

Rheinmetall posts strong start to year

- Consolidated sales grow by 3.5% to €1,405 million
- Operating result rises by €53 million to €87 million
- Operating margin up significantly year-on-year at 6.2%
- Operating free cash flow improves by €129 million to €-59 million
- Outlook for 2021 confirmed and adjusted to new reporting structure

Significant events in Q1/2021

Strategic realignment of the Group

As a result of a strategic realignment of the Group, the Rheinmetall AG Executive Board defined and announced a new Group structure in February 2021. In this context, the previous organizational separation into the Automotive and Defence sectors was discontinued. The new structure is made up of five divisions and aims in particular to promote the transfer of technology between the individual parts of the Group and encourage the focus on future-driven technologies and business areas with large potential for a sustained increase in value. The strategic realignment thus results in the following Group structure:

The former Pistons unit will be continued as a non-core business. In the context of aligning the product portfolio, Rheinmetall is currently examining the possibility of an acquisition by potential partners.

Reporting on the business performance and the presentation of key financial figures for the first quarter of 2021 is based on the new Group structure. The figures for the comparative period of the previous year have been restated accordingly.

In addition to the key figures of order intake and order backlog, the key figure of "booked business" is reported for the first time in the report on the first quarter of 2021 for the Sensors and Actuators division, the Materials and Trade division, and the Pistons non-core business. Booked business shows the future sales potential from customer projects based on written agreements and framework contracts with customers, although these do not yet represent binding customer orders.

Change

Sales and operating result up significantly year-on-year

Consolidated sales were increased by ≤ 47 million or 3.5% year-on-year to $\leq 1,405$ million in the first quarter of 2021 (previous year: $\leq 1,358$ million). Adjusted for currency effects, sales growth was 5.1%. Whereas sales in the same quarter of the previous year had already been impacted by the cyclical weaker development of the automotive markets and declining production in automotive manufacturing as a result of the emerging coronavirus pandemic, now the ongoing economic recovery of the automotive industry contributed to the rise in sales in the first quarter of the current fiscal year. The increase in sales was also attributable to ammunition deliveries that had originally been scheduled for the second quarter of 2021 but were moved forward by the customers.

Sales by region € million

| | Q1/2021 | Q1/2020 |
|---------------------------|--|--|
| Rheinmetall Group | 1,405 | 1,358 |
| 1 Germany | 429 | 422 |
| 2 Other Europe | 412 | 429 |

| | 1 Germany 2 Other Europe 3 North and South America 4 Asia | Rheinmetall Group1,4051 Germany4292 Other Europe4123 North and South America1584 Asia290 |

Rheinmetall posted a significant improvement in the Group operating result in the first quarter of 2021. At $\in 87$ million, the result was up significantly by $\in 53$ million compared to the previous year's figure of $\notin 34$ million. In addition to the positive sales performance, this improvement was particularly due to cost reduction measures that were initiated by the management back in 2020 to counter the negative effects of the coronavirus pandemic. The operating margin of 6.2% exceeded the previous year's level of 2.5% by 370 basis points.

Earnings per share were increased by ≤ 0.84 year-on-year to ≤ 1.14 in the first quarter of 2021 (previous year: ≤ 0.30).

Net assets and financial position

Compared to December 31, 2020, the Rheinmetall Group's total assets grew by ≤ 206 million to $\leq 7,473$ million as of March 31, 2021. This increase was mainly due to the rise in inventories and trade receivables. At 39%, the share of total assets attributable to non-current assets as of March 31, 2021 was similar to the level at the end of fiscal 2020 (December 31, 2020: 40%).

The equity ratio as of the end of the first quarter increased compared to the end of fiscal 2020 to 29.7% (December 31, 2020: 28.2%). Net financial liabilities amounted to \notin -77 million as of the end of the first quarter, whereas net liquidity of \notin 4 million had been reported as of December 31, 2020. This change was primarily due to the development of operating free cash flow.

Positive development of operating free cash flow in first quarter

Operating free cash flow improved by ≤ 129 million or 69% year-on-year to ≤ -59 million in the first quarter of 2021. This positive development mainly resulted from the improved earnings situation (+ ≤ 40 million), a comparatively lower increase in working capital (+ ≤ 69 million) and lower allocations to the contractual trust agreement (CTA) in Germany (+ ≤ 17 million).

Business performance of the Rheinmetall Group Segment performance

Vehicle Systems

| | | Q1 2021 | Q1 2020 | Change |
|--------------------------|-----------|---------|---------|---------|
| Sales | € million | 409 | 446 | -38 |
| Order intake | € million | 178 | 136 | 42 |
| Order backlog (March 31) | € million | 9,224 | 6,214 | 3,010 |
| Operating result | € million | 25 | 35 | -10 |
| Operating result margin | in % | 6.1 | 7.9 | -1.8%-P |
| Capital expenditure | € million | 15 | 19 | -3 |
| Operating free cash flow | € million | 79 | (21) | 100 |
| | | | | |

At \leq 409 million, sales in the Vehicle Systems division were down \leq 38 million or 8.4% compared to the same quarter of the previous year. This was particularly due to the expiration of two major projects. By contrast, the order intake rose – mainly due to binding call-offs from existing framework agreements relating to logistical vehicles – by \leq 42 million or 30% year-on-year to \leq 178 million. The order backlog is still at a high level of \leq 9.2 billion.

Due to the decline in sales, the operating result was down on the previous year's level at ≤ 25 million (previous year: ≤ 35 million). The operating margin was 6.1% (previous year: 7.9%). Operating free cash flow was up significantly year-on-year at ≤ 79 million (previous year: ≤ -21 million). This change was particularly due to the reduction of working capital in the first three months of 2021, whereas in the same period of the previous year working capital had increased.

| | | Q1 2021 | Q1 2020 | Change |
|--------------------------|-----------|---------|---------|---------|
| Sales | € million | 221 | 167 | 54 |
| Order intake | € million | 228 | 328 | -100 |
| Order backlog (March 31) | € million | 2,758 | 2,396 | 362 |
| Operating result | € million | 18 | (16) | 33 |
| Operating result margin | in % | 8.0 | (9.3) | 17.3%-P |
| Capital expenditure | € million | 7 | 6 | 1 |
| Operating free cash flow | € million | (56) | (72) | 16 |

Weapon and Ammunition

The Weapon and Ammunition division generated sales of ≤ 221 million in the first quarter, up ≤ 54 million or 32% on the figure for the previous year. After a weaker prior-year quarter, this significant increase in sales was partly due to delivery dates for ammunition that had originally been scheduled for the second quarter of 2021 were moved forward by the customers. In addition, the lifting of export restrictions contributed to this positive development.

At ≤ 228 million, the order intake was down by ≤ 100 million or 30% compared to the high figure from the previous year (≤ 328 million). In the same quarter of the previous year, the development of the order intake had been influenced by a large single order of ≤ 80 million for the delivery of artillery propellant powder to an international customer. As of the end of the first quarter, the order backlog amounted to ≤ 2.8 billion (previous year: ≤ 2.4 billion).

The high sales level led to a significant improvement in the result in the Weapon and Ammunition division. The operating result increased by \in 33 million to \in 18 million after a loss of \in 16 million in the same period of the previous year. The operating margin was 8.0% (previous year: -9.3%). Operating free cash flow improved by \notin 16 million or 22% to \notin -56 million.

Electronic Solutions

| | | Q1 2021 | Q1 2020 | Change |
|--------------------------|-----------|---------|---------|--------|
| Sales | € million | 167 | 174 | -7 |
| Order intake | € million | 218 | 324 | -106 |
| Order backlog (March 31) | € million | 2,345 | 2,298 | 47 |
| Operating result | € million | 10 | 10 | 0 |
| Operating result margin | in % | 6.2 | 6.0 | 0.2%-P |
| Capital expenditure | € million | 4 | 4 | 0 |
| Operating free cash flow | € million | (90) | (43) | -46 |

With sales of ≤ 167 million, the Electronic Solutions division was down slightly by ≤ 7 million or 4.0% compared to the same quarter of the previous year. The order intake was ≤ 106 million or 33% lower than the comparatively high figure from the previous year, which was positively impacted by a major order of ≤ 210 million in the Air Defence unit. The order backlog amounted to ≤ 2.3 billion (previous year: ≤ 2.3 billion).

The operating result matched the previous year's level at ≤ 10 million (previous year: ≤ 10 million). The operating margin improved slightly to 6.2% (previous year: 6.0%). Operating free cash flow declined by ≤ 46 million year-on-year to ≤ -90 million. This change was chiefly due to higher payments to the contractual trust agreement and an increase in working capital.

Sensors and Actuators

| | | Q1 2021 | Q1 2020 | Change |
|--------------------------|-----------|---------|---------|--------|
| Sales | € million | 372 | 348 | 25 |
| Booked business | € million | 656 | 471 | 185 |
| Operating result | € million | 28 | 9 | 18 |
| Operating result margin | in % | 7.5 | 2.7 | 4.8%-P |
| Capital expenditure | € million | 4 | 5 | 0 |
| Operating free cash flow | € million | (38) | (33) | -6 |

Sales in the Sensors and Actuators division climbed by ≤ 25 million or 7.1% year-on-year to ≤ 372 million in the first quarter of 2021 (previous year: ≤ 348 million). This positive development mainly resulted from increased customer call-offs as compared to the same quarter of the previous year, which was already impacted by the emerging coronavirus pandemic. In addition, negative effects from the global shortage of electronics components were avoided by means of close coordination with suppliers. Booked business for the first quarter of 2021 amounted to ≤ 656 million, representing an encouraging increase on the previous year's level (≤ 471 million). 56% of this was attributable to new project business, while 44% related to extensions and increases in the volume of existing customer projects.

The operating result in the Sensors and Actuators division improved by ≤ 18 million year-on-year to ≤ 28 million in the first three months of 2021 (previous year: ≤ 9 million). This increase is attributable firstly to the rise in sales and secondly to the measures introduced to reduce costs in the wake of the coronavirus pandemic. The operating margin rose to 7.5% (previous year: 2.7%). After the first three months of 2021, the division's operating free cash flow was ≤ 6 million or 17% lower than the previous year's figure at ≤ 38 million (previous year: ≤ 33 million).

Business performance of the Rheinmetall Group Segment performance

Materials and Trade

| | Q1 2021 | Q1 2020 | Change |
|-----------|---|---|---|
| € million | 160 | 140 | 20 |
| € million | 173 | 137 | 36 |
| € million | 14 | 7 | 7 |
| in % | 8.8 | 4.9 | 3.9%-P |
| € million | 2 | 3 | -2 |
| € million | (9) | (1) | -8 |
| | € million € million in % € million | € million 160 € million 173 € million 14 in % 8.8 € million 2 | € million 160 140 € million 173 137 € million 14 7 in % 8.8 4.9 € million 2 3 |

The Materials and Trade division increased its sales to ≤ 160 million in the first quarter of 2021, thus exceeding the previous year's level by ≤ 20 million or 14% (previous year: ≤ 140 million). This positive sales development was largely driven by higher sales volumes in the Bearings and Aftermarket business units. In the first quarter of 2021, the division gained nominations for customer projects (booked business) with a sales volume of ≤ 173 million. This corresponds to a year-on-year increase of ≤ 36 million or 27% (previous year: ≤ 137 million). The share of booked business attributable to new customer projects came to 96%.

The operating result of the Materials and Trade division doubled year-on-year to ≤ 14 million in the first quarter of 2021 (previous year: ≤ 7 million). In the Bearings and Aftermarket business units, the sales increases combined with continued strict cost management resulted in a positive development of the earnings situation. In the Castings business unit, the earnings contributions of the joint ventures KS HUAYU AluTech Group and HASCO KSPG Nonferrous Components (Shanghai) Co. Ltd., which are accounted for using the equity method, improved as against the previous year. The operating margin of the Materials and Trade division rose to 8.8% (previous year: 4.9%). Operating free cash flow declined by ≤ 8 million to ≤ -9 million (previous year: ≤ -1 million). This was chiefly due to an increase in working capital.

Pistons (non-core business)

| | Q1 2021 | Q1 2020 | Change |
|-----------|---|---------|--|
| € million | 140 | 149 | -10 |
| € million | 60 | 21 | 40 |
| € million | 3 | (6) | 9 |
| in % | 1.9 | (4.1) | 6.1%-P |
| € million | 2 | 7 | -5 |
| € million | 2 | (11) | 13 |
| | € million € million in % € million | | € million 140 149 € million 60 21 € million 3 (6) in % 1.9 (4.1) € million 2 7 |

Sales in the Pistons non-core business decreased by ≤ 10 million or 6.4% year-on-year to ≤ 140 million in the first quarter of 2021 (previous year: ≤ 149 million), particularly due to currency effects. Booked business in the first quarter of 2021 tripled as against the same period of the previous year, amounting to ≤ 60 million (previous year: ≤ 21 million). 37% of this was attributable to new projects, while 67% related to project extensions and increases in the volume of existing projects. After recording an operating loss in the previous year, this unit generated an operating result of $\in_3 \text{ million}$ in the first three months of 2021 (previous year: $\in_6 \text{ million}$). The operating margin was 1.9% (previous year: -4.1%). This improvement in the margin was particularly due to reduced amortization and depreciation as a result of the impairment recognized in the second quarter of 2020 and to improved at-equity income of the Chinese joint venture Kolbenschmidt Huayu Piston Co. Ltd. In the first quarter of 2021, the business unit's operating free cash flow was positive at $\in_2 \text{ million}$, which was $\in_{13} \text{ million}$ higher than the previous year's figure ($\in_{-11} \text{ million}$).

Risks and opportunities

Effective risk management

In the context of a systematic and effective risk management system, the risks in the Rheinmetall Group are limited and manageable. Based on the Rheinmetall Group's current risk-bearing capacity, there are no discernible existential risks in relation to its net assets, financial position, and results of operations.

Update to the risk and opportunity situation

Demand for semiconductors, chips, and sensors increased significantly in the consumer, IT, and communications sector during the coronavirus pandemic. The resulting global shortage of supply is also affecting the delivery chains of the Rheinmetall Group and its customers. This may lead firstly to bottlenecks in deliveries to our customers and secondly to lower call-offs by our customers and thus to sales losses. Ongoing monitoring and crisis management is carried out by the Executive Board, the division management, and Procurement and Production to minimize the associated risks.

The other material opportunities and risks of the expected development of the Rheinmetall Group are unchanged and are described in detail in the Group Management Report for 2020.

Supplementary report

Classification of the Pistons non-core business as a discontinued operation

In the context of aligning the product portfolio, Rheinmetall has started to examine the possibility of an acquisition of the Pistons non-core business by potential partners. Rheinmetall has mandated the investment bank Goldman Sachs Bank Europe SE to accompany this process as a financial services provider. The search for a buyer and the preparations for a potential acquisition have progressed further since March 31, 2021. In the report on the second quarter of 2021, the Pistons non-core business will therefore be classified as a discontinued operation for the first time, taking account of the provisions of IFRS 5 (Non-current Assets Held for Sale and Discontinued Operations). In accordance with IFRS 5, the key figures relevant to management for the Rheinmetall Group will be stated only for continuing operations from the second quarter of 2021 onward.

Personnel change on the Executive Board of Rheinmetall AG

In view of the transformation of the Group due to the strategic realignment, Jörg Grotendorst has asked the Supervisory Board to relieve him of his duties as the Executive Board member responsible for automotive business at Rheinmetall AG. Following Jörg Grotendorst's departure as of April 22, 2021, the Group's Executive Board structure will be adjusted in line with the upcoming challenges of the strategic realignment. After the dissolution of the automotive holding company and the resulting direct management of all divisions by the Executive Board, the Board will consist of only three members instead of the previous four.

Outlook

Outlook for 2021 confirmed and adjusted to new reporting structure

In view of the still relatively high level of uncertainty in the macroeconomic environment and given the situation on the procurement markets, Rheinmetall is keeping to the forecast for sales growth and the operating margin for the year as a whole that was published in March 2021.

Due to the classification of the Pistons non-core business as a discontinued operation, applying IFRS 5, from the second quarter of 2021 onward (see supplementary report), Rheinmetall anticipates operating sales growth of between 7% and 9% (pro forma sales in 2020: €5,406 million) and an operating margin of between 9% and 10% (pro forma margin in 2020: 8.4%) for fiscal 2021.

This financial report contains statements and forecasts referring to the future business performance of the Rheinmetall Group, which are based on assumptions and estimates made by the management. If the underlying assumptions do not materialize, the actual figures may differ from such estimates. Uncertain factors include changes in the political, economic and business environment, exchange and interest rate fluctuations, the introduction of rival products, poor acceptance of new products and changes in business strategy. All figures in this financial report have been rounded on a standalone basis. This can result in minor differences when adding figures together.

Rheinmetall's website at www.rheinmetall.com contains detailed business information on the Rheinmetall Group and its subsidiaries, current trends, 15-minute stock price updates, press releases and ad hoc notifications. Investor Relations information forms an integral part of this website and provides all the relevant details for download.
