## Outlook for EBITDA break even in H2 confirmed

SFC has released **preliminary figures for FY 2011 which are line with expectations**. A conference call was held at 10 a.m.

<b>SFC Energy - Q4 2011</b>		<b>Q4/11</b>	<b>Q4/11e</b>	<b>Q4/10</b>	<b>yoY</b>	<b>2011</b>	<b>2010</b>	<b>yoY</b>

<b>EBIT margin</b>		-2.5	-2.5	-0.4	580.7%	-6.6	-4.5	45.4%
<b>EBIT adjusted margin</b>		-52.0%	-54.3%	-8.4%		-42.6%	-33.8%	
		-0.4	-0.5	-0.4	n.m.	-4.0	-4.5	n.m.
		-8.3%	-10.9%	-8.4%		-26.1%	-33.8%	

Sources: SFC Energy (historical data), Warburg Research (estimates)

Revenues include EUR 0.9m from **first contributions from the acquired PBF** (consolidated since December 2011). SFC reached an organic revenue growth of ca. 9%. This however does not reflect the strong sales growth of 25-30% in the defence and industrial segments, which now account for ca. 55% of the group's sales. In contrast, sales in the leisure segment have declined by ca. 8% due to cleaning of inventories at customers. However, Q4 sales are expected to have been roughly flat again yoY.

As expected, Q4 earnings were impacted by **one-offs** amounting to EUR 2.5m for personnel measures, amortisation of development costs and the PBF acquisition amongst others. Hence, the adjusted EBIT improved from EUR -4.5m in 2010 to EUR -4.0m in 2011. Due to the typically strong seasonality at the end of the year, Q4 EBITDA is expected to have been only marginally below the break even level. The CFO confirmed that the cash position reached EUR 22-23m at the end of the year, which implies that the operating cash flow was close to the break even as well.

The **outlook was confirmed**: SFC expects to **reach the break even at EBITDA level in H2 2012**, which underpins our current assumptions. WR expects a growth of ca. 10% in SFC's core business because of further rising demand in industrial markets and the return to positive growth rates in the leisure segment after the introduction of the new generation of EFOY fuel cells and the absence of negative effects from inventory depletions. This and profit contributions from PBF (ca. 10% EBIT margin) are expected to be the main drivers for the improvement in earnings quality.

2011 is expected to have been the last year with significant losses at EBITDA/EBIT level. The **gradual move to a higher earnings quality should trigger a rise in investor's attention**. **PT of EUR 5.70** and the **Buy recommendation** remain unchanged.

## Company background

SFC is the first company to have brought fuel cells to the market from the beginning of the development stage. Up to now, the major part of the companies in the fuel cell sector failed to do so. SFC was able to sell more than 14,000 Efoy fuel cells so far.

With its products (direct methanol fuel cells) the company addresses the leisure, industry and defence markets. While the leisure and industry segments focus on the sale of commercial products, the defence segment mainly generates sales from development collaborations, prototypes and the first small series.

Development, production and sale are located in Brunnthal, the company's head office near Munich. SFC presently has around 100 employees.

## Competitive quality

The DMCF fuel cell technology focused by SFC is superior to the other fuel cell technologies in mobile areas of application with low to medium output standards, particularly compared to hydrogen-based systems. SFC's products are thus mainly competing with conventional technologies. The products are not sold on price, but rather on the specific advantages offered by the fuel cell technology in the relevant fields of application.

The leisure and industry markets focus on the completely network-independent energy supply independent of weather conditions. As a substitute for energy storage on the basis of batteries, the operating expenses (especially maintenance costs) are clearly reduced in the industrial environment. In the area of defence fuel cells allow for a weight reduction of approx. 80%

The most important barriers to market entry are the technological lead, secured by a large patent portfolio, and the established sales structures (leisure market).

A solid balance sheet with a high cash position enables a sufficient scaling of the fuel cell technology and allows the company to address new applications in order to reach break-even in the next 2-3 years.

## CAPEX and Cash Flow - SFC Energy

Sources: SFC Energy (historical data), Warburg Research (forecasts)

- Operating cash flow still negative
- Expansion investments until 2010/11

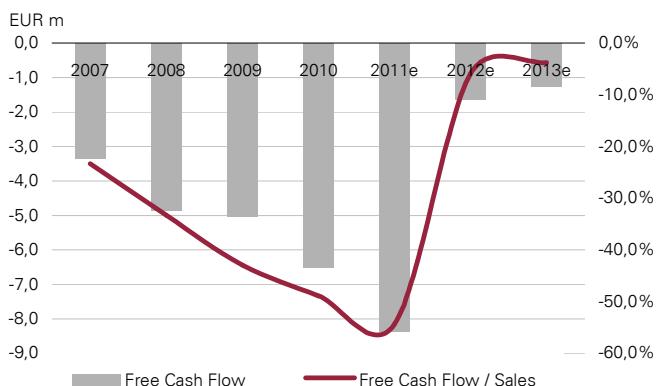

## Balance Sheet Quality - SFC Energy

Sources: SFC Energy (historical data), Warburg Research (forecasts)

- High balance sheet quality due to significant net liquidity
- Net liquidity at the end of 2010 EUR 4.70 per share

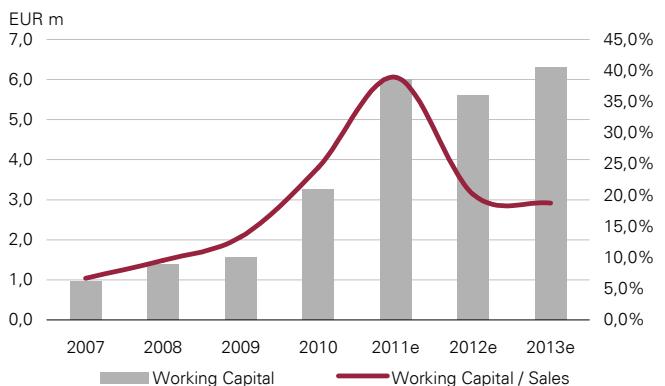

## Free Cash Flow Generation - SFC Energy

Sources: SFC Energy (historical data), Warburg Research (forecasts)

- Free cash flow burdened by CAPEX in addition to negative EBIT

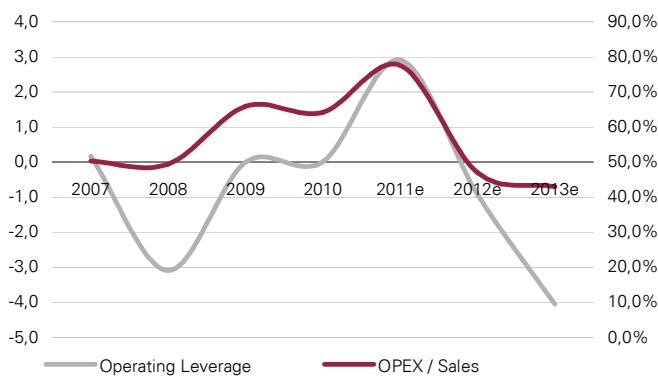

## Working Capital - SFC Energy

Sources: SFC Energy (historical data), Warburg Research (forecasts)

- Increasing Working Capital with growing sales volume expected
- Working Capital 2011 increased due to platinum hedge within inventories

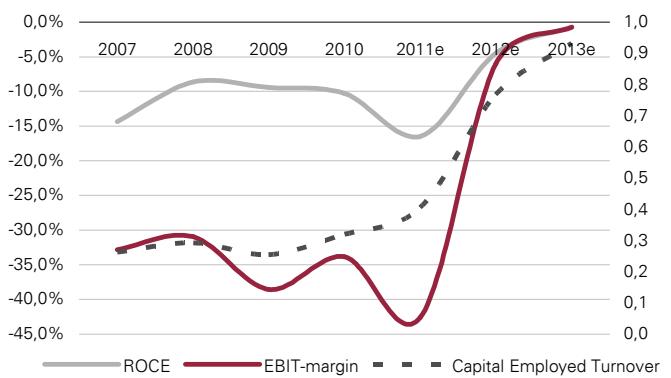

## Operating Leverage - SFC Energy

Sources: SFC Energy (historical data), Warburg Research (forecasts)

- A still low sales base leads to higher cost ratios

## ROCE Development - SFC Energy

Sources: SFC Energy (historical data), Warburg Research (forecasts)

- High Capital Employed after IPO in 2007

## Disclosure according to Section 34b of the German Securities Trading Act and FinAnV

Section 34 b of the German Securities Trading Act in combination with the FinAnV requires an enterprise preparing a securities analysis to point out possible conflicts of interest with respect to the company that is the subject of the analysis. In this connection, we point out that:

- M.M.Warburg & CO KGaA or Warburg Research GmbH is party to an agreement with this company relating to the production of research recommendations.

The valuation underlying the rating of the equity security analysed in this report is based on generally accepted and widely used methods of fundamental valuation, such as DCF model, Peer group comparison and – where applicable – a Sum-of-the-parts model.

M.M.Warburg & CO KGaA and Warburg Research GmbH have set up effective organisational and administrative arrangements to prevent and avoid possible conflicts of interest and, where applicable, to disclose them.

Valuations, ratings and target prices for the companies analysed by M.M.Warburg & CO KGaA and Warburg Research GmbH are subject to constant reviews and may therefore change, if any of the fundamental factors underlying these items do change.

All share prices given in this equity analysis are closing prices, except where stated otherwise.

Neither M.M.Warburg & CO KGaA's analysts nor Warburg Research GmbH's analysts do receive any payments directly or indirectly from any affiliates' investment banking activity.

M.M.Warburg & CO KGaA and Warburg Research GmbH are under supervision of the BaFin – German Federal Financial Supervisory Authority.

Investment recommendation: expected direction of the share price development for equity security up to the given Target price in the opinion of the analyst who covers the issue.

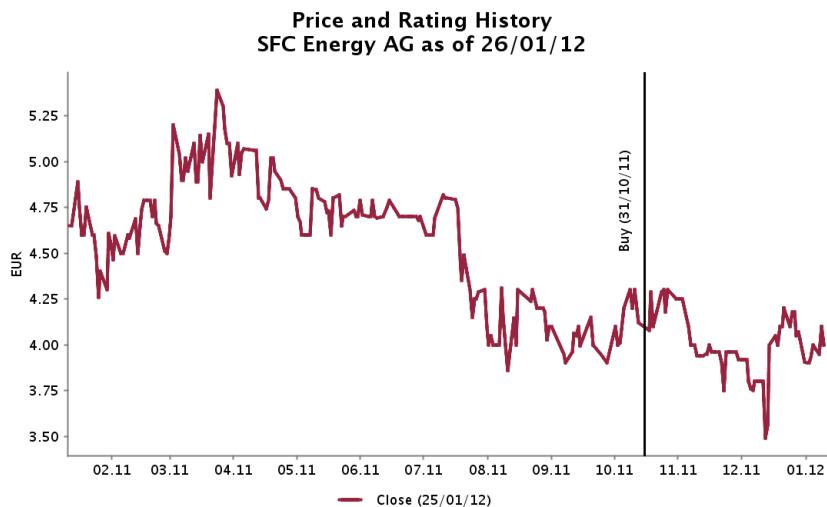

- B **Buy:** The price of the analysed equity security is expected to rise over the next 12 months.
- H **Hold:** The price of the analysed equity security is expected to remain mostly flat over the next 12 months.
- S **Sell:** The price of the analysed equity security is expected to fall over the next 12 months.
- "-" **Rating suspended:** The available information does not currently permit an evaluation of the company.

M.M.Warburg & CO KGaA and Warburg Research GmbH research universe by rating:

Rating	Number of stocks	% of Universe
Buy	130	72%
