

REA receives London Stock Exchange Green Economy Mark

,

Green Economy Mark Report 2022

London Stock Exchange's third Green Economy Mark report introduces and celebrates the 108 companies and funds accredited with its Green Economy Mark, including REA.

The Green Economy Mark is a world-first accreditation which identifies companies and funds that are contributing through their products and services to meeting environmental objectives such as climate change mitigation, adaptation, waste and pollution reduction, the circular economy, and sustainable agriculture. It recognises London-listed issuers that generate more than half their revenues from green products and services.
