TAG rental growth and capex allocation

Rental growth achieved with moderate capex investments due to strong underlying fundamentals

Rental growth achieved with moderate investments

- TAG creates **attractive rental growth** from
 - regular rent increases and tenant turnover ("basis I-f-I rental growth")
 - vacancy reduction (leading to "total I-f-I rental growth").
- Investment of capex at selective locations targeted to reduce vacancy:** investments in vacancy reduction result in highly attractive equity-returns: **c. 10%-15% return on capex** in large modernization measures and **c. 40%-45% in the modernization of vacant flats**.
- Tailor made capex allocation strategy** for each local market, no cross-locational spread capex-program.
- Basis I-f-I rental growth is achieved without extensive modernization programs** for existing tenants or in the re-letting process. This clearly shows strong underlying fundamentals in TAG's markets.

Like-for-like rental growth excluding and including vacancy reduction

- rent increases existing tenants
- tenant turnover
- modernisation surcharge

1 Net rent due to closing of disposals in Q3 2019 q-o-q nearly unchanged. Increase in net rent y-o-y by EUR 9.7m (4.3%) as a result of I-f-I rental growth (2.7% y-o-y including vacancy reduction) and closing of portfolio acquisitions from 2018 and 2019.

2 Improved net rental income q-o-q- by EUR 0.5m mainly resulting from lower vacancy costs. Increase in expenses from property management y-o-y of EUR 1.8m mainly result of higher maintenance costs (EUR 1.2m).

3 Increase in net income from services q-o-q by EUR 1.0m and y-o-y by EUR 3.0m shows TAG's expanding service business, preliminary coming from internalization of caretaker, multimedia and energy services.

4 No portfolio valuation in Q3 2019, next valuation by CBRE at 31 Dec-2019.

5 Personnel expenses q-o-q stable. Increase y-o-y by EUR 4.2m mainly result of ongoing internalization of caretaker services.

6 Higher depreciation of EUR 0.3m q-o-q as a result of investments in IT-systems. Increase y-o-y of EUR 1.9m mainly result of new accounting standard IFRS 16, leading to recognition and regular depreciation of leasing contracts.

7 Net financial result improved by EUR 7.3m q-o-q, mainly as a result of valuation effect from financial derivatives in Q2 2019. Slightly reduced financial result (cash, after one-offs) by EUR 0.4m q-o-q due to issuance of promissory note in Q2 2019.

8 Income tax mainly contains deferred taxes; cash tax expenses in Q3 2019 at EUR 1.4m (EUR 1.2m and EUR 1.3m in Q2 and Q1 2019).

TAG return on capex methodology

Modernisation is key element of TAG's strategy

- Capex measures can be broken down into
 - Modernisation of vacant flats
(longer term vacancy)
 - Modernization of flats during re-letting
(tenant turnover)
 - Large modernisation measures
(comprehensive building-related measures)
- Using modernisation as a means to upgrade the rental profile and constitution of its portfolio is a valid part of TAG's strategy
- It is in TAG's very own interest to track the success of these measures, which TAG wants also disclose to its shareholders
- In most cases large modernisation measures are financed via bank loans and equity, all other modernisation measures are equity-financed

$$1 \quad \frac{\text{Incremental revenues}}{\text{Total investment}} = \text{Return on investment}$$

$$2 \quad \frac{\text{Incremental revenues} - \text{financing costs}}{\text{Equity invested}} = \text{Return on equity invested}$$
