DYNAMIC INVESTMENT STRATEGY

Chimera focuses on acquiring Residential Mortgage Loans, Non-Agency RMBS, Agency RMBS and Agency CMBS

Residential Mortgage Loans

Chimera acquires residential mortgage loans. Chimera utilizes leverage through a combination of securitization, repo and warehouse facilities to manage risk and increase returns on the portfolio. Chimera's loan portfolio has historically generated higher returns with less price volatility and interest rate risk than comparable Agency RMBS.

Non-Agency RMBS

Chimera invests in both investment grade and non-investment grade RMBS. This portfolio provides high risk-adjusted returns while providing increased liquidity. Non-Agency RMBS securities carry higher yields than Agency RMBS.

Agency RMBS

Agency mortgage-backed securities that are backed by residential loans provide spread income for the portfolio with added benefit of liquidity. Chimera utilizes repo and various hedging techniques to increase returns on the portfolio while managing interest rate risk. Agency mortgage backed securities are amongst the most liquid securities available in the fixed income market.

Agency CMBS

Agency CMBS provide many of the same benefits as Agency RMBS while adding convexity to the portfolio. Agency CMBS typically carry prepay protection for the investor enabling more efficient hedging techniques than Agency RMBS.
