SAFE HARBOR STATEMENT

Forward-looking statements involve risks.

This company presentation contains various statements concerning the future performance of STRATEC. These statements are based on both assumptions and estimates. Although we are convinced that these forward-looking statements are realistic, we can provide no guarantee of this. This is because our assumptions involve risks and uncertainties which could result in a substantial divergence between actual results and those expected.

It is not planned to update these forward-looking statements.

OVERVIEW AND BUSINESS MODEL

UNIQUE MARKET POSITION STRATEC IN THE IVD VALUE CHAIN

OVERVIEW AND BUSINESS MODEL

BUSINESS MODEL

STRATEC provides instrumentation, consumables, software and automation solutions

- OEM development and manufacturing
- Around 8,000 fully automated analyzer systems and modules manufactured annually
- Wide range of intellectual property rights

Extensive collaboration with partner during design phase

- STRATEC: Engineering / automation, software, QM
- Partner: System / reagent / market requirements

Systems have long market lifecycles

- Product lifecycles typically in an area of 12 to 15 years
- Leads to longstanding partnerships
- Expanding installed base of systems
- Product enhancement and extension drives value

OVERVIEW AND BUSINESS MODEL

SECURING RETURN ON INVESTMENT

Long-term agreements with partners

- Milestone payments during development stage
- Operating sales during series production stage
- Recurring sales from service parts & consumables sales

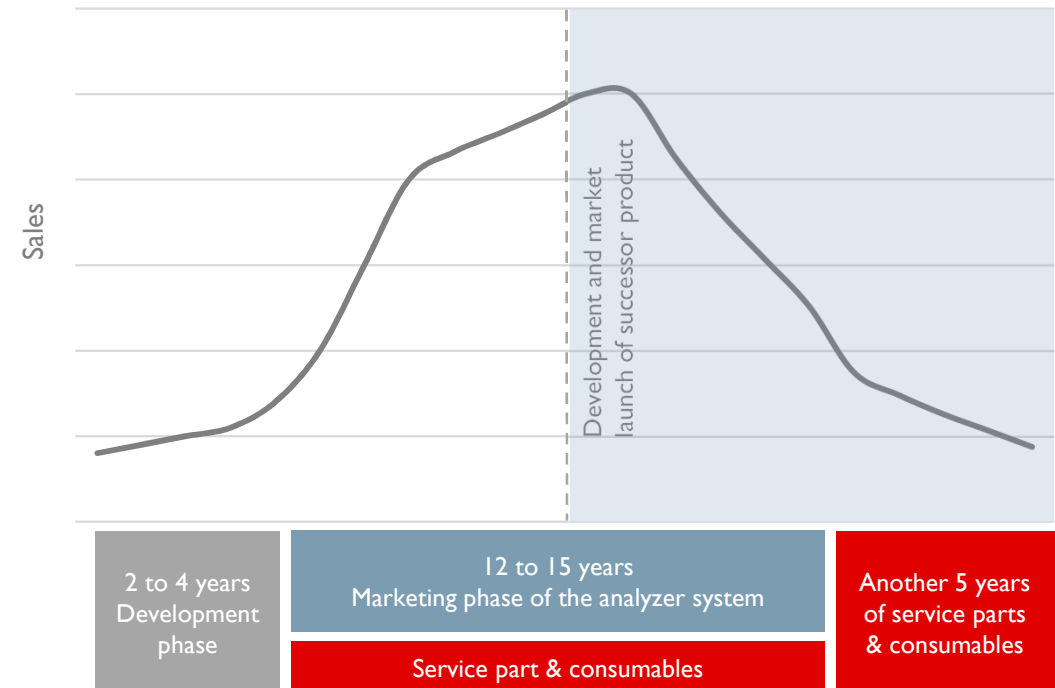

Minimum volume commitment

- Firm purchase orders
- STRATEC an integral part of partners' plans

Reliable partnership

- Shortened development time
- Integration of analyzer system and reagents
- Agreed development budget & transfer price
- High commitment by both partners

THE IVD MARKET

THE IVD MARKET

IVD MARKET SEGMENTS / IVD MARKET: ~ 85 BILLION USD IN 2020

IVD market by technologies

IVD market by product category

Total instrumentation market ~ 17 billion USD

Growth drivers

- Aging world population
- Rising prevalence of chronic diseases
- Expansion in healthcare systems, especially in emerging markets
- New technologies broadening scope of IVD applications (e.g. oncology, personalized medicine or non-invasive prenatal testing)
- Increasing automation

THE IVD MARKET

OUTSOURCED VS IN HOUSE INSTRUMENTATION MARKET

- The majority of instrumentation equipment in the IVD market is still developed in-house by diagnostics companies
- Share of outsourced developments has already increased significantly over the last couple of years
- Trend of outsourcing towards specialized players set to continue, due to:
 - Engineering of automation solutions often not core competence of diagnostics companies
 - Shorter development timeframes due to already existent technology pools
 - Guaranteed project budget and firm transfer prices
 - Keeping up with regulatory developments easier for specialized players
 - Structured processes in order to address end customer needs, such as ease of use, user experience, workflow efficiencies, remote access, serviceability and preventive maintenance

OUTLOOK AND STRATEGY

OUTLOOK AND STRATEGY

UPDATE COVID-19 PANDEMIC

Several STRATEC customers are at the forefront of containing the COVID-19 pandemic

- Significant proportion of genetic COVID-19 testing is performed on systems developed and manufactured by STRATEC
- Additional demands for immunoassay solutions due to antibody screening and lab-based antigen tests
- Still unprecedented demand levels and strong order trends → strong business performance expected for H1 2021

Various factors set to influence H2 2021 demand levels:

- Magnitude of replacement potential triggered by elevated utilization levels of installed base
- Uplift of serological and other testing (e.g. full respiratory panels)
- Overall testing volumes and penetration of genetic versus rapid antigen tests
- Impact of significant expanded installed base on Service parts & Consumables business
- Catch up potential of non-COVID-related product lines

Expected longer-term dynamics:

- Improved perception of IVD methods and further increase in STRATEC brand awareness
- Allocation of research budgets into infectious diseases
- Renaissance of decentralized testing capacities (more testing again in hospitals)
- Increased and sustainable public investments in healthcare infrastructures
- Sustainable additional testing demand (e.g. Long COVID, respiratory panels, other screening tests)

OUTLOOK AND STRATEGY

FINANCIAL GUIDANCE FOR FISCAL YEAR 2021¹

- Constant-currency sales growth in at least a high single-digit percentage range
- Adjusted EBIT margin of around 17.5% to 18.5% (2020: 16.7%)
- Investments in tangible and intangible assets combined of around 6.0% to 8.0% of sales

¹ Due to the COVID-19 pandemic, STRATEC continues to observe higher volatility in its customers' order behavior. In the first quarter of 2021, the company witnessed an overall rise in order forecasts for the second half of 2021. Due to the additional forecasting uncertainty resulting from the pandemic, however, the higher order forecasts for the fourth quarter of 2021 in particular are still not incorporated in the above financial guidance.

OUTLOOK AND STRATEGY

STRATEGIC PRIORITIES

- Focus on high growth areas and segments
- Boost expertise and technology portfolio

Enable customers and STRATEC to grow above market average

Expand product/value offering

- Organically and via M&A transactions
- Without entering into competition to partners

- Utilize tailwind from increasing complexity
- Expand smart consumables business

Increase proportion of recurring revenues

Drive customer diversification

- Utilize extended platform offering
- Extend components business
- New markets (e.g. veterinary, translational research)

OUTLOOK AND STRATEGY

SELECTION OF ESG TOPICS AND LATEST ACHIEVEMENTS

- Challenges of COVID-19 pandemic successfully managed
 - Employee health top priority (new shift system, extended options for remote working, increased working hours flexibility, early and strict travel restrictions)
 - Business continuity (supply chain, production, logistics, development and business operations)
- Strong commitment to combat climate change
 - Science based reduction target (SBT) in line with Paris agreement to limit global warming to less than 2.0°C
→ **30% absolute reduction of scope 1 and 2 emissions by 2030 (versus 2019)**
 - Expanded disclosure: Scope 3 emissions to be reported from 2020 onwards
 - Compensation of unavoidable Scope 1 and 2 emission (certified emission reduction projects)
- Employer attractiveness and talent management
 - Further employee surveys conducted in 2020
 - Roll-out of new group-wide talent development program
- New ESG initiatives
 - E.g. new waste reduction program initiated in 2020
