Final 2014E figures met our expectations

SFC Energy has issued the annual report for 2014. Sales and underlying EBITDA matched the preliminary figures as reported on 5 February. Sales therefore reached EUR 53.6m in 2014 (2013: EUR 32.4m), and underlying EBITDA accounted for EUR 0.4m. The company's targets for FY2014 were achieved.

EBIT came in at EUR -4.3m (2013: EUR -8.8m), and underlying EBIT at EUR -1.2m (2013: EUR -4.2m). Both figures were exactly in line with our estimates. EPS came to EUR -0.60, only slightly below our estimate (EUR -0.58).

Management is cautiously optimistic about 2015 despite increased challenges in the Oil & Gas sector

According to the Canadian Association of Petroleum Producers (CAPP), the oil producers will cut their investments in Western Canada this year by 33%. This is also more or less what SFC Energy is expecting now for the sector. Nevertheless, SFC Energy's management is now taking a **more optimistic stance on the group's oil & gas segment** than at the beginning of February, when they expected SFC's oil & gas business segment (mainly the Canadian subsidiary Simark) to suffer a drop in sales of 25% in 2015. **Management now assumes that Simark's sales will decline by only 10% this year.** After an initial period of reorientation on the side of SFC's customers, SFC has noticed again activity, particularly in the area of production optimisation (de-bottlenecking). Instead for new exploration projects, a larger share of the remaining budgets is now expected to be used for increasing the efficiency and safety of the existing production. This is exactly SFC's business in oil & gas. The recent recovery of the Canadian dollar as well as the stabilisation of the oil price should also support Simark's performance.

SFC's management also places **bigger hopes on orders from the defence sector** this year. Due to the uncertain geopolitical situation, there are clear signs that Germany as well as other NATO members will raise their defence budgets.

Sales and earnings targets: Management is projecting revenues for 2015 to be in a range from EUR 55-65m. The width of this range reflects the limited visibility in the Oil & Gas market as well as the fact that SFC's defence business has proven rather unpredictable in the past (few large projects which are often delayed by bureaucratic procedures). Management expects that underlying EBITDA as well as underlying EBIT will slightly improve. Break-even at underlying EBIT level, which is implied in our estimates, is not given as an official target, but the management stated that this is achievable.

A thorough revision of our modeling assumptions resulted in unchanged top and bottom line estimates for 2015e, but less ambitious earnings estimates for 2016.

BUY

A valuation update (DCF model) resulted in a fair value per share of EUR 6.25 (previously: EUR 6.62) which we take as our new price target (previously: EUR 6.50). Our PT refers to an EV/EBITDA multiple 2016E of 20.5x. We confirm our **BUY** recommendation.

The following valuation methods are used when valuing companies: Multiplier models (price/earnings, price/cash flow, price/book value, EV/Sales, EV/EBIT, EV/EBITA, EV/EBITDA), peer group comparisons, historical valuation approaches, discounting models (DCF, DDM), break-up value approaches or asset valuation approaches. The valuation models are dependent upon macroeconomic measures such as interest, currencies, raw materials and assumptions concerning the economy. In addition, market moods influence the valuation of companies.

The figures taken from the income statement, the cash flow statement and the balance sheet upon which the evaluation of companies is based are estimates referring to given dates and therefore subject to risks. These may change at any time without prior notice.
