Disclaimer:

This presentation contains forward-looking statements about the business, financial condition and earnings performance of the Infineon Group.

These statements are based on assumptions and projections resting upon currently available information and present estimates. They are subject to a multitude of uncertainties and risks. Actual business development may therefore differ materially from what has been expected.

Beyond disclosure requirements stipulated by law, Infineon does not undertake any obligation to update forward-looking statements.

Revenue Split by Division

Q2 FY 2012 revenue: EUR 986m

* Other Operating Segments;
Corporate & Eliminations.

+4% Revenue Growth; Stable Segment Result Margin

[EUR m]	Q2 FY11	Q1 FY12	Q2 FY12
Revenue	994	946	986
Segment Result	202	141	144
SR Margin	20.3%	14.9%	14.6%
Net Income*	572	96	111
Investment	164	294	192
FCF from cont. operations	13	-234	-10
Gross Cash	2,691	2,337	2,190
Net Cash	2,335	2,068	1,927

* Net Income includes „income from discontinued operations, net of income taxes“ in Q2 FY11 EUR 399m, in Q1 FY12 EUR -8m and in Q2 FY12 EUR 2m.

Tight Customer Relationships are Based on System Knowhow and App Understanding

New Era: Multiple Factors Driving Demand for Power Semiconductors

'90 – '10

'10 – '30

Changes

- Electrification of powertrain fuels demand for high-power semis in cars and doubles silicon content.

- Shift towards renewable energies requires orders of magnitude more high-power semis per MW of power generated.

- Higher efficiency in power conversion lowers CO₂, material and electricity costs.

- Stronger demand for goods containing power semis due to faster increase in standard of living in BRIC countries.

Healthy Growth in Global Car Production Expected

Global car production (cars ≤ 6t)

[units m]

CAGR₍₁₁₋₁₅₎ = 5.5%

Automotive: Infineon Biggest Market Share Gainer Amongst All Players in 2011

Worldwide Automotive Semiconductor Ranking for 2011

1. Renesas	13.8%	↓	-0.3%-pt
2. Infineon	9.8%	↑	+1.0%-pt
3. STM	8.7%	↑	+0.4%-pt
4. Freescale	7.9%	↓	-0.5%-pt
5. NXP	6.4%	↓	-0.4%-pt
6. Bosch	5.8%	↑	+0.2%-pt
7. TI (incl. NSM)	4.7%	→	0%-pt

Infineon
■ strengthened world's #2 position;
■ rose from #8 to #4 position in Japan.

Europe

1. Infineon	14.7%
2. STM	11.3%
3. Bosch	9.4%
4. Freescale	8.7%
5. NXP	8.2%
6. Renesas	8.0%
7. TI	6.8%
8. ON Semi	3.0%

APAC & others*

1. STM	10.1%
2. Infineon	9.0%
3. Renesas	7.5%
4. Freescale	7.4%
5. NXP	7.3%
6. Bosch	5.7%
7. Toshiba	2.9%
8. TI	2.6%

North America

1. Freescale	13.8%
2. Infineon	8.5%
3. STM	8.0%
4. Renesas	7.5%
5. NXP	6.7%
6. TI	6.0%
7. Bosch	3.7%
8. ON	3.3%

Japan

1. Renesas	35.1%
2. Toshiba	13.0%
3. Fujitsu	3.9%
4. Infineon	3.8%
5. Rohm	3.6%
6. STM	3.6%
7. ON	3.1%
8. Sanken	2.9%

Mild-Hybrid Vehicles: New Level of Efficiency Reached by 40µm / 400V IGBT Module

battery voltage

Today:
100 – 400V

Next generation:
150V

breakdown voltage

Today:
650V

Next generation:
400V

wafer thickness

Today:
70µm

Next generation:
40µm

HybridPACK™ 1 400V

- $P_{dissipation} \sim thickness_{wafer}^2$
i.e. power dissipation dwindles quadratically by reduction of wafer thickness.

- Ramp-up of “HybridPACK™ 1 400V” scheduled for 2014.

Infineon Security Chips for Europe's Biggest Contactless Banking Card Project "girogo"

girogo key facts

- 17 April 2012: the German Banking Industry Committee (Deutsche Kreditwirtschaft) launched a new banking card with "girogo" functionality.
- This banking card allows contactless payment without PIN or signing. In addition, it also supports the well-established contact-based payment methods.
- Infineon is the world's first chip manufacturer to meet both the high German Banking Industry Committee security guidelines and the contactless performance requirements of the new banking cards in Germany.
- The German Banking Industry Committee decided for Infineon's 78 family of security microcontrollers using the "Integrity Guard" digital security technology.
- Within the next three to four years, 45m girogo banking cards will be issued.

INTEGRITY GUARD

Guidance for Q3 and FY 2012

Outlook Q3 FY12*
(compared to Q2 FY12)

Outlook FY 2012*
(compared to FY 2011)

Revenue

Revenue to be broadly flat quarter-on-quarter.

Low single-digit percentage decline.

previously: Mid single-digit percentage decline.

Segment Result Margin

Broadly flat.

Mid-teens percentage.

previously: Low-to-mid teens percentage.

* This outlook is based on an assumed US-dollar-to-Euro exchange rate for the remainder of the year in line with the average of the first half of the year.

Superior Growth and Profitability Allow Sustained Investments Over the Cycle

Superior growth and profitability

- Focus on secular growth drivers, e.g. renewables, e-mobility, energy efficiency.
- Leading market share and competitive strengths.
- Financial targets (on average over the cycle):
 - 10% growth p. a. and
 - 15% Segment Result margin.

Sustained investments for future success

- Counter-cyclical investments, selling and R&D to enable further share gains.
- Investments secure capacity for future growth and competitive advantage.
- 300mm power discretes; 200mm, quality, innovation, automation etc.

Strong returns

- Value creation:
RoCE well in excess of our capital cost with 27% in Q1 FY12 and 25% in Q2 FY12.
- Capital returns through dividend payments, share buyback, and CB 2014 buyback.
- Aggregate capital returns since Q1 FY11 amount to more than EUR 500m.

ENERGY EFFICIENCY MOBILITY SECURITY

Innovative semiconductor solutions for energy efficiency, mobility and security.

4 Reasons for Sustainable Profitability –

High Barriers to Entry

Long product life cycles

Courtesy: Siemens

- For many markets we address, deliveries of semis need to be ensured for very long periods of time:
 - for car industry: 7 to 24 years;
 - for train industry: about 15 years.

System knowhow and understanding

Courtesy: BMW

- Both deep and wide know-how and understanding of our customers' applications needed for making best in class solutions:
 - e.g. HEV/EV needs both automotive and industrial expertise.

Strong quality and reliability req's

- Products need to reliably perform well in the field over longer periods of time:
 - airbag reliability required as long as the car is in use;
 - wind turbines should function 30 years.

#2 Semiconductors – Core Enablers of Innovation and Higher Functionality

Energy Efficiency

- **Power supplies**
More advanced power semiconductors allow smaller, denser, lighter and more efficient power supplies.
- **VSD**
More precise and efficient RPM-control versus mechanical transmission.

Mobility

- **Recuperation**
Implemented in trains for years; brought to cars by the advent of HEV/EVs.
- **Power steering**
EPS is replacing hydraulic-mechanical power steering allowing more flexibility in car design and less power consumption.

Security

- **Identification**
Chip-based passports and national ID cards allow much higher level of security compared with paper-only ID cards.
- **Brand protection**
Chip-based authentication of accessories, e.g. batteries, cartridges.

#3 Semis Represent a Negligible Part of the Value of the End Product

Example 1: mid-range car

€25,000

Semi BoM:
€250

1.0%
of
product
value

Example 2: high-speed train

€10,000,000

Semi BoM:
€100,000

1.0%
of
product
value

#4 Infineon's Core Competencies – Power Semiconductors and eControl

Design and manufacturing of power semis tightly coupled

Core competence power

- Thin-wafer technology
- Super-junction MOSFETs
- Silicon-Carbide (SiC)
- IGBT module packaging

Core competence eControl

- Automotive real-time 32-bit microcontroller (TriCore™) and multi-core design (AURIX™).
- Industry microcontroller with premium peripheral functions (XMC4000 family).
- Low-power security controller.

IMM Split Into Two New Divisions as of 1 January 2012

Industrial & Multimarket (IMM)

Industrial Power Control (IPC)

- Industry-oriented applications
- Drives and traction
- Home appliances
- Renewable energies (wind, solar)

- IGBT modules
- Module solutions (stacks)
- Discrete IGBTs
- Driver ICs

Applications

Power Management & Multimarket (PMM)

- Power conversion and RF applications
- Power supplies computer and server
- Lighting
- Cellular infrastructure

Products

- Power MOSFETs, Power ICs, DPM*
- RF power devices
- LED drivers
- Small signal components
- ASICs

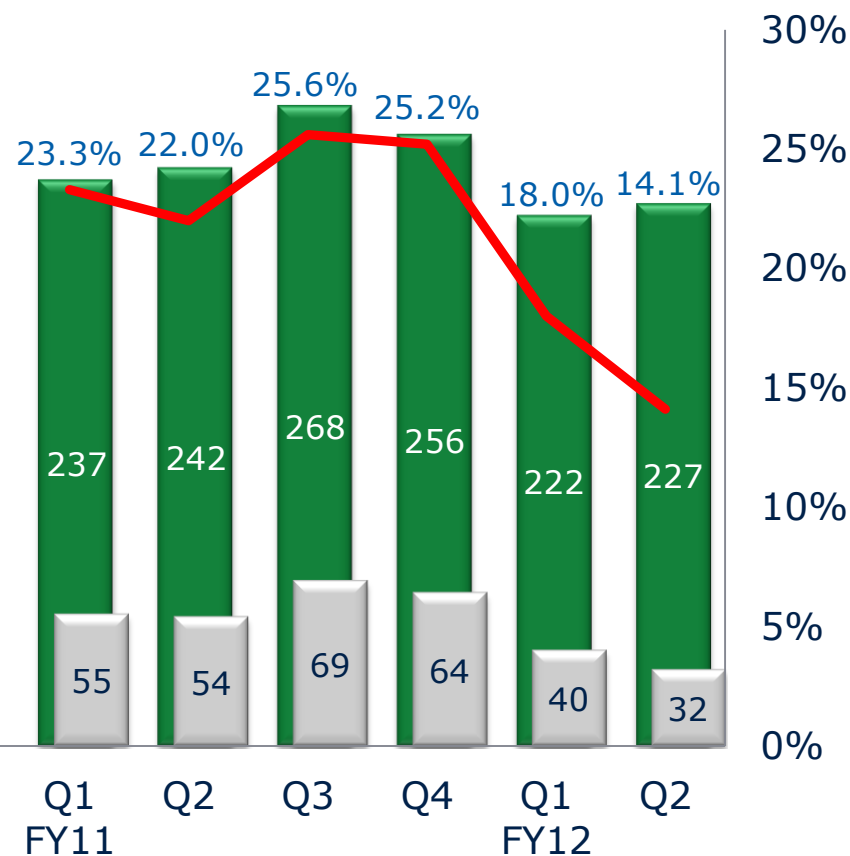

* DPM = digital power management

Investments Remain High to Exploit Growth Potential

Investments*

D&A

[EUR m]

Guidance for investments:

- FY13: below investments in FY12
- beyond FY13: 10 – 15% of sales

Guidance for D&A:

- FY13: increase compared to FY12
- beyond FY13: 10 – 15% of sales

* For definition please see page 36 in appendix.

High Gross and Net Cash Position Maintained

Liquidity Development

- Gross cash decreased due to dividend payments of EUR 130m, negative Free Cash Flow and debt reduction of EUR 7m. Net cash impact therefore lower.
- No buyback of convertible bond or shares during the quarter. But put options over 9m shares lapsed with EUR 2.7m premium received.

Value Creation of Infineon by Sustainably High RoCE Above WACC

Notes

Investments =

'Purchase of property, plant and equipment'
+ 'Purchase of intangible assets and other assets' *incl. capitalization of R&D expenses*

Working Capital =

('Total current assets'
– 'Cash and cash equivalents'
– 'Financial investment'
– 'Assets classified as held for sale')
– ('Total current liabilities'
– 'Short term debt and current maturities of long-term debt'
– 'Liabilities classified as held for sale')

DOI (inventory days; quarter-to-date) =
('Net Inventories' / 'Cost of goods sold') * 90

DSO (days sales outstanding; quarter-to-date) =
('Trade accounts receivables (net)' / 'revenue') * 90

DPO (days payables outstanding; quarter-to-date) =
('Trade payables' / ['Cost of goods sold' + 'Purchase of property, plant and equipment']) * 90

Infineon Has a Long Track Record in Responsibility and Sustainability

UN Global Compact Initiative

- As one of the first semiconductor companies worldwide, Infineon joined the Global Compact Initiative of the United Nations in 2004.

Dow Jones Sustainability Index

- Infineon is currently Europe's one and only semiconductor company member in the Dow Jones Sustainability Indexes.

Certifications

- Based on our efforts for resources management, safety and health standards, Infineon received the EN ISO 14001 and OHSAS 18001 multi-site certification.
