

Case study on REA's experience of using the RSPO PalmGHG tool published

REA was recently asked by the Zoological Society of London (ZSL)'s Indonesia Programme to share its experience of using the Roundtable on Sustainable Palm Oil's (RSPO) new tool for calculating Greenhouse Gas emissions, known as PalmGHG. REA's case study was published on ZSL's 'Sustainable Palm Oil Platform' when this website was launched at the RSPO's 10th Roundtable Conference at the end of October. Please [click here](#) to read the case study.
