

COMPANY PROFILE

In the growth market of sensor systems, First Sensor develops and produces standard products and customer-specific solutions for the ever-increasing number of applications in the industrial, medical, and mobility target markets. Based on tried-and-tested technology platforms, we develop products such as chips, components, sensors, and entire sensor systems. These products give our customers a real competitive edge. Trends such as Industry 4.0, autonomous driving, and the miniaturization of medical technology will drive our growth extremely rapidly in the future.

Among the customers of First Sensor are well-known industrial groups and young technology companies that utilize our know-how and many years of expertise to develop their own innovative products. They appreciate the opportunity to make individual adjustments at every stage of the value chain in order to create exceptionally powerful sensors and sensor systems with tailored features. This joint development work frequently forms the basis for long-standing partnerships.

New applications in our target markets opened up by smart sensors, for example, are driving the growth of First Sensor. These sensors not only measure but also respond intelligently to measurement results and communicate with other systems. In addition, we are investing in the internationalization of the Group. Our strategy is aligned toward sustainable value enhancement.
