

REA KALTIM PLANTATIONS sets new benchmark with a Gold rating under PROPER Provincial

PT REA KALTIM PLANTATIONS (REA Kaltim) has been recognised with a Gold rating for its Cakra oil mill (COM) under the 2025 Provincial PROPER awards, as announced by the Governor of East Kalimantan. The group's two other oil mills, Perdana (POM) and Satria (SOM), have been awarded a green rating.

PROPER is an initiative of the Indonesian government's Environmental Impact Agency which seeks to mitigate the risks of pollution and associated consequences.

The Gold rating for COM marks a significant milestone, building on our Green achievement for all three mills last year and placing REA Kaltim among the first palm oil companies in East Kalimantan to receive this recognition at the provincial level.

This achievement reflects the consistency, dedication, and collaborative excellence of our team in upholding sustainable good agricultural and best management practices across all aspects of our operations.

Guided by our vision to lead in sustainable palm oil production and our mission to foster best practices and innovation, we remain committed to driving positive change and creating lasting value for our stakeholders.
