238.1	5,431.2
EBIT	175.7	40.0	389.4	90.7
EBITDA	466.9	210.8	956.2	427.2
EBIT margin (%)	5.5	1.4	6.2	1.7
EBITDA margin (%)	14.7	7.5	15.3	7.9
Basic earnings per share (in EUR)	0.26	-0.40	0.78	-0.61
Return on invested capital (ROIC) annualised (%) <sup>2</sup>	5.3	1.0	5.9	1.3

<sup>1</sup> Due to the change in presentation of the consolidated income statement, the previous year's values have been adjusted.

As a result EBIT for the first half of 2018 rose by EUR 2.0 million, from EUR 88.7 million to EUR 90.7 million.

<sup>2</sup> The calculation of the return on invested capital is based on the functional currency USD.

The interest result for the first half of the 2019 financial year was EUR -224.9 million (prior year period: EUR -172.7 million). The increase in interest expenses compared to the first half of 2018 was primarily due to the first-time application of IFRS 16. Here, the inclusion of interest expenses for the new lease liabilities which must now be included in accordance with IFRS 16 resulted in expenses of EUR 32.4 million in Q2 2019 (prior year period: EUR 0.0 million). As a result of the prepayment of a bond, one-off effects of EUR -22.1 million as a result of repayment costs, the disposal of associated embedded derivatives and other associated transaction costs were also recognised in expenses. The generally higher interest rates level also had a negative effect on interest expenses. By contrast, the valuation of the embedded derivatives of the bonds resulted in income of EUR 12.6 million (prior year period: loss of EUR 3.2 million), which had a positive impact on the interest result.

The Group profit came to EUR 146.3 million in the first 6 months of 2019 (prior year period: EUR -100.9 million).

**Group financial position****Condensed statement of cash flows**

million EUR	Q2 2019	Q2 2018	H1 2019	H1 2018
Cash flow from operating activities	348.6	157.3	884.8	411.1
Cash flow from investment activities	18.4	13.7	-117.2	-45.1
<b>Free cash flow</b>	<b>367.0</b>	<b>171.0</b>	<b>767.6</b>	<b>366.0</b>
Cash flow from financing activities	-481.5	-248.0	-977.3	-433.8
<b>Changes in cash and cash equivalents</b>	<b>-114.6</b>	<b>-77.0</b>	<b>-209.8</b>	<b>-67.8</b>

**Cash flow from operating activities**

Hapag-Lloyd generated an operating cash flow of EUR 884.8 million in the first half of the 2019 financial year (prior year period: EUR 411.1 million). The increase in cash flow from operating activities was positively affected by the application of IFRS 16 in the first quarter of 2019 as redemption payments and interests of the lease payments are disclosed as cash flow from financing activities instead of cash flow from operating activities according to IFRS 16.

### Cash flow from investing activities

In the first half of 2019 the cash outflow from investing activities totalled EUR 117.2 million (prior year period: EUR 45.1 million) and related to payments for investments of EUR 165.7 million (prior year period: EUR 103.4 million), primarily in containers and ship equipment. These included payments in the amounts of EUR 94.6 million for containers acquired in the prior year. This contrasted with cash inflows of EUR 19.6 million, which were primarily due to the sale of containers in the first half of 2019.

### Cash flow from financing activities

Overall, there was a cash outflow from financing activities in the current reporting period in the amount of EUR 977.3 million (prior year period: EUR 433.8 million) which mainly comprised interest and redemption payments of EUR 1,542.0 million (prior year period: EUR 625.2 million). Interest and redemption payments in the first half of 2019 include the partial repayment of the ABS programme in the amount of EUR 177.1 million and for the first time repayments for lease liabilities in accordance with IFRS 16 in the amount of EUR 227.1 million. In the first half of 2019, Hapag-Lloyd completely prepaid a bond in the amount of EUR 450.0 million before its 2022 due date.

The cash outflows are contrasted by cash inflows totalling EUR 643.0 million (prior year period: EUR 161.0 million). In connection with the early bond repayment a new revolving credit line in the amount of 100.0 Mio. EUR has been utilised. Further significant inflows result from the financing of containers using Japanese operating leases (“JOLs”) in the amount of EUR 113.6 million, draw-downs under the existing ABS programme in the amount of EUR 219.4 million, loans to refinance vessels in the amount of EUR 166.5 million and the cash inflow from an unsecured term loan in the amount of EUR 40.1 million. There were also cash outflows from the realisation of derivative financial instruments used to hedge financial debt in the amount of EUR 52.7 million (prior year period: cash inflow of EUR 32.7 million).

### Developments in cash and cash equivalents

million EUR	Q2 2019	Q2 2018	H1 2019	H1 2018
<b>Cash and cash equivalents at beginning of period</b>	<b>573.6</b>	<b>597.7</b>	<b>657.1</b>	<b>604.9</b>
Changes due to exchange rate fluctuations	-6.3	31.7	5.5	15.3
Net changes	-114.6	-77.0	-209.8	-67.8
<b>Cash and cash equivalents at end of period</b>	<b>452.7</b>	<b>552.4</b>	<b>452.7</b>	<b>552.4</b>

Overall, cash outflow totalled EUR 209.8 million in the first half of 2019. After accounting for exchange rate-related effects in the amount of EUR 5.5 million, cash and cash equivalents of EUR 452.7 million were reported at the end of the reporting period on 30 June 2019 (30 June 2018: EUR 552.4 million). The cash and cash equivalents dealt with in the statement of cash flows correspond to the balance sheet item “Cash and cash equivalents”. In addition, there are available credit facilities in the amount of EUR 478.8 million (30 June 2018: EUR 446.7 million). The liquidity reserve (consisting of cash, cash equivalents and unused credit facilities) therefore totalled EUR 931.5 million (30 June 2018: EUR 999.1 million). Cash and cash equivalents of EUR 0.0 million (30 June 2018: EUR 40.3 million) which serve as collateral for existing financial debt were reported under other assets due to their maturity.

### Financial solidity

million EUR	30.6.2019	31.12.2018
Financial debt and lease liabilities	6,681.0	6,017.9
Cash and cash equivalents	452.7	657.1
Restricted cash (other assets)	–	6.4
<b>Net debt</b>	<b>6,228.3</b>	<b>5,354.4</b>
<b>Gearing (%)<sup>1</sup></b>	<b>98.4</b>	<b>85.5</b>
<b>Unused credit lines</b>	<b>478.8</b>	<b>475.9</b>
<b>Equity ratio (%)</b>	<b>39.4</b>	<b>40.9</b>

<sup>1</sup> Ratio net debt to equity

Restricted cash and cash equivalents (other assets) decreased to EUR 0.0 million (31 December 2018: EUR 6.4 million), as there was a decrease in cash and cash equivalents which served as collateral for existing financial debt.

The Group’s net debt amounted to EUR 6,228.3 million as at 30 June 2019. This was a rise of EUR 873.9 million compared to net debt of EUR 5,354.4 million as at 31 December 2018.

The increase was essentially due to the application of the reporting standard IFRS 16 from 1 January 2019. The recognition of the lease liability associated with the first-time recognition of rights of use relating to leases (primarily for medium and long-term charter expenses for vessels and for container leases) led to an increase of EUR 947.6 million in financial debt as at 1 January 2019. By contrast, redemption of short and long-term financial debts and lease liabilities in the amount of EUR 1,324.5 million, especially the early repayment of a bond in the amount of EUR 450.0 million, had an offsetting effect.

The equity ratio decreased by 1.5% points, from 40.9% as at 31 December 2018 to 39.4% which was mainly due to the first time adoption of IFRS 16 and the corresponding increase in financial debt. Gearing – the ratio of net debt to balance sheet equity – increased from 85.5% to 98.4% as a result.

of which cash and cash equivalents	452.7	657.1
<b>Total assets</b>	<b>16,059.2</b>	<b>15,301.3</b>
<b>Equity and liabilities</b>		
Equity	6,332.5	6,259.3
Borrowed capital	9,726.6	9,042.0
of which non-current liabilities	5,851.2	5,665.3
of which current liabilities	3,875.5	3,376.7
of which financial debt and lease liabilities	6,681.0	6,017.9
of which non-current financial debt and lease liabilities	5,452.1	5,301.6
of which current financial debt and lease liabilities	1,228.9	716.4
<b>Total equity and liabilities</b>	<b>16,059.2</b>	<b>15,301.3</b>
Net debt	6,228.3	5,354.4
Equity ratio (%)	39.4	40.9

As at 30 June 2019, the Group's balance sheet total was EUR 16,059.2 million, which is EUR 757.9 million higher than the figure at year-end 2018. The reasons for this change included exchange rate effects as at the reporting date due to the slightly stronger US dollar. The US dollar/euro exchange rate was quoted at 1.14 on 30 June 2019 (31 December 2018: 1.15). The main reason for the increase in the balance sheet total is the first-time application of IFRS 16 from 1 January 2019.

Within non-current assets, the carrying amounts of fixed assets increased by a total of EUR 850.0 million to EUR 13,639.8 million (31 December 2018: EUR 12,789.8 million). This rise was primarily due to the first-time application of IFRS 16 and the associated recognition of the right of use relating to lease contracts in the amount of EUR 858.2 million as at 1 January 2019 (31 December 2018: EUR 0.0 million). The increase also resulted from recognition of the right of use of leased assets for lease contracts closed within the first half of 2019 of EUR 387.3 million as well as further investments totalling EUR 127.7 million relating primarily to containers and ship equipment. Exchange rate effects of EUR 79.7 million at the reporting date contributed to the increase in fixed assets.

Depreciation and amortisation of EUR 566.8 million in the first quarter of 2019 had an opposite effect (prior year period: EUR 336.5 million). This figure includes an amount of EUR 204.2 million for additional amortisations of the rights of use according to the newly implemented standard IFRS 16.

Cash and cash equivalents of EUR 452.7 million decreased by EUR 204.4 million compared to the end of 2018 (EUR 657.1 million).

On the liabilities side, equity (including non-controlling interests) grew by EUR 73.2 million to a total of EUR 6,332.5 million. This increase is mainly due to the Group profit of EUR 146.3 million and the unrealised gains from currency translation recognised in other comprehensive income and amounting to EUR 34.7 million. By contrast, the payment of a dividend by Hapag-Lloyd AG for the 2018 financial year in the amount of EUR 26.4 million, the measurement of pension provisions through other comprehensive income in the amount of EUR –45.0 million as a result of the interest rate reduction and the adjustment of opening balance sheet values due to the first-time application of IFRS 16 as at 1 January 2019 in the amount of EUR –17.4 million had an offsetting effect. The equity ratio was 39.4% as at 30 June of the current year (31 December 2018: 40.9%).

The Group's borrowed capital has risen by EUR 684.6 million to EUR 9,726.6 million since the 2018 financial statements were prepared, which was mainly due to an increase in financial debt and lease liabilities by EUR 663.1 million to EUR 6,681.0 million as at 30 June 2019. The main reason for the increase in financial debt and lease liabilities was the first-time application of IFRS 16, which led to the recognition of additional lease liabilities of EUR 947.6 million as at 1 January 2019. Cash inflows for new financings, recognition of financial debts for new lease obligations as well as exchange rate effects on financial debt and lease liabilities of EUR 37.0 million also caused borrowed capital to increase. Debt repayments totaling EUR 1,324.5 million including an early redemption of a bond in the amount of EUR 450 million reduced financial debt.

Taking cash and cash equivalents and financial debt and lease liabilities into account, net debt as at 30 June 2019 was EUR 6,228.3 million (31 December 2018: EUR 5,354.4 million).

For further information on significant changes to specific balance sheet items, please refer to the Notes to the consolidated statement of financial position, which can be found in the condensed Notes to the consolidated financial statements.

#### **Executive Board's statement on overall expected developments**

Compared with the prior year period, the increased volumes and freight rates had a positive impact on the earnings position, as did the strengthening of the US dollar against the euro. The higher transport expenses which resulted from increased bunker prices and higher shipping operation costs had the opposite effect.

The development of earnings in the first half of the 2019 financial year was in line with the Executive Board's expectations at the start of the year. This was due to the slight increase in freight rates, the fall in bunker prices compared with the second half of 2018 and the strengthening of the US dollar against the euro. The growth of transport volume was slightly below the expectation at the beginning of the year. The development of earnings in the 2019 financial year will continue to depend largely on the growth in transport volumes and the development of freight rates. There have been no significant changes in the general economic conditions compared with the Executive Board's expectations at the start of the year.

## RISK AND OPPORTUNITY REPORT

In general, please refer to the 2018 annual report for details of significant opportunities and risks, an assessment of these and an evaluation of their probability of occurrence. The existing global macroeconomic uncertainties and ongoing stiff competition could have a significant negative impact on the development of transport volumes and freight rates again in 2019.

The risks listed in the 2018 Annual Report include risks arising from political conditions and protectionism. In addition, reference is made to the possible negative impact on the development of container shipping due to a further escalation of the trade dispute between the USA and China and an escalation of political tensions with Iran. The latter could have negative effects on the oil price and consequently on the bunker price due to restrictions on oil transport by the Strait of Hormuz. Consequently, the risks listed may have a negative impact on transport volumes, freight rates and costs and consequently have a negative impact on earnings.

In addition, the main risks associated with the expected development of the Group in the remaining months of the financial year are currently estimated as follows:

Risk	Probability of occurrence	Potential impact	Probability of occurrence in 2019 in comparison to the Annual Report 2018
Decrease in transport volume growth	Medium	Medium	Equal
Decrease in average freight rate	Medium	Medium	Equal
Decline in USD vs. EUR	Low	Low	Equal
Rise in bunker consumption prices	Low	Medium	Equal
Liquidity <sup>1</sup>	Low	High	Equal
Lower earnings contribution of efficiency programs	Low	Medium	Equal

<sup>1</sup> The assessment related to the impact on the covenants to be complied with and on the liquidity situation.

At the time of reporting on the first half of 2019, there were no risks which threatened the continued existence of the Hapag-Lloyd Group.

## NOTE ON SIGNIFICANT TRANSACTIONS WITH RELATED PARTIES

The notes on relationships and transactions with related parties can be found in the disclosures on page 58 of the Notes to the condensed interim consolidated financial statements.

## OUTLOOK

The general economic and sector-specific conditions which are of importance to container shipping are presented and analysed in the 2018 annual report (Economic report). A summary of the most important external factors is given below.

In its latest economic outlook (July 2019), the International Monetary Fund (IMF) expects global economic growth to reach 3.2% in the current year. As such, expected economic growth is down by 0.1 percentage points on the previous forecast (April 2019). As per the current forecast, the global economy is expected to grow at a slightly slower rate in 2019 than in the previous year (+3.6%). According to the IMF, the volume of global trade, which is key to the demand for container shipping services, will increase by 2.5% in 2019 (2018: +3.7%). The institute has therefore cut its forecast from April 2019 again substantially by 0.9 percentage points. Nevertheless, global trade is still expected to grow in line with the global economy in 2019. IHS Markit (May 2019) is forecasting that the global container shipping volume will increase by 3.8% to approximately 171 million TEU in 2019 (2018: 5.2%). IHS has lowered its forecast by 0.9 percentage points compared to its last one, published in January 2019. However, in its last publication, the Institute changed its forecasting methodology and thus also adjusted the previous year's figure. Comparability with previous publications is therefore only possible to a limited extent. Nevertheless, the expected rise in worldwide transport volumes in container shipping for 2019 is in line with the rate of growth for global trade.

Following a rise in transport capacities (following scrapping and delays in deliveries) of approximately 1.2 million TEU to 22.0 million TEU in 2018, Drewry forecasts a nominal increase in transport capacities of up to approximately 0.7 million TEU for the current year. In relation to the total capacity of the global trading fleet, this represents an increase of around 3.3%. At the start of the year, Drewry anticipated growth of around 0.5 million TEU due to a higher anticipated scrapping rate. Although the increase is expected to be lower than in the previous year (5.7%) and the supply of global transport capacity is much more in line with demand for container transport services, the delivery of large vessels for use on the Far East trade could also make it difficult to increase freight rates on this trade in 2019.

Hapag-Lloyd continues to anticipate an increase in the transport volume in 2019. However, the anticipated transport volume growth is expected to be below the latest forecast issued by IHS Markit. The main reason for this development is the active capacity reduction in the Intra-Asia trade, which is part of Hapag-Lloyd's strategic realignment under Strategy 2023. Based on these assumptions, and combined with a smaller increase in the global transport capacity than in the previous year, Hapag-Lloyd's average freight rate in 2019 is likely to increase slightly compared with the previous year. Based on the development of the average bunker consumption price in the first half of 2019 and the current expectation for its development over the rest of the year, Hapag-Lloyd anticipates a slight increase in the average bunker consumption price for 2019 compared with the corresponding figure for 2018 (start of year: moderate increase in average bunker consumption price).

Provided that Hapag-Lloyd achieves the expected freight rate, the anticipated improvement in revenue quality combined with a low triple-digit amount in cost savings as part of Strategy 2023, and the expected growth in volumes, it is forecasting EBITDA of EUR 1.6–2.0 billion and EBIT of EUR 0.5–0.9 billion in 2019. This includes a currently anticipated earnings effect from the first-time application of IFRS 16 on EBITDA in the amount of EUR 370–470 million and on EBIT in the amount of EUR 10–50 million. The expected effects of the first-time application of IFRS 16 on the statement of financial position and the income statement are described in detail on page 38 ff. of the condensed Notes to the consolidated financial statements. Not accounted for here are impairments on goodwill, other intangible assets and property, plant and equipment, which, although not expected at present, cannot be ruled out given current geopolitical developments and other factors. The earnings forecast is based on the assumption of unchanged exchange rates.

**Key benchmark figures for the 2019 outlook**

Global economic growth (IMF)	3.2%
Increase in global trade (IMF)	2.5%
Increase in global container transport volume (IHS)	3.8%
Transport volume, Hapag-Lloyd	Slightly increasing
Average bunker consumption prices, Hapag-Lloyd	Slightly increasing
Average freight rate, Hapag-Lloyd	Slightly increasing
Earnings before interest, taxes, depreciation and amortisation (EBITDA)	EUR 1.6–2.0 billion
Earnings before interest and taxes (EBIT)	EUR 0.5–0.9 billion

The benchmark figures for the 2019 outlook, which relate to transport volume, the average freight rate and the key performance indicators of EBITDA and EBIT, therefore remain unchanged on the forecast published in the 2018 annual report. By contrast, the forecast for the expected development of average bunker consumption prices was adjusted slightly in the first quarter of 2019, as outlined above.

Business developments at Hapag-Lloyd are subject to far-reaching risks in an industry environment dominated by volatile freight rates and stiff competition. The general risks are described in detail in the risk report in the Group management report of the 2018 annual report (page 100 ff.). Risks that may have an impact on the forecast for business development are also described in detail in the risk report. Deviations from the presentation in the 2018 annual report are explained in the risk and opportunity report of this half-year financial report. Significant risks for the Group's revenue and earnings development include in particular a slowdown in global economic and trade volume growth, a significant and lasting rise in bunker prices extending beyond the average bunker consumption price level in 2018, a sharp and persistent increase in the euro against the US dollar and a lasting reduction in the average freight rate. Additional risks could result from the consolidation of the industry and changes in the composition of global alliances.

The occurrence of one or more of these risks could have a substantial negative impact on the industry and, by extension, on the business development of Hapag-Lloyd in the remaining months of 2019, which could also lead to impairments on goodwill, other intangible assets and property, plant and equipment.

# CONDENSED NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

## FUNDAMENTAL ACCOUNTING PRINCIPLES

### General information

Hapag-Lloyd is an international group whose primary purpose is to provide ocean container liner shipping activities, logistical services and all other associated business operations and services.

Hapag-Lloyd Aktiengesellschaft (Hapag-Lloyd AG), domiciled in Hamburg, Ballindamm 25, Germany, is the parent company of the Hapag-Lloyd Group and a listed company in accordance with German law. The company is registered in commercial register B of the district court in Hamburg under the number HRB 97937. The Company's shares are traded on the Frankfurt and Hamburg Stock Exchanges.

The interim consolidated financial statements cover the period 1 January to 30 June 2019 and are reported and published in euros (EUR). All amounts recognised for the financial year are reported in million euros (EUR million) unless otherwise stated. In individual cases, rounding differences may occur in the tables and charts of this interim consolidated financial statement for computational reasons.

On 6 August 2019, the Executive Board approved the condensed interim consolidated financial statements for publication.

### Accounting principles

The consolidated financial statements of Hapag-Lloyd AG and its subsidiaries were prepared in accordance with the International Financial Reporting Standards (IFRS) of the International Accounting Standards Board (IASB), including the interpretations of the IFRS Interpretations Committee (IFRIC), as they are to be applied in the European Union (EU). This interim report as at 30 June 2019 was prepared in compliance with the provisions of IAS 34. It is presented in condensed form. These condensed interim consolidated financial statements and interim Group management report of Hapag-Lloyd AG have not been subject to an audit review nor have they been reviewed in accordance with Section 317 of the German Commercial Code (HGB).

The standards and interpretations valid in the EU since 01 January 2019 were applied during the preparation of the interim consolidated financial statements. As regards the possible effects of standards and interpretations that have already been adopted, but that are not yet mandatory, we refer to the explanations in the Notes to the consolidated financial statements as at 31 December 2018, which remain valid and have not changed. The interim consolidated financial statements as at 30 June 2019 are to be read in conjunction with the audited and published IFRS consolidated financial statements as at 31 December 2018. With the exception of the changes outlined in the “New accounting standards” section, the interim consolidated financial statements were prepared in compliance with the same accounting and measurement principles that formed the basis for the consolidated financial statements as at 31 December 2018. Estimates and discretionary decisions were made in the same manner as in the previous year with the exception of new discretionary decisions outlined in the “New accounting standards” section in connection with IFRS 16. The actual values may differ from the estimated values.

The functional currency of Hapag-Lloyd AG and all of its main subsidiaries is the US dollar. The reporting currency of Hapag-Lloyd AG is, however, the euro. For reporting purposes, the assets and liabilities of the Hapag-Lloyd Group are translated into euros using the mean exchange rate on the balance sheet date (closing rate). The cash flows listed in the consolidated statement of cash flows and the expenses, income and result shown in the consolidated income statement are translated at the average exchange rate for the reporting period. The resulting differences are recognised in other comprehensive income.

As at 30 June 2019, the closing US dollar/euro exchange rate was quoted as USD 1.1383/EUR (31 December 2018: USD 1.1451/EUR). For the first half of 2019, the average US dollar/euro exchange rate was USD 1.1296/EUR (prior year period: USD 1.2109/EUR).

#### **New accounting standards**

The following describes the significant changes for the Hapag-Lloyd Group resulting from the first-time application of standard IFRS 16 in the 2019 financial year.

The remaining standards, which are to be adopted for the first time in the 2019 financial year, have no significant impact on the net asset, financial and earnings position of the Hapag-Lloyd Group.

### IFRS 16 Leases

#### i. General

IFRS 16 Leases was published by the IASB in January 2016 and adopted by the EU into European law on 31 October 2017. Application of IFRS 16 has been mandatory since 1 January 2019. For companies that report in accordance with IFRS as applicable in the EU, IFRS 16 establishes the recognition, measurement, presentation and disclosure requirements of leases. IFRS 16 replaces IAS 17 Leases as well as the associated interpretations IFRIC 4 Determining Whether an Arrangement Contains a Lease, SIC 15 Operating Leases – Incentives and SIC 27 Evaluating the Substance of Transactions in the Legal Form of a Lease.

IFRS 16 comprises different regulations for lessees and lessors. For lessees, the standard provides a single accounting model. Differentiation between finance leases and operating leases is no longer required. With regard to leases, rights of use for the leased object and the corresponding lease liabilities that represent the payment obligation will in future be recognised in the statement of financial position. Lessors will continue to differentiate between finance leases and operating leases for accounting purposes. The accounting model of IFRS 16 does not differ significantly from that of IAS 17 in this regard.

Hapag-Lloyd applies the modified retrospective approach as at 1 January 2019. For this reason, the cumulative effect of applying IFRS 16 is recognised as an adjustment to the opening values for retained earnings as at 1 January 2019. No adjustments were made to the comparable information for 2018. The previous year's figures are presented in accordance with IAS 17 and the aforementioned interpretations.

The new regulations affect Hapag-Lloyd's recognition and measurement of rented and leased objects which were previously classified as operating leases. This relates to the following asset classes:

- (1) rented container vessels,
- (2) rented containers,
- (3) rented office buildings, office space and parking spaces,
- (4) leased vehicles and
- (5) other rented business equipment.

As with the Group's own assets, the rights of use for the above asset classes are recognised in the statement of financial position under property, plant and equipment. The corresponding lease liabilities form part of financial debt.

## ii. Main accounting principles

Hapag-Lloyd uses the simplification rule to retain the definition of a lease in the changeover to IFRS 16. The Group therefore applies IFRS 16 at the point of first-time application to the agreements which were previously classified as leases using IAS 17 and IFRIC 4. The definition of a lease under IFRS 16 is applied to agreements which were concluded or changed on or after 1 January 2019.

The single accounting model pursuant to IFRS 16 requires that all assets and liabilities relating to leases be recognised in the statement of financial position unless (in each case an option) (1) the lease term is 12 months or less or (2) the underlying asset has a low value. If the lessee makes use of one of the two relief provisions outlined above, the presentation in the balance sheet is the same as with the previous operating leases.

Hapag-Lloyd recognises a right of use asset reported under property, plant and equipment and a lease liability reported under financial debt in the statement of financial position at the point when the leased object is made available. At the beginning, the right of use is measured at cost of acquisition. The subsequent measurement occurs at cost of acquisition less cumulative depreciation, amortisation, impairment and certain remeasurements of the lease liability due to modifications. The lease liability is measured at the beginning at the fair value of the future lease payments. The lease payments are discounted using the interest rate implicitly specified in the leases or the incremental interest rate.

Hapag-Lloyd takes account of unilateral and bilateral rights of termination in the agreements examined in accordance with IFRS 16. In the case of unilateral rights of termination which may exist for Hapag-Lloyd, particularly for container vessel agreements and rented office buildings, office space and parking spaces, the probability of exercising the existing option is assessed while taking account of economic factors and on an individual basis in order to determine the term of the agreement.

Bilateral rights of termination essentially exist for a large number of container leases. These rights of termination can be exercised by both parties on a flexible and independent basis. When determining the term of these container leases for accounting purposes, Hapag-Lloyd must assess in accordance with IFRS 16.B34 whether significant penalties may be incurred when containers are returned or if these container leases are terminated. Hapag-Lloyd also assesses possible economic disadvantages in this regard. If Hapag-Lloyd also believes from an economic perspective that termination of these agreements will not result in any significant disadvantages, the term of the agreement is determined while taking account of the termination notice period in the respective agreement and a possible transition period in accordance with IFRS 16. If Hapag-Lloyd believes that there are significant disadvantages, this is taken into account when assessing the term of the agreement and the term extended until such time as the disadvantages have been resolved. This assessment will affect the amount of the lease liabilities and the right of use assets significantly.

For lease agreements which include a lease, Hapag-Lloyd separates a lease component and non-lease component and allocates the contractual consideration of each lease and non-lease component based on their relative stand-alone price. Hapag-Lloyd does not make use of the practical expedient that removes the obligation to separate the lease and non-lease component.

### iii. Transition date

As lessee, Hapag-Lloyd recognises a lease liability for leases in all asset classes which were previously classified as operating leases under IAS 17 and for which it did not make use of any practical expedient at the point of first-time application. This lease liability is measured at the fair value of the remaining lease payments and discounted using the incremental borrowing rate as at 1 January 2019. As lessee, Hapag-Lloyd also recognises a right of use for leases in all asset classes which were previously classified as operating leases under IAS 17.

As a rule, Hapag-Lloyd measures the right of use from the lease liability individually and in the asset classes (1), (2), (3) and (4) at the amount of the lease liability which has been adjusted by the amount of the lease payments paid in advance or deferred, which in turn were recognised in the consolidated statement of financial position as at 31 December 2018. For asset classes (1) and (2), Hapag-Lloyd uses the carrying amount in certain cases to measure the right of use as if the standard had already been applied since the date of transition and this amount discounted using the incremental borrowing rate at the point of first-time application. At this stage, there is a cumulative effect of applying the new standard for the first time, which is offset against retained earnings directly in equity at the point of first-time application.

On the transition date as at 1 January 2019, Hapag-Lloyd also made use of the following practical expedients:

Hapag-Lloyd applies IFRS 16 to a portfolio of similarly structured container leases.

At the point of first-time application, Hapag-Lloyd applies a discount rate which is dependent on the asset class, term and securitisation to a portfolio of similarly structured leases. The discount rate corresponds to the incremental borrowing rate applicable to the 5 defined asset classes at the transition point. In addition to the rented container vessels, which are essentially combined according to a similar remaining term, this assumption affects the container leases which are combined according to container type and remaining term and the rented office buildings, office space and parking spaces as well as the leased vehicles.

Hapag-Lloyd makes use of the practical expedient in the case of leases which are onerous agreements pursuant to IAS 37 Provisions, Contingent Liabilities and Contingent Assets, and adjusts the right of use as at 1 January 2019 by the amount which was recognised as a provision for onerous agreements in the statement of financial position as at 31 December 2018.

At the point of first-time application, Hapag-Lloyd treats leases for all asset classes whose term ends within 12 months of 1 January 2019 as short-term current leases pursuant to IFRS 16. The corresponding expenses, which essentially result from container vessel agreements expiring in 2019, are reported in the disclosures for the expenses for short-term leases for the 2019 financial year.

Initial direct costs were not taken into account at the point of first-time application when calculating the amount of the right of use.

There are no material effects on the Hapag-Lloyd Group's existing finance leases. As lessee, Hapag-Lloyd recognises as at 1 January 2019 the carrying amount of the right of use and of the lease liability for leases which were previously classified as finance leases under IAS 17 at the amount of the carrying amount which results from measuring the leased asset and the lease liability pursuant to IAS 17 as at 31 December 2018. From 1 January 2019, the provisions of IFRS 16 are applied to these leases.

Adjustments were made to all finance agreements that contain lending conditions as regards the required minimum equity ratio at Group level (financial covenant). The Group does not expect that the application of IFRS 16 will have any effect on its ability to meet the lending conditions of the required minimum equity ratio at Group level.

#### **iv. Hapag-Lloyd as lessor**

Since Hapag-Lloyd only operates as a lessor to a limited extent, IFRS 16 has no significant effects on the Group's net asset, financial and earnings position.

#### v. Effect of first-time application of IFRS 16

The changes to the accounting method affect the following balance sheet items as at 1 January 2019 as follows:

million EUR	1.1.2019
Right of use assets reported under property, plant and equipment	858.2
Revaluation reserve recognised in cumulative other equity	-17.4
Liabilities from lease contracts reported under financial debt	947.6
Other liabilities	-41.2
Other provisions	-30.7

The reported rights of use assets and lease liabilities do not include any assets and liabilities that were accounted for under finance leases in accordance with IAS 17 until 31 December 2018. The finance leases accounted for in accordance with IAS 17 until 31 December 2018 resulted in carrying amounts of EUR 172.1 million for right of use assets and EUR 99.0 million for lease liabilities as at 1 January 2019.

Based on the operating lease requirements as at 31 December 2018, the following reconciliation with the opening value for lease liabilities existed as at 1 January 2019:

million EUR	1.1.2019
<b>Obligations from operating leases reported as at 31 December 2018 (undiscounted)</b>	<b>1,102.9</b>
Discounting	-149.5
<b>Obligations from operating leases reported as at 31 December 2018 (discounted)</b>	<b>953.4</b>
Plus liabilities from finance leases recognised as at 31 December 2018	99.0
(less) leases in accordance with IFRS 16.4 for other intangible assets	-157.0
(less) short-term leases recognised as an expense on a straight-line basis	-146.1
(less) contracts reassessed as service contracts	-126.8
(less) leases of low-value assets recognised as an expense on a straight-line basis	-0.3
Plus terminable operating leases	291.4
Plus adjustments due to different estimates of contract options	100.2
Plus other adjustments	32.8
<b>Lease liabilities recognised as at 1 January 2019</b>	<b>1,046.6</b>

The lease liabilities were discounted using the incremental borrowing rate as at 1 January 2019. The weighted average interest rate was 6.0%.

For the first half of 2019 respective as at 30 June 2019, the figures were presented in the consolidated statement of financial position and the consolidated income statement as follows:

#### Leases in the consolidated statement of financial position

million EUR	30.6.2019
Right of use assets reported under property, plant and equipment	1,193.7
Liabilities from lease contracts reported under financial debt	1,214.7

#### Leases in the consolidated income statement

million EUR	30.6.2019
Depreciation of right of use assets	215.0
Interest expenses from lease liabilities	35.5

The rights of use and lease liabilities reported as at 30 June 2019 and the depreciation and interest expenses reported for the first half of 2019 relate both to the former finance lease agreements and the operating lease agreements to be taken into account since 1 January 2019. A distinction between finance and operating leases will no longer be made in the future.

### Change of presentation in the consolidated income statement

Hapag-Lloyd modified the structure of the consolidated income statement at the start of the 2019 financial year. Up until then, the structure was based on the principal types of expense, whereby the measurement effects from currency fluctuations were recognised in the respective income statement item. The new structure is based on a separate presentation of the individual components of service provision in the Hapag-Lloyd Group and separates operating effects from measurement effects. The purpose of the change is to provide a more detailed information basis and to increase harmonisation between the externally communicated income statement structure and internal management reporting. The modifications undertaken result from the following table:

million EUR	Consolidated income statement before adjustments	Adjustments			
	1.1.2018– 30.6.2018	Reclassification foreign exchange rate effects	Reclassification Subsidies	Reclassification commissions	Reclassification non-deductible indirect tax

### Group of consolidated companies

The consolidated financial statements include all significant subsidiaries and equity-accounted investments. In addition to Hapag-Lloyd AG, the group of consolidated companies comprised 144 fully consolidated companies (31 December 2018: 145) and 6 equity-accounted investees as at 30 June 2019 and was therefore the same as at year-end 2018. No significant effects on the net asset, financial and earnings position of the Hapag-Lloyd Group arose as a result of the liquidation of a company.

### SEGMENT REPORTING

The Hapag-Lloyd Group is managed by the Executive Board as a single, global business unit with one sphere of activity. The primary performance indicators are freight rates and transport volume by geographic region as well as EBIT and EBITDA at the Group level.

The allocation of resources (use of vessels and containers) and the management of the sales market and of key customers are done on the basis of the entire liner service network and deployment of all of the maritime assets. The Group generates its revenue solely through its activities as a container liner shipping company. The revenue comprises income from transporting and handling containers and from related services and commissions, all of which are generated globally. As the Hapag-Lloyd Group operates with the same product around the world throughout its entire liner service network, the Executive Board has decided that there is no appropriate measure with which assets, liabilities, EBIT and EBITDA as the key performance indicators can be allocated to different trades. All of the Group's assets, liabilities, income and expenses are thus only allocable to the one segment, container liner shipping. The figures given per trade are the transport volume and freight rate, as well as the revenue allocable to said trade.

#### Transport volume per trade<sup>1</sup>

TTEU	Q2 2019	Q2 2018	H1 2019	H1 2018
Atlantic	513	475	982	914

<b>Total</b>	<b>3,175.2</b>	<b>2,811.7</b>	<b>6,238.1</b>	<b>5,431.2</b>

<sup>1</sup> Due to an organisational change, the transport volumes to/from Djibouti, Sudan and Eritrea have been assigned to the EMAO trade since 1 January 2019. The previous year's values have been adjusted accordingly.

<sup>2</sup> As a result of the change in presentation of the consolidated income statement, revenue for H1 2018 increased by EUR 6.5 million, from EUR 5,424.7 million to EUR 5,431.2 million and for Q2 2018 by EUR 3.8 million from EUR 2,808.0 million to EUR 2,811.8 million.

Revenue not allocable to the trades essentially comprises income from demurrage and detention and income from charter rent and the surrender of container slots.

Operating earnings before interest, taxes, depreciation and amortisation (EBITDA) are calculated on the basis of the Group's earnings before interest and taxes (EBIT) as presented in the following table. Earnings before taxes (EBT) and the share of profits of the segment's equity-accounted investees correspond to those of the Group.

million EUR	Q2 2019	Q2 2018	H1 2019	H1 2018
<b>Earnings before interest, taxes, depreciation and amortisation (EBITDA)</b>	<b>466.9</b>	<b>210.8</b>	<b>956.2</b>	<b>427.2</b>

<b>Earnings before taxes (EBT)</b>	<b>55.9</b>	<b>-55.4</b>	<b>163.6</b>	<b>-84.0</b>
<b>Share of profit of equity-accounted investees</b>	<b>9.0</b>	<b>7.4</b>	<b>17.5</b>	<b>15.5</b>

## SELECTED NOTES TO THE CONSOLIDATED INCOME STATEMENTS

Detailed Notes to the income statement are contained in the interim Group management report in the chapter "Group earnings position".

### Earnings per share

	Q2 2019	Q2 2018	H1 2019	H1 2018
Profit/loss attributable to shareholders of Hapag-Lloyd AG in million EUR	46.2	-70.4	137.9	-108.0
Weighted average number of shares in million	175.8	175.8	175.8	175.8
<b>Basic earnings per share in EUR</b>	<b>0.26</b>	<b>-0.40</b>	<b>0.78</b>	<b>-0.61</b>

Basic earnings per share is the quotient of the Group net result attributable to the shareholders of Hapag-Lloyd AG and the weighted average of the number of shares in circulation during the financial year.

There were no dilutive effects in the first half of 2019 or in the corresponding prior year period.

## SELECTED NOTES TO THE CONSOLIDATED STATEMENT OF FINANCIAL POSITION

### Goodwill and other intangible assets

Goodwill and intangible assets increased by EUR 20.3 million compared with 31 December 2018 due to currency translation effects. The amortisation of other intangible assets of EUR 49.4 million had an opposite effect.

### Property, plant and equipment

million EUR	30.6.2019	31.12.2018
Vessels <sup>1</sup>	7,559.7	7,141.4
Container <sup>1</sup>	2,198.3	1,834.8
Other equipment <sup>1</sup>	226.7	137.1
Prepayments on account and assets under construction	21.7	6.4
<b>Total</b>	<b>10,006.4</b>	<b>9,119.7</b>

<sup>1</sup> Including right of use according to IFRS 16

In the reporting period, property, plant and equipment increased primarily due to the first-time recognition of rights of use in accordance with IFRS 16 at the beginning of the year. In addition, rights of use amounting to EUR 387.3 million were received in the first half of the financial year. The carrying amounts as at 30 June 2019 were reduced by depreciation to property, plant and equipment and to rights of use in the amount of EUR 517.3 million and currency effects of EUR 59.3 million.

### Cash and cash equivalents

million EUR	30.6.2019	31.12.2018
Cash at bank	434.5	638.3
Cash in hand and cheques	18.3	18.8
<b>Total</b>	<b>452.7</b>	<b>657.1</b>

As at 30 June 2019, a sum totalling EUR 10.4 million with a term of up to 3 months was deposited in pledged accounts (31 December 2018: EUR 11.1 million) and was therefore subject to a limitation on disposal.

Due to local restrictions, the Hapag-Lloyd Group has limited access to cash and cash equivalents of EUR 3.8 million (31 December 2018: EUR 4.4 million) at individual subsidiaries.

**Cumulative other equity**

Cumulative other equity comprises the reserve for remeasurements from defined benefit pension plans, the reserve for cash flow hedges, the reserve for hedging costs, the translation reserve and the reserve for put options on non-controlling interests.

The reserve for remeasurements from defined benefit pension plans (30 June 2019: EUR –157.6 million; 31 December 2018: EUR –112.6 million) contains income and expenses from the remeasurement of pension obligations and plan assets recognised cumulatively in other comprehensive income, among other things due to the change in actuarial and financial parameters in connection with the valuation of pension obligations and the associated fund assets. The expenses from the remeasurement of pension obligations and the associated plan assets recognised in other comprehensive income in the first half of 2019 resulted in a decrease of EUR 45.0 million in the reserve (prior year period: increase of EUR 0.7 million).

The reserve for cash flow hedges contains changes in the intrinsic value and in the cash component from hedging transactions that are recognised in other comprehensive income and amounted to EUR –15.6 million as at 30 June 2019 (31 December 2018: EUR –0.8 million). In the first half of 2019, the resulting gains and losses totalling EUR –22.9 million were recognised in other comprehensive income as an effective part of the hedging relationship (prior year period: EUR –5.9 million), while gains and losses of EUR 8.0 million (prior year period: EUR 32.3 million) were reclassified and recognised through profit or loss.

The reserve for hedging costs contains changes in the fair value and in the forward component from hedging transactions that are recognised in other comprehensive income and amounted to EUR –6.1 million as at 30 June 2019 (31 December 2018: EUR –7.7 million). In the first half of 2019, the resulting gains and losses totalling EUR –19.6 million were recognised in other comprehensive income (previous year: EUR –15.3 million), while gains and losses of EUR 15.3 million (previous year: EUR 12.7 million) were reclassified and recognised through profit or loss.

The translation reserve of 474.3 Mio. EUR (31 December 2018: EUR 439.7 million) includes differences from currency translation. The differences from currency translation of EUR 34.6 million recognised in other comprehensive income in the first half of 2019 (prior year period: EUR 168.8 million) were due to the translation of the financial statements of Hapag-Lloyd AG and its subsidiaries into the reporting currency. Currency translation differences are recognised in the statement of comprehensive income under the items that are not reclassified and recognised through profit or loss, because the currency translation effects of subsidiaries with the same functional currency as the parent company cannot be recycled.

The difference between the relevant non-controlling interests and the expected purchase price at the time the put option was entered is recognised in the reserve for put options on non-controlling interests. Changes in the value of the financial liability are subsequently recognised through profit or loss in the interest result. As at 30 June 2019, the reserve for put options on non-controlling interests amounted to EUR –0.5 million and was therefore the same as at year-end 2018.

### Provisions

As part of the Hapag-Lloyd Group's acquisition of the UASC Group on 24 May 2017, the Executive Board of the Hapag-Lloyd Group decided to implement a restructuring plan in June 2017. The plan comprises implementation of the integration and the Group's new organisational structure, which resulted directly from this. The provision of EUR 6.1 million in place as at 31 December 2018 was utilised in the amount of EUR 1.7 million in the first half of 2019.

In compliance with IAS 37, provisions were made in the first half of the year for potential expenses from damage to ships, freight and equipment as well as for rescue costs. The significant claims amount to a provision of EUR 28.6 million. Other assets were capitalised for associated virtually secure recourse claims against insurance agencies.

### Financial instruments

The carrying amounts and fair values of the financial instruments as at 31 December 2018 are presented in the table below.

million EUR	Carrying amount		Fair value
	Total	thereof financial instruments	Financial instruments
<b>Assets</b>			
Trade accounts receivable	1,217.7	1,217.7	1,217.7
Other assets	311.3	230.6	230.6

Other liabilities	165.3	99.4	99.4
Liabilities from put options <sup>3</sup>	1.7	1.7	1.8
Contract liabilities	260.3	–	–

<sup>1</sup> The market values of the non-designated time values and forward components, the changes of which are recognised in the reserve for costs of hedging, are also recognised here.

<sup>2</sup> Part of financial debt

<sup>3</sup> Part of other liabilities

The carrying amounts and fair values of the financial instruments as at 30 June 2019 are presented in the table below.

million EUR	Carrying amount		Fair value
	Total	thereof financial instruments	Financial instruments
<b>Assets</b>			
Trade accounts receivable	1,272.8	1,272.8	1,272.8
Other assets	360.7	256.8	256.8
Derivative financial instruments (FVTPL)	6.4	6.4	6.4
Embedded derivatives	6.4	6.4	6.4
Derivative financial instruments (Hedge accounting) <sup>1</sup>	12.4	12.4	12.4
Currency forward contracts	1.3	1.3	1.3
Commodity options	11.0	11.0	11.0
Cash and cash equivalents	452.7	452.7	452.7
<b>Liabilities</b>			
Financial debt	5,466.3	5,466.3	5,545.2
Liabilities from lease contracts	1,214.7	1,214.7	–
Trade accounts payable	1,768.8	1,768.8	1,768.8
Derivative financial instruments (FVTPL)	8.5	8.5	8.5
Interest rate swaps	8.5	8.5	8.5
Derivative financial liabilities (Hedge accounting) <sup>1</sup>	53.5	53.5	53.5
Currency forward contracts	35.2	35.2	35.2
Interest rate swaps	18.4	18.4	18.4
Other liabilities	119.8	87.4	87.4
Liabilities from put options <sup>2</sup>	1.8	1.8	1.8
Contract liabilities	326.1	–	–

<sup>1</sup> The market values of the non-designated time values and forward components, the changes of which are recognised in the reserve for costs of hedging, are also recognised here.

<sup>2</sup> Part of other liabilities

The derivative financial instruments were measured at fair value.

Other assets include securities with a fair value of EUR 1.9 million (31 December 2018: EUR 2.2 million) that are allocated to level 1 of the fair value hierarchy, as their prices are quoted on an active market.

The liabilities from the bond included within financial debt that, due to the quotation on an active market, are also allocated to level 1 of the fair value hierarchy have a fair value of EUR 473.2 million (31 December 2018: EUR 909.9 million; includes financial liabilities of 2 bonds).

Financial debt also includes a liability to reflect a contingent consideration payable for a business combination for which a fair value at level 3 of EUR 0.7 million was calculated.

The put options recognised under other liabilities, whose fair value was calculated at EUR 1.8 million, also belong to level 3 of the fair value hierarchy.

The fair values indicated for the remaining financial debt and the derivative financial instruments are assigned to level 2 of the fair value hierarchy. This means that the instruments are measured using methods which are based on factors derived directly or indirectly from observable market data.

As a rule, the carrying amounts of all other level 2 financial instruments are a suitable approximation of the fair values.

There were no transfers between levels 1, 2 and 3 in the first 6 months of 2019.

### Financial debt and lease liabilities

The following tables contain the carrying amounts for the individual categories of financial debt and lease liabilities.

#### Financial debt and lease liabilities

million EUR	30.6.2019	31.12.2018
Liabilities to banks <sup>1</sup>	4,527.3	4,483.5
Bonds	458.1	923.7
Other financial debt	480.9	511.7
Lease liabilities	1,214.7	99.0
<b>Total</b>	<b>6,681.0</b>	<b>6,017.9</b>

<sup>1</sup> This includes liabilities which result from sale and leaseback transactions that are accounted for as loan financings in accordance with IFRS 16 in conjunction with IFRS 15 (up to 31 December 2018 in accordance with SIC-27), as the liabilities are against special purpose entities, which are established and financed by banks.

**Financial debt and lease liabilities by currency**

million EUR	30.6.2019	31.12.2018
Denoted in USD (excl. transaction costs)	5,689.3	4,714.6
Denoted in EUR (excl. transaction costs)	808.7	1,118.2
Denoted in SAR (excl. transaction costs)	159.3	194.1
Denoted in other currencies (excl. transaction costs)	47.1	–
Interest liabilities	34.7	49.8
Transaction costs	–58.2	–58.8
<b>Total</b>	<b>6,681.0</b>	<b>6,017.9</b>

On 31 January 2019, the Executive Board of Hapag-Lloyd AG decided to conduct an early partial repayment of EUR 170.0 million of its bond due in 2022. On 14 June 2019, the Board resolved to completely repay the bond, with a remaining amount of EUR 280.0 million. Both the partial repayment made on 11 February 2019 and the repayment of the residual amount made on 24 June 2019 occurred at a repayment rate of 103.375%. The bond was issued in February 2017 with a nominal value of EUR 450.0 million and a coupon of 6.75%.

In the first half of the financial year, Hapag-Lloyd conducted 3 container sale and leaseback transactions to refinance investments in reefer and standard containers (Japanese operating leases [JOLs]). The lease agreements include substantial purchase options that entitle Hapag-Lloyd to repurchase the containers after 7 years. As a result, the transactions are recognised as loan financing in accordance with the provisions of IFRS 16 in conjunction with IFRS 15. The financing volume has a total amount of EUR 113.3 million.

Furthermore, sale and leaseback transactions were conducted for the refinancing of 2 containers (Japanese operating leases [JOLs]). The lease agreements include substantial purchase options that entitle Hapag-Lloyd to repurchase the containers after 8 or 7.5 years, respectively. The refinancing volume associated with these transactions has a total amount of EUR 168.8 million. The loan liabilities of EUR 115.2 million previously associated with these two ships were repaid in full.

The Hapag-Lloyd Group had total available credit facilities of EUR 478.8 million as at 30 June 2019 (31 December 2018: EUR 475.9 million).

## OTHER NOTES

### Legal disputes

On 25 February 2019 the U. S. Department of Justice Antitrust Division (“DoJ”) confirmed the official end of the investigation against Hapag-Lloyd. The investigation has been closed without charges against Hapag-Lloyd AG, its affiliates or any of its current or former employees. This investigation was related to subpoenas which were served to company representatives in San Francisco on 15 March 2017, ordering them to attend a hearing by the DoJ.

There have been no other significant changes regarding legal disputes in comparison with the 2018 consolidated financial statements.

As at the reporting date, there was EUR 95.5 million in contingent liabilities from tax risks not classified as probable (31 December 2018: EUR 107.2 million).

### Other financial obligations

The Group’s other financial obligations as at 30 June 2019 essentially relate to purchase obligations

- for investments in containers amounting to EUR 178.0 million,
- for investments in exhaust gas cleaning systems (EGCS) on container vessels amounting to EUR 49.6 million,
- for investments in conversion to the use of liquid gas on container vessels amounting to EUR 18.3 million,
- for investments in the use of low sulphur fuel on container vessels amounting to EUR 10.6 million,
- for investments in equipment for ballast water treatment on container vessels amounting to EUR 6.2 million and
- for other investments on container vessels, notably to ensure winter operation and the on-shore power grid, totalling EUR 3.4 million.

The increase in the open purchase order commitment for investments in containers compared to 31 December 2018 is attributable in particular to an order for reefer containers amounting to EUR 144.8 million.

The Group’s other financial obligations as at 31 December 2018 related to purchase obligations for investments in containers amounting to EUR 33.4 million and for investments in exhaust gas cleaning systems (EGCS) on container vessels amounting to EUR 11.2 million.

**Related party disclosures**

In carrying out its ordinary business activities, the Hapag-Lloyd Group maintained indirect or direct relationships with related companies and individuals and with its own subsidiaries included in the consolidated financial statements. These supply and service relationships are transacted at market prices. No significant changes in these supply and service relationships have arisen since 31 December 2018. The contractual relationships with related parties described in the remuneration report from page 127 onwards of the 2018 annual report remain essentially unchanged, but are not of material importance to the Group.

**SIGNIFICANT EVENTS AFTER THE BALANCE SHEET DATE**

There were no significant events after the balance sheet date which would have led to a material change in the net asset, financial and earnings position of the Hapag-Lloyd Group.
