TAG vacancy reduction track record

Residential units 2013-2015

- Realisation of development potential from newly acquired portfolios
- Proof of successful asset and property management over the last three years
- Increases in vacancy due to new acquisitions with higher vacancy and sales with lower vacancy (e.g. Berlin)
- Implementation of new ERP-system in the first-half of the year resulted in a stronger drop in vacancy reduction in the second-half post implementation

Salzgitter region 2013-2015

- Continued strong vacancy reduction in the Salzgitter region with currently c.300bps per annum
- Adjust residential units to the market requirements (for students, singles, families, elderly people)
- Targeted modernisation programs i.e. for elderly people, bathroom conversions etc.
- Reduction of service charges; better quality of service for tenants

TAG rental growth and vacancy development 2015

Vacancy development in 2015 per region

Salzgitter	from 15.5 % to 12.1 %	-3.4 %
Erfurt	from 7.6 % to 4.3 %	-3.3 %
Rostock	from 7.3 % to 5.2 %	-2.1 %
Hamburg	from 7.2 % to 5.5 %	-1.7 %
Leipzig	from 6.8 % to 5.6 %	-1.2 %
Gera	from 12.1 % to 11.1 %	-1.0 %
Dresden	from 10.3 % to 9.8 %	-0.5 %
Rhine-Ruhr	from 2.6 % to 2.2 %	-0.4 %
Berlin	from 5.3 % to 5.1 %	-0.2 %

Rental growth and vacancy reduction are the two main drivers to further improve the rental income profile of TAG

- TAG invests in regions with rather stable rent profile and is able to acquire properties with above average vacancy level
- By way of targeted modernizations and smart property management, TAG is able to reduce these vacancy levels over time
- Vacancy reduction and rental growth have to be considered as two sides of the same medal

Reduction in all TAG regions is evidence...

- ... for the healthy fundamentals of the underlying residential markets TAG is exposed to, and...
- ... for the innovative letting concepts and sustainable asset management approach of TAG

TAG 2016

TAG return on capex

TAG return on capex

Modernization is key element of TAG's strategy

- TAG spends approx. €40m p.a. on capex measures; these can be broken down into
 - Modernization during re-letting (tenant turnover)
 - Modernization of vacant flats (longer term vacancy)
 - Large modernization measures (comprehensive building-related measures)
- Using modernization as a means to upgrade the rental profile and constitution of its portfolio is a valid part of TAG's strategy
- It is in TAG's very own interest to track the success of these measures, which TAG wants also disclose to its shareholders
- In most cases large modernization measures are financed via bank loans and equity, all other modernization measures are equity-financed

Methodology

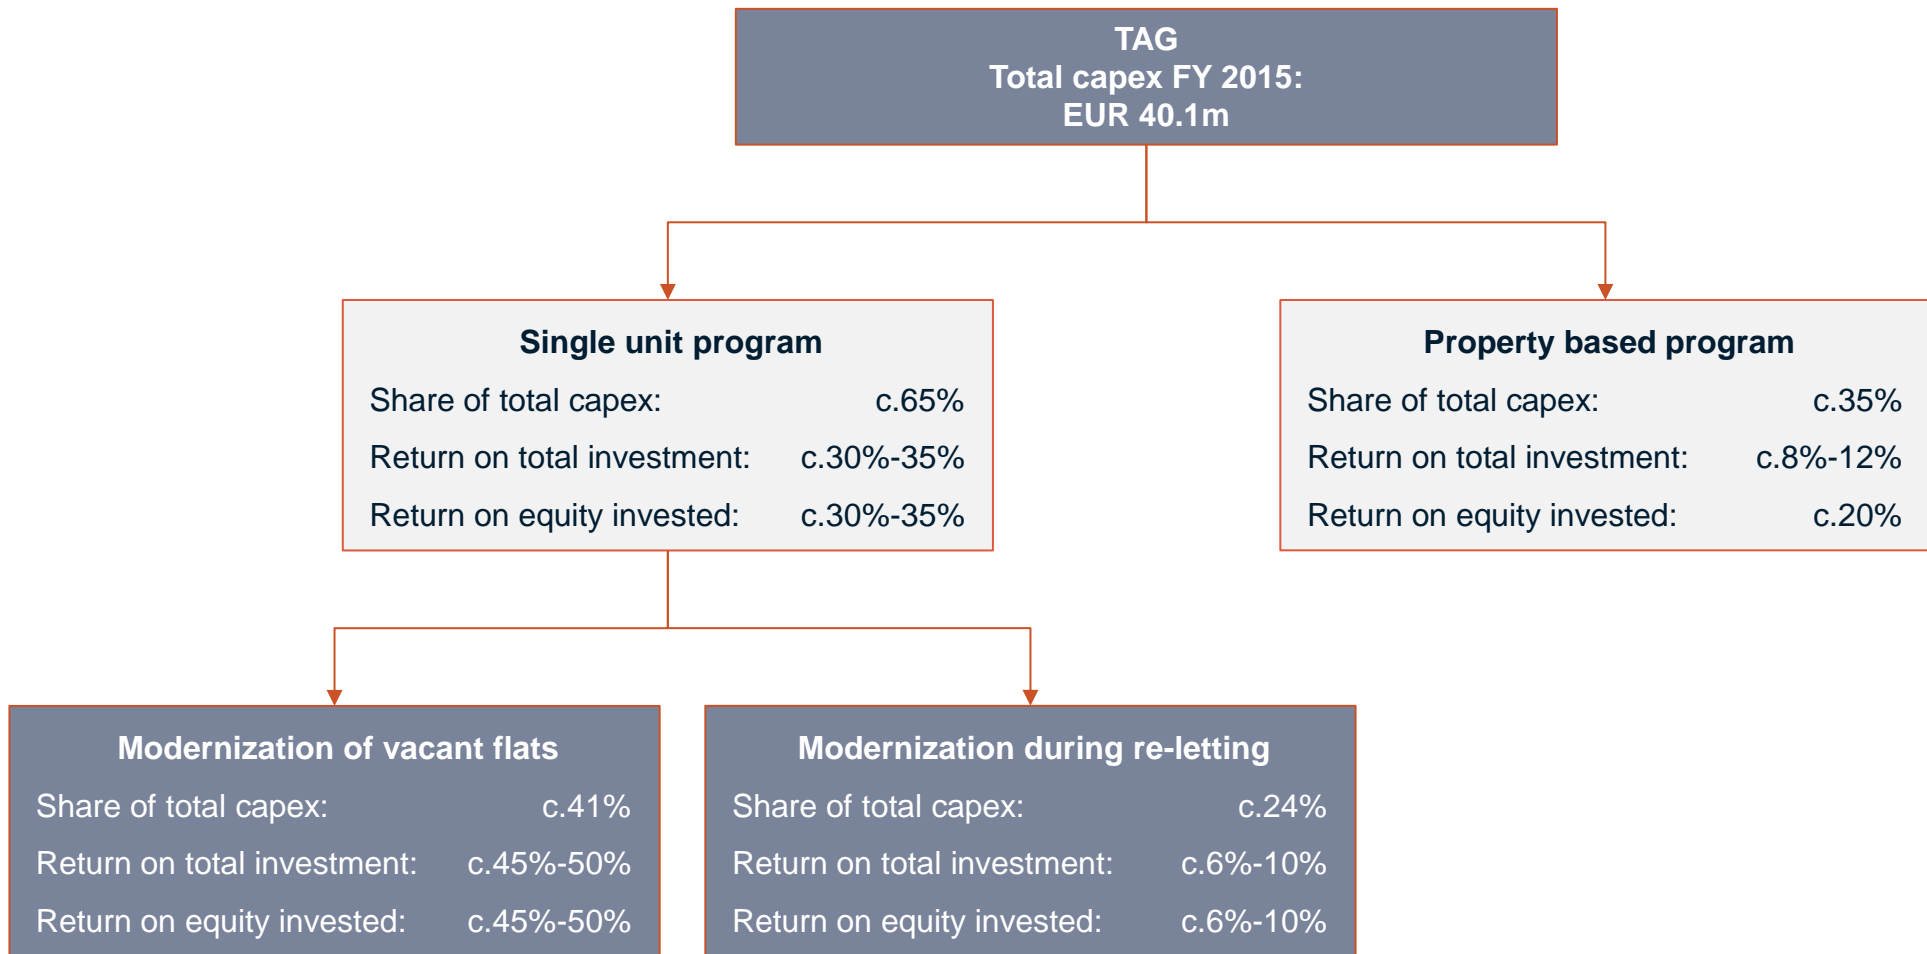

$$\frac{1 \text{ Incremental revenues}}{\text{Total investment}} = \text{Return on investment}$$

$$\frac{2 \text{ Incremental revenues} - \text{financing costs}}{\text{Equity invested}} = \text{Return on equity invested}$$

APPENDIX

The three pillar TAG investment case and strategy framework

- **“High Yield” investment profile**
 - Highest FFO and dividend yield profile amongst peer group
 - Total return focus on distributions to shareholders rather than un-crystalized NAV growth
 - Anti-cyclical investment strategy: “buy early”, “de-risk timely”
 - **Clear distinction of investment strategy vis-a-vis peer group**

- **Capital discipline and efficiency**
 - Most efficient capital structure amongst peer group
 - Disciplined allocation of capital including seamless acquisitions and disposals
 - Current portfolio size provides for sufficient critical mass to retain cost leadership
 - **Continuous optimisation of use of capital across the balance sheet as well as in relation to the capital structure**

- **Segment leadership**
 - Leading market player with strong presence in defined regions
 - TAG has been the first to implement the ‘ABBA’* approach in the listed German residential sector
 - Permanent innovations in tenant offerings and smart services/ concepts
 - **Affordable housing with geographic focus in North and East Germany**

* ‘ABBA’: A locations in B cities, B locations in A cities

■ Comments on valuation results

- Yield compression in “A-Locations” like Berlin and Stuttgart (Stuttgart included in “Other”) as well as in some cities of the Rhine-Ruhr region
- Positive revaluation gains in all other regions primarily the result of overfulfillment of last year’s assumptions regarding rent and vacancy development
- Revaluation losses, similar to last year, in regions with new acquisitions and with higher initial investments for future vacancy reductions
