

REA's second sustainability report published

In June 2015, REA published its second sustainability report. This report details the group's sustainability performance during the 2013 and 2014 calendar years, and has been produced in accordance with requirements of the Global Reporting Initiative (GRI). This report provides an update on the group's progress in meeting the commitments and targets published in the group's first sustainability report, which was published in July 2013. REA remains committed to producing a sustainability report biennially, and aims to publish its third sustainability report in 2017, alongside the annual report for 2016.
