# Company Presentation May 2016

### Infineon at a glance

#### **Business Segments**

- Automotive
- Industrial Power Control
- Power Management & Multimarket
- Chip Card & Security

Strong technology portfolio with more than 25,000 patents and patent applications (as of Sep. 2015)

#### **Employees**

About 35,400 employees worldwide

(as of Sep. 2015)

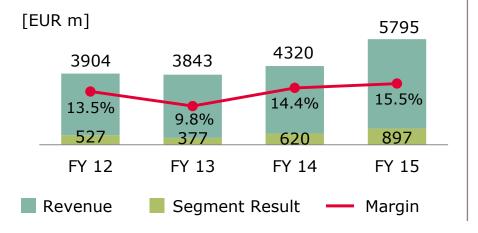

Americas 3,682 employees

Europe 14,533 employees

Asia/Pacific 17,209 employees

**34** R&D locations **19** manufacturing locations

#### **Financials**

#### **Market Position\***

September 2015

\*Details see page 8

Smart card
ICs

# 2

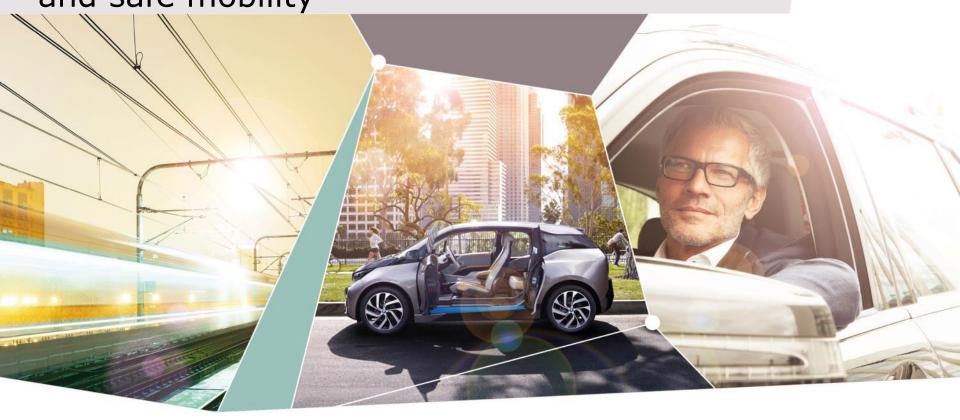

IHS Inc. July 2015

Infineon enables eco-friendly, connected and safe mobility

#### **Applications**

Efficient powertrain for combustion, electric and hybrid vehicles, charger station for electric vehicles, car safety, driver assistance systems, chassis and comfort electronics, authentication, mobile security, traction

Infineon enables efficient generation, transmission and conversion of electrical energy

#### **Applications**

Energy transmission and conversion, renewable energy generation, home appliances, power tools, power management (adapters, chargers, power supplies), LED lighting systems, mobile devices, industrial drives, industrial vehicles

## Infineon enables security in the connected world

#### **Applications**

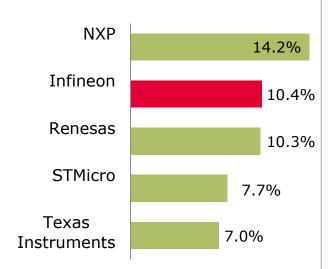

Internet of Things, Industry 4.0, mobile security, embedded security, trusted computing, machine to machine, (mobile) payment, SIM applications, transport ticketing, government identification

## Top positions in all major product categories

## Automotive semiconductors

total market in CY 2015: \$27.4bn

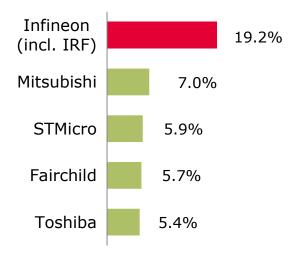

Automotive semiconductors incl. semiconductor sensors

Source: Strategy Analytics, April 2016

## Power semiconductors

total market in CY 2014: \$16.2bn

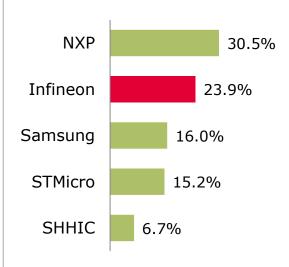

Discrete power semiconductors and power modules

Source: IHS Inc., September 2015

#### **Smart card ICs**

total market in CY 2014: \$2.63bn

Microcontroller-based smart card ICs

Source: IHS Inc., July 2015

## Leadership in system understanding will foster future growth and profitability

#### Competitive advantages

System leader in Automotive

#1 and technology leader in Power

Leader in Security Solutions

Average-cycle financial targets

Revenue Growth:

~8%

Segment Result Margin:

~15%

Investment-to-Sales:

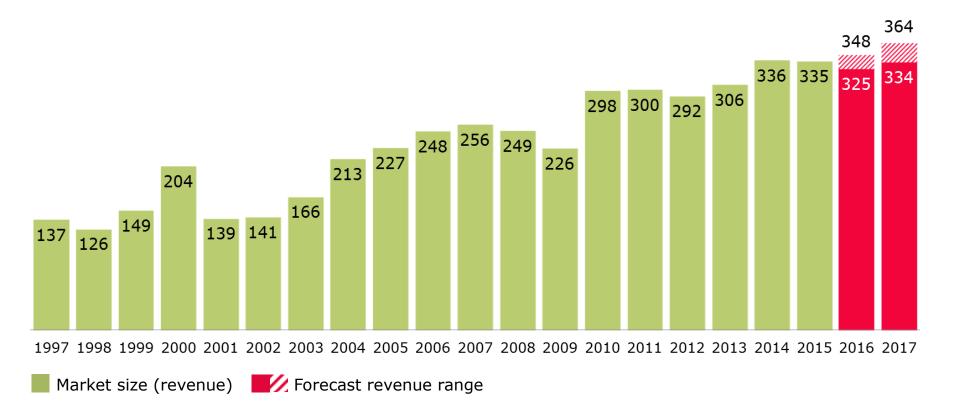

~13%

## The outlook for the global semiconductor market is cautious

#### **Global semiconductor market**

in billion \$

Source: WSTS for historical data. Forecast: Ø of WSTS, IHS, Gartner, IC Insights; last update 28 April 2016

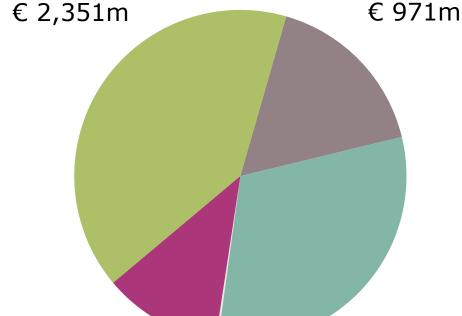

### Financial Year 2015: Revenue Split by Segment

#### FY 2015 Revenue: € 5,795m\*

#### **Automotive**

## **Industrial Power Control**

## Chip Card & Security

## Power Management & Multimarket

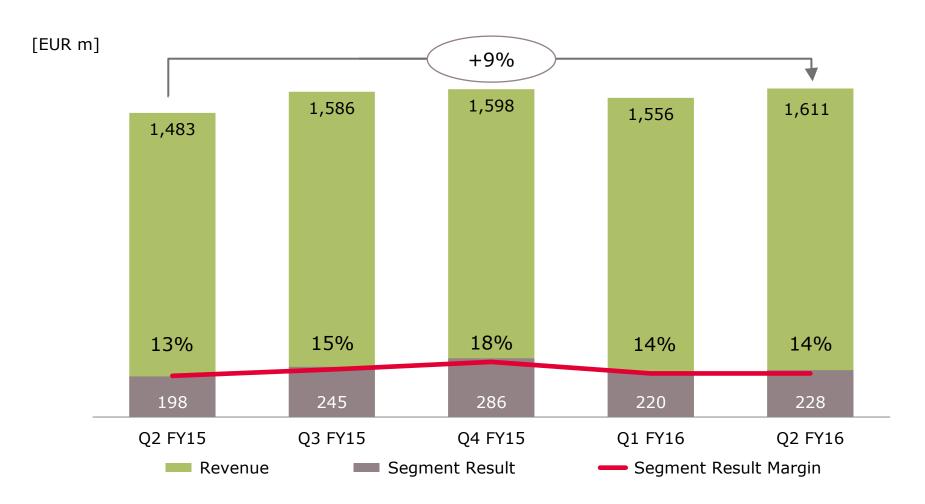

<sup>\*</sup> Including International Rectifier from 13 January 2015 to 30 September 2015

<sup>\*\*</sup> Other Operating Segments; Corporate & Eliminations

### Q2 FY 2016 Revenue and Segment Result\* Growth

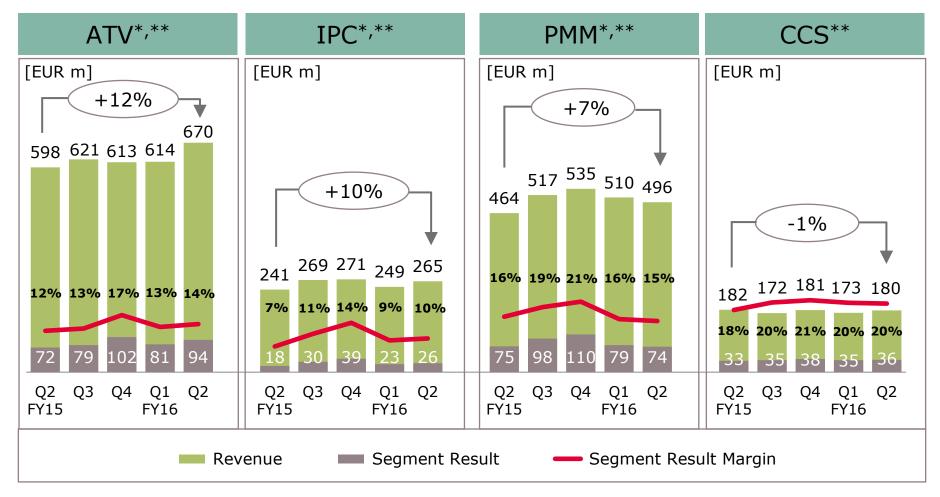

<sup>\*</sup> Including International Rectifier from 13 January 2015.

## Q2 FY 2016: Revenue, result and margin per segment

<sup>\*</sup> Including International Rectifier from 13 January 2015

<sup>\*\*</sup> The business with XMC industrial microcontrollers developed by ATV and CCS was transferred to PMM and IPC with effect from 1 October 2015. Previous year's figures have been adjusted accordingly

### Tight customer relationships are based on system know-how and app understanding

#### **ATV IPC PMM** CCS

#### **EMS partners** Distribution partners

#### Product range

### Automotive (ATV)

- 32-bit automotive microcontrollers for powertrain, safety and driver assistance systems
- Discrete power semiconductors
- ) IGBT modules
- Magnetic and pressure sensors
- Power ICs
- > Radar
- Transceiver (CAN, LIN, Flex Ray<sup>TM\*</sup>)
- Voltage regulators

## Industrial Power Control (IPC)

- ) Bare die business
- Discrete IGBTs
- Driver ICs
- IGBT modules (highpower, medium-power, low-power)
- IGBT module solutions incl. IGBT stacks

### Power Management & Multimarket (PMM)

- Control ICs
- Customized chips (ASICs)
- Discrete low-voltage and high-voltage power transistors
- GPS low-noise amplifier
- Industrial microcontrollers
- Low-voltage and highvoltage driver ICs
- MEMS and ASICs for silicon microphones
- > RF antenna switches
- RF power transistors
- TVS (transient voltage suppressor) diode

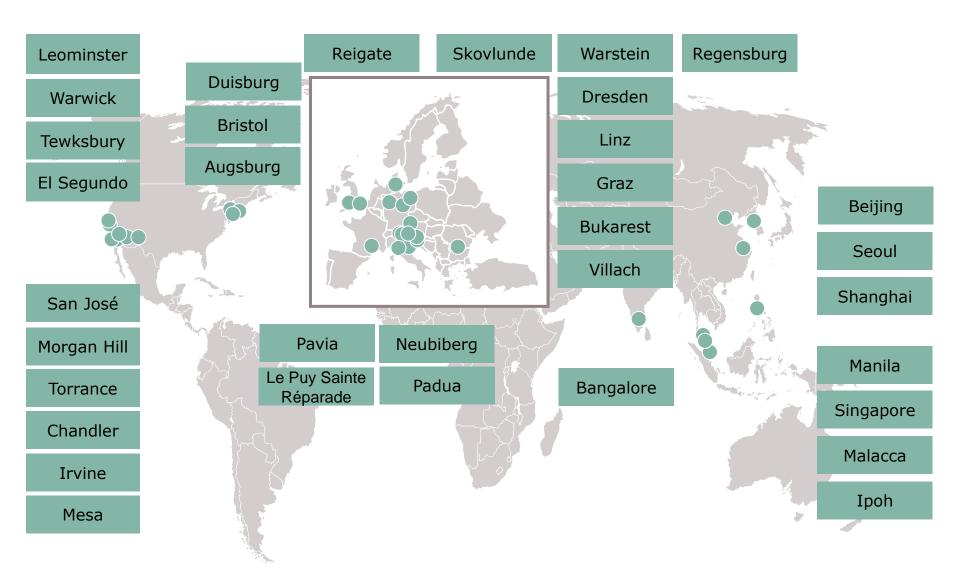

## Chip Card & Security (CCS)

- Contact-based security controllers
- Contactless security controllers
- Dual-interface security controllers (contactbased and contactless)

<sup>\*</sup>FlexRay is a trademark licensed by FlexRay Consortium GbR

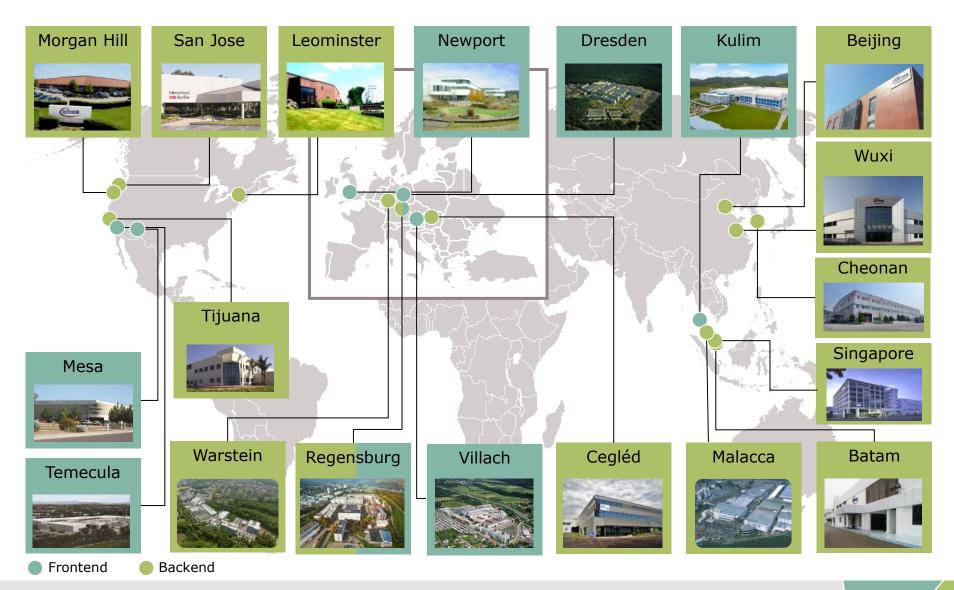

### Our global R&D network

## Worldwide manufacturing sites frontend and backend

### Our global sales network

### Corporate Social Responsibility (CSR)

- CSR comprises our voluntary commitment in: Human Resources Management and Human Rights, Environmental Sustainability, Occupational Safety and Health, Corporate Citizenship\*, CSR Supply Chain Management as well as Business Ethics.
- Infineon entered the **UN Global Compact** as one of the first semiconductor companies already in 2004 and is voluntary committed to the 10 Principles.
- Infineon is for the 6th time listed in the Sustainability Yearbook.
- Infineon is continuously listed in the **Dow Jones Sustainability**Index since 2010 and for the first time in the **Dow Jones**Sustainability World Index in 2015 and thus is among the top 10% of the most sustainable companies in the world.
- Infineon does not compromise in human rights and business ethics.
- Infineon's products and solutions as well as our efficient resources management enable a significant net ecological benefit.

<sup>\*</sup>social engagement of companies.

## Corporate Social Responsibility We are excellent in resources efficiency

#### At Infineon, less is more

About **40% less** electricity consumed per square centimeter produced wafer than the global average

About **21% less** water consumed per square centimeter produced wafer than the global average

About **50% less** waste generated per square centimeter produced wafer than the global average

We use resources much more efficient in our production processes than the global average of the semiconductor industry.

Basis for the calculations are the square centimeters processed wafer area in the front-end production and consumptions according to WSC definition.

The information and data given in this document apply to the Infineon Technologies group, except for International Rectifier companies.

## Corporate Social Responsibility We create a net ecologic benefit

#### **Emission Reduction enabled by our products and solutions**

around
1.6
million tons
CO<sub>2</sub> equivalents

CO<sub>2</sub> burden<sup>1)</sup>

Ratio around 1:23

around
36.5
million tons
CO<sub>2</sub> equivalents

CO<sub>2</sub> savings<sup>2)</sup>

## Net ecological benefit: CO<sub>2</sub> emissions reduction around 35 million tons

The information and data given in this document apply to the Infineon Technologies group, except for International Rectifier companies.

<sup>1)</sup> This figure considers manufacturing, transportation, function cars, flights, materials, chemicals, water/wastewater, direct emissions, energy consumption, waste, etc. and is based on internally collected data and externally available conversion factors. All data relate to the 2015 fiscal year.

<sup>2)</sup> This figure is based on internally established criteria, which are explained in the explanatory notes. The figure relates to the calendar year 2014 and considers the following fields of application: automotive, LED, PC power supply, renewable energy (wind, photovoltaic), drives as well as induction cookers.  $CO_2$  savings are calculated on the basis of potential savings of technologies in which semiconductors are used. The  $CO_2$  savings are allocated on the basis of Infineon market share, semiconductor content and lifetime of technologies concerned, based on internal and external experts' estimations. Despite the fact that  $CO_2$  footprint calculations are subject to imprecision due to the complex issues involved, the results are nevertheless clear.
