

COMPANY PROFILE

Viscom has successfully marketed its inspection solutions since 1984 and has grown from a pioneer in the field of industrial image processing to a leader employing a staff of several hundred employees today. The focus is on high quality inspection systems for the electronics industry, especially automated optical inspection systems (AOI), for solder paste inspection (3-D SPI) and placement and solder joint inspection, as well as X-ray inspection (AXI). In this sector, the company has become one of the leading suppliers worldwide and market leader in Europe.

Viscom inspection systems are used in nearly all sectors of electronics production – from automotive electronics through aeronautics and aerospace, to industrial electronics. Steadily rising demands for quality and increasing reliance on technology in all areas of life require a 100 % quality assurance with the help of intelligent, automated inspection systems.

Viscom's production plant is situated in Hanover and is represented by branch offices and subsidiaries in the major markets worldwide.
