^{*} Adjustments in the revenue line items are for support revenue that entities acquired by SAP would have recognized had they remained stand-alone entities but that SAP is not permitted to recognize as revenue under IFRS as a result of business combination accounting rules. Adjustments in the operating expense line items are for acquisition-related charges and discontinued activities. See *Explanations of Non-IFRS Measures* for details.

Starting in 2011, our non-IFRS operating margin will additionally exclude share-based compensation expenses as well as restructuring expenses. Our share-based compensation expense amounted to € 58 million for 2010 and restructuring expenses were € 2 million. Excluding these two items from the Non-IFRS operating profit in the table above results in the operating profit number under our new Non-IFRS definition and is the basis for the Non-IFRS margin of 31.9% that we have provided as the 2010 comparable number for our profit margin outlook for 2011. The same reconciling items (net of tax of € 44 million) were used in determining the non-IFRS tax rate for 2010 of 27.2% that we have provided as the 2010 comparable number for our Non-IFRS tax rate outlook for 2011.

Differences may exist due to rounding.

^{**} Constant currency revenue figures are calculated by translating revenue of the current period using the average exchange rates from the previous year's respective period instead of the current period. Constant currency period-over-period changes are calculated by comparing the current year's non-IFRS constant currency numbers with the non-IFRS number of the previous year's respective period.

REVENUE BY REGION (Preliminary and unaudited)

The following tables present our IFRS and non-IFRS revenue by region based on customer location. The tables also present a reconciliation from our non-IFRS revenue (including our non-IFRS revenue at constant currency) to the respective most comparable IFRS revenue. Note: Our non-IFRS revenues are not prepared under a comprehensive set of accounting rules or principles.

^{*} Adjustments in the revenue line items are for support revenue that entities acquired by SAP would have recognized had they remained stand-alone entities but that SAP is not permitted to recognize as revenue under IFRS as a result of business combination accounting rules. Adjustments in the operating expense line items are for acquisition-related charges and discontinued activities. See *Explanations of Non-IFRS Measures* for details.

Differences may exist due to rounding.

EXPLANATIONS OF NON-IFRS MEASURES

This document discloses certain financial measures, such as non-IFRS revenue, non-IFRS expenses, non-IFRS operating profit, non-IFRS operating margin, non-IFRS profit after tax, non-IFRS earnings per share, free cash flow as well as constant currency revenue and operating profit measures that are not prepared in accordance with IFRS and are therefore considered non-IFRS financial measures. Our non-IFRS financial measures may not correspond to non-IFRS financial measures that other companies report. The non-IFRS financial measures that we report should be considered in addition to, and not as substitutes for or superior to, revenue, operating profit, operating margin, cash flows, or other measures of financial performance prepared in accordance with IFRS. Our non-IFRS financial measures included in this document are reconciled to the nearest IFRS measure in the tables on the pages F8 to F13 above.

We believe that the supplemental historical and prospective non-IFRS financial information presented in this document provides useful supplemental information to investors because it is also used by our management – in addition to financial data prepared in accordance with IFRS – to attain a more transparent understanding of our past performance and our future results. At the beginning of 2010 the non-IFRS measures (as defined below) replaced the non-GAAP measures we used until the termination of our U.S. GAAP reporting. Specifically, we use these non-IFRS measures consistently in our planning and forecasting, reporting, compensation, and external communication as follows:

- Our management primarily uses these non-IFRS measures rather than IFRS measures as the basis for making financial, strategic and operating decisions.
- The variable remuneration components of our Executive Board members and employees are based on non-IFRS revenue and non-IFRS operating profit rather than the respective IFRS measures.
- The annual budgeting process for all management units is based on non-IFRS revenues and non-IFRS operating profit numbers rather than
 the respective IFRS numbers with costs such as share-based compensation and restructuring only being considered on a Company level.
- All forecast and performance reviews with all senior managers globally are based on these non-IFRS measures, rather than the respective IFRS numbers.
- Company-internal target setting and guidance provided to the capital markets are both based on non-IFRS revenues and non-IFRS profit
 measures rather than the respective IFRS numbers.

We believe that our non-IFRS measures are useful to investors for the following reasons:

- The non-IFRS measures provide investors with insight into management's decision-making since management uses these non-IFRS measures to run our business and make financial, strategic and operating decisions.
- The non-IFRS measures provide investors with additional information that enables a comparison of year-over-year operating performance by eliminating certain direct effects of acquisitions.

Our non-IFRS financial measures reflect adjustments based on the items below, as well as adjustments for the related income tax effects:

Non-IFRS Revenue

Revenues in this document identified as non-IFRS revenue have been adjusted from the respective IFRS numbers by including the full amount of support revenue that would have been recorded by entities acquired by SAP had they remained stand-alone entities but which we are not permitted to record as revenue under IFRS due to fair value accounting for the support contracts in effect at the time of the respective acquisitions.

Under IFRS, we record at fair value the support contracts in effect at the time entities were acquired. Consequently, our IFRS support revenue, our IFRS software and software-related service revenue and our IFRS total revenue for periods subsequent to acquisitions do not reflect the full amount of support revenue that would have been recorded for these support contracts absent these acquisitions by SAP. Adjusting revenue numbers for this revenue impact provides additional insight into the comparability across periods of our ongoing performance.

Non-IFRS Operating Expense

Operating expense figures in this report that are identified as non-IFRS operating expense have been adjusted by excluding the following:

- Acquisition-related charges
 - o Amortization expense/impairment charges of intangibles acquired in business combinations and certain standalone acquisitions of intellectual property (including purchased in-process research and development)
 - o Restructuring expenses and settlements of pre-existing relationships incurred in connection with a business combination
 - o Acquisition-related third-party expenses
- Discontinued activities: Results of the discontinued operations that qualify as such under IFRS in all respects except that they do not represent a major line of business

The operating profit and operating margin outlook provided for 2011 and the comparable 2010 operating profit and operating margin numbers are based on an updated non-IFRS definition which additionally excludes the following:

- Expenses relating to share-based compensation
- Restructuring expenses

Non-IFRS Operating Profit, non-IFRS Operating Margin, non-IFRS Profit After Tax and non-IFRS Earnings Per Share

Operating profit, operating margin, profit after tax and earnings per share in this document identified as non-IFRS operating profit, non-IFRS operating margin, non-IFRS profit after tax and non-IFRS earnings per share have been adjusted from the respective IFRS measures by adjusting for the above mentioned non-IFRS revenues and non-IFRS operating expenses.

We exclude certain acquisition-related expenses for the purpose of calculating non-IFRS operating profit, non-IFRS operating margin, non-IFRS profit after tax and non-IFRS earnings per share when evaluating the continuing operational performance of the Company because these expenses generally cannot be changed or influenced by management after the relevant acquisition other than by disposing of the acquired assets. Since management at levels below the Executive Board has no influence on these expenses we generally do not consider these expenses for the purpose of evaluating the performance of management units.

Additionally, our non-IFRS measures have been adjusted from the respective IFRS measures for the results of the discontinued operations that qualify as such under IFRS in all respects except that they do not represent a major line of business. We refer to these activities as "discontinued activities." Under U.S. GAAP, which we provided until 2009, we presented the results of operations of the TomorrowNow entities as discontinued operations. Under IFRS, results of discontinued operations may only be presented as discontinued operations if a separate major line of business or geographical area of operations is discontinued. Our TomorrowNow operations were not a separate major line of business and thus did not qualify for separate presentation under IFRS. We believe that this additional non-IFRS adjustment to our IFRS numbers for the results of our discontinued TomorrrowNow activities is useful to investors for the following reasons:

- Despite the migration from U.S. GAAP to IFRS, we will continue to internally treat the ceased TomorrowNow activities as discontinued
 activities and thus will continue to exclude potential future TomorrowNow results, which are expected to mainly comprise of expenses in
 connection with the Oracle lawsuit, from our internal management reporting, planning, forecasting, and compensation plans. Therefore,
 adjusting our non-IFRS measures for the results of the discontinued TomorrowNow activities provides insight into the financial measures
 that SAP uses internally.
- By adjusting the non-IFRS numbers for the results from our discontinued TomorrowNow operations, the non-IFRS numbers are more
 comparable to the non-GAAP measures that SAP used through the end of 2009, which make SAP's performance measures before and
 after the full IFRS migration easier to compare.

The operating profit and operating margin outlook provided for 2011 and the comparable 2010 operating profit and operating margin numbers are based on an updated non-IFRS definition which additionally excludes the expenses relating to share-based compensation and restructuring expenses from our non-IFRS numbers. These expenses are allocated and managed on corporate level only and are not factored in our management's view when managing the continuing operational performance of the Company.

We include the revenue adjustments outlined above and exclude the expense adjustments when making decisions to allocate resources, both on a Company level and at lower levels of the organization. In addition, we use these non-IFRS measures to gain a better understanding of the Company's comparative operating performance from period to period. We believe that our non-IFRS financial measures described above have limitations, which include but are not limited to the following:

- The eliminated amounts may be material to us.
- Without being analyzed in conjunction with the corresponding IFRS measures the non-IFRS measures are not indicative of our present and future performance, foremost for the following reasons:
 - o While our non-IFRS profit numbers reflect the elimination of certain acquisition-related expenses, no eliminations are made for the additional revenues and other revenues that result from the acquisitions.
 - o The acquisition-related charges that we eliminate in deriving our non-IFRS profit numbers are likely to recur should SAP enter into material business combinations in the future.
 - o The acquisition-related amortization expense that we eliminate in deriving our non-IFRS profit numbers is a recurring expense that will impact our financial performance in future years.
 - o The revenue adjustment for the fair value accounting of the acquired entities' support contracts and the expense adjustment for acquisition-related charges do not arise from a common conceptual basis. This is because the revenue adjustment aims to improve the comparability of the initial post-acquisition period with future post-acquisition periods while the expense adjustment aims to improve the comparability between post-acquisition periods and pre-acquisition periods. This should particularly be considered when evaluating our non-IFRS operating profit and non-IFRS operating margin numbers as these combine our non-IFRS revenue and non-IFRS expenses despite the absence of a common conceptual basis.
 - o Our discontinued activities could result in significant cash outflows.
 - o The valuation of our cash-settled shared based payment plans could fluctuate significantly due to the development of our share price and other parameters used in the valuation of these plans
 - o We have in the past and intend to continue in the future to issue share based compensation awards to our employees every year. Thus our share-based compensation expense are recurring although the amounts usually change from period to period.

We believe, however, that the presentation of the non-IFRS measures in conjunction with the corresponding IFRS measures together with the relevant reconciliations, provides useful information to management and investors regarding present and future business trends relating to our financial condition and results of operations. We therefore do not evaluate our growth and performance without considering both non-IFRS measures and the relevant IFRS measures. We caution the readers of this document to follow a similar approach by considering our non-IFRS

measures only in addition to, and not as a substitute for or superior to, revenues or other measures of our financial performance prepared in accordance with IFRS.

Constant Currency Period-Over-Period Changes

We believe it is important for investors to have information that provides insight into our sales. Revenue measures determined under IFRS provide information that is useful in this regard. However, both sales volume and currency effects impact period-over-period changes in sales revenue. We do not sell standardized units of products and services, so we cannot provide relevant information on sales volume by providing data on the changes in product and service units sold. To provide additional information that may be useful to investors in breaking down and evaluating changes in sales volume, we present information about our revenue and various values and components relating to operating profit that are adjusted for foreign currency effects. We calculate constant currency year-over-year changes in revenue and operating profit by translating foreign currencies using the average exchange rates from the previous year instead of the current year.

We believe that data on constant currency period-over-period changes have limitations, particularly as the currency effects that are eliminated constitute a significant element of our revenue and expenses and may severely impact our performance. We therefore limit our use of constant currency period-over-period changes to the analysis of changes in volume as one element of the full change in a financial measure. We do not evaluate our results and performance without considering both constant currency period-over-period changes in non-IFRS revenue and non-IFRS operating profit on the one hand and changes in revenue, expenses, profit, or other measures of financial performance prepared in accordance with IFRS on the other. We caution the readers of this document to follow a similar approach by considering data on constant currency period-over-period changes only in addition to, and not as a substitute for or superior to, changes in revenue, expenses, profit, or other measures of financial performance prepared in accordance with IFRS.

Free Cash Flow

We use our free cash flow measure to estimate the cash flow remaining after all expenditures required to maintain or expand the organic business have been paid off. This assists management with the supplemental information to assess our liquidity needs. We calculate free cash flow as net cash from operating activities minus additions to non-current assets, excluding additions from acquisitions. Free cash flow should be considered in addition to, and not as a substitute for or superior to, cash flow or other measures of liquidity and financial performance prepared in accordance with IFRS.
